Maine Girl Carnival Queen in Texas

Galveston, Texas, March 1—"Miss Elizabeth Armstrong, of the class of 1924, University of Maine, was chosen queen of the Mardi Gras Carnival recently held in this city.

Miss Armstrong belongs to one of the oldest Texas families, and she chose the University of Maine as the school at which she desired to finish. Her choice as queen from the debutante circle of the city was popular."

Baseball Schedule

April 28—Providence College at Providence (Tuesday).
April 29—Brown University at Providence (Wednesday).
April 30—Conn. Aggies at Storrs (Thursday).
May 1—New Hampshire at Durham (Friday).
May 6—Bates at Lewiston (Wednesday).
May 9—St. Michaels at Orono (Saturday). Pending
May 12—Bates at Orono (Tuesday). Pending
May 15—Bowdoin at Brunswick (Friday).
May 20—Tufts at Orono (Wednesday). Pending.
May 23—Bowdoin at Orono (Sat).
May 27—Colby at Waterville (Wed.)
June 5—Colby at Orono (Friday).

Eighty-Five to Observe

Its Fortieth Anniversary

The class of '85 intends to come back strong for its fortieth anniversary. More than a majority of the class have already written that they expect to be present. If all the "boys" desire it arrangements will be made for them to occupy their old rooms (somewhat modernized, to be sure) in Oak Hall, and eat together at the Commons. The old well is out of commission, but there's plenty of water, and the Stillwater is just as near as in former days. Let's make the reunion 100 per cent.

J. N. Hart,
Class Secretary.
The Student Faculty Alumni Banquet

The second annual Student-Faculty-Alumni banquet was held at the Bangor House, Friday evening, March 6th. This banquet is instigated and managed by the Senior Skulls with the intention of getting better cooperation and understanding between the students, faculty and alumni. There were, approximately, one hundred and sixty in attendance.

Alden Turner, '25, representing the Senior Skulls cordially welcomed those present to the banquet and introduced the Hon. George E. Thompson, '91, of Bangor as the toastmaster for the evening.

The speakers were President Clarence C. Little, Dean James S. Stevens, Dean Leon S. Merrill, Dean Harold S. Boardman, Robert P. Clark and John P. Ramsay of the Alumni Association. Prof. Charles P. Weston, William MacC. Sawyer of the Build-Fund Committee, Alden Turner and John Behringer of the student body.

Plenty of levity and good natured banter flavored the speeches, but throughout the evening a serious note prevailed, and every speaker reflected the common desire to build a "bigger and better Maine."

The last speaker and the only speaker to whom more than five minutes had been allotted by the committee was Dr. Clarence C. Little, who introduced the subject of Student Government for consideration by the undergraduates at Maine. In his talk he pleaded for the elimination of what he considered to be the greatest time wasters, money wasters, energy wasters and character wasters confronting every college and University in the country today. A plan to curb minor delinquencies by student legislation rather than by faculty action, was suggested.

He said that "criving, drinking, petty thievery and 'petting parties' must be done away with."

Dr. Little made it clear that he believed that conditions at the University of Maine were better than on any other campus in the country.

He did not charge his students, neither did he bring reports of such nature as existing at the State institution, to the alumni, but rather, he plead for a thorough consideration on the part of the student body recommending student government legislation rather than faculty action, to the end that the University might be cleared of the "rubbish on her streets," if such existed. Dr. Little emphasized that he brought no recent cases, or delinquencies to mind, and asked that his suggestions be considered without emotion, but be taken as a straight "business proposition" by all, that the University "we all love," he stated, may become a bigger, better and cleaner shrine.

**Dr. Little Recommends Student Government at Maine.**

Dr. Little spoke in part as follows:

"There are several theories of administration of institutions of higher education. Faculty government with establishment of a standing army of officers and a growing contrast between faculty and student viewpoint is the common conservative method. It means that the temptation continually is presented to build up an attitude of control on one part and a desire to escape it on the other. With such a system it is, to all intents and purposes, impossible to build up any real sense of co-operation or responsibility on the part of the students or to leave the faculty free for its proper academic interests and pursuits. I have therefore a more radical and I believe more progressive method to suggest.

