#### REPORT OF AUDITOR

This is to certify that I have audited the accounts of the Town of Mapleton, Maine for the Municipal Year ending Feb. 29, 1936 and found them correct. The Balance Sheet in the Annual Report sets forth the financial condition of the Town at the close of the Municipal Year.

The attention of the Tax payers is directed to the section of recent Tax Legislation in regard to delinquent taxes.

W.L. MURRAY, Public Accountant

March 4, 1936.

In spite of a late start, caused by the uncertainty of conditions, our schools are having a successful year. Teachers and pupils are interested in their work and good results are apparent. Parents and citizens have given encouragement by visits to the schools.

It is suggested that a separate appropriation be made for Insurance and that the amount for Repairs and Appliances be somewhat increased. The High School building needs a heavy protection. Incidental repairs and necessary apparatus call for a moderate outlay to keep up satisfactory standards.

When financial conditions will permit, we should have new heaters for some of the schoolrooms.

The sixth grade has been transferred from the Junior High School to the Old Mill School. The third grade has been taken from the Old Mill School to the New Mill School and an assistant has been employed for the latter school.

An Agricultural course has been stated in the High School and is being well received. We have purchased a Babcock Milk Tester. An incubator would be a good investment.

We have received considerable aid from the Federal and State Governments in enlarging the High School building and financing the teachers. More and more as time goes on, the support of schools will be dependent upon the State.

Respectfully submitted,

ELMER H. WEBBER,

Superintendent of Schools

Mapleton, Maine, February 11, 1936.

#### REPORT OF PRINCIPAL

To the Superintendent of Schools, Mapleton, Maine:

With pleasure I submit to you my annual report as principal of Mapleton Junior-Senior High School.

I. Second Semester of the School Year 1934-1935 The school year 1934-1935 ended Friday, May 31, 1935

Fourteen diplomas were awarded to students completing successfully the Senior High School requirements for graduation. Nineteen students were graduated from the Junior High School and awarded diplomas in recognition of their work. At the Junior High School graduation exercises on May 31, 1935, ten baseball letters were given to the boys who had earned them and two certificates for perfect school attendance for the year were awarded. At the same time the editorial board of the Maple Leaf for the coming year was announced.

During the semester a number of excellent assembly programs were presented by the students.

The Senior play entitled "The Man from Nowhere," was presented in March with great success. The proceeds from the play were used to defray the expenses of baseball and graduation.

Gwendolyn Rollins represented the school with credit in the Regional Contest for the Northern District, of the Annual Lydia O. (Hamlin) Spear Speaking Contest which was held at Aroostock Central Institute at Mars Hill, in May.

The prospects of publishing the Maple Leaf were very small so the members of the Editorial Board decided to buy a mimegraph machine and print the school paper themselves. Through the cooperation of the student body, advertisers, subscribers and friends the paper was successfully printed by the Board. Enough funds were realized from the publication to pay all expenses including the cost of the machine which is now the property of the Student Council. The Student Council is ready to do any mimeographing for any one in town desiring work of that type done for the cost of the stencils and paper used in the project.

Our baseball team had a very successfuly season and stood in second place in the league when the season closed.

II. First Semester of the School Year 1935-1936

The school year 1935-1936 opened September 30, 1935. The sixth grade was transferred back to the Old Mill school. A number of changes in the teaching staff were made. Miss Etta Grange was hired to fill the vacancy left by Mrs. Norton in the Home Economics department and Mrs. Kolouch was elected as full time teacher. Mr. Hollis Hazen was hired to start the new Agricultural department which the school committee had decided to add to the courses of study. Mr. Tetley resigned on December 6, 1935, to accept a position in the business world. Mr. Errol Higgins was hired to fill the position left vacant by the resignation of Mr. Tetley.

The introduction of the course in agriculture has increased the number of subjects taught and has still further increased the problem of class rooms for recitations. The course, however, will be of great benefit to a farming community of this type. It will take a few years to get the course worked out in proper shape and will require equipment and supplies with which to carry on the work of such a course. The interest shown in the course thus far is very encouraging and with its continuance the course ought to prove very beneficial to the future farmers of this district.

The work in all of the departments of the school is going along very smoothly although we are still very handicapped for want of supplies and equipment such as maps, reference books, magazines, newspapers, science material and laboratory room. We have at the present time eighteen students in a chemical laboratory designed for eight. This situaton will grow more critical for the next few years for the course in agriculture requires such laboratory subjects as biology, physics and chemistry for its successful completion according to the state requirements.

The annual sight and hearing tests were conducted in November and the parents notified as required by law. It is very gratifying to notice that a number of the worst cases of defective eyes have been treated but there are still a number of parents who have been notified many times but who do not seem to realize what it means to their children to have good vision.

