THE duties of the present board of Editors begin with this number, and we enter upon them willingly, and with a determination to do our best. We realize that the CADET has been ably edited during the past year, and that it will be no easy matter to keep it up to its present standard, but by hard work, and the help and encouragement of the students and alumni, we hope to make it still an interesting publication. It must be remembered that we are young and inexperienced in such work, and our other duties only allow us a certain amount of time to put on our paper, hence to make it what it should be, and what the graduates of the college wish it to be, we must have your assistance and support. THE CADET will be conducted in nearly the same manner as heretofore, but we shall always be ready to make any change which will increase its usefulness and interest. We hope you will feel free to criticize our columns, and anything that you may suggest to make them better will receive our careful consideration. Give us your best wishes and encouragement and we will strive to make the CADET a success. If our hopes are realized, we shall be satisfied, and we trust that you will appreciate our efforts.

AT the close of the spring term the three upper classes go before the public with declamations, themes and graduating essays,

and many dread to appear on the stage because of fear or nervousness. Some persons seem to have no fear, and we envy their composure, while they are really nervous but do not show it. A prominent singer says that the first time she appeared before the public, she was very nervous, and it took her utmost power to control herself; but after she had finished, an old singer came up to her and said, "I wish I could be as calm on the stage as you." Some people have this faculty of appearing self-possessed when they are not, while others cannot control themselves in the least. We have even seen a pupil break down entirely, and take her seat weeping, when trying to recite before her classmates. It is a feeling of being terribly frightened when there is nothing to be afraid of, akin to bashfulness, in which one is embarrassed, without knowing the reason why. Many actors use stimulants to take away their fear, and in this way become addicted to drink. Such persons should be pitied and not blamed. There is a preparation of cocoa, which stimulates without intoxicating; and it is said that taking a half wine glass, before going on the stage will give one confidence, and produce good results. However, physicians are not agreed as to whether it is harmless or not, and we would not advise one to use it to any extent. People who are nervous have the consolation that nearly all great speakers, singers, or actors have this same feeling, and one who has no fear or nervousness is not capable of obtaining the best results. An appearance of over-confidence produces a bad effect, and in order to move an audience, one must get them in sympathy with himself. One, then, should by practice gain control of himself, so as to appear at ease, and still be able to hold his audience.

It is estimated that one fourth of the college graduates in this country owe their educational advantages, wholly or in part, to their own efforts. While one may think he is unfortunate in not being situated as well as some, with whom he is associated, he will find that in depending upon himself he will obtain characteristics which will ensure his success in after life. We do not mean to say that is an advantage to be poor, but we do claim that a student who has the determina-

tion to obtain an education in spite of poverty, and who will work his way through thick and thin, will develop a character far above those who have no need of exertion. Many persons have talents of which they never dreamed, and which would lie dormant and be lost to the world, unless called into action by necessity. This is why the following, taken from a daily paper, is true: "At Harvard, Yale, Princeton and other colleges, the most capable young students of the day are those who are obliged to depend upon themselves for a livelihood. The college rolls of honor tell this story in unmistakable figures. The men who are doing the most for themselves in their college work, have the most numerous and exacting tasks outside of it, by which college expenses are paid. Daniel Webster supported himself throughout his college course. Thomas Hill, ex-president of Harvard, literally worked his way through college, mostly by manual labor. Thousands of other cases might be cited to show that it is and always has been true, that self-dependent young men get the most out of their course of instruction, as evidenced by their fame in after life." In nearly all colleges prizes are offered for excellence in work. In striving to obtain these prizes, the self-supporting student has the same incentive as the others, and in addition, the fact that he must win in order to pursue his studies further. This necessitates harder work, and he reaps the reward of his labors. There are many ways in which a student can obtain employment, both in college and during his vacation; so we would say to those who desire to attend college but have not the means, to remember that "what man has done, man can do."

CLASS POEM.

There are times in the lives of us all
 When the last farewell must be spoken;
 When with dear scenes, and still dearer friends,
 Close ties must forever be broken;
 When the heart is filled to o'erflowing
 With emotions of joy, yet of pain,

For the Future holds forth its bright prospects,
And the Past says "Never again."

Oh, never again shall we who depart
From under old M. S. C.'s care,
Assemble together for work or for play
In her buildings and grounds so dear.

No more shall the campus resound with *our* shouts,
In the work-rooms *our* voices are stilled;
And in all that once made the heart to rejoice,
Our places ere long will be filled.

When the boys come back in the beautiful fall,
Happy as sons returned home,
We'll not be there to grasp each hand:
Our college life is done.

For we, who for four long, happy years
Have traveled the same bright path,
Soon will be scattered, as seed by the wind
Thrown broadcast over the earth.

And some may go toward the setting sun,
Full many a mile away,
And forever pass from the sight of those
Who as brothers part to-day;

And some may seek in southern lands
The road that leads to fame;
Still others strive in their own birth-place
To win an honored name.

