ALUMNI TICKET SERVICE

The Athletic Board has reaffirmed its belief in "the best seats for Maine alumni" policy in vogue at football games at Orono for several years by allotting approximately 1000 good grandstand seats to the Alumni office for distribution to Maine alumni, for both the Bowdoin and New Hampshire games.

Blanks to use in applying for tickets were mailed all alumni by October 18th. Instruction should be carefully followed. Grandstand seats for these two games are \$2.00 each.

Let the Alumni Secretary help you to be sure of a good seat by ordering early.

THE LAST LAP

For many of us the Memorial Fund has been as a living being; an individual promising much for Maine and the generations of Maine men and women yet to come. We have rejoiced at its accomplishments and pulled hard with it when the going has been hard.

The Memorial Fund is now just starting on its last lap. The final

phase of the drive is now on. 4,300 Maine alumni have backed the Fund to win. They have rooted and cheered it on for four years. Now that the finish is in sight it is time for all to help make the last lap a fast one, ending with a whirlwind sprint that will insure the Memorial Fund breaking the tape a winner in the most stupendous undertaking of Maine men.

Subscriptions totaling \$543,000 were made during the drive. The Indoor Field and Military quarters section of the proposed Memorial Gymnasium-Armory have been constructed and only this month all obligations incurred in this construction have been paid in full.

With all bills paid we now enter on that final phase: the collection of the money for and the construction of the Gymnasium section, which when completed will give Maine one of the finest athletic buildings in the country.

All this is merely a review of reasons why all subscribers should make every effort to make their payments promptly.

WHAT OUR RIVALS THINK OF MAINE TEAMS

Athletics at the University of Maine are on an especially high plane. We have known this for a long time. The fact is receiving more and more general recognition and Maine alumni will read with interest a letter from the coach at Connecticut Agricultural College following our victory there this fall.

We congratulate Fred Brice and are proud of him.

October 10, 1927

"Mr. Fred M. Brice
University of Maine
Orono, Maine
Dear Mr. Brice:

I am very sorry that I did not see you following the game Saturday. Was busy for a time fixing up some of the boys' minor injuries and when I came over to the Armory you had left.

I wanted to tell you that you have the best drilled team I ever saw and that your boys played a marvelous game here at C.A.C. The hard, fast, clean play and sportsmanship of your football team is a great tribute to you.

We wish you the best of success in your remaining games.

Sincerely yours,
Louis A. Alexander
Connecticut Agricultural College
Storrs, Conn."

PAY ALUMNI DUES NOW

"Pay your alumni dues now," is the slogan which the Alumni Association Finance Committee has adopted having set for themselves the task of raising \$5950. from payment of dues by January 1st.

To accomplish this goal, a thing which has not heretofore been done by our association, the Finance Committee seeks the cooperation of alumni, emphasizing the fact that the longer the delay in paying dues the greater the cost of raising the budget and consequently a small amount is left for the activities of our association.

It is impossible to proceed with a constructive program of work for the year until funds are available for whatever activities are outlined. If alumni will respond by prompt payment of dues the Finance Committee and Alumni Office will complete its work and the secretary will be at liberty to tackle other problems and render greater service.

The response during the first month of the campaign has been very fine but there is a long way to go yet. The class of 1927 bids fair to outrank any of the graduating classes since 1900 at the rate that they are now going.

Especially does the committee urge the payment of sustaining membership dues of ten dollars. In order to accomplish the budget for this year a larger number of this type of dues must be secured.

As a means of keeping alumni in

touch with the activities of classmates and friends, support the Association and thus forward the interests of our Alma Mater. As Maine men and women you are asked to pay, what, after all is a small amount of money, to maintain the one organization which is at your service, which fosters the best of our past and aims to build soundly for the future.

Pay your dues now.

CORRESPONDENCE

Mr. Burke feels that too few alumni support the association. We feel the same way. However a study of the situation is getting results and this year will break records.—Editor.

Sept 28, 1927

"The General Alumni Association,
University of Maine,
Orono, Maine
Gentlemen:

I have received the September issue of The Alumnus together with circular letter of September 20 from the General Finance Committee of our Association.

I was particularly interested in "This Year's Goal" in the above issue of The Alumnus. As I understand it, there are some 6,000 alumni of the University and evidently it is expected that less than 3% will be sufficiently interested in Maine's future to contribute as Sustaining Members and only 23% as Regular Members; in other words, a total of only one alumnus in four who will contribute as much as \$3.00 a year to assure the successful administration of the Alumni Association's affairs.

Unfortunately the nature of my work has been such as to preclude periodic visits to the Campus, because as a rule my business trips East come when the college is not in session. In fact, much as I regret it, I haven't seen any Maine team in action since the football season of 1909 and I am sadly out of touch with what is really going on. Nevertheless, I have always felt that the \$10.00 which I have contributed annually to help carry on the activities of the Association was a really worth while investment. "This Year's Goal" makes me wonder a bit whether or not it is such a good investment after all, and whether it would not accomplish more constructive good if I contributed it to, say, an Orphans' Home in China.

On second thought, I believe I will send along my check for a ten-spot, for we seem to have some 4500 orphans in our own Alumni family, and apparently it is

up to the submerged 25% to carry on until such time as the rest of the family come to realize that a strong spirit of loyalty among the alumni is just as essential to proper college spirit as is the loyalty of the undergraduate.

With best wishes for the success of the Association and Maine, I am

Yours very truly,

W H Burke '06"

A fine letter suggesting possible improvements in the Maine Alumnus. What do you think about it?—Editor

Lockport, N. Y.

Aug 22, 1927

"Mr Robert P Clark, Alumni Secretary,
University of Maine,
Orono, Maine
Dear Mr Clark

Relative to your cooperative letter of June 22nd, I have been greatly delayed in my reply due to pressure of affairs and because I wished to consult others before making my answer in respect to criticism of The Maine Alumnus.

First, I want to insist that such as I offer is no reflection on the capacities of those concerned in the publication of the paper and, in fact, it actually signifies my confidence in their ability to carry out any valid suggestions I may propose.

Those who have read the Alumni magazine, for the purpose of reflecting upon its improvement, have come independently, with remarkable coincidence, to the thought that the general tone is rather immature—appealing possibly more to recent graduates than to those who have reached the dignity of years or responsibility—I have attained neither, by the way. The critics are college men and women, and, as to the latter, I have chosen those of coeducational training especially, in order that they may possess the proper sympathy. Both the arts and engineering are represented.

I shall enumerate the points in order of their occurrence to mind.