"We should all agree that the University administration has the right to set the standard for physical, mental and moral behavior of its students during the continuation of their college course. This course is carried out at considerable expense and therefore carries with it a real obligation both for student and for faculty.

"On the basis of the above state-
How Athletics Are Governed at Maine

Two bodies have in charge the government of athletics at the University of Maine: The Faculty Committee on Athletics, and The Athletic Board. Any single athletic game or schedule of games with organizations outside the University must first receive the approval of the Faculty Committee on Athletics. This applies also to varsity teams, club teams, fraternity teams, Intra-Mural teams, and the teams of any other club or organization.

The members of the Faculty Committee on Athletics for the present school year are: Professors Grover, E. H. Sprague, Halverson, Lyon, Pollard and Brooks. This Committee has in the past given permission to various fraternities and clubs to play basketball with outside organizations. These requests became so numerous that in December, 1924, just previous to the Christmas recess, the Committee adopted the policy that such games would be allowed only during Christmas recess and the spring recess. Permission for these recess games must be obtained before the games are played.

The Athletic Board is the body that determines the policies of all athletics at the University, except the activities of the Intra-Mural Athletic Association. This Board is composed of eleven members representing the trustees, faculty, alumni and students. The personnel of the board at present is as follows: H. B. Buck, for trustees; A. L. Grover, E. H. Sprague, H. M. Halverson, for the faculty; C. P. Crowell, W. MacC. Sawyer, P. R. Hussey, for the alumni; and G. H. Gruhn, L. C. Connor, W. C. Barrows, and Paul Lamoreau, for the student body.

The faculty manager, Prof. B. C. Kent, has direct control and management of all athletics except the Intra-Mural Athletics, and is responsible to the Athletic Board. The coaches and managers of various teams are responsible to the Faculty Manager.

A. L. Groves, '99,
President Athletic Board.

A Letter We Liked

"I'll say that clam was a go-getter! Here's my check for $5.00. I'm sorry it isn't $10.00 but maybe the extra $2.00 will pay for some of the duplicate letters you've sent.

Memorial Gymnasium-Armory

In a few weeks now work will begin in earnest on the new Memorial Gymnasium-Armory. The Boston Bridge Company will apparently be able to start the erection of steel early this spring, as the snow is gone already from the site and the concrete piers are in and ready to be built on. This steel work will be finished in July.

Specifications are practically completed for the construction of the rest of the building and these will be put out to bid in a few weeks now.

The Memorial Building Committee plan to have the indoor field, at least, completed soon enough for use next fall. The Committee is very optimistic about the construction of the balance of the building and it may well happen that by next winter the entire structure will be well on toward completion.

The size of the indoor field is one thing that amazes all that become familiar enough with it to get a real conception of it. The playing field is 304 feet long and 109 feet wide, inside the steel. Circling outside the steel is the running track which is 7½ laps to the mile. Also a 100 yard straight-away so arranged that there are 15 yards to spare at each end of the stretch. The indoor field is 67 feet high.

The Memorial Fund Committee urges all subscribers make every personal sacrifice to see that their payments are made promptly, from now on, as they fall due. Once construction starts, which is only a few weeks away, expenditures will be tremendous. If each subscriber does his part there will be no hitch in the construction.

Correcting Maine Relay History

The February ALUMNUS, in common with the press generally, made the statement in describing Maine's victory over New Hampshire and Massachusetts Agricultural College at the B. A. A. games, that this was the first time in six years that a Maine Relay Team had won its race at these games.

This is all wrong and we hasten to correct the mistake which developed from wrong information.