But wherever we are, we've always the chance
(From which blessing no man is deprived)
To do some good on the earth, that it may
Be the better for our having lived.

God grant that not one, as time flies on,
Shall prove aught but manly to be—
True to himself and his fellow men,
And a pride to the M. S. C.
So adieu to all that the old men say
Forms the happiest years of life,
When plans are made and the foundation laid
That will stand 'mid the world's testing strife.

And on those whom, alas! we are leaving,
With whom we shall share nevermore
The jolly good times of a college life,
As in good old days of yore;

Whose well-beloved voices and faces
May gladden our hearts ne'er again,
But long in our memories will linger,
As we sail over life's stormy main;

On those comrades, I say, old Eighty-eight
Can simply its blessing bestow,
And bid them God-speed, when *they* shall start out
In life's field *their* furrow to plow.

E. H. E., '88.

THE OLD GRAVE-DIGGER.

The twilight shadows deeper grow,
As in his weak and withered hand
Fritz swings the mattock to and fro,
And fashions in the yielding sand
A grave; the weary labor done,
He lets the spade and mattock fall,

And gazes where the setting sun
Burns dimly on the churchyard wall.

To heaven he lifts his weary eyes,
And thus complains in deep distress:
"Oh, wondrous strange is fate!" he cries,
"Here in the earth's dark, deep abyss,
A youth will soon be laid to rest,
Whom Death, the Reaper, would not spare,
While I, by fourscore years oppressed,
Still live to breathe the vital air."

There came a youth with hurried breath:
"Hold! cast the spade and pick away;
The death was but apparent death,
And life again resumes its sway."
A moment Fritz looks at the swain,
Then at the grave thus newly made:
"And is my labor all in vain?
Who in this bed will soon be laid?"

Then from the grave he turned to go,
But in his veins the living tide
Grew thick, and would no longer flow,
And with a feeble prayer he died.
Soon rang the bells a solemn strain,
As in the earth his form they place;
The grave was fashioned not in vain,
Its maker sleeps in its embrace.

From the German.

H. M. E., '76.

ADVANCED DEGREES.

Some time ago an article appeared in the *New England Journal of Education*, urging the necessity for higher attainments for the Master's degree. "The Bachelor's degree," says the writer, "generally marks a definite course of study of some kind, usually four years in length. The Master's degree, on the contrary, marks nothing. It simply means in most cases that its possessor has received it from some college as an honorary title, or that he has managed to live three years after graduation, and so received it *in cursu*."

The writer of the article stated a fact. The condition of things which he describes is that which exists to-day. Perhaps there was a time when the Master's degree indicated the possession of a more generous scholarship than that of the newly-fledged graduate; but if ever this was the case, it is no longer so, except in comparatively rare instances. The college professor writes M. A. or M. S. after his name, and so does the graduate who has spent the three years since receiving his diploma in getting in front of a base-ball.

Would it not be well for the scientific col-

leges to get out of the rut in which some of our older colleges are still running, and set the much-needed example of requiring post-graduate study along definite lines as a pre-requisite for the Master's degree? It is true that some of our colleges, literary and scientific, already make this requirement, but in a large majority of cases the only pre-requisites seem to be an interval of three years since graduation, and five dollars with which to pay for a diploma.

It is peculiarly necessary that the scientific colleges should insist on post-graduate study, tested by examination, since their requirements for admission are at present, as a rule, lower than those for admission to the literary colleges. They may thus equate the difference in scholarship, if any, which is to be found in the graduates of the two classes of institutions.

This post-graduate study should, as before stated, be along definite lines. Presumably the ordinary college course will give the student a fair degree of discipline and culture. His subsequent work in this day of specialties should be in special departments of knowledge. The work required need not of a necessity be done at college or under supervision: it may be done whenever or wherever most convenient to the student. The main thing is to see that it is done somewhere, before the degree is granted. The college should map out the work to be done, and conduct all examinations; beyond this it need not concern itself.

The following illustration will serve to make the foregoing clearer. It represents a post-graduate course in General Physics, so arranged that the work may be done at leisure, without actual attendance at college. Of course it would be better in some respects if the work were to be done in a laboratory, but this is not absolutely indispensable for the larger part of the course.

I.—METEOROLOGY.

Tyndall—Forms of Water.
Loomis—Treatise on Meteorology.
Abercromby—The Weather.

II.—SOUND.

Mayer and Barnard—Sound.
Tyndall—On Sound.
Everett—Vibratory Motion and Sound.
Blaserna—Theory of Sound.

III.—HEAT.

Review of Ganot, pages 214, 386.

Stewart—Treatise on Heat.

Maxwell—Theory of Heat.

IV.—LIGHT.

Mayer and Barnard—Light.
Tyndall—Six Lectures on Light.
Lommel—Nature of Light.
Lockyer or Schellen—Spectrum Analysis.

V.—ELECTRICITY.

