Peace observer  This is the United Nations. The man? Special delegate Walter W. Falck of Severna Park, Maryland—representing himself...seeing how peace is waged. Walter Falck happens to be a regional manager of Nationwide Insurance. He is one of hundreds of Nationwide managers who visit the U.N. each year at company expense, as part of Nationwide's continuing effort to bring world affairs closer to the affairs of all of us.

Career hunting?  Try the company that Walter Falck represents. Nationwide is a young company (35 years old) with new and different ideas. We operate in 27 states, with nearly three million policyholders, over 12,000 agents and employees, over $390 million in total assets. Our rapid expansion has opened career positions for new representatives to sell auto, fire, life, general insurance...plus the opportunity to sell mutual funds. Earn while you learn—with advancement opportunities, job satisfaction. Like to work for this dynamic organization? Write: Dean W. Jeffers, V. P. Sales, Dept. A, Nationwide, Columbus 16, Ohio.
Creative technical intellects constitute a very substantial percentage of our nearly 5,000 employees. Our 15 or so really great scientists — national authorities on electronics, computers, propulsion, optics, magnetic phenomena, solid-state physics, and other phases of aerospace science — are only a small fraction of the full range of Kollsman brainpower.

Our hundreds and hundreds of highly specialized engineers and technicians are an all-important part of it, and so are our master lens grinders who can hand-polish a lens to tolerances of a few millionths of an inch.

Some of these men can trace their career back to the days when Kollsman became a household word among fliers as the flight instrument company. We still are. But ever since the boundary between air and space disappeared, we have been finding ourselves more and more in the space part of the aerospace business.

Some people think, for example, that we are the astronavigation company today. And we may easily be the company for the particular aerospace business you have on your mind. Our best minds — the industry's leading aerospace intellects — are at your service.

Here is what we are delivering to our customers today:

- Astro Trackers
- Automatic Astro Compass
- Air Data Computers
- Electromechanical Systems
- Missile Components & Systems
- Jet Engine Instruments
- Kollsman Integrated Flight Instrument System
- Optical Systems & Components
- Doppler Computation Systems
- Sextants (Perisopic, Handheld, Photoelectric)
- Controls for Aircraft, Missiles & Space Vehicles
- Flight Simulator Instruments
- Laboratory Test Instruments

If you are interested in your career possibilities with us, why not write to Mr. John Whitton, at:

Editor’s Stencil

Should education at the University of Maine be a special privilege only for high income families? Are we educating too many? These questions are raised by thoughtful people now, because of the current high cost of a year at our state university.

On the cover this month is a freshman zoology student. She is one of the present young people whose education cost her and costs others a fairly large sum of money each semester.

Dr. Lloyd H. Elliott in his Biennial Report of the President, published in December, 1960, pp. 6 and 7 says: “I believe that today our future as a nation and as a state depends more directly upon the development of our human talent than upon any other factor.

“In years past our compelling tasks may have been settling the West, building the railroads, irrigating our fertile fields, or building more automobiles, but today our basic need is the development of the human abilities of our citizens both young and old. There is a new urgency to our nation’s needs. Our scientific advance is being challenged and our position in world affairs is in jeopardy. And what will it take to meet these developments? We have but one recourse and that is to give the nation the services of the best trained manpower that America can produce.

“In earlier years we were wasteful of our woodlands, of our soil, and of our minerals. Today we are wasting our human talent. While we search for a mathematician, an engineer, a nurse, or a poet, we allow 200,000 of our brightest youth in this country to stop their education at the high school level each year.

“There are very few areas of high-level training today that are not in need of additional manpower. When one thinks of the medical sciences, the business life, our engineering world, or any other activity, one is hard pressed to find areas that are overcrowded. In the physical sciences, where physics, chemistry, and mathematics may hold the answer to our ultimate survival, we need thousands of highly trained people instead of the few who were adequate only a few years ago. In foreign languages, where we may find a tool for carrying out our role in world affairs, we are nationally illiterate.

“We have come to the point where the development of human talent has surpassed in the national interest the development of Niagara or Passamaquoddy power, the building of submarines, or the landing of a colony on the moon. In fact it is the development of the manpower that is the prerequisite to all the rest. Whether we look for advance along these lines or for new ways to beat our swords into plowshares, it is only through education that we can hope for a peaceful world.”

Thoughtful alumni and citizens of the State of Maine may be inclined to agree with Dr. Elliott. And who would there be to say that the way to make an advance upon a better world would be to build an upper crust on society by having higher education available, for the most part, only to the wealthy?

It is a hope that alumni will upon their visits to campus, as for Commencement-Reunion June 9, 10 and 11 this year, give more reflection in, their minds and voice to their opinions about the challenge which their Alma Mater faces squarely.

It isn’t altogether new, really. It was Diogenes who said: “The foundation of every state is the education of its youth.”

George W. Treat Bequest
Provides Student Loan Fund

A generous bequest of $44,307 from George W. Treat of Boston was announced by the University of Maine in 1959. Mr. Treat's bequest was in the form of an unrestricted gift.

By vote of the University Board of Trustees, this substantial gift is used as a student loan fund. Known as the George W. Treat Fund, the student-aid fund perpetuates the name of the donor in a most appropriate and useful manner.

In announcing this gift, President Elliott of the University paid tribute to Mr. Treat and a member of his family who had waived an interest in the trust fund, thus releasing it for a gift to the University of Maine and other beneficiaries. "This fund will be a wonderful help to scores of deserving, capable, and needy students each year, and we shall be forever grateful to the donor for this fine gift," Dr. Elliott declared.

Mr. Treat for many years was the head of an important stock brokerage firm in Boston. He retained a lifelong interest in his native town of Livermore Falls and the State of Maine. His generous bequest has translated his interest into a memorial which will be of true value to many young people in their quest for higher education.
Shown above is the first RCA Laboratory. It was established in a tent at Riverhead, Long Island, in 1919. In the photo, left to right are: Mr. Beverage, Harold Olson, Chester Rice, E. W. Kellog and R. D. Greenman.

Harold Beverage had two job offers on graduation day in 1915.

The General Electric Company was offering him $11.20 a week to work in Schenectady, New York, testing its completed products.

The Loews Theatres organization was offering him $22 a week to play the trombone in one of its New York City movie house bands.

His degree from the University of Maine was a Bachelor of Science in Electrical Engineering, and he knew whatever job he took somehow would have to further his ambition to be a radio engineer.

He became interested in radio engineering as a boy in North Haven, Maine. Reading about the amazing experiments by Marconi and his associates in newspapers and magazines prompted the ambition which later would cause him to be a frequent visitor to such space-age centers as Cape Canaveral, Florida, and would see him become vice president for research and development for R.C.A. Communications.

But Dr. Beverage says he had few visions of where either he or wireless were going back in the days in North Haven and at the University of Maine.

"I didn't imagine anything terrific," he said recently; "but I knew it would be very interesting. It was a plumb marvelous thing that you could sit down and pick news out of the air."

He took the testman job, seeing it as a stepping stone to a position in the G.E. laboratories. One of the most prominent men in communications at that time was Dr. E. F. W. Alexanderson, a Swedish-born engineer who came to the United States in 1901 and became a major figure at G.E.

"My first impression of Alexanderson," Beverage says, "was that of a man who was just bubbling with ideas. He was a prolific inventor and an inspiring man to work with."

Dr. Beverage contacted Alexanderson, and when an opening came in his staff, Dr. Beverage got the job.

He was given broad scope in his work with Alexanderson.

During World War I, he was sent to the U. S. Naval Station at Bar Harbor, Maine, to test a new radio receiver devised by Dr. Alexanderson. The radio was to be used by Allied Forces in Europe in case the Germans cut communications wire and interfered with the radio systems then in use.

For several days Dr. Beverage draped wire over the Bar Harbor countryside—two miles of it in each direction from his receiver. Then in the process of testing, he noticed the wire going northeast had excellent reception from Europe while reception on the southwest wire was poor.

Further work with this discovery led to development of the Beverage antenna, a system which has been compared with a stepping stone to a position in the G.E. laboratories.

One of the most prominent men in communications at that time was Dr. E. F. W. Alexanderson, a Swedish-born engineer who came to the United States in 1901 and became a major figure at G.E.

able patents essential to the expanding radio industry in U. S. hands. Dr. Alexanderson’s patents were the chief subject of interest. The result was that G.E. and other firms set up the Radio Corporation of America as a company in which the several organizations could pool their patents for further U. S. development. Dr. Alexanderson became chief engineer of R.C.A.

Dr. Beverage says when he got the pink slip from G.E., “I went to Alexanderson and asked him why I was fired. Alexanderson, being a deep-thinker, was somewhat absent minded. He said, ‘Oh, I forgot to tell you; I had you transferred to R.C.A.’”

The new assignment took them to Long Island, New York. This was long before the commuters and real estate developers had discovered Long Island’s outer reaches. R.C.A. had started a receiving station at Rocky Point, and Dr. Beverage wanted to get away from it but still have enough room for his wires. He found a spot at Riverhead, complete with a road running northeast-southwest along which he could set out wires for his antenna experiments. They set up research headquarters in a tent.

They operated from the tent during the winter of 1919-1920. In the spring, a wooden shack was built, and antenna wire was strung on poles for nine miles around. Unfortunately, a burglar broke into the shack and carried off the old tent—thus stealing R.C.A.’s first research laboratory.

In November, 1921, Dr. Beverage was selected to go to England, pick up some equipment and a Marconi company engineer, and go to Brazil for six months work on a high frequency system to operate between Europe and the United States.

About the same time, the Radio Club of America, a group of amateurs, was experimenting with radio reception. During his trip to England, Dr. Beverage met Paul Godley, a member of the club, who was going to Europe to try to pick up broadcasts from the United States. Dr. Beverage told Godley about his antenna experiments. Godley set one up in Scotland and was successful for the first time, in picking up signals from the United States.

Godley’s results were published in the amateurs’ magazine, QST, and Dr. Beverage later wrote an article for it. The word spread, and soon many others were using the Beverage antenna. It gained fame that continues today. At a recent international conference in Colorado, Dr. Beverage was somewhat surprised when about 20 Russians surrounded him and said about his work. They not only knew of his antenna and other inventions but gave him full credit for them.

The early 1920’s saw great breakthroughs in international communications. Marconi's successful work with short wave reception made greater use of radio economically possible and enabled daylight operations which proved a boon to business.

In the autumn of 1923, Dr. Beverage, listening to the pioneer station, KDKA in Pittsburgh, Pennsylvania, became interested in the station’s frequent fading. Working with H. O. Peterson, a member of the R.C.A. staff at Riverhead, he conducted tests which showed the fading occurred at random at different times among antennas located only a short distance from each other. These tests led to development of a method called the Space Diversity System which, in effect, automatically selected the receiver getting the strongest signal.