(1) The quality of paper is rather poor in consideration of the fact that the publication represents such an institution as the University of Maine. Our Purchasing Agent states that the cost of a little better grade would not be great and that a Bristol cover (whatever that is) would add greatly to its improvement.

(2) It is usually considered preferable to place all advertising at the beginning and end. A larger amount of advertising would not be objectionable and a more presentable magazine would probably render this easier to obtain.

(3) Athletics should be arranged in a special group. At the end of the season, it might prove interesting to summarize

athletic history for the year. It is not the general practice, I believe, to give detailed accounts of various games. Alumni of such mentality as to be of importance to the University, are but slightly concerned with details of athletic events as they may obtain the same from newspapers and, if out of state, are proportionally less interested. In other words, the alumni paper should be well-rounded without excessive focus on any one student activity. Personally, I feel that the present athletic write-ups are well done.

(4) Other student activities should be given a slight, but descriptive, mention. This would not require much space and would add greatly to our reminiscences. I have frequently observed that the mode of expression in many articles veers towards platitudes of provincial journalism such as—"program was much enjoyed." Describe the program and let us judge as to its capability of being enjoyed! A detailed account is unnecessary but a proper choice of new but apt adjectives or curt sentiments would be expressive and convey the desired image.

(5) I strongly surmise that the Editor is aware of much that I have mentioned and I venture to hazard a guess that the difficulty lies in the extent of his duties being too inclusive for him to adequately remedy such. Might I offer the possibility of the cooperation of the English Department or others, in preparing articles, with more leisure time than the present organization possesses? I am assuming, of course, that said department is willing, as in most colleges. Besides this, there must be alumni who have knowledge of academic conditions or such as concern us as alumni and are willing to offer short sketches of interest.

(6) If ever by any remote contingency I should acquire to myself an offspring, and in due course of events, he should prepare for college, I would feel it of moment to learn of the status of certain schools so that I should know where to properly fit him for occupation in life. With this point—and others—in mind, I feel bold to suggest that a write-up of various departments or courses at the University, by the respective heads in charge, to give a short history of the development, new personnel or equipment and those items of consequence or interest to graduates of the same—might not be out of place.

(7) If ever I get back to Maine, my first queries will be as to the existence of certain professors and relatively stable characters (not pertaining to agriculture) whose impressions have lasted over from the years. Is this thought sufficient?

(8) Again, I am quite curious as to the trend of affairs in general—economic,

introduction of new courses, buildings and equipment, the activities of the staff in the scientific world, the methods used to weed out the great amount of the scholastically unfit who present themselves at the portals of Maine, raising of standards in student groups, and many other features which relate to the good name and well-being of the University of Maine. Others may be curious too! Any previous mention of these above has been too vague or incomplete to develop any impression.

(9) Naturally, it was a girl who suggested that a list of engagements might prove interesting—especially to our co-eds. In relation to marriage notices, it is usually considered good form to casually mention the bride's occupations, degrees or honors, or mention her parents, if these are well known. If it is the woman who is a Maine graduate, the same may be related for the husband or intended.

(10) The suggestion was offered me that a reduction of the columns of the magazine to two instead of three, with slightly larger type, would give a more creditable and less choppy appearance. I realize that the present arrangement may be dictated by circumstances and offer the above for what it may be worth.

(11) A casual description of annual student customs as Rising Night, the Bag Rush, and similar, might prove highly interesting in reclaiming forgotten memories. All these help to arouse dormant enthusiasm and I can readily conceive of this being of direct material gain to the University.

(12) In many alumni magazines, it is customary to give briefs of the work and lives of certain prominent alumni to arouse pride in their achievements and stimulate others to the same degree of success.

(13) I feel that the responsibility for an alumni paper rests essentially on the shoulders of the Executive Committee and that they should provide adequate support for the maintenance and continued improvement of the same. Might not some travel allowance be sustained whereby the Editor might visit alumni organizations of other colleges and incorporate any ideas gained, in his own respect. I feel that such might be a worthy investment.

I shall not weary you with further comment but allow you to winnow the worth of what I have mentioned. This letter is directed with the idea in mind that it is for your personal use and not to arouse criticism unfairly.

Wishing you all success in your venture of appealing to that heterogeneous Alumni Body, I remain

Very truly yours,
Evan F. Wilson, ex-'22"

EMPLOYMENT

Temiskaming, Que., Sept. 23, 1927
University of Maine,
Orono, Maine.

Dear Sirs:

We have immediate openings for the following men:

Three Industrial Engineering Designers for Drawing Office Work, preferably the type of men who could develop for Field Supervision on Construction. These men should be college graduates, experienced in pulp and paper industry. Salary range from \$225.00 to \$275.00 per month.

As it is desired to engage these men immediately, we would appreciate very much if you have men of these qualifications on your list whom you would recommend.

Yours truly,

Riordon Pulp Corporation, Limited,
L. S. Dixon, Const. Mgr.

Oct. 4, 1927

University of Maine Alumni Association
University of Maine
Orono, Maine
Gentlemen:

We propose to increase our retail sales force in New England and desire for this purpose ten to fifteen college graduates.

The General X-Ray Company is a Massachusetts Corporation and was organized some years ago to manufacture and sell x-ray and physiotherapy apparatus. During recent years our efforts have been concentrated in the physiotherapy field. A good proportion of the apparatus we sell is manufactured in our factory at Old Town, Maine.

Since the world war, physiotherapy has come forward by leaps and bounds, is now an accepted branch of therapy by the American Medical Association, and recognized by physicians as a very valuable adjuvant to the customary forms of therapy.

The future of physiotherapy looks very bright and offers positions with earnings limited only by the work a man is willing to put in.

As noted above we desire to secure ten to fifteen college graduates whom we will train to sell physiotherapy equipment. We have a school of physiotherapy wherein these men will be taught the fundamentals, a little anatomy, technic and principles of salesmanship.

We want single men about thirty years of age; one who lives in Burlington, Vt., one in Manchester, N. H., one in Portland, Me., one in Hartford, Ct., one in Providence, R. I., one in New Bedford, Mass., and six in Metropolitan Boston.

We would like to have you communicate with us if you know of any men

available for our sales organization, and we will be glad to go into detail of our plans.

Thanking you, we are

Very truly yours,
General X-Ray Company,
C. M. MacLeod

DEAN MERRILL ELECTED GRAND SIRE OF ODD FELLOWS

(Portland Press Herald)

Dr. Leon S. Merrill of Orono, Me., dean of the College of Agriculture at the University of Maine, today was elected Grand Sire of the Sovereign Grand Lodge of Odd Fellows. He is the first Maine man and the second New England man to be elected to the office, the highest in Odd Fellowship.

