We have purchased 400 feet new hose this year, making us sufficient amount of good hose for this year. I would recommend buying a new or second hand hose wagon for No. 1 company having the whole of the weight on four wheels instead of the one we have at present. There are in this state three or four dandy one-horse hose carts that have been discarded for motorized apparatus that can be bought very reasonably, and would haul much easier than our present dump cart pattern. A chemical fire engine on standard Ford chassis would be a great piece of apparatus and the time will come soon when it would save a set of buildings. Get the firemen to the fire in time and they will save your house, but you have got to give them a fighting chance.

Our L. L. Mason Relief Association fund now amounts to \$57.06. I for one wish our assistant engineer, Guy I. Swett, whom we love so well, had the whole of the fund if it would give him any comfort that he does not get.

Wars come and go—God knows we wish go. The enlistment of fire fighters will never end, therefore it is our duty to study the situation and bring about the best result for fighting fires. Seventy-five per cent. of our fires are preventable by carefulness. Don't allow your paper hanger to paper over a flue hole, stop, it's dangerous. Don't put wood ashes in a wooden receptacle. Fire prevention should be taught in our schools, we would have less losses.

I wish to thank every member of our fire department for their kindness to me during my past eighteenth year with you.

Sincerely your friend,

CHARLES W. BOWKER.

Report of Water Commission.

To the Citizens of South Paris Village Corporation :

The past year has been one of more expense to do the same work, while brass goods have more than doubled. Our net earning of the water system is not as much as last year; the superintendent shows you the reason why. The receipts from the Grand Trunk Railway were \$465.86 less than last year, and from one of our local water companies \$110 less. We can see why the receipts were not up to last year. The commission's idea is not to stop for expense when the purity of the water can be improved for drinking purposes.

Your commission is unanimous in recommending that the Corporation now adopt a fixed policy of taking up at least \$1,000 of the water bonds each year. This needs no argument, but it is well to bear in mind that we ought to be reducing the debt and making preparations to replace some of the old Norway Water Company pipe before it becomes worn out.

We have instructed the Treasurer to call \$2,000.00 of the bonds on April 1st next in accordance with vote of last corporation meeting.

Your Commission was instructed to examine and report concerning the purchase of some of the smaller and private water companies now doing business in the village. We have made some examination of the situation and are convinced that any further examination of the question would involve an examination of the companies themselves, and at some expense. We therefore recommend that any company desiring to sell its plant to the Village Corporation shall be directed to present its figures to the officers of the Corporation within three months from the date of the annual meeting of the Corporation, and that the officers shall thereupon, within

an additional month, call a meeting of the Corporation to consider such propositions as may have been thus prepared.

Respectfully submitted,

ALTON C. WHEELER,	}	Water Commission.

Owing to the lateness of the season when the Corporation decided to build and the delays in getting material, we have not yet completed it. We did not believe it best to put in the runways until the ground had had a chance to settle. The snow came so we did not get second coat of paint on only part of the building, but we have the paint bought and paid for. We believe that when the building is completed it will cost less than \$4,000.
