School Department

To the Superintending School Committee and
to the Citizens of Owl's Head:—

This, my twelfth annual report is hereby presented.

There have been no changes in the teaching force or in the salary schedule during the past year. Under the direction of these teachers the schools have been reasonably successful.

Sound methods of instruction have been employed, and the pupils as a group have worked well with the teachers.

The two larger schools are crowded, especially the Ingraham's Hill School. The fact that a considerable degree of success has been achieved for the past few years is due directly to the efforts of the teachers who have given of their time and efforts more generously than could have been reasonably expected.

Various plans of building and consolidations have been presented to the voters in the past but these have failed to meet the approval of the citizens.

The parents who send their children to the Timber Hill School continue to feel that some action should be taken to furnish a new school or move the old schoolhouse to a spot nearer to the Village.

In late Autumn the State Commissioners of Education asked the Superintendent of Schools to furnish at once projects for needed work on the schoolhouses and grounds. The purpose of this was to provide a program for work by the Civil Works Administration.

In the very short time allowed a list of needed repairs was sent and for the main part the items were approved. The fact that a lot of materials would be needed for which no funds were accessible and which could not be expected from the state to a town of the good financial standing of Owls Head was one of the reasons that influenced the town officials to choose the road project. Another important factor was the greater ease and speed with which a road project could be undertaken. Among the real needs is that of good water for the schools. At Timber Hill this is acute. Decent wells should be dug where there is no water systems. At the school named there is no good water within reasonable distance. The Ingrahams Hill School could be furnished with good water from the water pipes at a fair cost. If a good well cannot be provided at either of the other schools because of ledge, some other site should be provided for the school. Water is a necessity and the children should have a good and constant supply.

The underpinnings at Ash Point and Timber Hill must be attended to and the roof at the last named school leaks, and should be shingled. Some work should be done on each of the school toilets if these are to be kept up to legal requirements. Had there been a fund of \$500.00 for materials for

repairs the town could have received much more from the Civil Works Administration than has been received on the road project.

The sum of \$500.00 for repairs should be raised this year if the present buildings are to be maintained for any considerable time. This is not urged for to some citizens the insides of an efficient central school and conveyance of pupils still persists.

Our schools are now provided with modern text books and the needs of another year will be no greater than those of last year.

The expenditures for supplies will be larger. Prices have advanced and more seat work is needed where there are many pupils and grades in each of the schools.

More money will be needed for High School Tuition because of the increased number of pupils and the smaller balance in the tuition account.

I thank the town officials for their kindness and assistance and the citizens for their generous support.

To those who have assisted with gifts, we express our gratitude and commend them as examples to those who are interested in our schools and wish to assist even in a small way.

Respectfully submitted,

F. L. S. MORSE
