How to replace your COVID-19 vaccination card (07/21/2021)

If you are fully vaccinated for COVID-19 but cannot find your vaccination card, these are the steps you can take to acquire a record that can be uploaded to the University of Maine System's (UMS) vaccination verification portal. The University of Maine System only requires a digital copy of your vaccination card to complete verification.

Photo of Your Vaccination Card: If you have a photo of your card on a phone or other device, please visit the vaccination verification portal and follow the steps to upload an image.

Contact Your Medical Provider or Primary Care Physician: Contact your provider to ask if they can provide proof of vaccination from your medical records or by accessing your state's immunization registry and provide a record or letter verifying your status for upload to the University of Maine System portal with the type of COVID-19 Vaccine administered and dates.

Contact Your Pharmacy: If you were vaccinated at a pharmacy, many pharmacies like Walmart, CVS and Walgreens, may provide individuals with digital vaccination records through their website that can be uploaded to the UMS portal. You may also be able to visit the providing pharmacy and request a copy of your record.

Contact Your State's Immunization Registry: Contact your state registry directly. In Maine you will need to email, fax or mail in a signed copy of an authorization to release information directly to the Maine Center for Disease Control and Prevention. The Maine CDC strongly recommends individuals contact their medical provider or primary care physician as a faster alternative.
