On July 30 we had a practice meeting, and the boys made a good showing, as no one knew anything about it, and in six minutes Hose Co. No. 1 had water on the brick school house, and in thirteen minutes all the companies were in the school yard.

We have been very fortunate the past year, as we have had but one general alarm, and I have only the highest praise for the men who so bravely fought the fire in Odd Fellows' Block, with the mercury twenty below zero. And I want to congratulate the committee who had charge of building the engine house. They have one of the best buildings to dry hose and do work in that I know of in any country town. We had about two thousand feet of hose wet, and one of the coldest days of the season, and we never had a piece freeze up, and it was all dried by seven o'clock the next night after the fire.

The apparatus seems to be all in good shape, and we have about 2800 feet of hose on hand, three hundred that has never been used, so I think we have enough for the present.

We have just had the New England telephone installed in the boiler room of the Mason Manufacturing Co. To send in an alarm, call Central 250 and give the engineer the district or location of the fire.

I want to thank the firemen for their quick response to calls, and the manner in which they discharged their duties for the past year.

B. W. TUTTLE, Chief Engineer.

## Report of Superintendent of Water Works.

*To the Board of Water Commissioners :*

I submit the tenth annual report of the South Paris Village Corporation water works for the year ending December 31, 1919:

Total number of services Dec. 31, 1919,	287
Number added during 1919,	10
Number of faucets,	202
Number of sill cocks,	116
Number of water closets,	84
Number of bath tubs,	59
Number of set bowls,	25

I have collected for water rentals and material

furnished for putting in water services,	\$	6,334 01
The expense for maintenance, 1919,	\$	2,258 96
The interest on the bonds,		2,602 78
		<hr/>
	\$	4,861 74

Net profit on water works, 1919, \$ 1,472 27

Value of uncollected, \$75.00.

We have relaid seven old services, and there are several that need new pipe the present year. We have extended a 2-inch water pipe to A. F. Goldsmith's the past season. Mr. Goldsmith paid two hundred and thirty-six dollars and seventy-nine cents (\$236.79) of the expense of laying the pipe along the street. The cost of iron pipe, brass goods, and lead pipe is nearly three times what it was when the water works put the system in. You can see why maintenance costs more than former years.

Respectfully submitted,

CHARLES W. BOWKER, Supt.

## Report of Water Commission.

*To the citizens of South Paris Village Corporation :*

In the year 1919 we recommended one extension, with the understanding that every dollar over the interest money that the rental would bring, must be borne by the party deriving the benefits of the water supply.

The present indications of any net profit are indeed poor this year. For ten years you have not been inconvenienced a day. Now our day of trouble has come. Our mains are frozen solid in several streets, and it will be a big expense to repair them. Our idea is to thaw every service and main as fast as possible, and repair the broken mains.

Your commission recommends paying \$1000 of water bonds this year.

Respectfully submitted,

N. DAYTON BOLSTER,	}	Water Commission.