The Maple Leaf will be printed by the students of the school on ther mimeograph machine just at it was last year. They have already secured a number of advertisements and about one hundred and fifty subscriptions for the paper. With the support of the towns of this school district the paper ought to again be a success.

The annual Junior Prize Speaking Contest was held in November. Arlene Wilcox and Myrtle Dow were chosen as itest speakers and Helen Webber was given honorable mention. Arlene Wilcox will represent the school at the Spear Contest in the spring.

Every effort is being made to make it possible to hold a winter carnival here in Mapleton and to send a team to the carnival at Ashland. We had a carnival benefit supper served at the Baptist Church on February 7, 1936 the proceeds of which \$16.50, will go towards financing the carnival expenses. More money is needed and the outcome depends on the support which the town will give us. The food for the supper was all solicited from the parents of the students and the work of serving it was carried out by the Home Economics department. The school expresses its sincere thanks to those who helped the supper to so successful a conclusion.

Through the renting of the Parish Hall we have been able to do a little with girls' and boys' basketball teams. The boys have played a number of games away from home but the girls have not been able to do so. The lack of funds has necessitated the paying of travelling expenses by the players out of their own pockets. This should not be so, for teams representing the school should be financed by the school. The playing conditions at the Parish Hall are far from ideal and this too is a serious handicap in trying to raise funds and build up good teams.

The Senior play will be presented in the spring and is under the direction of Mrs. Kolouch.

All of the necessary repairs that I mentioned in my last report are still needed and in addition others that have developed since.

Our two school reporters, June Dicker and Pauline Briggs, are doing a fine piece of work in keeping the school happenings before the public. Miss Briggs reports for the Bangor Daily News and Miss Dicker reports for the Presque Isle Star-Herald.

In November Mr. Barnes of Presque Isle supervised the installation of a chapter of the Future Farmers of America in Mapleton by the initiation of five of our agricultural students to membership in the organization.

JOSEPH F. KOLOUCH,

Principal.

February 8, 1936.

#### COMMERCIAL DEPARTMENT

To the Superintendtn of Schools:

The subjects offered in the Commercial Department of Mapleton High School for the school year 1935-1936 are as follows: Bookkeeping, Business Training, Economics and Typewriting.

The bookkeeping students of both beginning and advanced classes now use as their text the new edition of 20th Century Beekkeeping and Accounting. This text gives the student a complete insight into all forms of beekkeeping whether for simple, single proprietorship forms, partnership forms, or the more complex corporate forms. Attention is also given to the preparation of income tax reports, both of individuals and of business concerns in conformance with the present income tax requirements. Application of bookkeeping to farm and individual needs is made to increase its practicability. The students in both classes have shown good progress in their work and both classes at the present time are engaged in the work of recording the transactions of a business organization because of these transactions and in determining whether these changes have been favorable. In advanced bookkeeping plans of budgeting are also studied and their relationship to bookkeeping records shown.

Business Training furnishes an introduction to the Commercial Department and is of practical use to all, since everyone in this present age cannot help but have contact with business concerns and business procedure. The functions of business in our economic life and the needs of business in its personnel are taken up and related to the needs of commercial training for students in order to better perform these business activities.

Economics is a course given alternately with Commercial Law and offered to Juniors and Seniors. It is a very difficult course for high school students to handle since it involves primarily being able to reason from given facts, but partly for this very reason is of great practical use and good training for them. It is a study which is necessary for an understanding of how man obtains a living and applies scientific means to the bettering of

man's economic environment. It studies man's economic activities in the light of trying to eliminate poverty by increasing the supply of desirable objects and providing for an efficient and even distribution of these objects. As part of the work of the course a discussion of the Townsend Plan is planned for the near future. Points for both sides will be presented. An announcement will be made and an invitation is extended to all those interested.

Typewriting consists of two classes, beginning and advanced. The beginning classes first learn how to use their machine by touch rather than sight. Class supervision is necessary to accomplish this objective and emphasis is placed upon the need to do this in order to operate the machine skillfully in later work. Rhythm drills have been conducted in class to aid in obtaining the accurate work which is essential to typing. The entire class undertakes a typing project together and type in unison. In this way the teacher can by typing the rhythm control the speed of the typing and as matter becomes more familiar can speed up the work to a point consistent with accuracy. It teaches the student how to stroke the keys evenly and surely and paves the way for increased speed later on at the same time maintaining accuracy.

Typewriting II undertakes more advanced work such as the writing of business letters and the attainment of higher speeds. Work the first part of the year is confined to the drills until a background of rhythm and accuracy is built up. Then the class goes on to the typing of more intricate work. An excellent text in letter writing for typists is available for the class this year and is to be the project for the second semester of Typewriting II to teach the student the common Business letter forms and the proper placing of them on the sheet to assure a neat looking copy.