We are pleased to quote from a letter which gives the truth of the relay situation:

"Just after the war in 1919 the Maine Relay team composed of Capt. "Hep" Pratt, "Dick" Hegarty, Charlie Wansk, and myself with "Pat" French, as coach, beat Bowdoin, and Bowdoin would not run us against in relay until last year, 1924. In 1920 we trimmed the fast Tufts team with "Jimmy" Blair's brother as captain of the team (Tufts). That year Hegarty's place was taken by Lawrence and Wansk's by Rock with myself as Captain and "Hep" Pratt, the best anchor man Maine ever had. In 1921, the same team as for 1920, took both Tufts and Bates into camp. The team in 1921 was captained again by Pratt and at the B. A. A. games our time was the second best of the college one mile teams."

Roger C. Castle, '21.

Winter Carnival

The Intra-Mural Athletic Association which conducts the Winter Carnival at the University had plans made for this year's carnival to be the best ever. The weather-man was against the committee, however. February was a warm month in Maine. The snow melted and even the enthusiasm of the most ardent supporters of Winter Sports could not carry out snowshoe races and ski jumps on bare ground.

The Carnival was given over to dances and house parties. The Carnival Ball, which is gradually becoming the big dance of the year, was the crowning event and a real success.

Are Your Dues Overdue?

The recent letter asking that alumni dues be paid met with an excellent response. Many more must appreciate the work of the alumni office and enjoy THE ALUMNUS. If you do, why not send your check today?
The Close of the Basket Ball Season

Basketball Summary

The basketball season is over and the University of Maine's checkered-skirted basketeers have hung up their suits for another season. The season which has just closed has brought to light many things. Most important among these is the fact that "Cuddy" Murphy has done a fine piece of work, considering the amount of green material with which he had to work in turning out the fast and flashy team which represented Maine on the polished surface this winter.

Last year, Maine, with a veteran team, won a majority of its games. This team was wrecked through graduation, the passing of "Olle" Berg, "Crabby" Newell, and "Louie" Horsham, leaving only two letter men, Captain-elect Lake and "Tubby" Everett, around which a new five had to be built. Immediate results would point out that the Blue's 1924-5 season was not crowned with success, as but four games were won and 10 lost. An examination of the summary of games will show, however, that Maine lost many games by close scores, some even by one point margin, and an idea may be gained of the tough battles which the Blue team was forced to drop. Ten games were played on foreign floors, the Orono fans only seeing four games, three of which Maine won.

Bright Prospects Next Year

Rome was not built in a day, and another season should give Maine one of the fastest and best fives in New England. Six letter men will be on hand when the call for hoop artists is received in the Boston University game, he recovered in time to finish his season in a blaze of glory. Johnson, Olsson, Bryant, and Burton alternated in the guard positions and all seemed of equal caliber. Hanscom was alternate forward. All made their letter and all will be available next season.

Press Accounts of Last Games of Basketball

New Hampshire

Orono, Feb. 13—Friday the 13th put its jinx on the Maine varsity in its game with New Hampshire University here tonight. The Bears being outplayed in all departments of the game and landing the small end of the 29 to 10 score after using all the basketball men in the college in the line-up. Soderberg was the only scoring threat the locals possessed and made seven of the ten points counted for his team. Durrell made a basket and Everett added a point on a foul.

McKinley, Cotton and Craig made the scores for New Hampshire. Maine was weakened by the loss of Captain Lake, who was unable to get into the game for only a few minutes.

Rhode Island

Kingston, Feb. 18—The University of Maine basketball five invaded Kingston last night and received a 36 to 25 defeat at the hands of the State shooters. The opening period was exceptionally fast, the Maine team playing a neat defensive game.

The second session found the home crew gradually forging ahead after some neat shots by Hill, Asher and Pinto. Soderberg was leader of the Maine team, registering seven points from the penalty line. Jensen and Rabunowits with four personal fouls each were put out of the game.

Wesleyan

Middletown, Feb. 19—In the most closely contested game ever fought at the Fayerweather Gymnasium, Wesleyan barely nosed out a victory over the University of Maine, here tonight, 25 to 22.

Deadlocked Eight Times

At no time did either team attain a lead of more than four points. The Pine Tree State combination had such a lead before the Red and Black broke into the scoring column and Wesleyan gained this margin only twice during the game.

