To: matthew.revitt@maine.edu

Matthew,

As University of Maine System Chancellor Dannel Malloy mentioned in his [community message](#) this afternoon, technological challenges on the first day of Shield T3 asymptomatic COVID-19 testing on campus led to problems scanning the QR codes on the saliva sample tubes. Participants also experienced excessive wait times for their appointments. We appreciate everyone's patience and perseverance and apologize for the inconvenience.

Anyone whose test results could not be processed because of the QR code problems will be notified.

UMaine's T3 testing for the remainder of this week, Feb. 3–5, is now canceled to resolve the QR scanning issues. Daily COVID-19 testing of UMaine students and employees resumes Monday, Feb. 8. This week's appointments will not be rescheduled. All participants holding tickets for testing appointments this week should come next week to their assigned testing times, days and locations. **New tickets will be sent for next week's appointments.**

Your T3 appointment that you selected remains the same for the entire spring semester. If there is a need to reschedule due to an unplanned event, email um.covidtesting@maine.edu to request another appointment time