The Commercial Department extends a sincere invitation to parents and friends to visit us and view for themselves the work that is being done.

Respectfully submitted, RUSSELL D. CARROLL

#### HOME ECONOMICS DEPARTMENT

To the Superintendent of Schools:

Our aim in Home Economics is to develop initiative and the ability to attack and solve problems which arise in every day living. The purely manipulative skills, such as cooking and sewing, no longer consume so large a part of the time devoted to Home Economics because of the changed conception of what home making really entails. We now attempt to teach home making in every respect possible.

Our curriculm (as recommended by Miss Jenkins, State Supervisor of Home Economics) is as follows:

#### Seventh Year

One-half year clothing construction and hygiene. The girls learn the primary steps in sewing, care and selection of clothing, laundering, and the relation of clothing to health. Simple articles are constructed.

One-half year foods and health. We teach the meaning and value of health, food selection and uses, food values, simple marketing, and preparation of simple foods.

#### Eighth Year

One-third year home problems. The girls study the selection of small household equipment, its arrangement, and care.

One-third year clothing—care, construction, and textiles, This course includes a more detailed study and continuation of former work. Simple principles of color and design are taught. More difficult articles of clothing are constructed.

One-third year foods and marketing. We teach economical buying and preparation of foods. The values of foods and their uses are also stressed.

# Ninth Year

One-third year foods and dietetics. In this course we stress the composition of foods, selection and buying, their preparation, planning and serving of meals, and preservation and storage of foods. One-third year home nursing and first aid. The girls study about the various communicable diseases, home care and nursing, household emergencies, and first aid.

One-third year home selection and furnishings. This course includes the study of design and color in relation to home furnishings, the selection of all types of household furnishings, their arrangement and care. Each girl will plan a complete individual home.

#### Tenth Year

Two-thirds year advanced clothing. This is a detailed study of design and color in relation to clothing, buying and selection, renovation, and textiles, clothing construction, suitability to person, time, and place.

One-third year home problems. This course is a study of personal care and home care.

#### Eleventh and Twelfth Year

One-fourth year advanced foods and nutrition. An advanced study of food composition nutritive requirements per individual.

One-half year family relationships, child-care, and training. This course offers a study of problems that relate directly to the home and family such as care and management of the home, care of children, and social life and hospitality in the home, and the relation of the home to the community.

One-ourth year handicraft. This work will be adapted to the needs, abilities, and interests of the girls.

Short courses in knitting construction have also been given to some of the classes. Many useful articles have been made, such as mittens, anklets, scarfs, sweaters, and caps.

# Home Projects

This phase of our home-making work is the connecting link between the school and the home; between class room instruction and home making application. Projects, based on the needs and interests of the pupils, may be carried on in the home by

the pupil, being first approved by the mother. A report of the work is then written and, that having been approved, adds five to ten points to the pupil rank, according to the amount of work done. These reports are filed in the Home Economics room.

#### Home Economics Club

A Home Economics club is planned and will be finally organized in the early spring. At this time we will have a fair average of rank as the basis of initiation. This club will be composed of high school pupils with an average rank of B or better.

Enrollment	
Seventh grade	8
Eighth grade	10
Freshmen	22
Sophomores	10
Juniors & Seniors	12
Total	62

We would like to extend a condial invitation to parents and friends to visit our department. I would like to take this opportunity to thank you for your cooperation and for sending in supplies to clothing and food classes.

Respectfully submitted, ETTA M. GRANGE

Pctatoes—¾ Acre with 2 special machines; ½ Acre with 1 special machine;¼ Acre by hand.

1/4 Acre tuber Unit Method.

Strawberries—1/4 Acre.

Squash— $\frac{1}{4}$  Acre.

Our 1935-1936 school year opened with 23 boys enrolled. There are 12 freshman, 6 sophomores and 5 juniors. This number represents about 55 per cent of the total number of boys in Mapleton High School.

In November 5 boys from the junior class were initiated into the "Future Farmers of America" organization by the Presque Isle Chapter. We expect to have 100 per cent membership in this organization.

I wish to thank Mr. Webber, the members of the school board and faculty who have so kindly cooperated with me in my work.

Respectfully submitted,
HOLLIS M. HAZEN,
(Agriculture Instructor)

# Warrant

State of Maine, Aroostook Co., ss.

To Charles S. Archer, a Constable in the Town of Mapleton, in the County of Aroostook and State of Maine:

#### GREETINGS:

In the Name of the State of Maine, you are hereby required to notify and warn the Inhabitants of the Town of Mapleton, qualified by law to vote in Town affairs to assemble at the Methodist Episcopal Church, in said Town of Mapleton, on the Sixteenth day of March, A.