When R.C.A. Communications, Inc., was created as a subsidiary of R.C.A., Dr. Beverage became its chief research engineer. He stayed in this post until 1940 when he became vice president for research and development for R.C.A. Communications.

In 1934, he participated in the development of the first television relay system, used for field tests between New York City and Camden, New Jersey.

In following years he served a term as president of the Institute of Radio Engineers and received an honorary doctor of engineering degree from the University of Maine.

R.C.A. combined its research operations under a new division called R.C.A. Laboratories in 1942, and Dr. Beverage acquired the title of director of radio research in the new division in addition to his vice presidency.

With the start of World War II, the government asked him to look into problems in the North Atlantic where communications problems were causing large losses among the hundreds of planes being ferried to Europe. Dr. Beverage and Julius A. Stratton, who presently heads the Massachusetts Institute of Technology, investigated the situation. With Dr. Beverage using his old trick of laying out wires, the team soon demonstrated that low radio frequencies could get through to planes when high frequencies were blocked out by atmospheric disturbances. Changes were made, and losses dropped drastically.

The Beverage antenna also found a role in war work. Since it operated with wires close to the ground, it was adapted to transmit as well as receive and was valuable in situations where erection of high towers was out of the question.

Dr. Beverage traveled extensively on communications problems during the war. Just prior to the invasion of France, the U. S. Ninth Air Force Headquarters at Uxbridge, England, needed some way to perk up its communications. The unit was in tactical support of the Army and had to have reliable contact with its planes and the troops in Europe. It had been using the same methods as British air commands but was not getting the same results. Dr. Beverage decided the heart of the problem was that Uxbridge was some 40 miles inland while the British units were along the coast. Changes were made to compensate for the location, and the problem was solved.

When the comment was made later that he made things seem easy, he said “It is simple when you know what’s going on.” He stayed in London while commuting to Uxbridge, and friends once told him of

The University

Half-Million Grant
From Ford Foundation

AFTER ONE OF THE WORST WINTERS IN MANY A YEAR, EVERYONE ON CAMPUS WAS LOOKING FORWARD TO FAIR SPRING WEATHER. BUT UP TO THE MIDDLE OF APRIL, THE WIND WAS STILL WINTRY, AND SNOW CONTINUED TO FALL. AT THIS WRITING THE SNOWSTORMS HAVE ABATED, BUT THE AIR IS COLD AND A CHILLY DRIZZLE IS FALLING NEARLY EVERY DAY. IF THE LAW OF PROBABILITY REMAINS VALID, THE FUTURE SHOULD BE BRIGHT, WITH FAIR WEATHER AN ODDS ON FAVORITE FOR THE REMAINDER OF SPRING AND EARLY SUMMER.

'61 Commencement at Bangor Auditorium

The 1961 commencement program will be scheduled, however, without a gamble on rain or shine. This year the ceremonies will be held in the new Bangor Municipal Auditorium, where approximately 860 students will receive degrees at 2:30 p.m. on June 11. The baccalaureate ceremony will be held in the morning at 10:30 in the Memorial Gymnasium.

JUNE IS REUNION TIME

Will we see you on June 9-10-11 in Orono for the 1961 Commencement-Reunion weekend?

In case you've forgotten, the following classes will hold reunions:

June 9-10-11:

Senior Alumni 1936
1911 1941
1916 1946
1921 1951
1926 1956
1931 1959

UNIVERSITY RECEIVES KELSH PLOTTER

The James W. Sewall Company, of Old Town, recently made available to the University a Kelsh Plotter, an intricate device used to transfer details from aerial photographs to base maps. The stereoplotter, valued at about $5,000, has been placed in the Forest Photogrammetry Laboratory in Deering Hall. Faculty members and students in the School of Forestry, and the departments of Agricultural Engineering, Geology, and Civil Engineering will have an opportunity to use the instrument. No piece of equipment of this value has ever before been received by the School of Forestry.

The University has received a grant of $500,000 from the Ford Foundation to finance a seven-point program in its College of Education. This is the second largest grant ever received by the University, being topped only by the Frederick W. Hill Fund of $525,000 bequeathed to the University in 1922.

The Ford grant, which will come from the Foundation's Fund for the Advancement of Education, will cover a five-year period.

Under the terms of the grant, the College of Education will carry out the following seven-point program:

1. Establish a program of team-teaching for the elementary and secondary schools of Maine.
2. Develop opportunities for student teaching experience in team-teaching situations.
3. Develop a working relationship with the public schools in Orono whereby these schools can be used in creating a team-teaching pilot program in the elementary school, the junior high school, and the high school.
4. Implement closed circuit television for purposes of observing teaching.
5. Provide and make use of such electronic devices and machines as may be used effectively in teaching.
6. Create a new fifth-year program of education for some of its own students and students from other liberal arts colleges.
7. Study and recast the basic program of preparation for its potential teachers.

"This action by the Ford Foundation is an inspiring vote of confidence in the University of Maine," President Elliott said. "It is also a recognition of the important responsibility the University has for training teachers for the schools of Maine.

"In accepting this grant on behalf of the University's board of trustees, I want to commend Dean Mark R. Shibles and other members of the faculty of the College of Education for their work and foresight in developing plans for the new program. The teacher-training program, already moving toward national recognition, will be moved along even more rapidly by these funds," he declared.

Dean Shibles said he and his colleagues were "delighted" that the Ford Foundation had selected the college for the half-million-dollar grant.

Dean Shibles said he was hopeful the legislature would provide the full amount of the funds requested for equipment for the new College of Education building, since the closed-circuit television activities envisioned by the Ford Foundation grant will depend on the college having the new equipment. The closed circuit apparatus would be used primarily for observation of teaching in connection with the basic professional courses.

Noting that the faculty of the College of Education believes that a teacher who is to educate young people must himself be well educated. Dean Shibles said the college's academic program under the Ford grant calls for a sharp decrease in professional courses and a sizeable increase in academic credits. Plans also call for the adding of a new fifth year to the College of Education's program of teacher training for both elementary and secondary school teachers.

The new fifth-year program would be open to carefully selected graduates of the College of Arts and Sciences as well as the College of Education, and to students from other institutions with suitable ratings. Upon successful completion of 30 semester hours (one full year of residence plus two summer sessions) the master's degree would be awarded.

Plans also call for a series of Summer Session workshops to prepare participants and University personnel for the team-teaching aspect of the project.

As the program unfolds, the college will be working with educational interests throughout the state including the State Department of Education, Dean Shibles said.

Alumni Attention!

Notice is hereby given to members of the General Alumni Association that the following change shall be voted upon at the annual meeting on June 10, 1961:

ARTICLE IV of the By-Laws

(*by addition):

SECTION 1. The annual dues shall be fixed each year by the Alumni Council, or, in lieu of annual dues, a program of annual gift giving shall be fixed each year by the Alumni Council, in order to establish financial aims.

SECTION 2. Dues, or annual gifts to an alumni fund, are payable in advance on or before the date of the annual meeting, as indication of active membership.

Italized material indicates the proposed additions to the by-laws.
The University of Maine at Portland, which has never in the past had more than a three-weeks summer session, will offer the full nine weeks of study this summer.

The session will be divided into two separate periods. The first, from June 19 to July 7, will be three weeks; the second period, from July 10 to August 18, will be held for six weeks.

Courses offered in the three-week period will be: the teaching of art, the use of standard tests in school, newer practices in reading, poetry of the Romantic movement, the Communist pattern of government, history of the West, trigonometry, college algebra, protective practice and safety in physical education, educational psychology, sociology of the family, and general zoology.

Offering undergraduate credit courses only, the six-week curriculum will be composed of: engineering drawing, freshman composition, English literature, masterpieces of English and American literature, American literature, elementary and intermediate French, American government, U.S. history to 1877, European history to 1500, current world problems, descriptive physics, and fundamentals of public speaking.

DR. L. B. LEVITAN '38 GIVES SCHOLARSHIP

A scholarship fund of $5,000 has been given to the University of Maine Foundation by Dr. Leon B. Levitan '38 of Braintree, Mass., in memory of his father, Nathan Levitan.

The income from this fund, which is to be known as the Nathan Levitan Fund, will perpetuate the ideals of the father by using income for research and/or other endeavors in the field of social, theoretical, or historical aspects of economics.

Any student, graduate or undergraduate, in economics who is in need of financial assistance and whose scholastic standing indicates promise of high academic success will be eligible for this award. It is expected the first award will be made for the next college year, 1961-62.

MAINE PSYCHOLOGISTS ATTEND EASTERN MEETING

Three members of the psychology department at the University of Maine attended the meeting of the Eastern Psychological Association in Philadelphia on Friday and Saturday, Apr. 7-8.

Dr. Alan Baron, Assistant Professor of Psychology, read a paper before a panels which he co-authored with Dr. Joseph Antonitis entitled "Punishment and Pre-Shock as Determinants of Bar-Pressing Behavior." Dr. Vaughn E. Gulo, Assistant Professor of Psychology, read a paper entitled "A Study of Differential Scoring Procedures in a Critical Thinking Test." Dr. George B. Kish, Associate Professor of Psychology, also attended the sessions.

About 25 years earlier, during a visit to Philadelphia, he had dinner at a friend's home. Another guest was Miss Patricia Yurgel, a social worker in Brooklyn. They became friendly, but with the rapidly-changing world of electronics, the depression and war years, marriage was delayed until 1946.

Mrs. Beverage hadn't had much to do with electronics in her social work, and it took time to get used to their house at Stony Brook, Long Island, being cluttered with "miles of wire and a million receivers."

But she adapted. Now she says "His interests have become mine. I'm interested in all these electronics, and I enjoy all the traveling. I don't want to be a wife who just sits in a corner."

Dr. Beverages work was recognized in 1948 with a presidential Certificate of Merit.

In 1957, one year before his retirement from R.C.A. at age 65, he was awarded the Lamme Medal, presented by the American Institute of Electrical Engineers to its outstanding members. He took a look at the expanding radio field at that time and told the delegates "we may fit within the limited radio spectrum tomorrow such services as international television, highly portable personal communications systems and even the remote control of our ships and aircraft from electronic traffic centers."

When he retired in 1958, friends at R.C.A. sponsored a dinner at a New York hotel. As Mrs. Beverge tells it, "All these people came, not just from R.C.A. but from different organizations in electronics, radio and related fields. They came from Washington, California and Canada even. And instead of buying him a gift like a wrist watch or pen, they presented him with this award which I thought was the most wonderful thing they could have given him."