Tyndall—Lessons on Electricity.
Jenkin—Electricity and Magnetism.
Prescott—The Telegraph.

The course outlined above does not pretend to be an ideal course. Doubtless the Faculty would in some cases prefer other works to those suggested for study. But it can easily be seen that the candidate for the Master's degree, after having thoroughly studied the authors named and passed examination thereon, could not fail of having a knowledge of physics far in advance of that possessed by the ordinary graduate.

Courses in various subjects should be laid out, so that the candidate may have large freedom of choice. The work need not be exclusively of a scientific nature. The most of our scientific colleges provide quite liberally for literary culture, and if a student has a distinct literary bias, provision should be made for study along his favorite line. Then, too, in colleges supported in part by Congressional land grants, the subject of political economy would seem to be peculiarly appropriate.

In conclusion, the writer ventures to hope that this article may call forth the opinions of other members of the alumni on this subject.

LETTER FROM AN ALUMNUS.

IN a recent letter to the CADET by "R. K. J." the subject of giving appropriate names to the college halls was advocated. The idea is a good one, and should be pressed upon the attention of the Trustees until they take some definite action upon the subject. The names now borne by the different buildings are trivial, and barely serve to distinguish one from the other. College graduates are wont to look back upon their student homes with affection, and to refer to them with pride. What satisfaction can a graduate have in referring to his former home as Brick Hall, a name that tells merely the material of which the building is constructed;

or to White Hall, thereby distinguishing the kind of paint with which it is covered? Suppose, too, that the latter building should ever be painted a slate color, the name now used would then not only be trivial but inaccurate.

By all means change the names of the buildings. Morrill Hall, Oak Hall, and Fernald Laboratory would sound far better to a graduate than Brick Hall, White Hall and the Laboratory. These names would not only distinguish the buildings, but would also continually remind us of men who deserve to be remembered for the services which they have rendered to the college.

'76.

TO THE ALUMNI OF THE M. S. C.

The Alumni Association desires to secure a correct list of the addresses of the alumni as soon as possible. It will greatly facilitate matters if each alumnus will forward his address on a postal card to the corresponding secretary of his class. If he will also add his occupation the information will be gratefully received. A list of the corresponding secretaries is below, that there may be no mistake made. It is proposed to send a copy of the Annual Report of the college to the address thus obtained, and as we do not wish to waste any reports, it is particularly desirable that the address should be correct.

'72. E. J. Haskell.....	Saccarappa.
'73. J. M. Oak.....	Bangor.
'74. Walter Balentine.....	Orono.
'75. E. F. Hitchings.....	Warren, Mass.
'76. N. P. Haskell.....	Orono.
'77. S. W. Gould.....	Skowhegan.
'78. E. C. Walker.....	Lovell.
'79. F. E. Kidder.....	Boston, Mass.
'80. A. H. Brown.....	Old Town.
'81. A. T. Ingalls.....	Bridgton.
'82. Chas. S. S. Bickford.....	Belfast.
'83. C. E. Putnam.....	Boston, Mass.
'84. G. H. Allan.....	Dennysville.
'85. H. T. Fernald.....	Amherst, Mass.
'86. J. F. Lockwood, 2224 Lenox Ave.	New York, N. Y.
'87. C. F. Sturtevant.....	St Paul, Minn.
'88. W. J. Hancock.....	Saco.

As the time in which the work must be done is limited, please give the matter your early attention and greatly oblige,

yours very truly,

CHAS. S. BICKFORD,

Gen. Cor. Sec., M. S. C. Alumni Asso.

OBITUARY.

Miss Maude A. Matthews died at her home in Stillwater, June 4, 1888. She was a member of the class of '89, of the Maine State College, and was loved and respected by the entire class, and all connected with the college. She left college on account of sickness, about a year before her death, and steadily grew weaker, until she passed away. Her courage and cheerfulness during her sickness were something wonderful, and she died as she had lived, happy and cheerful, with a firm Christian faith that could not be shaken. The class of which she was a member attended the funeral in a body, and after her death drew up the following resolutions:

MAINE STATE COLLEGE,

Orono, Me., June 7, 1888.

Resolved: That we, the class of '89, of the Maine State College, firmly relying on the divine wisdom of our Creator in removing from our midst our beloved classmate, Miss Maude A. Matthews, do hereby express our tender regard for her, and our deep sympathy for her afflicted family and friends, and our sorrow at her removal.

Resolved: That a copy of these resolutions be presented to the afflicted family, and also be published in the CADET.

Laxness!!

'Rah for M. S. C.!!!

"Let this *kid* in."

Jocko has been cruelly accused of playing a "snyde trick."

It is generally understood that the Seniors and Juniors will not bear questioning.

The Publishing Association has been re-organized, and will be incorporated under the laws of the State.

A rotating sphere with a blackboard surface, for illustrating spherical Geometry and Trigonometry, has been added to the property of the College.

