## Report of the Superintendent of Schools

To the Honorable School Committee, Board of Selectmen  
and Citizens of North Kennebunkport:

LADIES AND GENTLEMEN:

It is with special pleasure and satisfaction that I submit this, my thirteenth annual report of schools, for your approval.

I have recently made a statistical study of your census, enrollment, elementary tuition pupils, and secondary tuition pupils covering the thirteen years I have been supervisor of your schools. These figures, as a table, will appear appended to this report.

In the first place, your census has greatly increased. As you will recall, in 1926 there were only 140 boys and girls in North Kennebunkport between the ages of 5 and 21 years, in 1938 there were reported 226 pupils.

In 1926 there were only 54 pupils enrolled in the town schools with 21 pupils attending elementary schools outside the town for which you paid tuition. In the same year there were only 10 high school students for whom you paid tuition.

Contrast the conditions just enumerated with the present figures. Of the 226 census group, 135 of these are in your town's elementary schools while 15 others are in elementary schools outside the town and are tuition pupils. At the same time there are 25 pupils in high school which for two years in succession has marked the largest enrollment in the years covered by the report.

In 1926 only three schools were operated. These other schools had been closed for many years. In 1938 all six schools are operated, with four of them crowded to capacity.

It appears from this study that in the near future more school facilities and space must be provided. The attention of your citizenry should be directed as to how best to plan when these tendencies have become actualities, some have advocated a school with several rooms operated as a consolidated school. Others have considered the advisability of enlarging schools already in use. I have no recommendation at this time but, however, would point out that with the rapid rates of population increase on route one, the Durell School and the Iron Bridge School will shortly be overcrowded.

In December I was informed by the State Commissioner of Education, Dr. Bertram K. Packard, that North Kennebunkport would again share in the State Equalization Fund. A special grant of \$152.00 to be allocated for permanent library purposes and special school accessories, such as maps, globes, etc., was sent to the treasurer, along with the State subsidy. This enables the schools to have some things that would otherwise be difficult to provide. This should in no way be confused with the regular textbook appropriation. This fund is for things not contemplated in the usual lines of textbooks and supplies.

When school was opened last September, it was found that there were not enough seats at three of the schools. Moreover, these conditions may arise again this fall. This need was met as an emergency. Accordingly, twelve seats and desks were purchased by order of the superintending school committee and conference and approval of Mr. Benson, first selectman. There was no appropria-

tion to cover the expenditure and therefore was carried. presumably, to the contingent fund.

The Durell School was painted inside and outside in June. This was a much needed bit of repair work and made a great change at this school.

The primary school at Burnham was done over inside. The flagpole at Iron Bridge was reset and some inside work was done to walls, and ceiling. The flag pole at North Chapel had to be reset. A new flagpole at Irving-School was supplied and set without expense by Mr. Philip Steel. The town furnished the paint and hardware. We wish to acknowledge this public service.

The annual cleaning of toilets and oiling of floors and varnishing of seats were carried through where needed. Mr. Andrew Lux had charge of the repair work in the schools, and gave it his personal supervision and approval.

#### TEXTBOOKS

The policy inaugurated last year, in regard to textbooks, helped to partly equip those grades that were the most desperately in need. However, the very large enrollment and the fact that many textbooks were completely worn out and obsolete left many grades and certain types of textbooks impossible to furnish under that appropriation.

Your schools will not be better in the long run than the textbooks that are used. Textbooks are the tools of the teacher and the child. The State Commissioner of Education in the Maine State School Bulletin of January, 1938, has this to say: "Towns should make adequate appropriations for textbooks. During the past few years many towns have failed to appropriate a sufficient amount for textbooks. Probably a safe guide to determine the necessary amount would be anywhere from two dollars to three dollars per pupil per year. It is

rather a short-sighted policy to expect results even with good teachers if the pupils are inadequately provided with suitable textbooks and instructional materials. The textbook appropriation, at the lowest estimate as set down by the State authorities, is two dollars per pupil. Our enrollment is 135 pupils. Therefore, your textbook appropriation should be \$270. There are many textbooks now in use in North Kennebunkport that are past use as an intellectual text. The extra State subsidy that came in last year earmarked for library books was spent for dictionaries and Lincoln Library books. One set was allocated to each school. These are used over and over again by all upper grade pupils as reference books.

It seems to me that the State recommendations, as regards textbook appropriations, should be followed in the appropriation for textbooks this year.

I fully realize that the tax rate in your town has been high. We all realize that six schools have a higher operating cost than three schools. Furthermore, I realize, perhaps, better than anyone else, how much you desire to maintain your schools on a satisfactory basis and appreciate the willingness you have so often manifested in being willing, for the sake of your children, to sacrifice other desirable town improvements for your schools. These troublous days in the world at large indicate plainly that appropriation of funds for education is the most important of the municipality.