The award was a sum of money, the interest on which will go to each year a University of Maine student excelling in the study of communications. The first Beverge award was presented last December to 25-year-old Richard T. Goodhue of East Waterboro, a senior majoring in electrical engineering.
The Hauck Fund...
Percent Participation of Classes

THE BAR GRAPH last month on the Hauck Fund page showed the amount given (in thousands of dollars) by classes. This month the graph shows the percent participation of members in each class. The percentage figures (with a top of fifty percent) are indicated at the right of the graph. Classes are listed at the bottom of the graph.

Also shown on this page are the number of Senior, Junior, and Associate Partners in each class:

BECAUSE of the smaller numbers of living alumni in the classes from 1885-1904, the listing of data is presented in summary.

The average participation of these classes is approximately 50%. The total amount given is $23,387.00. From sixty-seven donors, the average gift to the A. A. Hauck Building Fund from these alumni is $349.00.
Phase One of the Arthur A. Hauck Building Fund has been realized and is manifest in the clean, well-designed, well-furnished rooms on the third floor of the Memorial Union Building. The third floor, to be formally opened on April 30th, is primarily intended for the use of faculty and alumni.

The photos on this page will give you some idea of what your Hauck Fund dollars have purchased to date. The top left photo shows the stainless steel serving counter in the Ford Room dining facilities. At the right, top, is the fireplace at the north end of the Peabody Room, the faculty-alumni lounge. The middle picture shows the Ford Room, decorated with murals made from photos of the Maine coast, taken by Walter T. Eitel ’56. At the bottom, left, SRA Director Reverend Harvey Bates talks with a student in the new SRA Office, the Reverend Alson H. Robinson Room. The bottom right picture was taken in the faculty-alumni lounge, the Peabody Room.

More detailed information on the third floor of the Union Building will appear in the June Alumnus.
Local Associations

St. Petersburg, Florida Alumni
The final luncheon of these season-meeting alumni was held on April 1 this year. Four previous meetings had been held this season, all at the New Garden Room of the Pennsylvania Hotel.

Oscar W. Mountfort '12 presented the meeting, at which officers were elected for the coming year and dates were set for 1961-62 meetings.

Portland Alumni
The Portland Club of University of Maine Women met April 6 at Payson Smith Hall on the UMP campus. Dorothy (Carrell '45) Dutton conducted the business session.

Charlotte (Moreshead '54) Libby introduced the guest speaker, Edward Ferron. Mr. Ferron spoke on "The History and Reproduction of Wall Paper."

Plans were presented by co-chairmen Dorothy McCann '52 and Margaret Mary McCann '57 for the Annual Spring Scholarship Dance on April 29.

So. Kennebec Alumni
Men of the Southern Kennebec Valley met April 7 at the Worster House in Hallowell. A social hour began at 6:00 p.m. followed by dinner at 6:45 and a smoker.

Brian McCall, the University's outstanding basketball coach, spoke about the recent record in basketball and the future potential of the sport at Maine. T. Russell Woolley '41 also attended from Orono.

New officers were elected for the coming year.

Whitney L. Wheeler '29 presided at the session.

Baltimore, Maryland Alumni
Attendance was high at the annual meeting and banquet in Baltimore April 11.

Dean Mark Shibles of the University's College of Education was guest and speaker for the meeting, bringing news of the campus and a discussion of the outlook for education in Maine.

A new chairman was elected for the Baltimore Alumni for 1961-62. Richard F. Barter '58 presided over the business session and evening festivities.

Merrymaking Bay Alumni
Men and women of the Bath-Brunswick area in Sagadahoc County held a successful dinner meeting on April 13 at the New Meadows Inn. Esther (Drummond '41) Hawley was in charge of arrangements, assisted by Janet (Marston '55) Bodwell.

Speaker at the well-attended session was University President Dr. Lloyd H. Elliott, speaking on the University's Five-Point Legislative Program. T. Russell Woolley, GAA Executive Director, made brief remarks to the group.

New officers were elected at a business meeting, which was conducted by Merle F. Goff '48, President.

Northeastern, N. Y. Alumni
-- Area alumni met on April 14 at The Colonial Tavern in Saratoga Springs for a social hour and dinner, L. "Jack" Carpenter '27 heading the committee on arrangements.

William M. Foss, Jr. '55, president at the business session and introduced the guest speaker, T. Russell Woolley '41 from Orono. Dr. Woolley talked about current happenings on the Maine campus and the legislative program.

Auburn-Lewiston Alumni
April 19 was the meeting date for Auburn-Lewiston Alumni and a program was presented from the "House of Charm."

Complete details of the March 15 meeting have been received, of a gathering held at the home of Margaret (Watson '48) Savignano, Court St. in Auburn. Mrs. Ray Philbrick, Jr., gave a very interesting demonstration of copper enameling. Plans were discussed for the annual rummage sale and an annual May banquet.

Eastern Pennsylvania Alumni
A dinner meeting of April 21 gathered at The Engineers Club at 6:00 p.m. in Philadelphia. The well-attended affair was the Annual Spring Banquet for Maine Alumni and friends.

Arthur A. Chapman '21 presided at the business session and presented the speaker, T. Russell Woolley '41, GAA Executive Director talked about present problems and plans at the University, also showing colored projections of new buildings on campus.

Utica-Rome, N. Y. Alumni
-- An annual banquet of the new Utica-Rome alumni group was held Saturday, April 22. Lois Ann (Small '49) Peterson was in charge of arrangements.

Finger Lakes, N. Y. Alumni
Saturday April 29 was the night of the dinner and spring meeting of the group. The location was the Chemung County Airport Restaurant, off route 17, near East Corning.

Eunice (Copeland '31) Chandler spoke about her study at the University of London, during the academic year 1959-60. Movies of the experience were also shown.

In charge of arrangements were Philip A. Lord '55 and Frances (Dorr '44) Henderson.

Portland Alumni
The annual University of Maine Scholarship Dance was held April 29 at the Mayfair Room of the Lafayette Hotel.

This pleasant occasion was planned by a large committee under the guidance of co-chairmen Dorothy McCann '52 and Margaret Mary McCann '57. Pauline (Cushing '41) Clough was reservation chairman.

Coming Meetings
Rhode Island and Southeastern Mass. Alumni
May 12, 1961
Speaker: Col. Lester K. Olson

Moment of Truth...

Remember? The bluebooks were passed, the exam questions posted...then the panicky moment of blankness before facts gradually swam into focus. Final exams were the crucible of study and, in a real sense, forerunners of the many "moments of truth" for which each of us must prepare throughout life.

Preparation for decisive moments is man's strategy in facing his future. But this planning needn't always be a lonely, uncertain affair. The experience and understanding of a Connecticut Mutual Life man can greatly facilitate the wise safeguarding of your family...and provide for the needs that loom ahead. Use the counsel of this objective partner. Out of a wide variety of policies and payment methods, a CML man will prepare the plan best suited to secure your dreams. He's a helpful man to talk with.

Dividends* paid to policyholders for 115 years

Owned by its policyholders, CML provides high-quality life insurance at low cost and gives personal service through more than 300 offices in the United States.

Dividend scale for 1961 increased 12 1/2% over 1960.

Connecticut Mutual Life

Alumni Names

Congratulations...

Carl Magnus '15 was recently appointed a Council Director of the Connecticut River Watershed Council, Inc., in Greenfield, Mass.

Stewart F. Oakes '41, and Preston W. Hall '54 were named President and Vice President of the Hobbs Manufacturing Company of Worcester, Massachusetts, in February. Mr. Oakes joined Hobbs in 1948 and was previously Vice President and General Manager of the firm. Mr. Hall, who has been with Hobbs since 1954, was promoted from Factory Manager to succeed Mr. Oakes.

Ruth E. Allen '44 was recently given a Certificate of Appreciation from the Department of the Army for her outstanding contribution to the initial planning of the QM Executive Dining Room, the Tempo ABC Generals' Dining Room, and Gregory Hall in the G.S.I. Cafeteria in the Tempo B. Building, Washington, D. C. Miss Allen is Manager of the G.S.I. Cafeteria.

Sharland L. Leavitt '51, has been appointed Manager of the Sears, Roebuck and Co., store in Amsterdam, N. Y. Mr. Leavitt was formerly Operating Assistant Manager of the Sears Store in Bangor, Maine.

Donald D. Anderson '54 has been appointed Staff Engineer in Component Engineering at the IBM FSD Space Guidance Center in Owego, New York.

In The News...

Several farm organizations elected officers during the 54th annual Farm and Home Week at the University, April 3 to 6. Alumni elected to offices were:

Maine Extension Association: Secretary, Richard C. Dolloff '27, Orono; Treasurer, Stanley H. Blanchard '34, Cumberland Center; Trustee, Oscar T. Turner '29, Livermore.

Outstanding Farmer and Homemaker Group: Chief Farmer, John McKeen '30, West Paris; Secretary, George E. Lord '24, Orono.

Maine Cooperative Council: Vice President, Raymond N. Atherton '18, Orono; Secretary-Treasurer, Dr. Winston E. Pullen '41, Orono; Trustees, Philip B. Turner '48, Caribou; and Smith C. McIntire '32, Parme.

Maine Guernsey Breeders Association: President, Malcolm Roberts '40, Alfred; Vice President, Wendell Bubar '50, St. Albans; Director to Maine Livestock Breeders Association, Gerald Pickard '50, Hermon.

Maine Holstein-Friesian Breeders Association: Vice President, William Jinks '49, Bangor; Secretary-treasurer, Seavey Piper '11, Troy.

Maine Jersey Breeders Association: Vice President, Robert Dow '51, Dover-Foxcroft; Secretary, Mrs. Thomas (Ruth Corliss) Splan '43, Sherman Mills.

Named Outstanding Farmer during Farm and Home Week was Owen H. Smith '41, of Presque Isle. Mr. Smith was recognized "for his many contributions to agriculture and time given to leadership roles in the community, county, and state."

James Booth '10L was given a certificate for the practice of law for fifty years, by the St. Petersburg Bar (Florida) Association.

Clement A. Lyon '15 was recently honored at the New Hampshire Hotel in Concord, N. H., on the occasion of his retirement from State service as Director of the Division of Markets and Standard in the New Hampshire State Department of Agriculture.

In the March issue of the Punahou School (Honolulu) Alumni Bulletin, tribute was paid to former Maine President Arthur A. Hauck. The Bulletin said of Dr. Hauck's recent visit to Honolulu: "V.I.P. . . . Punahou joined Honolulu in a gala welcome late last month to Dr. and Mrs. Arthur A. Hauck who revisited the Islands after an absence of twenty years. Dr. Hauck, President of Punahou from 1922 to 1929, is Head of the International Student Federation in Washington, D. C., and was in the Islands on East-West Center business. He has been with the federation, an organization which assists in the orientation of foreign students to the United States, since his retirement as President of the University of Maine. . . . The enthusiastic reception accorded the Haucks by the alumni present (at a dinner in honor of the Haucks) left no question about the warmth of the affection felt for him."

