Your Superintendent of public Schools herewith submits his annual report for your worthy consideration. The educational interests of Maine have reached a new era. We stand at the parting of the ways.

The highest function of school is to fit the boys and girls to become useful, intelligent citizens, so whatever we may help to do for our childrens best interest, we know from actual experience, that we can do no better by them, than to give them the best possible education in the free public Schools.

I am satisfied that the work of the schools as a whole for the past year does not at all suffer in comparison with that of previous years. I should be very glad to say that every school in town has been, throughout the year an ideally perfect one.

But that is hardly to be expected, there are many circumstances that effect the success of a school. But I have found much that was worthy of commendation in our schools for the past year, and some things that was not. I would say to every one who has scholars attending school through the town take a lively interest in every lesson to be learned. Thus stimulate, encourage and assist, so instead of a task, study will be a pleasure. I have tried with the help of the School committee to advance the schools.

In regard to the text books, will say they are in poor condition, and need a general revision. We have too many kinds of books and should be more uniform.

Respectfully submitted,

F. A. McALLISTER, Supt. of Schools.
