	<hr/>
Balance due Agent.....	\$375 08

It has been my aim, during the year, to limit my expenditures to the appropriations, and with the exception of the appropriation for distressed poor, I have been quite successful.

There is quite a number of the male portion of the tribe who, being unable to perform hard labor, have in former years earned a considerable part of their living by hunting, but game has become so scarce that it is impossible for them to follow that business for a livelihood, and must look to the State for assistance. There are also a great many aged females, some of them entirely helpless, who must receive their support from the agency. There has been the usual amount of sickness in the tribe, and in several instances whole families have been obliged to depend upon the poor fund for months for support. In times of business depression like the

present it is very difficult for the men to obtain employment. In no case has any member of the tribe received aid unless it was absolutely necessary. I am well satisfied that the amount appropriated last year will not be sufficient to meet the absolute needs of the poor in the tribe the coming year, and would recommend that the sum of sixteen hundred dollars be appropriated for distressed poor.

The buildings belonging to the tribe are all in good repair, and no appropriation will be needed for that purpose.

I would recommend an appropriation of two hundred dollars for wood for the tribe, to be distributed as follows: For those at Pleasant Point, one hundred dollars; for those at Pembroke, twenty dollars; for those at Calais, thirty dollars; and fifty dollars for those at Peter Dana's Point.

I would recommend an appropriation of fifty dollars for repairs upon the road from Peter Dana's Point to the Granger Turnpike. There was an appropriation of fifty dollars expended very satisfactorily upon this road in 1875, and the amount I now recommend would be sufficient to make the road passable, and it is very much needed by the Indians, as it is the only way they have of getting out with teams, when the ice is making in the fall and breaking up in the spring.

As specified in a treaty made with the different sections of the tribe, dated February 28th, 1852, upon the death of John Francis (then Governor of that portion of the tribe living at Pleasant Point) a vote of the whole tribe should be taken and the majority should decide whether to elect another Governor at Pleasant Point or to be content with the one living on the Indian Township.

The office having become vacant by the death of John Francis, the tribe decided to elect another Governor at Pleasant Point, and have made choice of Selmore Francis.

They have, also, in accordance with the provisions of the treaty, chosen Peter Selmore Lieutenant Governor at Pleasant Point, and as there was no provision made last year for the pay of more than one Lieutenant Governor, I would recommend an appropriation of twenty dollars to each of the Lieutenant Governors.

The school at Pleasant Point, taught by P. H. Rogers, Esq., has been quite successful the past year, and as an inducement to the scholars to take more interest in the school, I offered them a few prizes for the best attendance, deportment and attention to

study, and the teacher and myself were well satisfied with the result.

We are under obligations to J. W. Jacobs, Esq., of South China, for money to furnish prizes for deserving scholars at Peter Dana's Point; also for a set of wall maps for the same school.

I think the tribe has taken more interest in farming, the past year, than usual, particularly that portion residing at Pleasant Point, and I would recommend an appropriation of one hundred dollars for dressing for land.

In accordance with an act passed by the last Legislature, I have taken the census of the tribe; and find their number to be 508. Of this number, 260 are males and 248 females.