The score was tied eight times and the lead changed hands seven times before the local university was finally victorious.

Worcester Polytechnic

Worcester, Mass., Feb. 21—Worcester Tech defeated the University of Maine basketball team here tonight 29 to 25 in the fastest game seen on the Worcester floor this season. The engineers were in the lead throughout the game, except for a few minutes after the opening of the first half, but never gained more than a five point advantage.

Play during the entire game was fast and furious with first Gross, the star crimson and gray guard, dropping in a long shot only to have Lake, the stellar Maine forward, cut down the lead with a pretty shot from under the basket.

Basketball "M"s Awarded

The athletic board on March 5, awarded the basketball varsity "M" to eight players and to P. L. Lincoln, manager. The players receiving their letter were: M. F. Lake, '26, Capt.; V. A. Soderberg, '25; R. C. Johnson, '27; W. A. Hanscom, '27; V. B. Everett, '25; A. H. Olsson, '26; W. J. Bunten, '26, and V. C. Bryant, '26.
Interesting Meeting Held in Portland

Outstanding achievements of the University of Maine, one or more of which have reached National recognition in the past year or two, were recited to the Western Maine Alumni Association of that institution on Tuesday evening, Feb. 17, at the Elks Club. The occasion was the annual meeting and banquet, and was largely attended. New officers were elected, and included those chosen last October at which time a belated election was held.

Philip W. Thomas is again president; Benjamin O. Haskell, vice president; Linwood T. Pitman, secretary and William B. Cobb, treasurer. Robert P. Clark, alumni secretary of the General Alumni Association, was another speaker on the program. Several amusing features were introduced by Ralph H. Boothby and Henry P. Turner, in charge of the entertainment.

Perhaps the outstanding feature of all recent alumni meetings in the past few years was a mock trial in which the existence of the Western Maine Alumni Association was at stake. Mr. Turner proposed that the association be disbanded as serving no further purpose. He was seconded by Frank P. Preti. Mr. Boothby took exceptions and was supported by Harry C. Libby. Mr. Preti was named attorney for the plaintiff and Mr. Libby for the defense, and the case was finally decided in favor of the defendant, that the alumni association should continue to function.

Harry E. Sutton, of Boston, president of the General Alumni Association, who is attending the legislative hearing on the University of Maine bill, was present and gave a fine outline of alumni purposes and activities recommended for local associations.

Mr. Clark reviewed the work of the alumni secretary’s office and outlined the assistance that the work there is receiving from the alumni groups of the country. American college and university alumni associations have the same fundamentals as American genius, he said—idealism and the capacity to organize properly. Among other things, Mr. Clark mentioned the plan of Coach Fred Brice of the varsity football teams to organize the former football players of the university as an assistant coaching staff, to aid in the active coaching when possible, to look around in the prep schools of their localities and seek out promising material for future Maine teams.

In pointing out the larger achievements of the university, Dr. Little said that the College of Agriculture has contributed 70 per cent of its graduates as permanent residents of the State, which is sufficient answer to those who inquire why Maine graduates do not settle in their native State.

The research side of the branch of the university has by experimental methods developed a variety of oat that yields 100 per cent higher than any other oat used in Maine, known as the Three-Forty oat.

Three years ago when seed potatoes of Aroostook were threatened with a dangerous disease, the university turned over its laboratories and men to the study of the matter, and showed in a few months’ time that the disease could not be controlled adequately, thus avoiding much worry and labor on the part of the farmers.

The College of Technology has contributed two splendid pieces of research work. This college ranks a comfortable second, in the rating of big engineering firms, to the Massachusetts Institute of Technology, in recognized worth of its graduates. A Maine technical graduate built the highway on Green Mountain in Lafayette National Park so well that the superintendent of all National parks has expressed his intention of bringing his engineers there to study its construction as a model for future road work. A series of experiments conducted in the various mixtures of cement for State road building has worked out mathematical formula for the correct mixture in this work, and the authorities believe that this will prove a standard for cement road building in the country.

The experimenters have succeeded in cutting down to one-third the work of testing of concrete and cement, saving therefore 200 per cent to the State in test work on road construction.

