Kennebec Valley Community College Pulp and Paper Technology Program is hosting this one-day work shop to be held at the University of Maine. The program is sponsored by the National Science Foundation to support the development of an advanced technical workforce in the US.

Topics to be covered include pulp preparation, handsheet making, and paper testing. The future of the industry and topics such as biofuels and 'smart packaging' are also discussed. Hands-on lab exercises are performed at the Process Development Center, a state-of-the-art facility in the Department of Chemical and Biological Engineering.