Eastman, '88, is enjoying a few weeks at home before leaving for Topeka, Kansas, where he has a fine position.

The Sophomores in Surveying began a survey of the Campus May 22.

The Base Ball craze does not seem to be wholly confined to the students. One of our worthy professors after calling up nine members of his class, and listening as many times to the familiar expression "not prepared," exclaimed, "Nine innings without a run."

Some members of the Cadet Band assisted the Orono Band in their work of Decoration Day. The boys report a hard day's work and a good time.

A large number of the students were present at the exercises held in Town Hall the evening of Memorial Day. The exercises were very interesting.

Hastings, of the class in Surveying, has been "Miraudy-ing" the road in front of the College.

W. N. Sawyer has been awarded the contract for building the Experiment Station. His figures were the lowest received, \$7,297. The work is being pushed forward rapidly, and will be completed as soon as possible.

Our Ball Team is this year doing what it has heretofore had the reputation of not doing,—working, and with success.

One of the *insectivorous* Juniors tried to catch a fly; but as it turned out to be a hornet he muffed it.

The Seniors attended the last Chapel Friday, June 8th. They carried out an interesting programme for four evenings of the following week; Tuesday evening at Professor Balentine's and a call on Professor Rogers; Wednesday evening they assisted in painting the town so red as only M. S. C. students can paint when their representatives on the diamond are successful; Thursday evening they took tea with President Fernald, on their return to Brick Hall enlivening the air in that vicinity with such songs as '88 is the Best Class in College, etc.; Friday evening was spent with their genial

classmate "Nat" Wilson, at his home in Orono.

Lieut. Phillips gave his last drill to the Hamlin Guards of Bangor, Friday, June 8th. He has done much for the Maine Militia as well as for the Coburn Cadets; and his efforts are everywhere appreciated.

One of the boys feeling patriotic, swept out the grand stand the other day before the game of ball. In doing so he found a lead pencil and remarked: "That proves that a man will get his reward; one should not be afraid to do a good deed if he does not see the pay ahead." Follow suit, boys.

The entire class in Analytical Geometry were excused from examination on 90 per cent. principle. This shows good work. (?)

The Frye Light Guards of Lewiston, have presented Lieutenant Phillips with a beautiful and costly sword and belt as a mark of their appreciation of his efforts as their instructor. Captain Hoyt made the presentation in behalf of the Company in a pleasing manner. Lieutenant Phillips was completely surprised. He responded briefly in a few well-worded remarks, which were received with cheers and tigers by the members of the company.

Nicholas says that mosquitoes go south in the winter. In the Middle States they are called reed birds; in South Carolina rice birds, and in Florida, birds of paradise; whereupon Mike wants to know where they are called wild geese.

We clip the following from the *Commercial*: The many friends in this city and Orono, of Mr. Will Philbrook, of Senior Class at the Maine State College, will warmly congratulate him upon his marriage, the happy event having occurred in Winslow, Sunday, at the residence of Rev. T. B. Williams. The bride is Miss Louisa C. Lary, of New York, who formerly resided in Shelburne, N. H., Mr. Philbrook's home, for several years. She is a charming and accomplished young lady. Mr. Philbrook is one of the most popular students at the college, prominent in his society, and has been in command of the battalion of cadets during the past year, besides receiving numerous other college honors during his course. His many friends predict a successful future for him.

Mr. and Mrs. Philbrook are now stopping at the Bangor House, and will pass commencement week in Orono. During the summer they will reside in Bethel, with Mr. Philbrook's parents. The college, and other friends of the happy couple, will wish them a happy wedded life.

The mice will play when the cats are away, and it is just good sport to watch Jim flirt with the two ladies who are doing the floor scrubbing in the recitation rooms.

The work of excavating for laying the foundation for the new Experiment Station is under full progress. The ground has been broken on the eminence nearly in the rear of Coburn Hall. The excavation has wholly to be made by blasting into the solid ledge. Those who happen to be in the vicinity of Coburn Hall are warned of the coming explosions by the cheerful blasts of an ancient fog horn.

The Ball Team has done work this term of which every student, alumnus, and friend of the institution should be proud. Laboring under the great disadvantage of having little or no gymnasium facilities, being unable to take an extended tour of New England for practice games, our diamond being later freed from the snows and frosts of winter than that of any other team in the league, they have gone into the contest and by sheer hard work have come off victorious.

One of the alumni says that they used to call the train across the river the *tri-weekly*, as it would try to get up one week, and try to get back the next.

Prof. Rogers has sailed for Europe. He will be absent from this country about nine months, and during his stay will make a thorough study of the languages, customs, and habits of the people of Europe. His language classes will in part be under the instruction of Mrs. Fernald during his absence.

During commencement week one of the Freshmen tried to go home with three different girls the same evening. He thus describes his success: "I got left on first, second and third, and then stole home." If any one can beat this record his chances for the first nine are good.

It gives much pleasure to announce the presence on the Campus of many of the alumni.