At last year's convention he won over several other candidates for the position of Deputy Grand Sire. In the ordinary course of events he would have been advanced automatically, but a contest for the office of Grand Sire developed this year.

Dr. Merrill became an Odd Fellow in June, 1886, when he was initiated into Table Rock Lodge of North Anson. In 1892 he transferred to Solon Lodge in his home town. He joined the Grand Lodge in 1895.

As Grand Master of the Grand Lodge of Maine, 1904-1905, Dr. Merrill added 11 new subordinate lodges to the grand lodge, an unusually large increase in one year. When he relinquished this chair he was made representative to the Sovereign Lodge.

For the past 21 years he has served on the Sovereign Grand Lodge's legislative committee, and for the past 13 years has been its chairman. He also is an ex-officio member of the legislative committee on matters outside of North America.

Since 1910 Dr. Merrill has been in charge of the University of Maine's extension work, and now is dean of the College of Agriculture. During the World War Herbert Hoover, now Secretary of Commerce, appointed Dr. Merrill Federal Food Administrator for Maine.

GIFTS TO THE LIBRARY

Two of the Alumni made important donations to the Library during the past year, and in both cases the Library was glad to have an opportunity to select the material that was wanted, by checking lists of the books offered.

From the valuable geological library of George P. Merrill of the class of 1879, were received many early American reports and surveys, besides a large num-

ber of other volumes which will be of especial value if the number of advanced students in geology increases. Many of these publications it is now very difficult to obtain except at great cost

Thru the kindness of Paul F. Slocum, of the class of 1915, were obtained 79 volumes of engineering works, including a file of the Scientific American Supplement from the beginning in 1876 thru 1901

Another gift, which it would cost about \$500.00 to duplicate, consisted of publications of the Hispanic Society of America, presented by the President and Trustees of the Society. It is unnecessary to state how much this will add to the value of the Spanish Department of the Library.

Besides these large gifts, the library received donations and deposits from sources classified below, but which lack of space does not permit us to acknowledge in detail.

THE GENERAL ALUMNI ASSOCIATION

A. W. Stephens, '99

Most of our alumni take the General Association for granted and whether they support it or not, approve it as an excellent organization and do not question that somehow it will continue to exist as long as does the University

The question of just why there should be an association and what it should accomplish is worthy of some consideration. Comparatively few of our alumni are so located as to be in direct contact with the University. A somewhat larger number, perhaps ten percent, come into contact with it to a limited extent by virtue of membership in local association. Probably eight out of every ten have no direct contact with the University and learn of its activities only thru the Alumnus. The Alumni thru the agency of the association have been able to be of very real service to their Alma Mater. Without this organization the Alumnus could not be published nor would it have been possible for the alumni to have presented the splendid Memorial Armory Gymnasium to the University.

lines, and cut in over the goal line after

The association has to a large extent been supported by a relatively small number of Alumni more or less in direct contact with the University, but it has become evident that many have failed to appreciate the importance of contributing to it.

Bearing in mind the unquestionable love and loyalty of Maine Alumni for their Alma Mater and their desire to continue to serve, it seems certain that all alumni and especially those who are far away from the University and therefore deprived of direct contact with it, will on giving thought to the subject, liberally support the General Association thru which they are able to accomplish so much

LAW SCHOOL ALUMNI MEET

The following Law School men and their wives returned for Commencement and had a jolly get together and dinner at the Bangor House on Friday evening, June 10th.

Mr and Mrs. Dudley Baldwin of Boston; Mr. and Mrs. Allen Sherman of New Bedford, Mr and Mrs. Abraham M. Rudman of Bangor; Albert J. Fortier of Presque Isle; Mr. and Mrs. Earl D. Hooker of Springfield; William Gallagher of Portland; Robert Cohen of Bangor, Reuben Levin of Manchester Depot; Mr Thornton of Belfast; Adelbert Miles of Rockland and Verner Gilpatrick of Bangor

Dudley Baldwin

RHODE ISLAND 0—MAINE 27

Although the Maine team which trotted onto the field for the opening of the game consisted of five linemen who had never started a college game before, it plowed down the field to score a touchdown in the first four minutes of play after Big John Lynch had recovered a short kickoff. Coltart took the ball over from the five yard line after long advances by Buzzell and Peakes had placed the ball within scoring distance. Peakes failed to kick the first goal but neatly placed the ball inside the bars in his next three attempts

Maine's second tally followed closely after the first. Rhode Island elected to kick, and tried a short one. The Bears then took the ball from midfield and in seven plays carried the ball over, Buzzell shooting 15 yards around left end for the score.

Pat Peakes, starting his third year as a member of the Maine varsity, late in the second period ripped and tore through the entire Rhode Island team for a 50 yard run and a touchdown. Again in the fourth period he received a punt to run the side-a 55-yard journey. Jim Buzzell encircled the ends on several occasions for gains

of from 15 to 28 yards, while Mike Coltart proved to be a consistent line plunger. Jackie Moran, sophomore from Brewer, went through for several gains of ten yards and better on hidden ball attacks. The Rhode Islanders' only scoring flash was a pass Stevens to Howes, which netted 45 yards and placed the ball on the Maine 32 yard line. During the last half the visitors tried 12 passes and completed seven but the majority of these netted little or no gains

CONNECTICUT 13—MAINE 14

One point allowed the Maine Bears, from Orono when a Conn Aggie player was offside after the former club had made a touchdown proved to be the margin of victory in which Coach Fred Brice's visiting team triumphed over the local farmer boys by a 14-13 score here, Saturday afternoon.

The contest was one of the most exciting ever staged on the local battlefield, and was featured by a last period rally in which two touchdowns were netted by the home team after a score of 10-0 had been chalked up against them. Rip Black, Maine end, broke through and blocked Captain Eddy's attempted drop kick for the tying score of the game after the second touchdown.

It was the second victory of the season for Maine and a hard earned one. It was easily the hardest fought and most exciting football game seen here in years, with both elevens using everything they had to gam the verdict. Despite the gruelling nature of play for four periods, only two substitutions were made on each team.

FT. WILLIAMS 0—MAINE 97

Remembering a recent victory over the soldiers a year ago by a 7 to 6 score, the Maine team certainly went into the game this year with intentions of regaining lost laurels.

Brice did not take any chances with the Soldier team at the outset of the game and started his full first string lineup. Two touchdowns, both made by Coltart were pushed over the line in the first stanza with the Bears being forced to fight for nearly every inch of territory gained, to produce each. Then the fun began and the good condition of the men with plenty of reserve strength took their toll.