The College of Arts and Sciences ranks third in the country to Harvard and one other college in standing of its teacher graduates, Dr. Little continued.

The university is working hard to strengthen its pre-medical and pre-legal courses. Maine is not yet ready, the president said, for establishment of medical and law schools, but much study and attention is being given these future possibilities with a view to making ready for them when the time is ripe.

He mentioned the tryout the past fall of Freshman Week, an idea promulgated at U. of M. and since tried out at Harvard, University of Chicago, Arkansas and other colleges and adopted.

Another innovation has been introduced in the sending of faculty members under the direction of Dean James S. Hart, to prep schools and high schools to interview prospective students and find out if they have a real purpose in attending college, to learn what their future hopes are and if they are ready for higher education. Much of this is determined by questionnaires.

The university has outlined its first 10-year program, showing what it intends to do for the State of Maine.

Freshmen Basketball

The freshmen basketball team has just finished a very satisfactory season, having won ten out of twelve games played. New Hampshire State freshmen and Coburn Classical Institute are the only two teams that have given the Maine yearlings a defeat. Both of these games lost were played on foreign floors. The Maine freshmen defeated the New Hampshire freshmen later in the season at Orono in one of the best games of the year. Coburn cancelled their game at Orono and the freshmen lost their chance to even up the series.

Captain Branscom was high scorer and made an excellent leader. Fitzhugh and Thompson scored well. There is excellent material on the freshmen squad for next year’s varsity. Fred Brice coached the team.

The Pulp and Paper Course at the University

How many of the Alumni and friends of the University realize that the University of Maine offers a four year course in the technology, both theoretical and practical, of the manufacture of pulp and paper of the various kinds?

Because this is the most important industry of the State of Maine, and also one of the most important industries in Massachusetts, New York, Wisconsin, and Canada, a need was felt in the industry for technically trained men. These were to be absorbed by the industry to surplant wasteful rule of thumb methods those of efficiency, scientifically applied. To meet this need, the pulp and paper course was started here at the University as a branch of the Department of Chemical Engineering. In 1912, and leads to the B. S. or M. S. degrees.

The University of Maine was the first college or university to enter this field in the United States. It aims to, and does, fit its graduates to work into responsible positions in the industry, in a short time, either as salesmen, production officials or research chemists along these lines. The various courses are given in a practical way and require the full time services of a professor and an assistant. At the present time Paul Bray, Maine 1914, has charge of this work with Alexander Cutler, Maine 1923, as assistant.

The new set of texts, in five volumes, recently edited by the combined Technical Associations of the Pulp and Paper Industries of the United States and Canada are used as a background for the various lecture courses.

The pulp laboratories are quite well equipped to make the three commercial types of the chemical wood pulps, and to run the production across semi-commercial size wet-machine, which incorporates all the principles of operation as do the larger machines of the industry. The paper laboratories are equipped for practical paper making in hand sheet form of the many kinds?

University Broadcasting Station

The Alumni will be interested to learn of the plans for a broadcasting station at the University. In preparation for this a new and efficient antenna was erected last summer over Lord Hall. The transmitter will be constructed, in connection with thesis work, by two seniors in the department of electrical engineering, Robert Haskell and Chester Baker, under the direction of Prof. Creamer.

Present plans call for two 50 watt modulator tubes, modulating the output of two 50 watt power amplifiers, which in turn are excited by a 50 watt master oscillator tube. Speech frequency amplifiers have already been constructed and tested.

For the present, speech transmission tests are being conducted with a 10 watt set, preliminary to the installation of the larger equipment. A considerable number of reports from Massachusetts and New York of reception form this set, which operates under the call letters WGBX, indicates a highly efficient radiating system, and suggests the probability of a wide audience for the programs to be broadcast by the higher powered set.

The completion of this station will provide facilities for extension service by radio; and all departments of the University will be at liberty to make use of this method of service to the people of the State. In addition to education programs, athletic events can be broadcast, and entertainment can be furnished by the various musical organizations. The lack of funds to equip a satisfactory studio will probably delay the broadcasting of musical programs for a time; but by next fall this need should be met.