In nearly all we find a sentiment of satisfaction at the success the CADET is achieving as a college journal. We assure the alumni and all friends of the CADET that their support is not unappreciated.

At the end of this term Lieut. Charles L. Phillips severs his connection with the college, and will join his regiment, the Fourth U. S. Artillery, at Newport, R. I. It is with feelings of heartfelt regret that we part from Lieut. Phillips. Our best wishes go with him, and we shall watch every new success which he achieves with deep and congratulatory interest. The chair of Military Science and Tactics will be filled by Lieut. E. E. Hatch, Eighteenth U. S. Infantry. Lieut. Hatch is a graduate of West Point, class of '84. He was appointed from Liberty, Maine. After graduating with high standing, he was assigned to duty at Fort Hayes, Kansas, where he served until ordered here. We heartily welcome Lieut. Hatch, and hope he will be as popular as his predecessor.

Miss Mamie Mayo, assisted by nine other young ladies at Orono, entertained the base ball team upon the lawn at Prof. Hamlin's, Wednesday evening, June 27. All report a very pleasant time.

There has been obtained from the Brown & Sharpe Mfg Co. a new model for illustrating the various motions and different kinds of gear teeth. The model embraces the involute, epicycloidal, twisted and skew-bevel teeth, together with several kinds of racks. It will be a great aid to those of the Mechanical Department in understanding the different ways of applying gear teeth, and in giving them some insight into the fine work that can be done on them.

The ground for the new Experiment Station was broken June 7. The plans and specifications for the building were made by F. E. Kidder, of Boston. From them we judge it will be a handsome structure, and supply a want which has long been felt by this State. We hope to see the farmers of the different sections of the State profit by the results of the work which will be carried on, as good results are a certainty under the present able management.

COMMENCEMENT.

Saturday, June 23.

SOPHOMORE PRIZE DECLAMATIONS.

In spite of the threatening weather a large audience assembled in the town hall to hear twelve members of the gay and festive class of '90 declaim for the Prentiss Prize. For two days back, the Sophomores, assisted by the Orono High School girls and a few stray Freshmen, had been at work upon the decorations of the hall, and on this evening, it presented a very pleasing appearance. All of the pieces were exceedingly well delivered, showing the result of careful training and study, and it was the opinion of the audience that the committee had a difficult job before them in bestowing the prize. The following is the order of exercises:

MUSIC.

1. Parrhasius and the Captive..... *Willis*
HARRY T. HAYES, Oxford.
2. The Black Horse and His Rider..... *Sheppard*
NATHAN C. GROVER, West Bethel.

3. The Grandeur of the Universe..... *Mitchel*
HUGO CLARK, Lincoln.

MUSIC.

4. Irish Aliens and English Victories..... *Shiel*
G. HERBERT BABB, Sebago.

5. The Fireman's Prayer..... *Conwell*
E. FENNO HEATH, Bangor.

6. Death of Benedict Arnold..... *Leppard*
ELMER L. MOREY, Colombo, Ceylon.

MUSIC.

7. The Death Bridge of the Tay..... *Carleton*
HARRY D. DUNTON, Boothbay.

8. The Prisoner of Chillon..... *Byron*
CHANDLER C. HARVEY, Fort Fairfield.

9. Kate Shelley..... *Anon*
EDWARD H. KELLEY, Belfast.

MUSIC.

10. Has the Capital Been Captured..... *Wm. P. Frye*
JOSEPH R. RACKLIFFE, Hampden.

11. The Raven..... *Poe*
JOHN W. LEWIS, Milton Mills, N. H.

12. The Ride of Collins Graves..... *J. Boyle O'Reilly*
GEORGE M. PILLSBURY, Scarboro'.

MUSIC.

Sunday, June 24.

BACCALAUREATE SERMON.

Sunday evening a large audience assembled in the town hall to hear the Baccalaureate Sermon delivered before the members of the Senior Class, by Pres. M. C. Fernald. The sermon was a very able one, and held the closest attention of every person in the audience until the close. He preached from the text, Am I my brother's keeper?—Genesis 4:9. Whosoever

will lose his life for my sake shall find it.—Matthew 16:25.

Monday, June 25.

JUNIOR PRIZE ESSAYS.

A still larger audience gathered on the evening of June 25, to listen to the Prize Essays by the Juniors. The hall decorations were much more extensive and beautiful than on any of the previous evenings. On one side of the stage was a pillow of white flowers with "M. S. C." in dark letters, and on the other a similar one bearing on it '89, both surrounded with many beautiful flowers and vines. All the parts showed careful study and research in preparation, and each was rendered in a creditable manner. Following is the programme.

MUSIC.

1. American System, G. S. VICKERY, Bangor.

2. Agricultural Education, F. P. BRIGGS, Hudson.

3. The Study of Languages, J. S. FERGUSON, Searsport.

MUSIC.