Three more touchdowns were made in quick succession at the outset of the second period with Coltart charging over the line the first two times and Buzzell making the last. It was then that Brice issued his first call for reserves and it was answered by Jackie Moran and several others who started where the more experienced men of Brice left off carrying the ball across the line again before the period was ended.

The third and fourth periods were repetitions of the second, with the Maine second and third string backs galloping wildly through the soldier's line and secondary defense.

Young intercepted a forward pass and ran 70 yards for a touchdown in the last period while Abbott dashed 50 yards for a tally after receiving a punt at midfield, in the only two real spectacular plays of the game.

The game, despite the fact it was uninteresting from a contest standpoint did hold the majority of the spectators in their seats until the last. The Maine system of offense never functioned more perfectly and was a pretty thing to watch with interferers breaking the soldier line to pieces, carrying on and picking off the secondary defense and runners capered unmolested for runs of from 10 to 40 yards before they were hauled down.

Despite the fact that they completed two forward passes for first downs, one netting 25 yards and the other 15 the soldiers lost more ground than they gained, during the contest.

MAINE HARRIERS EASILY DEFEAT NEW HAMPSHIRE

Minus the service of its Captain, Andrew Cushing, who is on the injured list, Maine's cross country team won an easy 36-20 victory over the New Hampshire State Hill and Dalers, over the rugged Orono-Stillwater course this afternoon. Captain Weeks of the New Hampshire team was forced from the race at the half way mark when he was stricken with cramps.

Lindsey, Richardson and McNaughton, all members of the Maine team came down the final lane well bunched to make a blanket finish 50 yards ahead of Hobbs, the first New Hampshire runner to come.

The order in which the harriers scored was Lindsey, Richardson and McNaughton of Maine; Hobbs, New Hampshire; Chalmers, New Hampshire; Benson, Maine; Eastman, New Hampshire; Stimson, Maine, Corpenger, New Hampshire, time 36 minutes 20 seconds. Timer, Simpson, Harvard; Judge, Corbett, Maine, starter, Lloyd, Maine.

THE UNIVERSITY AND THE ALUMNI

Remarks of President H. S. Boardman before the General Alumni Association June 11, 1927

For some time I have had a feeling that the Alumni should be better informed regarding the activities of the University and that it would not be out of place for the president, especially as he is one of you, to bring what message he might have to the regular meeting of this Association, rather than give it at the time of the Alumni dinner. Our meeting ground here allows more intimacy, and I invite comments upon anything which my remarks may bring to your attention.

It is not my purpose to recount the extra-curricula activities of the year nor to go into details with regard to administrative matters. Most of the former you already know, and most of the latter would only weary you. I desire, however, to bring to your attention one of the tendencies connected with modern education which appears to me to be rapidly developing, and also to tell you of some of the ways in which I think we have made

progress during the past year. First let me speak of the relations which exist between the average institution and its alumni, and perhaps apply them to ourselves.

I do not for a moment question the loyalty of an alumnus for his Alma Mater, but it has appeared in the past that a few years after graduation the average alumnus has very little inside knowledge of his institution except thru athletics. One of our well-known educators in discussing alumni claimed that the most of them regarded their Alma Mater as a place of sentimental loyalty, of comradeships, of friendships, and activities, and all sorts of relations of fun and pleasure. His opinion was that college loyalty is one of the most unintelligent things that could be imagined in connection with an institution of learning. While much of this may be true it is certainly not wholly the fault of the institution. It appears that there has existed in the past a gulf which neither party has succeeded in bridging. No one can doubt the interest which an institution has for its former graduates and everyone knows the pride with which an alumnus speaks of his Alma Mater and the interest which he shows in hearing first hand information of the institution when the opportunity comes. I shall never forget the many pleasant impromptu gatherings which I have attended in the past in various cities when in the discharge of my duties as engineering dean I have been a delegate to some convention. At these gatherings the questions would come thick and fast with an eagerness which showed the desire to learn of the present day activities. One can, however, get only superficial knowledge by such methods. In fact you by meeting here once a year, can not get a real insight into the workings of your institution. You gain impressions, it is true, but even those may be visionary and some are sure to be wrong. At this point I am reminded of a clipping which illustrates my point.

"Some years ago a Boston newspaper presented a cane to the oldest man in every Massachusetts town and then published a daily interview with each of these individuals in which the cane recipient gave his personal receipt for old age.

"They were extremely enlightening. The man in Monday's article lived to be 78 because he had never slept less than 10 hours a night. On Tuesday he was trumped by an 82-year-old who never slept over six hours out of 24.

"The man interviewed on Wednesday attributed his 90 years to the fact that he never smoked, while the Thursday paper stated that the man who lived to be 95 years old was an inveterate smoker.

(Continued on Page 22)

"DAN" WOODWARD, MACHINE DESIGNER

From Walworth Boston Craftsman

"One of the ancient kings left monuments in the various countries of the world in which he travelled; Carnegie libraries dotted over the country remind us of the liberality of that able Scotchman and some twenty odd machines in Boston Works bear testimony to the Yankee ingenuity of Dan Woodward. As machine designer in our Engineering Department, many of our most efficient operations have had their inception upon his board. The modern automatic machine with its gears, cams, levers, cutters and multitude of parts speaks a language as unintelligible as Greek to the layman in mechanics. To the up-to-date designer, however, each mechanical part is a potential factor in greater speed, production or efficiency. The designing of special machines to meet the requirements of our varied product has been the all absorbing work of Dan Woodward for a number of years.

A recent product of Dan's skill is the hex miller in the Brass Shop. This machine mills the hexagon on brass valve lonnets and does its work so efficiently, that plans are underway to install a number of them. It is based on the principle of those in operation in Kewanee Works, where machines of this type have demonstrated their ability to not only make a better product, but to reduce cost. Four machines of a similar type can be operated by one man and with less effort than the former style of miller. The old type was a hand fed and hand indexed machine. Compared with the present method it was a somewhat awkward operation, a good deal like trying to rub your chest and pat your head at the same time.

Among the machines designed by Dan are the flanged rolling machine in the Pipe Fabricating Department, which makes the famous Walmanco joint; the disc milling machines in Iron Body Valve and Brass Finishing Departments which mill slots in gate valves discs; the three way flange facing machine in the Iron Body Valve Department, which faces three flanges simultaneously; and numerous others. His knowledge of air and oil pressure mechanisms has found an outlet in many of these machines and has saved much muscle for workmen and made possible the production of better goods, in line with modern industrial progress.

