Supt. of Schools Report

To the Superintending School Committee and to the
Citizens of Owls Head:—

Please accept this, my seventh annual report.

In the month of December, our Committee was saddened and shocked by the death of one of its members, Mrs. Lura Whalen.

An experience of years as an efficient teacher who not only taught the pupils from text books but trained them to take part in all community activities, brought a judgment on school matters especially valuable to a committee. Her zeal and faithful labors will be long remembered.

During the past year the work of our schools has been on the whole satisfactory. Success has attended the methods of instruction and our schools have been well governed and harmonious.

With few exceptions children have been faithful in their attendance. Parents should realize that an education is of great value to their children and that the school time is so short that every day is needed. It is a pity that parents should permit their children to be absent from school for trivial causes. The law is strict on this point and the school officials expect this law to be respected and obeyed.

I believe our citizens will help the officials to see that this law has better observance from this time than it has in the past.

If our schools are to properly do their work and if pupils from our town who enter Rockland High School are to succeed in their studies, the standards of promotion in all grades must be strictly observed.

In many cases, parents show an unwise zeal for the rapid advancement of their children. The promotion of a child to a class where the work is too difficult is an injury from which the child may never recover, yet many parents resent any attempt to hold back a child where lack of interest or immaturity renders him unfit for advancement.

As there should be some changes in textbooks this year, more money will be needed for this account.

During the past two or three years several new series of Arithmetics have been published, which have made good use of facts learned from the recent study of educators.

Spelling books have undergone a greater and more striking improvement.

Purchase of the newer books will be economical in the time of pupil and teacher and an aid to efficiency.

The schoolhouse at Ash Point has been altered and improved. After the work was begun it was found that the new ceiling was a necessity and that there was more of a job in several ways than had been expected. New windows were put in, the window spaces on the northern side were filled in and clapboarded. The walls were repaired and papered, the front wall of the building repaired and the door of the vestibule changed to the southern side. Blackboards were installed. Our repair appropriation was

overdrawn but no unnecessary work was done. At Ingrahams Hill a woodshed was built.

Several citizens of Owls Head Village have spoken to me at various times this year, expressing hopes that there might soon be a new schoolhouse so located that a majority of the pupils would not be obliged to walk so far.

There is no question but that this is highly desirable. The only argument against it has been that the town cannot afford it. This is for the citizens to decide, but it should not be decided without careful consideration.

If a building and lot were to cost \$3000 to \$3500 and be paid for by three or four yearly appropriations, would it be a great burden? How would it compare with the expenditure on roads?

Could a little curtailment on roads and an insistence on careful and painstaking economy in other departments make it possible to do justice to the children? It is not for your superintendent to decide and he will not attempt to do so. It is hoped that the citizens will give serious thought to the matter.

If favorable action is taken this year, repairs at the other schools should be made with conservative care.

Ingrahams Hill School needs more window space and better blackboards. The matter of light is important. It is hard to estimate the damage to children's eyes, that is caused by study during the afternoons of November and December.

There are each year a number of small repairs that require a considerable sum of money.

The large balance in the Tuition account is caused by Rockland's failure to present the tuition bill for the fall term at the usual time. If this were paid there would be little if any surplus.

In conclusion I wish to thank all town officials and citizens who have cooperated with our efforts to serve the children of Owls Head.

Respectfully submitted,

F. L. S. MORSE.

Estimates for Appropriation

Common Schools	\$1650.00
High School Tuition	425.00
Textbooks	110.00
Supplies	25.00
Repairs	500.00

At least \$200.00 of the money asked for repairs will be needed for the overdrawn account. If a new schoolhouse should be built this year not more than \$100.00 would be asked for repairs appropriation.