4. Country Roads, G. G. FREEMAN, Cherryfield.

DEDICATION OF COBURN HALL.

At exactly fifteen minutes past twelve the battalion was formed on the usual parade ground, after which they were marched to the village and escorted Hon. Hannibal Hamlin, the Governor's representative, and the members of the board of trustees to Coburn Hall. The exercises of dedication were held in the auditorium at the top of the building. room, capable of seating between four and five hundred, and to-day it was taxed to its utmost capacity. During the exercises the President announced that the building formerly known as Brick Hall had been christened Oak Hall, in honor of Hon. Lyndon Oak, President of the Board of Trustees, and the building formerly known as White Hall was hereafter to be known as Wingate Hall, in honor of — Wingate, one of the early members of the board, and a firm friend of the institution. Brief addresses were made by Major Dickey, of Fort Kent, Rev. Chas. Davison, of Greenville, and Rev. Dr. Pepper, President of Colby University. Following is the programme.

ODE.

Ode, Mrs. M. C. Fernald, Air, "The Old Oaken Bucket."

A full score of years, with their records, have entered
Eternity's gate, since wise men in their day,
With hearts in the weal of posterity centered,
Here planted good seed to be fostered for aye,—
Good seed that was precious beyond common knowing,
Long nourished in darkness and watered with tears;
Its sunshine, the faith of a few in its growing,
Its culture, the courage that yields not to fears.
But e'en while the germ of rich promise seemed sleeping,
To childish impatience for growth without time,
Who holds all right efforts in vigilant keeping,
He blessed the young plant and He taught it to climb.
Its strong roots out-reaching, its bright blades up-springing,
At length its fair fruitage appeared to the sight.
The years, as they pass, richer harvests are bringing,
Their God-given increase we hail with delight.

With praise for the past to the bounteous Giver,
With trust for the future, in gladness we meet
On the beautiful banks of the still-flowing river,
Our sheaves, with rejoicing, to lay at His feet.
Our ardor renewed by His promise of blessing
To those who are faithful in service, tho' small,
True hearts and firm hands to our labors addressing,
May harvests here reaped be the glory of all.

Wednesday, June 27.

GRADUATING EXERCISES.

A large audience assembled in the Town Hall, Wednesday forenoon, to listen to the themes presented by the members of the graduating class for the attainment of bachelor's degree. The articles were all carefully composed and finely delivered. At the conclusion of the exercises the class were marched to the stage, where they were briefly addressed by President Fernald, who announced the following degrees: upon William Jerome Hancock, Thomas George Lord and John Wood Hatch, of the course in Agriculture; upon Nathaniel Estes Wilson, Francis Stephen Brick, Harry Foster Lincoln, John Russel Boardman, Ralph Hemenway Marsh, and Harry Butler, of the course in Chemistry, and upon Edward Henry Elwell, Jr., of the course in Science and Literature, the degree of Bachelor of Science; upon Charles DeWitt Blanchard, William Philbrook, Frank Adelbert Smith, Dudley Elmer Campbell, Seymour Farrington Miller and Hiram Bertrand Andrews, of the course in civil engineering; upon Claude Lorraine Howes, George Edwin Seabury, George Stetson Bachelder, Seymour Everett Rogers and Fred Langdon Eastman, of the course in Mechanical Engineering, the degree of Bachelor of Mechanical Engineering. After the conferring of the degrees, the class was briefly addressed by Councilor Warren, the representative of the Governor, who handed them their diplomas. The President then announced the following advanced degrees: upon Elmer Orlando Gooddidge, '85, and Leonard Gregory Paine, '85, the degree of Mechanical Engineer; upon Henry Torsey Fernald, '85, Levi William Taylor, '83, Harriet Converse Fernald, '84, and Oliver Cummings Farrington, '81, the degree of Master of Science. Then amid great applause came the announcement of the conferring of the degree of Civil Engineer upon Lieut. Charles Leonard Phillips.

The awarding of prizes was next in order.

The Prentiss Prize for the best Junior essay was given to Fred Percy Briggs, of Hudson, with honorable mention of the themes of George M. Gay, of Damariscotta, and Mertimer F. Wilson, of Orono. The Prentiss Prize for the best Sophomore declamation was awarded to George Herbert Babb, of Sebago, with honorable mention of J. R. Rackliffe, of Hampden, and E. L. Morey, of Colombo, Ceylon. The Libbey prize for the best agricultural theme was given to F. P. Briggs, of Hudson, with special mention of C. G. Freeman, of Cherryfield. The special prize for the Sophomore maintaining the highest rank, both in deportment and studies, was awarded to Chandler Cushman Harvy, of Fort Fairfield, who ranked 97.1. Hugo Clark, of Lincoln, ranked 94.89, and E. F. Heath, of Bangor, 94.15. The Freshman prize for a similar record was awarded to Leslie A. Boardway, of Orono, with a rank of 96.6, Wm. R. Farrington coming next, with a rank of 95.3, and James Walker Davis third, with a rank of 94.6. The awarding of the prizes closed the exercises, after which came the Commencement dinner. Following is the order of exercises.

