Report of the Superintendent of Schools

To the Superintending School Committee and Citizens of Isle au Haut:

I hereby submit my tenth annual report as superintendent of schools for the fiscal year ending February 20, 1933.

The success of pupils going from this school and attending high school is perhaps a better measure of the success of our school than any report I can make. I am gratified to report that I have received the ranks of the four pupils attending Rockland High and that all passed satisfactorily the first half year. I have heard indirectly that this is also the case of the two attending Portland High. I think the fact that these pupils have been able to bridge the gap between a small rural school and a city high school speaks well for the preparation they have received.

Following is a statement I received from the State Department of Health. "As our state nurse visited the Island in November and among other types of work assisted the physician in completing immunization of 12 school children against diphtheria, it was deemed advisable to save the time for school work until spring when there would be better opportunity to secure corrections of defects, and would also be about the right time to have the Schick test to determine if the children had become immune to Diphtheria.

We trust the service has been of sufficient value to the children of your town to warrant a continuance of your support through an appropriation. We are asking your town for an appropriation of \$15.00."