Dan is a "Down Easter," having been born in Winthrop, Me., where his grandfather, with one of those large old fashioned families, had migrated from Massachusetts. At an early age he developed mechanical tendencies perpetrating his

first designs with a jack-knife. In due time, as a matter of course he entered the University of Maine, where he received his bachelor's degree. A few years later he returned for his M. E. (Master's).

Class spirit at his Alma Mater is strong and June always finds Dan back on the campus. Like so many of the state universities, Maine dates back to the sixties. Its colleges of Technology, Arts and Sciences and Law are justly celebrated.

Dan's industrial career has been both broad and varied. He has held positions with the General Electric Company, Westinghouse at Pittsburg; Fore River Shipbuilding, Shaw Crane Company of Muskegon, Mich., Gisholdt Machine Company, Madison, Wisc., Brown & Sharpe and Pratt & Whitney. In his duties with these companies he has worked with many of the leading machine designers in the country.

His connection with Walworth dates from 1910 except for an absence in 1916 to 1918 at which time he was engaged in Government work on munitions. In the period of his connection with the company, he has seen its greatest growth. That he is a real traveler is shown by the fact that he commutes every day from his home in Lowell. If he had ever taken the time to design a distance registering device to wear in his hat, it would total some 18,000 miles per annum."

NEW ASSISTANT DIRECTOR OF EXTENSION SERVICE

Arthur L. Deering, county agent leader of the Extension Service, College of Agriculture has been appointed assistant director of that organization according to the announcement just made by Dr. Leon S. Merrill, director of Extension Service and dean of the College of Agriculture. This appointment becomes effective immediately and is a recognition of Mr. Deering's splendid service covering the period of fifteen years in extension work.

In announcing the appointment of Mr. Deering as assistant director, Dr. Merrill pointed out the increasing number of problems that naturally have arisen with the growth of the service which in 1912 amounted to but four or five agents as compared with the present extension force.

Mr. Deering was first appointed county agent in Kennebec County beginning December 16, 1912. He was teacher of agriculture in Hartland Academy for three months following his graduation from the University of Maine, College of Agriculture in June of 1912. In college he was very active in athletics and student affairs. After his brief period of teaching he went to Augusta as county agent.

After a little more than seven years

very successful work in Kennebec County where Mr. Deering made a host of friends he was promoted to county agent leader February 16, 1920. In this position he has been responsible for the work of the 15 county agents in the state. The high quality of personnel and the work which these agents have been doing is a reflection of the success which Mr. Deering has achieved in this position.

He will continue as county leader having added to his duties those of assistant director and will thus have considerable amount of work with the state extension agents particularly as it relates to the formulating and carrying out of the extension programs in the counties.

MAINE NIGHT, NOV. 4th

Prominence to university accomplishments besides athletics, will be given this year at Maine Night and as such subjects will be covered by able speakers, it is expected that a new record will be set in both attendance and in the quality of the program.

Maine Night will be held again in the Indoor Field. It is the only place available large enough to hold the crowd. With the experience gained last year a committee appointed to arrange the best seating and speaking facilities is expected to make many improvements over last year's scheme.

Maine's splendid football team will be represented on the program by Coach Fred Brice and Captain Moses Nanigian '28.

Joseph A. (Joe) McCusker, '17 has been invited to serve as cheer leader.

President H. S. Boardman, '95 will act as chairman of the evening and he will introduce Professor C. P. Weston, '96 who will speak on "The University of Maine of To-day." The Memorial Fund Committee will be heard from. R. H. Fogler, '15, the new president of the General Alumni Association will speak for the alumni and the Senior Skulls have been asked to select a speaker to give student opinions and comment.

The Maine band will be on hand of course and as hundreds of students and alumni mingle together under the huge roof, "Joe" McCusker is sure to lead the Maine supporters to enthusiastic support when the Maine Bear meets the Polar Bear of Bowdoin.

Letters received in the alumni office indicate that alumni are returning for Maine Night this year and they are coming from far and wide.

The more paid up members we have in the alumni association, the more the alumni office can accomplish.

THE ALUMNI COUNCIL MEETS

The Alumni Council met in Portland October 2, at the Congress Square Hotel. Much immediate business was taken care of and the problems of the year discussed.

A. L. Deering, '12 reported for the Finance Committee. He explained how a campaign was underway to have the quota set for alumni dues payments reached by January first. The class loyalty contest was explained and the purchase of a silver shield as a prize was authorized.

The Alumni Secretary reported concerning Memorial Fund collections and explained the results being secured by field workers doing personal follow-up work on delinquent subscriptions.

The printing contract for the *Maine Alumnus* was awarded to the University Press on the campus.

A special committee was appointed to study the Dix Plan for alumni reunions and report on it at next commencement.

It was voted that the council bring to the attention of the University authorities, the need of a new alumni directory and offer the use of the files and records in the Alumni Office as well as the co-operation of the Alumni Secretary. It was urged that a new directory be put out by 1929.

The awarding of honorary degrees was discussed and a co-ordination committee suggested.

There were present at the meeting: R. H. Fogler, '15 of New York; E. E. Chase, '14 of Portland; A. L. King, '14 and N. H. Mayo, '09 of Portland; C. P. Crowell, '98 and Hosea Buck, '93 of Bangor; A. L. Deering, '12, E. H. Kelley, '90 and R. P. Clark, '15 of Orono; Harry E. Sutton, '09, W. D. Towner, '14 and Walter Can-gill, '00 of Boston.

E. R. WINGARD, FORMER U. OF M. COACH, DEAD

A telegram has been received in Orono announcing the death of Edgar Ramey Wingard at his home in Selins Grove, Penna., on July 31. He was stricken with cerebral hemorrhage and he passed away a week later. For several years Mr. Wingard was professor of physical culture and director of athletics at the University of Maine. Since leaving here he has been connected with Susquehanna University, Selins Grove, Pa., their home town, and since severing his relation to that institution has been president of a silk manufactory in Selins Grove, president of the Selins Grove bank and district governor of the Rotary club. The funeral took place from the family residence in Selins Grove Aug. 3.

1908 CLASS NEWS

W. P. Hamilton, Attorney at Law, Caribou, Maine, writes, "Tell the boys and girls of 1908 that when I come to Orono in June 1928 that they should address me as "Grand Dad" not of one but of many. Three cheers for Grand Dad, he was the very first one to answer the 1908 circular letter.

Stacy C. Lanpher, Maine 1908, Law 1916,—now serving sentence as Clerk of Courts, Piscataquis County, Dover-Foxcroft, Maine, writes that he will be in Orono for the 20th reunion and gladly help reorganize the "Old Guard."