CLASS DAY.

The decorations of the hall were much more elaborate and beautiful on this day than on any of the preceding days. The parts were all exceedingly well taken, and were very interesting, failing not to hold the closest attention of the large audience until the close. A large stuffed turkey-cock hung suspended by a wire in the centre of the hall, bringing to the minds of many, recollections of '88's famous "six-dollars-apiece racket." At the close of the exercises the professor of Natural History was called to the platform and the turkey was presented by the president of the class to the College Museum. The Professor accepted the gift in

Air:—Old Oaken Bucket.

How dear to our hearts in the days that shall follow,
 In the days and the years when receding from view,
 The scenes of this spot which our memories hallow,
 The pure-flowing fountain whence knowledge we drew;
 The valley and hillside, the river still-flowing,
 The forest and field we have oft wandered through
 And every sweet breeze in the summer air blowing
 Still whispering our hearts "be firm and be true."
 To kind Alma Mater, our grand Alma Mater,
 To dear Alma Mater we'll ever be true.
 Afar through a world of both sorrow and pleasure
 We'll wander apart from the scenes of our youth,
 But ever we know we will hold it a treasure
 To have drank for a time from the fountain of truth; *
 But sad are the hearts we bring to the parting,
 And sadder they'll be when the parting is through,
 But we'll hide from our class-mates the tear that is starting
 And bravely we'll whisper each other "be true,"
 To kind Alma Mater our grand Alma Mater,
 To dear Alma Mater we'll ever be true.

BASE BALL NOTES.

MAY 30.

Our boys played their first game with the Colbys, at Bangor, May 30, and defeated them by a score of 14 to 3. Small was very effective, striking out nineteen men, while our boys batted hard, driving Parsons out of the box in the fourth inning. Following is the tabulated score.

JUNE 2.

Our second game with the Bates was played at Orono, June 2. Our boys batted very freely, while the Bates could not touch Small but shut out in every inning but one. The fielding of both nines was very good. The score stood M. S. C. 16, Bates 2.

On the morning of June 9 the National Base Ball Nine of St. John, accompanied by a number of other members of the St. John Athletic Association, arrived in Orono. After a breakfast at the Orono House they were driven to the College by Uncle Ben, and spent the forenoon in inspecting the college buildings and apparatus connected with the several departments.

In the afternoon the two nines were driven to Bangor, where a game of ball was played, which resulted in favor of M. S. C. by a score

of 11 to 8. The "pony battery," Andrews and Keith, officiated for the M. S. C.'s, Rogers being laid off with a sore finger. Robinson and Whitneck were the National's battery. Morton L. Harrison umpired as usual to everybody's satisfaction. The Nationals left on the evening train for St. John, very much pleased with their trip.

JUNE 13.

Our boys met the Bowdoin's for the last time at Bangor, June 13, and defeated them by a score of 9 to 3. The M. S. C. boys won by good steady ball playing. The Bowdoin's played a good game, but were unable to bat Small. This game practically decided the championship, and when the boys returned to Orono they were given a grand reception by the students and townspeople.

Totals.....	32	3	5	6	24	21	10

Three base hits, Small, Fogg; struck out by Small 13, by Cary 15; passed balls, Freeman 3, Rogers 1; base on balls, by Cary 2, by Small 2; umpire, Watkins; time, 2 h., 30 m.

Our last game with the Bates was played at Waterville, on the Colby diamond. The Colby students wanted the Bates to beat, and "chinned" for all they were worth, but it availed them nothing. Both sides played loosely, but the M. S. C.'s liked left-handed pitching, and pounded Daggett unmercifully, while the other side batted no better than usual.

The last game of the season was played with the Colbys, on their own grounds, Wednesday, June 20. They wanted this game bad, as they had suffered two defeats at the hands of the M. S. C. nine, but our boys were playing ball about this time, and it took a solid nine to get away with them. They played a steady game, and batted well. The Colbys were shut out till the last two innings, their inability to bat, Small being the cause as usual. The score:

This making seven straight games won by the M. S. C.'s, gave them the championship. As the nine did not return to Orono that night, the students prepared for a celebration Thursday evening, and with the help of the citizens, succeeded in "painting the town a beautiful vermilion." The College and Orono bands filled the air with music, and fireworks and transparencies made the streets one immense blaze of light. Cannons were fired, and cheers without number rent the air. Speeches were made by some of the citizens of Orono, congratulating the nine on their success. On the whole it was a grand affair and all present showed that they appreciated the good work the nine had done.

The pennant offered by Wright & Ditson, to the winners, arrived on the campus Friday, June 29, too late for commencement, but before all the students had left the college, and was received with shouts of delight. It was immediately suspended from the top of Oak Hall. It is of beautiful light red bunting, with "Champions of the Maine College League," in large white letters. It will float over our diamond next fall, and encourage the boys to practice for the coming year.

