## Supporting Children of the OPioid Epidemic

Transcript of Zoom recording:

Welcome everyone on behalf of Betsy Humphreys and myself, I'm Jen Maeverde, to our poster presentation Supporting *C*hildren of the *O*Pioid *E*pidemic. We're really excited to share the work we've been doing in New Hampshire and Maine in supportive early intervention providers and their work with families and children impacted by the opioid crisis.

The poster gives you an overview of both the model we've been using, the ECHO model, Extension for Community Health Outcomes, as well as information about the SCOPE curriculum that we've been implementing. And we'd really encourage you to go to the bottom of the poster and scan the barcode, which will bring you to our website, which will give you lots more in-depth information about both the ECHO model and the SCOPE curriculum, including the modules and access to lots and lots of resources.

Speaking of resources, we have uploaded some additional resources for you so that you can take a look at what's going on in New Hampshire and Maine relative to opioid use and treatment and services available to children and families.

So, we do encourage you to ask us any questions that you have and to join us on Wednesday morning from 9:30 to 10:30 for our live-stream session, where we can have conversation and interact with you.

So, thanks for viewing our poster and we look forward to connecting with you later on in the week.