Dr. Mary E. Smith '46, one of three women veterinarians in the State of Maine, was recently the subject of a feature story in the Portland Sunday Telegram.

Peter A. Pattee '54, received the Doctor of Philosophy Degree from Ohio State University in the Winter Quarter, March 17th Commencement. Apologies to Frank Harrison '52, coach of Lubec's runner-up basketball team in the Eastern Maine High School Medium School Tournament this winter. In listing alumni coaches whose teams participated in tourney play this year, the Alumnus inadvertently omitted his name last month.

The following persons represented the University at the functions of other institutions as indicated:

Raymond H. Fogler '15, inauguration of Chancellor, Hunter College, New York City.

Mrs. Walter T. (Madeline Davis) Johnston '38, inauguration of President of Judson College, Marion, Alabama.

Thomas J. Desmond '33, inauguration of Chancellor of the University of Chicago.

Royal C. Higgins '17, inauguration of President of University of Massachusetts, Amherst, Mass.

Mrs. Donald H. (Romaine F. Littlefield) Kupfer '45, installation of President of Tulane University.

Mrs. Roger K. (Beryl Warner) Williams '35, inauguration of President of Howard University, Washington, D. C.

Dodd E. Roberts '51, inauguration of President of Albion College.

Professor Hilda Fife, inauguration of President of Hampton Institute.

Norman W. Mosher '43, inauguration of President of George Washington University, Washington, D. C.

Basketball Team Receives National Rating

MAINE RATED 7th NATIONALLY

Maine's 1960-61 basketball team was one of the nation's leaders in foul shooting, according to final NCAA statistics. The Black Bears finished 7th among the country's small colleges and 15th among all colleges with a completion average of 74.2% (484 of 652). The average was tops in New England collegiate circles, including both major and small colleges. Skip Chappelle of Old Town, captain-elect for the 1961-62 season, placed 21st in the nation in the small college division and was 28th among all colleges. His average was 83.9% (167 of 199).

Among New England collegians, however, Chappelle captured first place ahead of Providence's John Egan who finished with 106 completions in 129 attempts for an 82.2% average. In hitting on 19 out of 19 free throws against Massachusetts, Chappelle came up with the best single game foul shooting mark in New England for the entire season. Jack Foley of Holy Cross had the second best game, tallying 17 out of 21 against Dartmouth. A check of national ratings showed that only one player in the country had a better one-game average with 20 for 20.

AIR FORCE GRANTS $17,100 FOR RESEARCH

The United States Air Force Office of Scientific Research has awarded a three-year grant of $17,100 to Dr. Edward F. Carr, Assistant Professor of Physics.

The title of Dr. Carr's research project is "An Investigation of the Ordering of Molecules in the Anisotropic Liquid Phase of Liquid Crystals."

Dr. Carr said "Some organic compounds melt to form a cloudy liquid, and at higher temperatures become a clear liquid. The object of this investigation is to study the cloudy phase. Compounds that show this cloudy phase between the solid and normal liquid are called liquid crystals."

Dr. Carr has received two previous grants for research work in the same area.

WALTER HENRY ROGERS, Walter H. Rogers, 69, formerly of Bowdoinham, died in Plainfield, N. H., March 31, 1961. A native of Bangor, he served for two years in the U. S. Navy during W. W. I, and was a member of the American Legion. A graduate of the College of Law, he had been employed by the U. S. Government in New York and by the Office of Price Control for several years. Surviving are his widow, a daughter, a son, — Thomas F. '09 of Bangor, and seven grandchildren.

1918

JAMES AUGUSTUS GALLAGHER, James A. Gallagher, 69, died in Brookhaven, N. Y., on March 4, 1961. A native of Bangor, he served for two years in the U. S. Navy during W. W. I, and was a member of the American Legion. A graduate of the College of Law, he had been employed by the U. S. Government in New York and by the Office of Price Control for several years. Surviving are his widow, a daughter, a son, — Thomas F. '09 of Bangor, and seven grandchildren.

1919

ARMAND THEOPHENE GAUDREAU, Armand T. Gaudreau died in Westport, Conn., on March 31, 1961. A native of Bar Harbor, he received a M.B.A. degree from New York University in 1927. For 17 years he was employed by the Westinghouse Electric Corporation in Danbury, Conn., where he developed cost accounting procedures that were placed in use throughout the organization's 53 plants. His last position with the company was that of text, "Plant Layout, Principles and Practices," published in 1951 and a subsequent volume of more than 500 pages on industrial engineering. At the time of his death he was director of Gaudreau Associates in Westport.

1921

MOSES CARR RICKER. The Alumni Office has recently been informed of the death of Moses C. Ricker, 58, of Fort Bragg, N. C., on March 9, 1961. Surviving are his widow, a daughter, a son, — Richard H., a student at the University in the Class of 1964, his mother, and four sisters — one is Marion A. '35 of Reading, Pa., with whom he made his home at the time of his death.

1925

JAMES BISSETT STEVENSON. Judge James B. Stevenson, 94, died in Rumford on March 26, 1961. He was born in Dundee, Scotland, in 1867. A graduate of the Law School, he practiced law in Farmington until 1901 and in Rumford from 1901 to 1942. He served as Recorder of Rumford Falls Municipal Court from 1901-1907, and Judge from 1919-1935, and as Auditor of the Town of Rumford for 13 years. A son — James S. Stevenson '26 of Rumford survives.

1928

EBEN LEE TOWNSEND. E. Lee Townsend, 54, of Winthrop, died at the Augusta General Hospital on March 23, 1961. A native of Readfield, he had lived in Winthrop for the past 20 years and was employed at the Winthrop Water Works. Surviving are his widow, two sons — one is Linwood C., a student at the University in the Class of 1964, his mother, and four sisters — one is Marion A. '35 of Reading, Pa. Townsend was a member of Phi Eta Kappa Fraternity.

1932

PHILIP RADCLIFF YERXA. Philip R. Yerxa, 53, died in South Portland on April 5, 1961. A native of Redford, he was active in the Lions Club and was a member of the University Quartet while at the University. At the time of his death he was president and treasurer of the Yerxa Inc., garden and nursery firm, and was active in oil dealership. He was a Mason, a member of Longfellows Chapter OES, and a member of the Portland Lions Club. Survivors are his widow — Eleanor (West '33) of So. Portland; a son — Richard R. '52; two daughters — Dorothy L., a student at the University in Maine in the Class of 1962, and several nieces and nephews. Frank P. Preti '17 is a brother-in-law. Yerxa was a member of Phi Eta Kappa Fraternity.

1947

PAUL JAMES NADEAU. Paul J. Nadeau, 35, died on May 4, 1959. A native of Fort Kent, he attended the Ricker Junior High School and the University. He was a veteran of W. W. II, having served in the U. S. Navy. His father survives.

1952

FRANCIS BARR ALLAN. The Rev. Francis B. Allan, 33, of Saco, Maine, was killed on April 6, 1961, when his single-engine plane crashed near Summersville, West Virginia. His wife and two children were kited in the accident, and his mother survives. Allan was a native of Solon, the Rev. Allan graduated from the Bangor Theological Seminary before receiving his degree from the University. He served as a pastor in Solon, then served for a time in West Gills Falls, N. Y. At the time of his death he was pastor of the State Street Presbyterian Church in Schenectady, N. Y. In 1956 he was in Mayaguez, Puerto Rico, for a summer work project and in 1960 he and his family were in Alaska for the Conference. Allan was survived by his widow, two daughters, one is Richard H., currently a student at the University and a member of the Class of 1961, and a nephew — Everett K. Adams '32 of Reading, Pa., with whom he made his home at the time of his death.

1888

Just as this issue went to Press, the Alumni Office learned that Nathanial E. Wilson '88 of Reno, Nevada, died on April 4, 1961.

1890

The Bangor-Brewer Lions Club gave a mighty roar recently for Frederick G. Quincy of Bangor who was 93 years of age on February 13 and one of the oldest Lions in the State.

1891

SENOIR ALUMNI

Annual Reunion, June 9-10-11, 1961

PHI PI KAPPA BONDS—1889-

1890

The Bangor-Brewer Lions Club gave a mighty roar recently for Frederick G. Quincy of Bangor who was 93 years of age on February 13 and one of the oldest Lions in the State.

George Gould has been at home in Bangor re-
1967 Mr. Karl MacDonald
27 Nelson Avenue, Wellsville, N. Y.

Mr. Charles E. Smith of Kansas City, Kans., and wife, left home June 4 for a fishing trip to God's Lake and river in Manistota, Can. They flew to San Francisco, then to Los Angeles, then to Pierre and the Zephyr to Chicago where they met Arnold Totman. They had a varied four-day dinner and with them the next morning flew to Flint, Mich., where they picked up a car. From there they drove thru Canada, returned from there to God's Lake. Had good fishing. They drove about 5,000 miles, mostly in Canada. Arrived home July 28.

Lucius Barrows, 11 Waban St., Augusta, says he was not able to indulge much in his hobby of ice skating on account of the mild winter. "The good Lord willing, we hope to be in Florida another winter," so he says. They had nine mornings that it was zero or colder, to 22 below.

In the past few years, but he can not comment. He spent more time last summer and fall with his timberlands and enjoyed it. "The good Lord willing, we hope to be in Florida another winter," so he says. They had nine mornings that it was zero or colder, to 22 below.

1968 Mr. James A. Gannett
201 Commercial St., Orono

When Marian and I were in Cambridge, Mass., for the Levinson-Sato wedding we enjoyed talks over the phone with Oli Means, Sally Trask, and Phil Emery. As of that date in early February, Phil and Rebecca are now in Florida; Sally was busy compiling family genealogy records, Ditto's favorite and absorbing hobby; and Oli, who vacations in downtown Bangor, desires a visit again to the University campus.

The Phillips County News of Malta, Montana, of February 2 announced that of Malta's oldest firms when Hanscom and just sold their hardware and plumbing business. Quoting from the paper, "Both Hanscom and Just are long time resiidents and business men of Malta... Art Hanscom came to Malta in 1909 as an engineer with the U. S. Reclamation Service. The Dodson Dam was then being completed... After severing his connection with the reclamation service, he decided to make his home in Malta." He served for four years in the city office as Clerk and City Engineer. He was a member of the Board for many years; a Past Master of Malta Lodge, A. F. & A. M. and a Past Worthy Patron of the Order of Eastern Star. The Hanscom and Just business was established in 1926. Previous to that time Arthur was a partner in the Hanscom and Snodgrass Hardware and Plumbing. When asked about his future plans Arthur said he will enjoy home life and work in his garden, long his major hobby.