Raymond Fellows, Attorney General, State of Maine, reports from Augusta that his shoulder is lowered to help keep the ball rolling for a Jolly '08—20th. Every lift is a help, come on get set for the flag rush.

J. A. Gannett, Registrar, University of Maine, Orono, Maine, will be present without question to help the other fellow have a good time—altho Jim's big job will be to lead the blind in the ways they know not—for the new campus is an unknown land to most of us young Grads.

Claude P. Meserve, Bridgton, Maine, invites all returning 1908 members to travel to Orono in June 1928 by way of Bridgton. He modestly offers to look after all automobile troubles and guarantee safe delivery in Orono. Of course Claude will clear the bar of service to land in Orono for the big noise.

Warren Trask—Lumber Merchant of Boston, in the spirit of the same old "Ditto" of old, claims that he will be in Orono for our 20th and what is more he will bring some one with him. That is the spirit that will land a big bunch at the good old U. of M. 1928 commencement.

Ralph Heath and wife of Melrose, Mass. have promised to join our happy crowd. Hats off to the Ladies, boys, they will help to make things go.

Dan Chase, Executive Secretary, The Sportsmanship Brotherhood Inc., #342 Madison Ave., New York City, has promised to land both feet in Orono next June and help the other fellow have a good time. Say if we all return with that same spirit the sky will be the limit.

M. A. Sturtevant, Dist. Supt. of Schools, Shewsbury, Mass. has made his plans to pat the palms of his feet on the Maine campus for the '08 reunion. Merle has a daughter entering Simmons this fall. I am sure that Merle has our congratulations but then some of the rest of us can keep young for years with our youngsters while he is acting the part of Grand Dad.

L. S. Dixon, Temiskaming, Que., P. O. box #196, scrawled so many notes over

the '08 circular letter that it was hard to decode all the facts. However he reports a son in the class of 1930 University of Maine, and states that altho he is unable to sing he might be tempted to play baseball. Hence we have victim #1 for that undefeated '08 baseball team that will be ready to meet and beat any other alumni team next June.

E. L. Milliken, Treasurer and General Manager of the Belamose Corporation, Rocky Hill, Conn. Residence address, 142 Kenyon St., Hartford, Conn. has made his plans to be present in Orono at the 1928 Commencement. Skim has three children to his credit which ought to speak well for the future growth of the University.

1908

All members of the class of 1908 in attendance at the Maine-Bowdoin football game Nov. 5 are requested to meet at 1.30 P.M., Nov. 5th on steps of Lord Hall for the purpose of organizing a working committee for the 20th reunion of the class.

Yours truly,

E. N. Vickery

CHEMIST WANTED

The following letter is self-explanatory:

"Gardner, Mass., Oct. 20, 1927
University of Maine,
Orono, Maine.
Gentlemen:

We have a position as assistant in our Research and Testing Laboratory open to a protestant graduate in chemistry. Will you put us in touch with any young man interested in this line of work? The work of the laboratory is varied and the experience excellent.

Yours truly,

Heywood-Wakefield Company,

J. J. Fulton,

Director Chemical Laboratory."

More alumni have paid dues to the General Alumni Association to date this year than at the same date ever before in our existence—and by a wide margin. It should be a banner year.

Look out for the Duesaredue. You will feel better as soon as you mail the check that drives him from your door.

Do you read carefully all letters from our Finance Committee? You really should. This committee is made up of three Maine alumni and they write only facts and honest opinions. Give them a chance to convince you.

(Continued from Page 19)

THE UNIVERSITY AND THE ALUMNI

"If one does not become so confused by such conflicting statements and notions that he is disgusted with all formulae for old age he is indeed fortunate. But when he begins to realize that these isolated cases have not lived because of what they did, but in spite of it and that "what's one man's meat is another's poison" he is well on the road to a solution of the problem."

It appears then that some way must be found to get a much closer connection between you and the University, some way to make that powerful potential body of nearly 7000 living former students a real dynamic force for the good of the institution. In making this statement I am not belittling the individual efforts of many of our alumni, neither am I forgetting that splendid memorial which stands as a monument to the memory of those Maine men who gave their all for the cause of justice and right. I do claim, however, that money, much as we need it, is not all. Time and effort in helping us to solve our problems, your presence here as often as you can come, your active participation in local alumni associations and your constructive criticism and advice are just as necessary. But constructive criticism can not be made without a complete knowledge of our problems. So we come back to the statement that some way must be found to bring you all closer to us so that you may see the changed conditions which in turn are sure to bring in to your reasoning, factors which make your conclusions very different from those made at long range.

One of the great tendencies of modern education is to do away with the old network of compulsion, for the American college now is beginning to suggest to its students that they teach themselves, that they do some original work both of research and creation, and that especially they use their brains for thinking. To aid in this general proposition the college offers its wealth of libraries, its lecture courses, its aid wherever possible, and, most important of all, its professors. These latter are to be thought of as co-laborers, fellow students, and, as in the tutorial system, the sharp line of division between the teacher and the taught gradually and gratefully becomes lost. These are not mere idle words or visionary sentiments; for the movement is beyond a tendency—it has become a reality and future educational methods will be developed along these lines. Not only do the truly great educators of the present day acknowledge this and plan for its development, but the youth of our country are

fitting into the scheme in a wonderful manner. I wish every one here could read an article by Thomas A. Clark, Dean of Men at Illinois entitled, "What's the Matter with our Young People?" He has had years of experience and his conclusion is that "The young person of today is more resourceful than any other young person whom I have ever known. He can do anything that he wants to do and can do it better than any of his predecessors. Challenge him and he will meet your challenge with a success that is almost unbelievable. The chief difficulty is to get him to the point of wanting to do something. . . . Our young people as a whole are judged, too, quite commonly by the escapades and the derelictions of the few. In general I have found that from eighty to ninety per cent of the young people with whom I have had to do are conscientious and hard working and anxious to do well. It is the minority of ten per cent who have stirred up comment and made themselves notorious by their irregularities, and for these things foolish, indulgent parents are most largely responsible." I believe with Dean Clark that the material with which we have to work is the best the world has ever seen, and that the opportunities of the colleges were never greater.