The only values that endure beyond that indefinite range of depressions and inflations are human values. Your expenditures for education are your best investments and the safest.

#### HEALTH

The health conditions have been generally good, except at the Iron Bridge School. During the fall term impetigo broke out at this school and necessitated the

calling of the Board of Health, who closed the school for a week and ordered the room thoroughly cleaned and scrubbed with disinfectant. Those affected with the malady were excluded until they had recovered. There was considerable loss of school time and attendance will need to be without interruption for the remainder of the year at this school to make the usual grade placement in May.

The Durell School was closed for a week in February on account of teacher illness, and the Irving School lost a day or two by sickness of the teacher. This time, if over three days, will lie made up either during the week of regular vacation or in May.

A word at this time about the high school tuition may be in order. It appears from such data as is now available that only one pupil is scheduled to graduate from the high school group. There are nine pupils who will be eligible to enter high school this coming fall from the elementary schools of your town. There will, therefore, be thirty-five tuition pupils in high school and perhaps more. This means that your appropriations for high schools must care for the advanced registration.

I wish to take this occasion to express my high regard for the cooperation accorded me by the teaching staff and express my confidence in their ability to render to your youth a service far beyond the remuneration accorded them in monetary return.

Your school committee have counseled with me and given of their time and energy without limit, and we extend to you all a hearty welcome to come and inspect the various schools of your town.

Sincerely,

H. C. HULL,  
Superintendent.

## Report of County Nurse

To the Citizens of the Town of North Kennebunkport,  
I hereby submit my report for the period beginning  
January 1, 1937, and ending December 31, 1937.

In January arrangements were made with the selectmen for a family of seven to be transported to clinic at the Maine Eye and Ear Infirmary in Portland. The nurse accompanied the family at clinic and assisted in the transportation back to their homes. Other visits of investigation were made to homes of children regarding persistent cases of pediculosis found at schools. Visits were made to the home and to the family physician regarding children reported in need of tonsil and adenoid operations. Numerous other follow-up visits were made to homes of school children regarding defective visions found at school.

At the request of one teacher the nurse called at school and took two children to the office of Dr. Hancoc at Sanford to have teeth corrections.

The annual inspection was done in each school. The following is the report:

Pupils inspected,	117
Pupils with defects,	37
Defective teeth,	7
Defective visions,	12
Defective hearing,	1
Defective throat,	11
10 or more underweight,	1
20 or more overweight	4
Poor posture,	1

Excluded for evidence of pediculosis,	10
Teeth corrections.	40
Throat corrections made during- the year,	2

The nurse wishes to assure you that she is always glad to respond to any calls for service or consultation in your community.

To the superintendent of schools, the teachers, the selectmen, and all others who have helped with the health work this year, I am grateful.

Respectfully submitted,

OLIVE TWITCHELL. R. N..  
York County Health Service.

DEVELOPMENT ASSOCIATION FOR YORK  
COUNTY, MAINE

This is a county-wide organization founded for the sole purpose of developing and advertising the outstanding natural advantages and attractions of York County. Its one object is to increase the amount of revenue now being received by every individual in the county. Its founders feel sure this can be done, primarily, by increasing the tourist traffic into the county and by bringing in half a million more vacationists than are coming here each year at the present time. The Association would also assist the agricultural and industrial interests of the county in ways that are not covered by the excellent organizations which represent these important activities at the present time, and which may be said to be outside of their field of work. Mainly, this would be through channels of county-wide advertising and publicity which would mean increased sales for both the farmer and the business man, small or large.

York County has reached the point where it must present a united front in its effort to hold and to increase its present business. This is why the Development Association for York County, Maine, has been founded and is being backed by many of the most public-spirited and far-seeing men and women in the county.

Its program will include extensive county advertising-campaigns in the great newspapers of Eastern United States and Canada; the publication of a beautifully illustrated York County booklet in which each of its 28 towns and cities will have identical space and pictures; establish information bureaus to give out vital facts about

what York County has to offer; increase the sale of old farms and community homes to summer residents and make more taxpayers and more demand for local labor; develop and improve its highways; publicize the county's agricultural and industrial advantages; promote Old Home Days, Winter Sports, and other events that will attract large numbers of people from outside the county; mark its historical spots, and stimulate interest in making its communities and its highways more beautiful so that they will attract more people.

The Association has been so organized that every town and city has equal representation on its governing board. There can be no politics, no cliques, no special benefits for one section over another, within the organization. It must work for the county as a whole. It will have to be supported by low cost investor-memberships and the more who join it the more work the Association can do.

Complete details will be furnished all who write for information. Address, Development Association for York County, Maine. Biddeford. Maine.