Dan Chase was honored by the Board of Directors of the Sportsmanship Brotherhood, Inc., who selected him to receive the John Perry Bowditch Award for 1960. The award was in recognition of his 35 years of service to the cause good sportsmanship and his interest in developing American youth through athletic games and physical fitness. The award was made at the annual luncheon in New York in late February.

Arnold W. Totman, 224 S. Michigan Ave., Chicago 4, Ill., took his annual trip thru New England as far as Bar Harbor in October to admire the foliage. He said he was not able to indulge much in his hobby of ice skating on account of the mild winter.

Lewis W. Perkins of 32 Lafayette Avenue, Hingham, Mass., was sworn in on March 1st as president of the Hingham Cooperative Bank. We have another bank president among us. Mr. Perkins has been a Director of the Bank since 1942 and was formerly director and vice president of the Hingham Trust Company. He has served as Plymouth County Treasurer for 31 years, a native of Wells, Maine, he graduated from South Berwick Academy and attended college at the University of Maine, he has served for the Boston Elevated engineering department and later joined Walter G. Foster's engineering firm. In 1926 he opened his own office in Scituate and in 1935 purchased the Foster Engineering Company. He now has his office in Scituate.

Well! What do you say? We need everyone at Maine for the 50th to show that we are still young and full of Pep.

The Treutler Frank "Pete" Lancer is home again after a bout with major surgery at the Eastern...
THE MAINE ALUMNUS

2012's ROWE!

Here's the report on Charles W. Rowe's family. His family has had 120 years of grade school, 60 years of high school and 12 years of college for himself and his 15 children. He says he hasn't accumulated great wealth, but birthday gifts to 47 grandchildren and one great grandchild help to use his spare cash. Mr. Rowe's address is Route 1, Vassalboro, Me.

Mr. Charles W. Rowe

1914

Mr. Harold P. Adams

Marion University, Marion, O. W. Mountfort, 515 38th St. South, St. Petersburg, Fla., writes he has attended all the meetings this winter in St. Petersburg. He is chairman of the Class of 1913.

California city clerk was elected in 1923 but there was a break in his services during the war years.

Charles A. Chase, who is spending the winter at 621 Bay Esplanade, Clearwater Beach, Florida, attended the March 11th meeting of the St. Petersburg Maine Alumni group.

Don't forget our 50th in June 1964. Howe Hall is in a receiving mood for your donations for this momentous event. His address is: 24 Crosby St., Orono.

Mrs. Harold P. Adams

Park Home, Ludlow

1915

A. A. HAUCK FUND DONORS—35

A fine letter from the Goodwin came which we appreciated very much. Eugene was a "special student" and left before the 1915 Com­mencement to supervise a mechanical and electrical equipment in the then new Ban­gor Post Office. A number of years of work in the West he returned to help build submarines at Bridgeport, Conn. Shortly after he was able to enter the Supervisory Office of the Treasury Department in D. C. where he spent over 40 years with the exception of a period of enlist­ment in the Army. For about one hundred and twenty-five years the organization has designed and supervised the design of the buildings, hospitals, power plants, Federal office buildings, Washington National Airport, etc. At the end of 1958 Good­win resigned as Chief of the Architectural and Elec­trical Engineering. Just before W. W. I Eugene married Mary Dore of Brewer. They built their home in Brewer where they now live. They had a son and a daughter. The daughter com­pleted her doctoral degree at Wisconsin and is married, and has two children. Words are in­adequate to describe the two grand children!! Thanks for a very interesting letter.

A note just arrived from Ciem Lyon who writes "Another classmate has bit the dust of retirement." I go on the retirement roll of the Department of Agriculture of the State of New Hampshire April 1st. Ciem is anticipating gardening, both flowers and vegetables. This will bring you much enjoyment and good health.

1916

A fine letter from the Goodwin came which we appreciated very much. Eugene was a "special student" and left before the 1915 Com­mencement to supervise a mechanical and electrical equipment in the then new Ban­gor Post Office. A number of years of work in the West he returned to help build submarines at Bridgeport, Conn. Shortly after he was able to enter the Supervisory Office of the Treasury Department in D. C. where he spent over 40 years with the exception of a period of enlist­ment in the Army. For about one hundred and twenty-five years the organization has designed and supervised the design of the buildings, hospitals, power plants, Federal office buildings, Washington National Airport, etc. At the end of 1958 Good­win resigned as Chief of the Architectural and Elec­trical Engineering. Just before W. W. I Eugene married Mary Dore of Brewer. They built their home in Brewer where they now live. They had a son and a daughter. The daughter com­pleted her doctoral degree at Wisconsin and is married, and has two children. Words are in­adequate to describe the two grand children!! Thanks for a very interesting letter.

children. His chief hobby is gardening and he has about an acre of berries and vegetables.

Clara (Haskell) Foss, Eliot, is a retired teacher. She lives with her daughter in Maine, she has four children, and has taught in various high schools. She also was a 4-H Club leader in Maine for many years and is a fourth generation granger. She is a member of the First Congregational Church and secretary of its Ladies Circle. She has been active in the Eliot Garden Club and is president of the Melody Club. Her hobbies include braiding straw hats, making doll clothes, and collecting recipes. She is very interested in music, drama, and traveling.

Ralph Wilkins was listed among the honor guests who attended the annual U. of M. Pulp and Paper Alumni Luncheon at the Biltmore Hotel, New York, recently.

Henry Stearns and his wife are in Maine. He is a professor of education at the University of Maine, where he has been for about 30 years. His grandchildren are all at home.

Donald J. Dellinger, who was elected Potentate of Anah Temple (eastern Maine) on Jan. 13, has been appointed to the Imperial Council Session in Miami recently.

Lloyd Douglas writes, "Have been with A. T. & T. Co., nearly 41 years and will retire in May, 1962. They have bought us two sons, one a child, and one more expected this month. Of course the grandchildren are the most important things to us now. We have done some traveling in the last five years. Virgin Islands, Florida, Nova Scotia, and more after this summer. We'll probably stay at our present address as long as we can pay taxes and upkeep, and roam about from time to time." Mr. Dellinger is now 65th.

Phil Libby, Caribou, wrote, his cousin, Roland (Emery) Cole, '17, after Christmas: "We are sure having a ball since I retired, but nothing goes as planned. We got in the first trip to Oregon in the fall. O.K. I'd always wanted to be there in late Sept., or Oct., but had to return to school. We had a great trip but the Oregon coast is too cold and rainy in the fall for us. Then we dilly dally along until too late to make reservations to Chamois and Mexico, but got into short trips to the near-by desert, we've never had a speedometer. We go down to the desert, down to Brinn, and time flies. Expect to go down to Matanzas, in Mexico for their Fiesta about February 19th, if we don't get into the desert first. Our kids are fine and have good jobs and fine families. They both have good jobs and two kids and have about 100 miles; just an easy ride (or so far for baby sitting)."

A news release in September gives an interesting and detailed description of Prof. Harry Watson's work in testing equipment for fire prevention. This news item was from our helpers at the Alumni Office—keep these items coming.

From the Alumni Office, a letter written by Mr. Arthur Hawkes, Farm Editor for one of the Houlton papers, in which he writes about the most interesting aspect of a "Start Planting Under Light." Charles Wesley, our classmate from Belfast, as head of vocational agriculture department at Houlton High School, gives us through Mr. Hawkes some tips on artificial light. Space does not permit much coverage here, but he states that light from tomatoes and cabbage, to tuberous begonias and English daisies, have been grown by Charles Wood. This most interesting information should be in the hands of all who grow African violet or etc. seedlings prior to moving them out of doors. Charles recommends a subject on the book, "Gardening In Doors Under Lights," by Frederick H. and Jacqueline L. Kranz, published in 1957 by the Viking Press, New York City. Thanks, Charles, so much for this contribution to those of us who see very few things "green or blooming" from October until May.

Here in Newnton, Massachusetts, the snow is still on the ground, however the birds seem more plentiful and it shouldn't be long before our winter hibernating habits will be turned on and the air will be heavy with the scents of the lovely blooms in the spring. Thanks again to all of you who help make this column possible.

Robert C. Chandler writes that he is superintendent of the Decatur District of the Central Illinois Conference of Churches with headquarters at 1442 West Wood St., Decatur. The district has 113 churches so there is a great deal of travel and a variety of duties, mostly to do with administration and supervision. Bob and Mrs. Chandler have a daughter, Martha, who lives in Decatur 45 miles away so that they can thoroughly enjoy her five "all normally active" children.

Again we extend congratulations to Ted Curtis for superior accomplishments during his 37 years as Varsity Ski Coach at the University. Ted is retiring from coaching and will remain in his present position as faculty manager of athletics. He was recently honored at the Annual Winter Sports Ball held recently at the recently associated member of the Orono Planning Board.

Grace Hillman Kealher (Mrs. Clyde B.) was among the judges of this year's D.A.R. Essay Contest, which had its subject "Waterways of Maine." Ninety-one entries were submitted from the Bangor schools and Grace also made the six selections for the writing contest. She and her husband reside at 73 Court St. and besides her teaching, she is active in clubs and various organizations.

William H. Jordan, a Cape Elizabeth market gardener, was pictured in the newspapers recently, studying water for absorption of soil. He is president of the Maine Vegetable Growers Association.

George A. Vose, was re-elected vice president of the Eastern Trust & Banking Co. at the 74th annual meeting held recently in Portland. Mr. Vose's residence is at 15 Wingate Court. He is also active in many civic affairs.

Mr. Hutchins, your class secretary, was so interested in the newspaper report on Charles Wood that he has offered to send photostat copies to anyone who requests one from him. Space wasn't an issue. We hope you enjoy the column. Readers who have good ideas for future columns are encouraged to submit them.

Howard Bowden of Hallowell recently participated in the mid-winter Parent-Teachers Board Meeting in Augusta. He is national chairman of rural service in that organization.

Jennie (Sherwood) MacInnes, a teacher in the Greenshush School at Milford, is retiring in June after thirty years in that position.

Clayton P. Ogden, Chief of the Division of Inspection of the Maine Dept. of Agriculture, recently expressed the Women's Auxiliary of the Maine State Police, speaking on food inspection. Clayton also holds the position of state seal of weights and measures.

• Thomas J. Carlin's address is P.O. Box 151, Kenogamau P.Q., Quebec, Canada.

Paul J. Stella is a salesman for the Simplex Time Recorder Co. in New Haven, Conn. He resides at Longhill Road, Guilford, Conn. At present he is president of the Southern Conn. U. of M. Alumni Assoc.

In Trenton, Maine, we still have snow covered fields (March 26th) and are eagerly anticipating a more spring-like vista of sea and mountain.