Individual Records of the M. S. C. Players for the Season of 1888.

L. C. Southard, a prominent lawyer of Boston, is counsel for Sellon, the postal clerk who will be tried at the August term of Court, at Bangor, for the murder of his associate.

'76.

C. P. Allen, of Presque Isle, attended the Republican convention at Chicago as one of the delegates from the Aroostook District.

'80.

Daniel Webster, who has had charge of the American Express Company's office, at Augusta, will take charge of the Bar Harbor office during the summer, at a salary of \$100 per month.

Frank Spratt, A. B., principal of the Hampden Academy, will act as clerk in one of the Bar Harbor hotels this summer.

'81.

E. H. Farrington, Chemist in the Experiment Station at New Haven, Conn., will take a course in Chemistry in one of the Universities of Germany. He will leave for there some time this summer.

'82.

S. J. Buzzell, of Argyle, was elected a delegate to Portland, to the Republican State Convention, instructed for Burleigh.

W. R. Howard has resigned his position as Principal of Gould's Academy, Bethel, and will spend the summer at his father's home in Belfast.

J. I. Greenlaw is doing a large and prosperous business in the clothing line at Fryeburg.

The many friends of A. L. Hurd, of Springfield, Mass., express their sympathy for him, in the loss of a mother, who died in Lowell, June 4.

'83.

Ralph R. Ulmer, a lawyer in Rockland, was married at Lynn, June 13, to Miss Annie C. Cooper, formerly of Rockland. The *Rockland Free Press* has the following: "The ceremony was performed by Rev. Mr. Staples, pastor of the Boston-street Methodist church, and at the close the happy couple left by the first train for the White Mountains, where they will visit for a few days. They will be warmly welcomed home when they arrive from their trip, for both have a multitude of friends who wish them all prosperity and happiness, and rejoice in the consummation of what is unanimously regarded as a 'good match.'"

'87.

Fenton Merrill recently paid a short visit to his home and the college on his way to work on the Northern Maine Railroad.

'88.

D. E. Campbell left after his work was completed, to accept a position in civil engineering, at Skowhegan.

F. A. Smith is at work on the Northern Maine Railroad, with headquarters for the present at Mattawamkeag.

C. B. Gould is visiting his home in Orono. He has a situation in the grocery business at Monroe, Wis.

Miss Maude A. Matthews died at her home in Stillwater, after a long and weary term of sickness, having been obliged to leave college more than a year ago. She has borne with courage and cheerful spirit the dread disease which she knew would soon result in death. She was a scholar of marked ability, and with her quiet ways and ladylike manner, won the respect and esteem, both of the instructors and the students with whom she was connected.

'90.

J. W. Lewis left before the close of the term to work on the Northern Maine Railroad.

Wright & Grover will assist Prof. Hamlin in the survey of one of the islands in Portland Harbor, some time during the summer vacation.

'91.

Starrett is assisting Campbell in engineering at Skowhegan.

The *Notre Dame Scholastic* of June 2 contains a well written article entitled "Moral Liberty," also another—"Persevering Efforts." Both are worthy of consideration by the student.

The *Antiochian* for June contains quite a number of the graduations. It is an interesting number and shows careful preparation throughout.

The *M. C. I.*, one of our new exchanges, contains an article entitled "Some objections to a liberal education," in which the author brings to view the various objections, and does away with them in a practical manner. He closes with these words: "Let the young understand that an education is well worth securing of itself; that honest labor is honorable for any man, and

when these two facts have been accepted and acted upon, we shall not so often have it said that a liberal education makes a man "unpractical."

"Reviewing" is the subject of an editorial in the *Earthanite*. The article is well worthy of the consideration of both instructor and student.

Among our exchanges may also be found "The Stylus," "University Cynic," "Dartmouth," "Bowdoin Orient," "Free Lance," "Fisk Herald," "Colby Echo," "Literary World," "Boston Reckord," "W. P. I.," "Beacon," "Polytecnic," "University Monthly."

HASH

They were sleigh-riding. "Can you drive with one hand, Mr. Sampson?" she asked, and she asked it very sweetly. "O, yes," he replied, "but I think it looks better to drive with both." "Perhaps it does," she said in a cold, convinced tone of voice, and then added: "We mustn't be gone too long, Mr. Sampson, mama will be anxious."—*The Tuftonian*.

RIGHT THERE.

A maid with a smile as fair as the skies,
A gallant who for nothing e'er tarries;
She casts him a glance with archness replete,
He knows the deep meaning it carries.

"Kind maid, pray answer my query bold:
Were I to impress," said he,
"The seal of love on your waxen lips,
Can you tell me what you would be?"

"Kind Sir," quoth she, with coquettish glance,
"Your conduct is shocking, very;
But as for your answer," with modest blush,
"I'm sure I'd be—stationary."—*Ex.*