Boston Alumni Doings

DANCE

The second installment known as the Ladies Night and Dance duplicated the fun and frolic of the event initiated into the annals of Boston alumni activities a year ago. Whitney Hall, Coolidge Corner, Brookline was used again. The night of the affair was January 24. 67 couples were in attendance. Alphonso Wood, '05, was floor director. As master of ceremonies he shone particularly when the Paul Jones was announced (Oh you Stillwater, Orono and Veazie dance hall). Charlie Bickford, '32, was conspicuous by his absence but F. L. Eastman, '88, was there to prove that the older grads are not to be denied the pleasures of the youngsters fresh from the campus.

BANQUET

"Poetry, songs, cheers, rattling good speeches from "Prexie" Little and "Bob" Clark, '15, stereopticon slides of Archie Grover's alumni special to Mt. Katahdin and a toastmaster (Harry E. Sutton, '09) who was the finished product characterized the 34th annual banquet of the Boston Association, February 27, at the Hotel Bellevue, Beacon street. 68, including the piano player and the head waiter, were in attendance.

Alumni notable's evidence were Charles Bickford, '82, trustee; F. L. Eastman, '88, who has missed but two Boston banquets since he and 13 other alumni organized the association in 1892; Joe McCusker, '17, who did his chair-balancing stunt while spelling it the long way; H. D. Leary, '10, who drew forth the mighty songs of yesteryear; and yes, many many others of fame.

"Prexie" Little's address was worth going miles to listen to for he demonstrated anew his rare ability to think soundly upon the problems confronting the schools and colleges of today.

The committee in charge was Fred D. Knight, '09, chairman; Warren D. Trask, 08, Harry Sutton, '09, H. D. Leary, '10, J. L. Ober, '13, W. D. Towner, '14, and J. A. McCusker, '17.

W. D. TOWNER, '14

Secretary.

College Beds Yearn for Alumni

"The beds at Maine are getting restless and dissatisfied. In an interview one of the beds confided that it yearned to bear the weight of the Alumnus that hadn't been back for several years. The beds are still there, boys, so you had better come back and have a real night's sleep once more. The north wind still rushes and whistles around the beds, and as usual, the "Boudoir" gang reigns supreme."—Maine Campus.
Maine on the Air

On Saturday night, January 31, an Internation Intercollegiate Smoker was held at the Edison Club, Schenectady, N. Y. This smoker was for Edison Club members and engineers of the General Electric Company. The entire program was broadcast by station WGY of the General Electric Company.

The program consisted of fifty-five numbers, forty-five of which were put on by college alumni groups. In some cases two or more colleges were grouped together so that fifty-one were on the program.

It is doubtful if there is any other place in the world where a program of this sort could be put on by as many college graduates.

The Eastern New York Alumni Association of the University of Maine had a part in the program and put on four numbers including the "Stein Song," the football song "For Maine" and two cheers. In the group were nineteen men, as follows:

With this crowd we made lots of noise and might state that Cornell was the only college with a larger representation. As they have in the neighborhood of 250 men in the vicinity we feel that we did very well.

The WGY studio has received hundreds of telegrams and letters in regard to this program and from all indications the program was a great success. Many of the replies asked that another such program be put on in the near future. Of these replies a number were from Maine Alumni who listened in.

One telegram was received as follows:

"How about Bowdoin at Banquet."

The Eastern New York Alumni Association of the University of Maine wishes to thank those who sent telegrams and letters regarding our part of the program in the International Intercollegiate Smoker held by the Edison Club of Schenectady, N. Y.

By Classes

Ex'84—Robert S. Leighton, lens manufacturer of Everett, Mass., attended the banquet of the Boston Alumni Association, February 27th.
Ex'81—Charles C. Ross is night clerk at Hotel Duncan, New Haven, Conn., and resides at 396 First Ave., West Haven, Conn.
Ex'69—Calvin S. Smith, February 5, 1925, at Bangor.