Mrs. William E. Schrampf (Mildred "Brownie" Brown) & 40th Reunion:
A. A. HAUCK FUND DONORS—79

Clayton T. Stover is vice president of the Kelley Chapter Pioneers, an organization affiliated with the Telephone Pioneers of America. This Organization was founded nearly 50 years ago and today is the largest employee organization of its kind. Long service in the business, 21 years or more, is the mark of eligibility for membership. Among the objectives fostered by the organization is the ideals of community service. Claude is general traffic manager for the New England Telephone and Telegraph Co. in Maine and lives in Portland.

Walter Littlefield, retired from the Brown Co., of Deer Isle, N. H., has been spending his time at Holmes Beach, Fl. He attended the St. Petersburg Alumni gathering last winter. Walter plans to settle in Marshall, Miss.

Earle M. Hillman, of Bangor, a member of our class for one year, and a graduate of Northeastern University, has been city manager of N. H. It has been spread, he is now the general manager of the New England Telephone.

Lawrence "Zkee" Dewley, ski coach at Edward Little High, Auburnd, has brought national fame to Maine. Under his guidance, the students have won national titles. Since "Zkee" organized the team at E.L.H.S. in early 1950, his team has won 13 state championships, and six
Clarence Flint is really up in the world. Titles—director of graphic arts and partner Charles T. Main, Inc., of Boston, chairman of a discussion leader when 29 newspaper executives held a seminar at the American Press Institute, Columbia University.

We—Ma, Pa, Jane & Bill—are leaving for California in June to attend son Bill's wedding in Sierra Madre on July 22. We, friends, if an answer came from the cards which we have been receiving each day.

Robert Prescott is with the U.S. Department of Engineers in Anchorage, Alaska. His address is 1326 K St., Anchorage.

Miss Angela Minutili, 55 Ashmont St., Portland, has been appointed deputy commissioner for operations in the United States Department of Agriculture, by Pres. John F. Kennedy. Frank Battles and wife Arline have just established a real estate business in Wolfeboro, N. H. Their address is 92 No. Main St.

Dr. Merle T. Hilborn, plant pathologist at the Maine Agricultural Experiment Station, and a fellow worker, Prof. Richard McCrum, have helped prepare a booklet on the apple virus disease.

Mr. Rufus Jasper of Elliot is first vice president of the Maine Congress of Parents and Teachers. He has been active in P.T.A. work for twenty years.

Dr. Samuel Bachrach, Worcester, Mass., was one of the official delegates from Mass., to the conference of the aged and elderly at Washington, D. C. According to a clipping from the Enterprise, Concord, Mass., Dr. Bachrach has long been active in the work of the problems of the aged and has been instrumental in making Worcester one of the outstanding cities in the nation for the solution of this problem.

Donald Huston is manager of a credit bureau in Dover, N. H., and resides at Dover Point, Dover, N. H.

Don Huston is a manager of a credit bureau in Dover, N. H., and resides at Dover Point, Dover, N. H. Ward Cleaves writes from 7600 Honeywell Lane, Bethesda, Md., that he and Myron Cleaves are going on a cruise to the Virgin Islands via Florida. There he hopes to look up Larry Merrill and Nossel South in Florida.

Dr. Merle T. Hilborn, plant pathologist at the Maine Agricultural Experiment Station, and a fellow worker, Prof. Richard McCrum, have helped prepare a booklet on the apple virus disease.

course we can’t leave you out Alice (Dyer)! They say the woman makes the man. Ed and Alice have a daughter Jane, a junior at Pembroke College. Do let us know your address, when you get settled in Newport, N. H.!

Mrs. Clement Donahue (Gladys Colwell). They have an addition to their family, a girl, born in January. I'm not sure about the name but I believe they have three other children, the oldest of whom is a freshman at Bowdoin. The Donahues live in Caribou.

Jim Stanley must make nearly as much noise in Augusta as he does at our reunion—he sure seems to be making news and headlines with much activity in the current Maine Legislature.

Robert Irvine, Cedar Crest Road, Bellows Falls, Vt., is principal, Central Elementary School, Bellows Falls.

Maddy (Smart) and Wally Beardsell never did go on that vacation to the Virgin Islands instead they were transferred to California. Address

Milton J. Jeffellon has been appointed a trusted staff member of the Eastern Trust Company.

Sheldon Howard’s present address is: 3435 River- side Drive, Chicago, Ill. 60613.

Just read a most interesting news article about Helen Philbrook. Helen is a hostess-secretary to the Assistant Secretary of State at the Blaine House, a position she also held a few years ago with Mrs. Burton Cross. This position involves people, food, paper work, and a knowledge of the job Helen does with efficiency and enthusiasm.

Had a pleasant chat with Audrey (White) Beyer recently. Her second book, "The Sapphire Pendant," was recently published. She is a former student of Governor-General Practice and in order to be in good standing with this National Organization, a doctor must study medicine at least 150 hours every three years in approved courses. Dr. Mastro is on the staff of the Manchester Memorial Hospital and has a very large practice. Joe loves gardening for a hobby. He is also an active business man, being Financial Vice Pres. and Director of the Thomas J. Mahon Co., Inc., of Englewood, N. J. This company markets drugs and products used in the treatment of diseases of the upper tract. Keep your eye peeled for more about this company. The Mastroes have two daughters, 7 and 10, and live in Manchester, High School, and one, 14, who is a student at Manchester in Thornfield in 1960. Joe attended the American Medical Ass. Convention in Washington, D. C. At that time he had an appointment with Dr. Thomas Hunt Smith (34, ambda chi) who is Assistant Administrator of the Federal Aid Agency, and lives at 6202 Green- tree Road, Bethesda, Md. We’re glad to hear word of you, too, Smitty.

A. A. HAUCK FUND DONORS—116

This is the last opportunity that I will have to urge you all to return June 9-11-11 for our 25th Reunion. We, especially Mrs.新政, the Chairwoman and her committee, Don should be full of ambition having just returned from the last reunion. Be sure you read this you will probably have received at least one letter from Don.

I just recently learned that Joe Mullen was married recently to Dorothy (Gall), and they have a daughter born in January. Joe is employed by the J. F. White Construction Co. in Lawrence, Mass. He is married to the former Marion Morrison, and they have four children, Joseph, Robert, James, and Marion. He has announced his candidacy for the board of assessors in Lawrence. His address is 487 Lowell St., that city.

1938

Mr. Robert L. Fuller
31 Andrews Ave., Falmouth Foreside
A. A. HAUCK FUND DONORS—116

Guess I’ll have to resort to the new Blue Book and the alumni office for help this month. Did spend a Sunday P.M. with them recently in Wellesley and also an overnight visit from the Dwright Lords. Dwight had been to Orono and Brunswick and is now back in his private practice.

Jim Stanley must make nearly as much noise in Augusta as he does at our reunion—be sure to see him! His book "Making News and Headlines with Much Activity in the current Maine Legislature." Arthur and Betty (Bruce) Smith recently announced the engagement of their daughter (Bet- tina) who is employed in the Art Dept. of Hallmark cards, Kansas City, Mo. Wow, how are you going!

Howard Goodwin seems to keep active around Bangor. His latest efforts are in behalf of the new St. Joseph Hospital. He is chairman of the business and professional committee.

Only two more years to our 25th—how’s the fund coming? You all should know if you’ve done your part. Dunc and Midze say they’re ready—so give it only hurts once. Your address: 166 Kerman Rd., Newton Highlands 61, Mass.

The Maine fishing season is about to open and Hagget doesn’t even have his last year’s record catch back from the Taxidermist. Many of his friends (?) are wondering who is telling who to stuff it.

1939

Mrs. Linwood R. Card (Charlotte Hennessy)
41 True St., Portland
A. A. HAUCK FUND DONORS—116

Arthur Chick of Brothertown, Monmouth, spoke at the Agricultural Extension agents’ confer- ence at the University of Maine, Jan. 5, 1961, on his recent trip to Russia. Art is married and has one daughter. While on campus he called on former professors and members of our class.

"Herb" Leonard (if you are ever class secretary you will thank him!) is currently faculty advisor to the Senior Skull Society.

John W. and Priscilla (Thomas’ 40) Perry live at 164 Katahdin St., Cape Elizabeth. John is a General Agent, National Life of Vermont, 905 Casco Bay Blvd., Portland, Maine.

Barbara (Whittridge) MacCasland is a psychologist at Marcy State Hospital. Her husband is a dentist there. Barbara’s home address is Box 100, Marcy, N. Y.

According to the Kennebec Journal, Edward P. Cary, Senator, in the 100th Maine Legislature, was recently appointed co-chairman of the Welfare Committee. His home address is P. O. Box 688, Madawaska.

From the same source, Ralph W. Farris, Jr. (my first contributor!) a Senator in the 100th Maine Legislature, was recently appointed chairman of the Legal Affairs Committee. His address is 3,100 State St., Augusta.

Clayton Merriman is venturing into politics, competing for a position on the board of assessors in Littleton, Mass. He is representative for International Harvester, Middlesex Implement Co., and manages his orchard.

The amusing item in a recent Portland Telegram carried the news that Richard Berries now serves in a Maine Legislature. Our Republican friend, Ed Cape Elizabeth, re- ports that he has been getting a few calls from people who want to argue about views expressed by Portland’s Ridge Avenue’s moose that he ‘really didn’t mind but pointed out that they could save themselves embarrassment if they watched that moose carefully.

A letter from Marge (Mackinnon) DeWick brings news of Avis (Lovejoy) Stanford. Avis, recently widowed from Mr. Mullen, Mr. Mullen running her husband’s poultry farm and, with two other Wayne women, has a thriving little business making poultry eggs. Her son, Donald, Gatti, and his family, are now at the University, where Donald is a sophomore.

Henry Lowrey reports a new position as general sales manager of the Baldwin Lime Hamilton Co., 42 Fourth Ave., Waltham, Mass. The Lowreys are moving to Waltham from Fairfield, Conn.

Among those elected to serve for a three-year term on Bangor’s Salvation Army Advisory Board at its annual meeting this spring was Norman Carlisle. Norman is president of the Gordon- Carlisle Insurance Co. His address is 64 Leighton St., Bangor.

1940

Mrs. Edward K. Brann (Anne Perry)
Phillbrooke Farm Inn, Shelburne, N. H.
20th Reunion, June 9-10-11, 1961
A. A. HAUCK FUND DONORS—138

Late again with this column—busy getting ready for our Reunion! I sure hope to see oodles of you in Orono in June.

Lawrence Kelley, for the past two years man-ager of merchant sales in the Fine Paper Division of International Paper Co., has been transferred to the staff of the Executive V.P.

Robert Carlisle has been elected a V.P. of the United Co. of Ellsworth, Maine. Alice Smith will be teaching the first grade in East Hampton, Conn. She has been teaching special courses at the Westfield State Teachers College.