The great problem confronting us, however, not only as a nation but as a state, is the limit to which we shall go in our enrolment. The three private institutions of Maine have reached their maximum and do not indicate any desire to expand. This leaves the University as the only chance to absorb the overflow. Next Monday we are graduating nearly 250 boys and girls, one of the largest classes in our history. We have every reason to believe that, should we allow it, our registration could easily be increased. It is true that certain courses could accommodate more students without extra expense, but in general we may say that no great increase can be made in our student body without having available larger appropriations. Our present policy is to make what we have better, to increase in quality and not quantity; but in so doing are we fulfilling our duty to our State? Should we not increase in both quality and quantity if the demand appears? This brings me to my thesis which I advanced in the beginning of my term as Acting President, that some way should be found to settle for some time to come the educational policy of the State so that we may carry forward a constructive program and not be forced to undergo the haphazard methods of the past and the unbalancing of our policies every two years.

The knowledge that the Alumni Council has for several months been working

along this line has been a source of much satisfaction to me, and as I was writing this I received a copy of a letter which has today been presented by the Council to the Trustees offering their services in the attempt to solve this great problem. You may be sure that this meets with my whole-hearted approval, and I shall use every effort to work with the Council.

May I now briefly review some of the outstanding events of the year which are closely associated with the development of the University.

It has been my hope ever since taking office that the Legislature of 1927 would provide enough funds so that salaries and equipment could be increased and our institution brought up to a much higher state of efficiency. The most of you know that we asked for \$293,000 for the purpose and got \$40,000. For building construction we asked for \$185,000 and got \$140,000. Each college made a careful study of its departments which resulted in certain savings which, added to the extra amount allocated to them, enabled us to make salary increases, which altho they are not as generous as desired, are quite substantial. It may be of interest to note that the old scheme of automatic increases has been abandoned and now advancement in both title and salary is based upon merit. This makes it less comfortable for the deans, and president; but is, in my opinion, the only proper way to develop an outstanding faculty. During the year we have lost some good men from our teaching staff. The most of them have had better opportunities elsewhere and all we could do was to bid them "God Speed," and look for others to fill their places. We feel that we have been unusually fortunate in attracting men of prominence for these vacancies. We must, of course, always expect a certain yearly turnover in our staff, and we would not be healthy without it. Our concern is to keep it at a reasonable figure.

During the year the money left by Oliver Crosby was used to construct what is to be known as the Crosby Mechanical Engineering Laboratory. The building is not fully completed, as the bequest was not sufficient. The wings, however, will be made usable this summer and a year from this time a part of the special building fund appropriation will be used to finish the center portion. The last is to consist of an experimental hydraulic laboratory, and when completed will compare very favorably with any in the country.

In the evolution of educational methods experimentation and research have been coming more and more into evidence so that now an educational institution which does not foster its development, not only

in the applied sciences but in arts as well, is not keeping up with the procession. This university is essentially a teaching institution, but a certain amount of research, judiciously handled, is very proper and necessary to keep the teachers alive and is also an inspiration to the students. I am glad to say that this is being recognized here more and more, and the Trustees have signified their approval by setting aside the income of \$100,000 of the Coe Fund for special research work. It is hoped to add to this amount from time to time. This is of especial value in the development of graduate work, which is slowly and surely becoming one of the strong features of this institution. During the past year and a half a new graduate faculty has been developed, which in its aims and purposes, allows perfect freedom in the development of graduate and research work of all colleges. This is a distinct advance over the previous custom where such work was chiefly possible in the liberal arts and pure sciences.

Last September Paul Cloke, head of the Department of Electrical Engineering of the University of Arizona, was appointed Dean of the College of Technology and entered upon his duties in October. He has more than fulfilled our expectations and is proving himself an able administrator. One of his lines of endeavor is the formation of contacts with the industries of the State. The Engineering Experiment Station which has existed in embryo for several years is expanding and will ultimately be of considerable importance in engineering research. Already the work of the Station along the lines of cement and concrete is attracting general attention.

The Agricultural Experiment Station has been able to increase its usefulness by aid of further federal appropriations. Many research problems of vital interest to the agriculture of the state are under way. The last project to be undertaken is a study of the blueberry industry in Washington County which bids fair to last for several years and which is expected to do for that county what our previous research in potato growing has done for Aroostook. Research work has also been started in Home Economics.

We are being honored this year by having the University chosen as the meeting place of the Annual Convention of the Society for the Promotion of Engineering Education. This is a national organization of great influence and its conventions are eagerly sought after by educational institutions. It is expected that during the last days of this month at least 400 educators, representing all parts of the Union and Canada, will be in session here.

Last summer we were honored in like

manner by the New England Grange Lecturers Conference, eight hundred strong. Over seven hundred were housed and fed for a period of three days. The expenses of these conventions are borne by their respective organizations.

Plans are already under way for the construction of a new dairy building and milk house and a second section of the greenhouse. These buildings will fill a long felt want in the College of Agriculture and will provide a plant of which we may well be proud.

Our needs are many. I am going to mention only three and two of these are not likely to be furnished through state appropriated funds. The first is a union building and the second a chapel. I will not go into details of why these are important, but will only say that we have no place where off-campus students may assemble for study or pleasure, or where returning alumni may meet, or where faculty and students may meet on a common level.

In closing I wish to say that in this the first year of my administration I feel that I have had the warm cooperation of the faculty, students and alumni, and if we have made any advance along the road in our development—and I believe we have—it is due to the fine spirit shown by all, and is not due to the efforts of any one man. I believe that we can accomplish great things together, but without team work the best man is a failure in his undertakings. I look to the future with courage and feel that in the next few years our combined efforts will see many of our hopes realized.

Alumni Personals

WEDDINGS

'10—Ernest Lamb and Miss Polly Ayers were married July 9th, 1927 at Bangor. Mr. Lamb is engaged in the Wool business in Boston.

'13—Ralph O. Shorey and Miss Alice Webb were married May 14, 1927 at Belleview, Pittsburgh, Pa. Mr. Shorey is in the construction department of the Pennsylvania Railroad at Pittsburgh, Pa.

'15—Earle Brockway and Miss Bettina Bateman were married June 29, 1927 at Cohasset, Mass.

'17—Dr. Henry A. Peterson and Miss Emily Thomason were married August 20, 1927 at Huntsville, Texas. Dr. and Mrs. Peterson are residing at Kennecott, Alaska.

'18—The marriage of Francis Head and Miss Miriam S. Chapman took place July 8, 1927 at Brookline, Mass. Mr. and Mrs. Head are residing at Athlenstand Road, Newton Center, Mass. and Mr. Head is associated with Olmsted Bros., Landscape Architects in Brookline, Mass.

'19—Paul A. Morris and Miss Eleanor A. Smith were married recently at Norway. Mr. and Mrs. Morris will reside at Berwick where

Mr. Morris is Principal of the Sullivan High School.

