## HONORARY DEGREES

### **Vincent A. Hartgen**

Vincent Hartgen, Professor Emeritus of Art and former Art Department Chairperson, came to the University of Maine in 1946 and retired in 1983. He is a nationally known artist who, through his organizing, promotional ability, and dedication, created the University of Maine's Art Department. Professor Hartgen has influenced many generations of Maine students as well as the general public and Maine schools. He created the Traveling Art Exhibit to Maine public schools. He was a dynamic teacher, lecturer and promoter. Through his leadership, dedication and love of art, he created one of the finest art collections in Northern New England. Original works of art are hung in almost every building on the Orono campus because of his efforts. Professor Hartgen's works have been exhibited in galleries throughout the United States and abroad. He is represented in the permanent collections of many museums including the Boston Museum of Fine Arts, the Hartford Athenaeum and the Smith College Collection. Professor Hartgen instilled an inspiration for art in everyone with whom he came in contact. In addition to his work on campus, he lectured at outreach programs, helped initiate the Jewish Community Center Arts Festival, and promoted Maine artists in every way possible.

### **Elizabeth F. Murphy**

Elizabeth Murphy, native of Maine, and Professor Emerita of both Horticulture and Food Science, began her long association with the University of Maine with her matriculation as a freshman in 1926. In addition to receiving her Bachelor's degree from the University in 1930, Professor Murphy produced over fifty publications, nineteen of which were associated with potato quality. Her research methodology became a world standard technique that was applied also to fruit, poultry, and seafood. Other areas in which Professor Murphy made significant contributions involved her research with the Vitamin C content of apples, tomatoes, broccoli, and other fruits and vegetables. Professor Elizabeth Murphy's work has been significant in enhancing the agricultural and oceanic industries of Maine. She is a scientist who has devoted her life to improving the diet of Maine people and, relatedly, to improving the economic status of Maine farmers.

## UNIVERSITY OF MAINE DEGREES

The University of Maine offers curricula in a wide variety of academic fields leading to the associate, baccalaureate, master's and doctoral degrees. The associate degree is awarded upon satisfactory completion of a prescribed two-year program. Baccalaureate, or bachelor's degree, is awarded to undergraduate students who complete the required program in their respective departments. A Fifth-Year Certificate in Pulp and Paper Management is awarded after a year's specialized study, either concurrently with the appropriate baccalaureate degree, or, separately, a year later. A Certificate of Advanced Study (C.A.S.) is available for specified graduate study beyond the master's degree. Master's and doctoral degrees are awarded to students who complete prescribed graduate study.

Associate degrees are conferred with *distinction*, *high distinction*, or *highest distinction* upon students who have achieved an average rank of B or better as their average grade is based on all the degree credit taken at the University of Maine. These hours comprise at least half of the degree hours including the last semester of the second year in resident study at the University of Maine.

Baccalaureate degrees are conferred with *distinction*, *high distinction*, or *highest distinction* based upon students who have achieved an average rank of B or better and are based on all the degree credit taken at the University of Maine. These hours comprise at least half of the degree hours including the second semester of the senior year in resident study at the University of Maine.

Baccalaureate degrees are conferred with *honors*, *high honors*, or *highest honors* upon students in the Honors Program. In order to receive a degree with honors a student must have a minimum of four semesters of work in the Honors Program, including both semesters of the senior year, and at least one semester of group tutorials.

Degrees are awarded at the end of the semester or session in which degree requirements have been completed not necessarily accompanied by commencement ceremonies. Descriptions of degrees awarded by the University, as well as the requirements for graduation with *distinction* or with *honors* may be found in the general catalog.

## ACADEMIC DRESS

Academic costume originated in Europe about seven hundred years ago. It consists of the gown, hood, and cap. Now much modified, each level of academic achievement still retains a distinctive gown and hood.

The hood, when worn for the bachelor's degree, is three feet long, for the master's degree, three and one-half feet, and for the doctor's degree, four feet. Hoods are lined with the official color of the college or university conferring the degree. For the University of Maine, this is pale blue.

The velvet edging of the hoods varies in widths according to the degree. Its color is distinctive of the subject to which the degree pertains. Some of the colors and associated subjects are:

Agriculture	Maize
Arts, Letters, Humanities	White
Business	Drab
Education	Light Blue
Engineering	Orange
Forestry	Russet
Human Development	Maroon
Music	Pink
Philosophy	Dark Blue
Science	Golden Yellow

The caps are usually of the same material as the gown. The tassel is black or the color appropriate to the subject, except that the doctor's cap may have a gold tassel.

Many European institutions have gowns, hoods, and caps of original and frequently colorful design.

**Honors graduates are wearing a gold braid cord around their necks.**

The listing of degree candidates as well as the distinctions are tentative only since the printing of this program was required prior to the final certification of each candidate for a degree.