Dr. Corinne (Comstock) Weston has been pro-moted to full professor at the University of Pennsylvania. Her brother, Carlton ’39 of 9 Lincoln St., Hallowell, tells us she’s a housewife for her Air Force Officer husband, Bob.

Mrs. Constance P. Leger (Connie Philbrook)
Box 456, Wolfeboro, N. H.

From New York Life’s yearbook of successful insurance career men!

RONALD SCHECHTER—Gets his degree in “Success” through insurance career begun in college!

Ronald Schechter became a part-time New York Life Agent while still a sophomore in college. Two years later, after graduation, he joined the Company on a full-time basis. Ron has never had any regrets about his decision. At the close of his first full year, his efforts earned him a place in Nylic’s “Star Club” of leading agents. He has qualified for the 1961 Million Dollar Round Table of the National Association of Life Underwriters.

Each succeeding year, Ron has earned even greater success. His past accomplishments are the result of his abilities. His promising future is limited only by his own talents and ambitions. If you, or someone you know, is interested in following a career like this, write for information.

IN MATTERS OF TRUST...

Our Trust department offers all trust services. Executor and administrator of personal estates, trustee under wills or as trustee of living trusts and life insurance trusts. Investment management, custodian accounts... in fact, anything under the heading of estates and trusts.

We will be glad to discuss your estate planning needs with you at any time.

Remember...You’re always welcome at MERCHANTS NATIONAL BANK

Mrs. Walter C. Brooks

(57 Leighton Street, Bangor)

A. A. HAUCK FUND DONORS—124

A new address for the Meade Klenners' (Constance Cratty) is Hqrs. 65th AD, Box 2376, APO #283, New York, N. Y. Should you be in Madrid, Spain, be sure and look up Meade, Bonnie and son Mike.

M. Thelma Browne (Barbara Mills) 12 Somerset St., Bangor, has been in the news recently. First she and her daughter, Melinda, worked for the Fashion show in Brewer. U. of M. Women Fashion Show in Bangor along with Mrs. Robert Patterson of West Bangor. She and her daughter Deborah and Lisa. Then Barbara, who is head of the speech drama dept. at Bangor High School, coached the students. They played "Othello" when they won the area one-act play contest in Brewer and two days later they won the regional one-act play contest in Millinocket.

R. Proctor Ransden, Hartford Turnpike, Rockville, Conn., has recently been promoted to president of the cost and credit dept. of Taylor-Made Homes, Inc., of East Hartford.

Rev. Richard R. Davis, former class secretary, now gives as his address; Methodist Parsonage, Shelley, Idaho. We know Maine has sent a loyal alumnus to a sister western state which competes with our famous Aroostook crop—potatoes.

John Carson received his Master's degree in electrical engineering from Newark College of Engineering last June. John is now employed as a Senior Engineer at the Argonne National Laboratory, 9740 South Cass Avenue, Chicago.

Next month is reunion time at Maine, and although this isn't our year back, I'm sure that there will be plenty of activity for any of you who get the chance to visit the campus then.

1948

Mrs. Richard S. Foster

(Jean Campbell) 25 Donamor Lane

East Longmeadow, Mass.

A. A. HAUCK FUND DONORS—185

Spring is a charming time in East Longmeadow and we are surely overjoyed to see it. There were times this winter when we thought it would never come but at least we can say to one, wasn't it?

On to the news—Word from Jay and Elizabeth (Brown) Calkins finds them in Bingham now. Jay is principal of the Bingham High School and Betty is an English teacher there. Their address is 466 Bingham. Jay was promoted in Dec. to the grade of Captain and in the National Guard.

Harrison P. Crowell, Jr., is a sales engineer with Telco, Inc., Cleveland, Ohio. He was married to Dorothy M. Wribel of East Bridgewater, Mass., on Dec. 26, 1948. They will be coming to Maine in February helping with a benefit dance which is sponsored by the group.

Maurice Sylvester is down in Maryland where he is an Aero Research Engineer at the Ballistics Research Laboratory. Home is 744 Hickory Ave., Bel Air.

Ramon Rakoff is living at 88 Gerry Road, Chestnut Hill 67, Mass. His two daughters are both in school now, Jill, 7, in the second grade and Lauri, 6, in the first grade. He writes that they visited in Woodbridge, Conn., with Bob and Eunice Cahoon and three of their children, Michael, William and Steven, 6. Bob works for Johnson Service Co. in New Haven, Conn.

John Carson received his Master's degree in electrical engineering from Newark College of Engineering last June. He is now a section chief R. and D. Relays and Control with Daystrom, Inc., Newark, N. J. His home address is 23 Woodside Terrace, West Orange, N. J.

Forrest Stewart is also living in New Jersey at 49 Morley Drive, Wyckoff. He and his wife are the parents of two children, Michael, 12, in the 8th grade and John, 10, in the 6th grade. Bob works for Johnson Service Co. in New Haven, Conn.

Dr. Richard Adams has been promoted to associate professor, Dairy Extension, at Penn. State Univ.

Bob Rhoads, an agriculture engineer at the U. of Maine, has developed a new blueberry picking machine which will be tried out next summer in Maine and Nova Scotia.

Cary Davis is director of urban renewal for the city of Manchester, N. H.

Mr. and Mrs. Robert Scott with their four boys and four girls are living at 375 N. Campbell Ave., Ind. 19, Ind.

Peg Spaulding (57 Leighton Street, Bangor) is director of field services for Science Research Assoc. of Chicago.

Miles Dodge is working in The Forest Park, St. Louis, Mo.

Freda Gray-Masse, mezzo contralto, has sung during the past few months with the Boston Symphony Orchestra, Bangor Symphony Orchestra and Symphony Orchestra of Maine. She was a guest soloist with the Colby College Concert Choir in November and was recently invited to sing with the London Philharmonic Orchestra in London and Vienna next summer.

Robert Rehn is now with Internationa

Ltalx Corp. and resides at Cooper Rd., Moores Lake, Dover, Del.

Jay Rice has been named sales manager with some of his Old Town basketball lettermates, and one of Nundi Romano with his Piscataqua Pirates.

Dick Watson has been named general sales manager for the J. W. Greer Co. of Wilmington, Mass. Following his graduation from Maine, he was enrolled in an advanced training program with Westinghouse as a sales engineer with them. He joined the Greer Co. in 1952 as a sales engineer and since 1956 has been manager of process equipment division sales. The Watson's and four children reside at 22 Arnold Ave., Reading, Mass.

The engagement of Shirley Simmons of Seattle, Wash., to Dave Newton has been announced. The wedding will be solemnized May 20. Shirley was graduated from the U. of Washington and at present is connected with the U.S. Dept. of Agriculture, Chicago, with the Wheat, Flour and Feed Research Branch.

Mr. and Mrs. O. David Boutilier (Phyllis Os- good '51) and their four children live at 1015 E. 5th Ave., Houghton, Mich. Dave teaches in the civil eng. dept. of Michigan Tech. Bob is a new member of Wadsworth and Boston, architects and engineers. Ray resides in Cape Elizabeth.

Mr. and Mrs. O. David Boutilier (Phyllis Os- good '51) and their four children live at 1015 E. 5th Ave., Houghton, Mich. Dave teaches in the civil eng. dept. of Michigan Tech. Bob is a new member of Wadsworth and Boston, architects and engineers. Ray resides in Cape Elizabeth.

Hope all of you have made some plans that include the celebration.

William Louvier has recently been named manager of advertising for the State Mutual Life Assurance Co. of America.

Dr. William Annis has been named supervisor of teacher training in agricultural education for the State Dept. of Education with headquarters at the University of Massachusetts.

Raymond Trabold is the New Milford (Conn.) Junior Chamber of Commerce "Man of the Year." Raymond is the principal of the high school in New Milford.

Jasper Bull has been appointed to the northern Maine field staff of the Niagara Chemical Division of Food Machinery and Chemical Corp.

James A. Bement, 231 Ridge Road, Nutley, N. J., is head of the field erection dept. of J. O. Ross Engineering Co., manufacturers of air processing systems.

Merrill G. Butts is now employed at the Great Northern Paper Co. in Millinocket. His address is 15 Park St., East Millinocket.

Robert B. Donovan is a partner in the law firm of Perkins, Holland and Donovan. Their address is South Rd., East Kingston, N. H.

Malcolm E. Osborn has recently been appointed tax attorney for State Mutual Life Assurance Company of America. Prior to that he served for five years with the same company, first as an attorney for the law division and then as an attorney in the securities division. Mr. Osborn has recently had two taxation articles published. The article "Certain Tax Problems Involved with the Acquisition of Stock Purchase Warrants in Connection with Investments" was published in the Summer, 1960 issue of Boston University Law Review. The article "Package Deal is Best for Lender Tackling Stock Warrants" was published in the December, 1960 issue of The Journal of Taxation. Malcolm lives in Worcester, Mass., at 172 Vernon St. with his wife, Claire, his daughter Beverly May, 6, and son Lester, 1.

Issy Stevens writes that she is still at Acton, Mass., teaching physical education, coaching 3 varsity sports—2 junior varsity and 4 Junior High School sports. In basketball, the varsity has won 2 sectional championships, 3 league championships, 1 tournament championship and 4 runner-ups. The team has won the good sportsmanship trophy 2 out of 3 years. The softball team had a string of 41 straight victories at one time. We can see you've had a real busy and full nine years, Issy. It's been good to hear from you.

Dottie McCann and her sisters, Elizabeth, Margaretmary '57, attended the Inauguration of President Kennedy. They found it a very exciting and wonderful experience.

Jean (Geyger) and Gus Black write that they have been very busy on their new home in Saxton River, Vt. Last year, they wrote and invited '52ers to look them up—they have a campsite on a brook at their summer place in Pen, Vt.—and they extend the invitation again this year.

Vonnie (Leonard) and Ken. Ste. Marie have

married to Roberta Mary Adams of Patten. She is a graduate of Patten Academy and is currently attending the University of Maine. Bill is employed by the U.S. Forest Service at the University of Maine, 16 Pine St., Orono.

William K. Thorndike recently married Phyllis J. Tran. He is a graduate of Portland High School and has been employed as assistant manager of the Canal National Bank. The Bridgetschool, a technical engineer by the S. D. Warren Company. Their home is at 18 Dartmouth St., Portland.

New Arrivals

Bridegroom is employed as a chemical engineer by the S. D. Warren Company. Their home is at 18 Dartmouth St., Portland.

Roger Frey, who received his master’s degree from Maine in June, is studying for his Ph.D. in psychology at the University of Maryland. Last summer, he worked with the Human Sciences Research, Inc., in Arlington, Va.