'20—The marriage of Raymond M. Astle and Miss Margaret G. Harrigan took place August 15 at Houlton. Mr. and Mrs. Astle are residing on Court St., Houlton, where Mr. Astle is associated with the Astle Music Store.

'20—Stanley M. Currier and Miss Theresa V. Grametbauer were married June 17, 1927 at New York, N. Y. They are residing at 3912 214th Place, Bayside L. I., New York. Mr. Currier is with the W. T. Grant Company at 455 Seventh Ave., New York, N. Y.

'20—Morris A. Dolliver and Miss Ruth C. Kittredge were married June 29, 1927 at Tremont. Mr. and Mrs. Dolliver will reside at Burlington, Vermont, where Mr. Dolliver is a teacher of chemistry at the University of Vermont.

'20—The marriage of Miss Barbara Dunn and Prof. Elmer R. Hitchner took place June 19th, 1927 at Orono. Prof. and Mrs. Hitchner are residing at 51 Bennoch St., Orono. Prof. Hitchner is a member of the University of Maine faculty.

'20—The wedding of Dwight M. Ingraham and Miss Edith F. Sewall took place in Bangor, September 16, 1927. Mr. and Mrs. Ingraham are residing at Deering St., Portland.

Ex-'20—Clarence L. Emerson and Miss Winifred McNamara were married June 30, 1927 at Millinocket. Mr. and Mrs. Emerson are residing at Millinocket where Mr. Emerson is with Gonya's Pharmacy.

Ex-'20—Kathleen M. Snow is now Mrs. Warren E. Hill. The wedding took place August 17, 1927 at Rockland. Mr. and Mrs. Hill are residing at Adams, Mass., % Hoosic Valley Lime Corp.

Ex-'20—The marriage of Miss Ava M. Weymouth and Mr. John McGhee, Jr. took place August 14, 1927 at Howland. Mr. and Mrs. McGhee are residing at 360 Longwood Ave., Boston, Mass.

'21—Alden W. Berry and Miss Marjorie R. Driscoll were married June 29, 1927 at Bangor. Mr. and Mrs. Berry are residing at 209 West Minister Road, Brooklyn, New York, where Mr. Berry is a chemist for the E. R. Squibb & Sons Company.

'21—Walter L. Hatch and Miss Sarah M. Herron were married June 1, 1927 at Rochester, New Hampshire. Mr. and Mrs. Hatch are residing at Wells, where Mr. Hatch is in the Law business and also tax collector for the Town. He was graduated from Boston University Law School in 1925, spending one year at Harvard Law School. He was admitted to the Bar of Maine in February, 1926.

'21—Reginald M. Jocelyn and Miss Marion B. Custer were married July 20th, 1927 at Pittsburgh, Pa. Mr. and Mrs. Jocelyn are residing at King Edward Annex, 225 Melwood St., Pittsburgh, Pa. where Mr. Jocelyn is employed by the Bell Telephone Company.

'21—Raymond D. Stephens and Miss Marjorie E. Barber were married September 26, 1927 at Bangor. Mr. and Mrs. Stephens are residing at 38 East Street, Bangor.

Ex-'21—The marriage of Kenneth G. Smith and Miss Arline H. Bussell took place June 30, 1927 at Pittsfield. Mr. and Mrs. Smith are residing at 28 Reynolds Ave., Everett, Mass., where Mr. Smith is Instructor at the Chelsea High School.

'22—Donald H. Cross and Miss Iva M. Wood were married August 11, 1927 at Greenville. Mr. and Mrs. Cross are residing at Greenville where Mr. Cross is manager of the Crafts Company Store.

'23—Nelson B. Aikins and Miss Sara C. Leighton were married at Windham, August 13, 1927.

'23—The wedding of Lionel E. St. Pierre and

Miss Mabelle E. Hopkins took place June 20, 1927 at Winterport. They are residing in Auburn where Mr. St. Pierre is a civil engineer employed by the State.

'23-'23—The marriage of Ralph E. Thomas and Miss Ruth M. Coombs took place August 13, 1927 at Bangor. Mr. and Mrs. Thomas are residing at 2910 Cortland Ave., Detroit, Michigan.

Ex-'23—Sumner S. Clark and Miss Sylvia V. Drillen were married recently at Bangor.

'24—Donald Alexander and Miss Ruth M. Cook were married August 13, 1927 at Pittsburgh, Pa. Mr. and Mrs. Alexander are residing at West St., Wilkesburg, Pa.

'24—Miss Anna E. Green and Adolph C. Robinson were married August 28, 1927 at Old Orchard. Mr. and Mrs. Robinson are residing at 170 Claremont Ave., New York.

'24—The marriage of Karl H. McKechnie and Miss Irma V. Davis took place July 18th, 1927 at Woodstock, New Brunswick. Mr. and Mrs. McKechnie are to reside in Houlton where Mr. McKechnie is teacher and athletic director at Ricker Classical Institute.

Ex-'24—Sewall Drisko and Miss Anna MacGregor were married September 3, 1927 at South Gouldsboro. Mr. and Mrs. Drisko are residing at Harrington.

Ex-'24—Hollis M. Kimball and Miss Stella Mullen were married June 6, 1927 at Fort Fairfield.

'25—Charles P. Burbank and Miss Geneva Hinks were married June 21, 1927 at Yarmouth. Mr. and Mrs. Burbank reside at 343 Essex St., Lawrence, Mass., where Mr. Burbank is with the S. S. Kresge Company.

'25 Ex-'25—Harold Gerrish and Miss Frances L. Towne were married September 6, 1927 at Milo. Mr. and Mrs. Gerrish are residing at Milo.

The Switchboard

*An Advertisement of
the American Telephone and Telegraph Company*

A WEB of cords plugged into numbered holes. A hand ready to answer signals which flash from tiny lamps. A mind alert for prompt and accurate performance of a vital service. A devotion to duty inspired by a sense of the public's reliance on that service.

Every section of a telephone switchboard typifies the co-ordination of human effort and mechanism which makes possible America's

far-reaching telephone service.

Its cords link for instant speech those who are separated by a few

miles or by a continent. Its guardian operators are of the telephone army — men and women vigilant to meet a nation's need for communications.

In plant and personnel, the Bell System is in effect a vast switchboard serving a nation that has been transformed into a neighborhood through telephone growth and development.

Many a man is
doing work day after
day that an electric
motor can do for less
than a cent an hour

ASK your electrical expert to help you select
the labor-saving electric equipment best suited
for your factory, farm, or home.

Guided by human intelligence, electricity can do almost any job a man can do. From stirring to grinding, from lifting to pulling, you will find a G-E motor specially adapted to any task.

GENERAL ELECTRIC