Deaths

Edward N. Snow and Miss Edith L. Radley, August 16, 1924 at Renfew, Ontario. They are residing at 688 Wilson Ave., Montreal, Quebec. Mr. Snow is president of the Western Montreal Alumni Association of the University of Maine. He is an engineer for the Western Electric Company.

Harold G. Hall and Miss Hazel L. Farwell, February 5, at Bath. They are residing in Union, Maine, where Mr. Hall is a civil engineer for the State of Maine.

George K. Stackpole and Miss Dorothy L. Stimson, September 12, 1923, at Kennett, N. Y. Mr. Stackpole was graduated from the University of Maine in February and is now employed by the Otis Elevator Company of Boston, Mass. Mr. and Mrs. Stackpole are residing in Medford, Mass. at 34 Indianer St.

Paul E. Atwood and Miss Lilian Boyce, February 21, 1923, at Bangor. Mr. Atwood is a member of the University of Maine Alumni Association. He is president of the Western Quebec Alumni Association of the University of Maine. He is an engineer for the Western Electric Company.

Births

Deaths

Edward N. Snow and Miss Edith L. Radley, August 16, 1924 at Renfew, Ontario. They are residing at 688 Wilson Ave., Montreal, Quebec. Mr. Snow is president of the Western Montreal Alumni Association of the University of Maine. He is an engineer for the Western Electric Company.

Harold G. Hall and Miss Hazel L. Farwell, February 5, at Bath. They are residing in Union, Maine, where Mr. Hall is a civil engineer for the State of Maine.

George K. Stackpole and Miss Dorothy L. Stimson, September 12, 1923, at Kennett, N. Y. Mr. Stackpole was graduated from the University of Maine in February and is now employed by the Otis Elevator Company of Boston, Mass. Mr. and Mrs. Stackpole are residing in Medford, Mass. at 34 Indianer St.

Paul E. Atwood and Miss Lilian Boyce, February 21, 1923, at Bangor. Mr. Atwood is a member of the University of Maine Alumni Association. He is president of the Western Quebec Alumni Association of the University of Maine. He is an engineer for the Western Electric Company.

Births

With this crowd we made lots of noise and might state that Cornell was the only college with a larger representation. As they have in the neighborhood of 250 men in the vicinity we feel that we did very well.

The WGY studio has received hundreds of telegrams and letters in regard to this program and from all indications the program was a great success. Many of the replies asked that another such program be put on in the near future. Of these replies a number were from Maine Alumni who listened in.

One telegram was received as follows:

"How about Bowdoin at Banquet."

The Eastern New York Alumni Association of the University of Maine wishes to thank those who sent telegrams and letters regarding our part of the program in the International Intercollegiate Smoker held by the Edison Club of Schenectady, N. Y.

By Classes

Ex'84—Robert S. Leighton, lens manufacturer of Everett, Mass., attended the banquet of the Boston Alumni Association, February 27th.
Ex'81—Charles C. Ross is night clerk at Hotel Duncan, New Haven, Conn., and resides at 396 First Ave., West Haven, Conn.
Ex'69—Calvin S. Smith, February 5, 1925, at Bangor.

OLD TOWN TRUST COMPANY
ORONO, MAINE
Artificial lightning was first publicly demonstrated on June 5, 1923, in the laboratory of the General Electric Company at Pittsfield, Mass., when a two-million-volt spark crashed into this miniature village.

What's the use of artificial lightning?

Experiments like these are particularly thrilling and important to young men and women, who will live in an age when electricity will perform most of life’s hardest tasks. Know what the research laboratories of the General Electric Company are doing, they are a telescope through which you can see the future!

If you are interested to learn more about what electricity is doing, write for Reprint No. AR391 containing a complete set of these advertisements.

It is mainly experimental, aiding General Electric scientists to solve high power transmission problems. Many such experiments yield no immediate return.

But in the long run this work is practical and important. It is part of the study which must go on unceasingly if this powerful force, Electricity, is to be fully tamed and enlisted in your service.