Phil Johnson is studying for his master’s degree in engineering physics at the graduate school of Cornell University. In his spare time (?), he works at the Advanced Electronics Center of the General Electric Co., Hamden. He and Nancy (Davis ’56) have a two-year-old “boy-type” son. The family lives at 1 Crescent Pl., Ithaca.

Carolyn Barlow, Montreal, Canada, became the bride of Stephen Gilbert on April 8. An army veteran, he is with the survey section of the Connecticut Highway Department.

Mr. and Mrs. Philip Gotlib (Ruth Mamolen ’56) have a new daughter, Marcia Jean, born on February 20. They also have a son, Louis Jeffrey.

Mr. & Mrs. Philip Gotlib (Ruth Mamolen ’56) have a new daughter, Marcia Jean, born on February 20. They also have a son, Louis Jeffrey.

Kent, Ohio, to Chevy Chase 15, Md. (4830 Drummond Ave.) Bill was promoted to manager of technical promotion for the Penoyars have three

Many thanks to Mrs. William Penoyar for a nice newsy letter—she and Bill recently moved from Marcy, Ont., to Storrs, Conn. They have one son, Roger Earl, 17 mos. Their address is RFD 2, Winterport.

Mr. & Mrs. Philip Gotlib (Ruth Mamolen ’56) have a new daughter, Marcia Jean, born on February 20. They also have a son, Louis Jeffrey.

Mr. & Mrs. Philip Gotlib (Ruth Mamolen ’56) have a new daughter, Marcia Jean, born on February 20. They also have a son, Louis Jeffrey.

Norman and Isabelle (Stearns) Foss announce the Sept. 12 arrival of daughter Nancy. They have two other children, Margaret and Austin. (“Izzi” writes that her family moved to Bowdoinham about a year ago and that she is enjoying being a wife again. She receives mail via R. F. D. 2, Richmond.)

Paul Royte is a guidance counselor at Randolph High School in Massachusetts. Paul holds his master’s degree from Northeastern University and has recently been certified as a school psychologist.

Spring finds Bill Ewing at the University of Fort Worth campus in early April when she spoke and showed slides on “Six Weeks in Scandinavia.” It was done as part of the annual Farm & Home Week program.

Mrs. Charles L. Lavoux (Jane McNish) of Swarthmore, Pa., has written to the letter from the wife of a classmate brings us up to date on Albert H. Bishop and family. Mrs. Bishop writes that A1 is now a civil engineer working for the state on the Interstate Highway in the Bangor area. He and Norma have one son, Roger Earl, 17 mos. Their address is 464 W. Main St., Monticello, Terrance, Bangor. They hope to hear from long lost friends.

Dr. Robert L. Parsons (’51), his wife, Beverly Patricia, and their two children have moved to Storrs, Conn. They have one son, Roger Earl, 17 mos. Their address is 464 W. Main St., Monticello, Terrance, Bangor. They hope to hear from long lost friends.

Gloria writes that Kristen Ann came on 12 September, 1959. She received her M.A. in Elementary Education in 1959 and since then has been teaching first grade in Florida. (Congratulations may be sent to Box 1183, Titusville, Fla.)

Reba Drost signed her Christmas card—Mrs. A. H. Speicker. She and her husband live in the Caribou Trailer Park, Lot 60, Caribou.

Guy Hunter was elected president of the Central Maine Chapter of the National Cystic Fibrosis Research Foundation on July 1, 1959. In his acceptance speech he said, “To the boys. The Wilsons have bought a new home at 16 Churchill Rd., Fayetteville, N. Y.; Pete is also with Western Electric.

In the basketball department, John Norris again brought a team to the finals of the eastern Maine tournament—the only home loss, by a heartbreaking 55-50. Bob Nixon has a fine 10-2 record at Winslow this season.

Ralph Keef reports from our 49th State—“After I completed the five-year pulp and paper course at Maine in 1956, I went to work with the Ketchikan Pulp Co., Ketchikan, Alaska. In four months, I changed into the U. S. Navy and spent 27 months in the Ordnance Corps. I returned to the U. of M. in September 1958 to complete my master’s degree in Pulp and Paper Engineering, and, then, I headed for Alaska and my old job in January 1959. The family has joined the Alaska Lumber and Pulp Company. I am a process engineer in their new mill. Last summer I enjoyed a brown bear hunt on Kodiak Island.” He gets mail at the Alaska Lumber and Pulp Co., Sitka, Alaska.

From Florida we hear that Gertrude Harriman is planning a May wedding to T/Sgt. Theodore R. Metzger, USAF. He is a graduate of the University of Maine and has been employed as assistant manager of the Canal National Bank. The Bridgetschool, a technical engineer by the S. D. Warren Company. Their home is at 18 Dartmouth St., Portland.

band Vince are living at Gulf Breeze, Fla. Ment has the Y-15 missile and is responsible for the engineering program for the research program and missile firing. These reports are sent to Ment, we sure good to know you! Write to Ment and Vine at 516 York Drive, Bayside, Long Island, N. Y. The Clark's residing at 33 Underwood Road, Falmouth Foreside.

MS. ANDREW BISHOP, married to Bruce Bishop, is living at 206 Wells Rd., Damariscotta, Me. Also heard from Harry Percival. Since February, he has been working for the city of Bangor in charge of the electrical dept. Mail will reach him at 32 Parker St., Calais, where Clarissa and their daughter Mary are staying 'til warmer weather.

WITH spring in the air, it's been so swell to hear from many of you within the past couple of months. Thanks so much for your good wishes—and all the news included!

I got a wonderful, long letter from Pat (Wade) Stewart, Benghazi, Libya. He is employed by Esso Standard (Libya), Inc., and he and Pat and their twin, Charles, Jr., and Diane, have been in Libya for a little over a year. And despite the changes and adjustments in their lives due to this "distance" move (such as coping with insects, heavy rains that mold plaster, washing fresh foods on the ship's ship), they're enjoying it! So many new things and places to see! Their address is—C/o Esso Standard (Libya) Inc., P.O. Box 281, Benghazi, Libya.

Also heard from Harry Percival. Since February, he has been working for the city of Bangor in charge of the electrical dept. Mail will reach him at 32 Parker St., Calais, where Clarissa and their daughter Mary are staying 'til warmer weather.

Barbara Bernard, Carnibou, and Earl Adams were married April 3rd. Barbara is a senior at Aroostook High School and is living at 19 Park St., Bar Harbor. Earl is teaching at Presque Isle.

Gene and Julia (Tripp '60) Boothby are living at 15, Route 34, Phillipburg, N. J., with their new baby daughter born on December 13, 1961. Gene is a mechanical engineer with Ingersoll Rand Co. in Bridgewater, N. J.

Mr. and Mrs. Llewellyn Clark—that's the former Martha Trefethen—have four little ones—Rocky, Susan, Deborah, and young John, born last May.

The Clark's' big plans include building a camp in Sweden this summer!

Walter Hogan, a recent graduate of Temple University School of Oral Hygiene in Philadelphia, is living at 194 Main St., Cooperstown, N. Y. He is a Dental Hygienist, and a graduate of Temple University School of Oral Hygiene in Philadelphia.

A note from Carolyn (Bull) Dahlgren tells us of the birth of Matthew Lee in December, joining big brother Christopher. The Dahlgrens live at 33 Underwood Road, Falmouth Foreside.

Madeline Plaisted, 161 Westervelt Ave., North Plainsfield, N. J., is teaching in high school.

Janie (Quimby) Biscoe writes from the Fenn School, Concord, Mass., where she and Mark are house parents to a dozen 10 to 13 year old boys, and they that they will spend the summer in Graho, 75 Forest Ave. It won't be long now on that degree!

Barbara Luce, Ellsworth, to Darold Mitchell; Eleanor Johnson, Groton, Conn., to Melvin Young.

The early success of
Frank Shull, U. of Maryland, ’58 — some observations

Following his first full year of life insurance selling, Frank Shull was named "Most Valuable Associate" of his agency. And not the least of his accomplishments that year was the sale of nearly $800,000 of new life insurance.

To achieve success in a new career so rapidly is unusual—but less unusual in a New England Life sales career than in many others. There are good reasons. Tangible reasons, such as screening and training. Our candidates must, from the start, measure up to demanding standards. Then they participate in programs of study and practice at a General Agency, under the expert supervision of men who are themselves eminently successful. Finally, special schools at our home office hone their skills even further, building confidence along with competence.

But there are also intangible reasons for success—the variables in each of the candidates—ambition, motivation, character. The first may well determine his income, the second his attitude toward his profession, the third the manner in which he serves his clients. There can be no real success, early or otherwise, unless a man has all three attributes in the highest form.

If a career with New England Life sounds good to you, let us know. We'll see that you receive more information about the opportunities for men who meet our requirements. Write to Vice President John Barker, Jr., 501 Boylston Street, Boston 17, Mass.

NEW ENGLAND LIFE

New England Mutual Life Insurance Company; Founder of mutual life insurance in America in 1835. All forms of individual and group life insurance, annuities and pensions, group health coverages.

Local agent: Ernest K. Khoury ’53, Portland, Maine
The first quarter of the 19th century saw a speculative fever sweeping into Portland from the larger cities. Money was plentiful and the town's inhabitants were eager prey to the smooth, slick offerings of a new group of men ranging the land — the get-rich-quick schemers. Tall hat and tail coat was the chosen costume (until then the badge of utmost respectability) of these men, who were dedicated to parting dollars from their rightful owners. They were convincing talkers and impressed the unsophisticated citizens with their plausibility and sincerity. Fortunes were made — and lost — innate caution and common sense were abandoned in the hysteria of the times.

One story of early Portland relates how such a schemer persuaded some of the town citizens to join in a plan to produce silver from dew. After their initial investment (for a survey), they were informed that the dew at Freeport was particularly suited to the purpose. Consequently, the investors with great secrecy and difficulty, brought him several quarts of the laborsiously-gathered liquid. Poured into a great cauldron hung over a roaring fire, this was brought to boiling. After much anxious watching the schemer finally, with great regret, told them "something was wrong" — the silver did not materialize. Seriously he questioned the investors, and finally learned that the dew had not been gathered at exactly midnight, and only midnight-gathered dew would work! Back they went the next night, and sure enough, when the fresh dew was boiled, there in the bottom of the cauldron were gleaming pellets of silver!

With this proof of the workability of his plan the schemer had little difficulty getting additional investors who in turn gathered midnight dew (always at Freeport) and were rewarded with little silver pellets. Visions of quick wealth brought in more and more investors and all were happy.

Until, one morning, the schemer could not be found. He — and their money — had disappeared. Then, unbelievably for the first time, the little pellets were examined closely. On several of them fragments of Spanish words were engraved, and slowly the truth emerged. Thousands of Portland dollars had been exchanged for a handful of broken-up Spanish coins!
