Maine Alumnus, Volume 14, Number 2, November 1932

General Alumni Association, University of Maine
UNIVERSITY OF MAINE
College of Agriculture

In its Service to the State—

Prepares young men to become farm operators and young women to become home makers in Maine.

Prepares men for teaching agriculture and women for teaching home economics in the high schools of the state.

Prepares men and women for many other kinds of service in the fields of Agriculture, Home Economics, and Forestry in Maine.

Conducts an annual Farm and Home Week for farmers, their wives, and other interested persons where the latest developments in many fields are discussed.

Conducts annual contests for 4-H Boys' and Girls' Club members, and for Smith-Hughes agricultural school students.

Conducts an annual Poultry School during the summer.

Conducts a testing service for pullorum disease of poultry, publishing a list of poultry flocks which tests have shown to be free from this disease. During the 1931 season blood samples from 130,959 birds were given the laboratory test.

Supplies a diagnostic service for poultry and livestock diseases with recommendations for treatment.

Provides a service for identifying weeds, plants, and plant diseases and also for testing soils for acidity.

Provides lecturers for many organizations within the state such as service clubs, farm bureaus, and granges.

Renders advice on a wide variety of farm and home problems through personal correspondence and individual conferences.

For information regarding courses of study, the opportunities for which they prepare, and services of the College available to citizens of the state apply to the College of Agriculture, Orono, Maine.

LEON S. MERRILL, Dean
BRANN GIVEN ROUSING WELCOME
Crowell Receives Pine Tree “M”

The Second Annual Alumni Homecoming is now a matter of history. In spite of the fact that rain conspired to keep alumni away, there was at least as many alumni on the campus as last year, if not more. The program this year extended into two days rather than one, the high spots being an “M” meeting, the Homecoming luncheon, and the football game. This year more than last, an effort was made to so shape the program that alumni might have the opportunity of visiting teachers and classes, since this is the primary purpose of having such an event, as well as getting alumni back to the campus. The program began Friday afternoon with athletic events, followed by the first meeting of alumni and student “M” men which has been held in recent years at least, if not for all time, the Senior Skull dance the Homecoming Luncheon at which Hon. Louis J. Brann was the guest of honor, and then the football game, which Maine won 6-0, as elsewhere reported.

Alumni-Faculty Luncheon
Well over 200 alumni, faculty and friends were seated at the Homecoming Luncheon Saturday noon. During the meal hour the band furnished music and Ermo Scott ’31 led the singing. Professor Charles P Weston, chairman of the Homecoming committee, extended the welcome of the University to the Homecomers in his characteristic pleasing and witty way. Following this, President Boardman, who presided at the luncheon, introduced Arthur L. Deering, president of the General Alumni Association, who presented the Alumni Service Emblem. The program concluded with the presentation of Governor-elect Louis J. Brann ’98, who was given a very hearty ovation. Mr. Brann reminiscenced concerning his student life at the University and spoke of having met many Maine men in his recent travels and about the positions of responsibility and leadership which they have attained. The Governor-elect was touched by the warmth of the reception which was given him and wished Maine well in the forthcoming game. Telegrams from “Bub” Fogler ’15 and Rudy Vallee ’25 were read.

Crowell ’98 Awarded Emblem
In presenting the third Alumni Service Emblem or Pine Tree “M” to C. Parker Crowell, Arthur L. Deering ’12, president of the association kept the audience guessing until the very last. In making the announcement, Mr. Deering pointed out the basis of award, stressing particularly the fact that any alumnus may make a nomination at any time. He paid high tribute to Mr. Crowell’s long, faithful, conspicuous but none the less efficient and valuable service. The committee on the award of this emblem was: Harry E. Sutton ’09, J. Larcom Ober ’13, J. A. McCusker ’17, Myron E. Watson ’22, and Hazen Ayer ’24, all of Boston.

Among the important services rendered by Mr. Crowell over a period of more than twenty years, are the following: He was elected to the Alumni Advisory Council of the General Alumni Association in 1911 and is still serving as a member-at-large of the Alumni Council. He has served on the executive committee several times and is now a member. Was president of the Penobscot Valley Alumni Association for 1913-14 and 1914-15. In 1922 he was elected a member of the Memorial Fund Committee. He is also a member of the Memorial Fund Building Committee. He was vice-president of the Penobscot Valley Alumni Association for 1923 and also 1924. He was a member of the Athletic Board for many years, resigning in 1929. In 1928 he was a member of the Special Budget Committee and the Campus Planning Committee. He has generously supported the alumni association and the Memorial Fund.

The announcement of the award was received with genuine enthusiasm. The first two emblems had been awarded to Harry E. Sutton ’09 of Boston in 1930. Hosea B. Buck ’93 of Bangor received it last year.

“M” Meeting
An unexpectedly large number of alumni were on hand for this new event on the Homecoming program which was open only to alumni and student lettermen. Horace J “Hod” Cook ’10 of Auburn was the presiding officer and did his work in commendable fashion. The attendance was 102 in addition to the members of the University Band who added much to this occasion. Phil Jones ’19 also made valuable contribution in the form of leading songs and Al Lingley ’20 in leading cheers.

First on the program was the introduction of the football men, who by special arrangement, attended the dinner. Ted Curtis told briefly of the athletic achievements of each of the men. Trainer Wallace was next called upon and spoke briefly concerning the caliber of the men who were representing the University on the varsity team this year. Coaches Jenkins, Brice, and Phil Jones were each called upon for remarks concerning the cross country and track, varsity football, and freshman football teams. Then “Hod” Cook presented the members of the 1915 national cross country championship team: Frank Preti, Edmund Dempsey, and Weston Haskell, who was manager. The remarks of this trio were most pleasing, in (Continued on Page 26)
Three Classes Start Endowment Gift Plan

Three alumni classes, 1930, 1931, and 1932 have each taken a one thousand dollar endowment insurance policy for the purpose of creating a fund which will form the nucleus of a class gift on the occasion of the twenty-fifth anniversary of their graduation. It is believed that these are the first alumni classes of the University to have undertaken this arrangement. All three of these policies were written by William Daley, an alumnus of the class of 1930.

The first class to undertake this plan was 1930. It is especially interesting to know that the action taken was entirely voluntary and wholly unexpected. At the reunion meeting of their class last June one of the members of the class suggested that they should begin to look forward to presenting the University with a gift at their twenty-fifth reunion since this idea had been suggested to them. After careful discussion the class unanimously endorsed the idea and further that the business should be given Mr. Daley, president of the class, because of his untiring effort in behalf of their group. After that class had endorsed the idea it seemed worthy of expansion and other classes were approached and as a result of this act, 1931 and 1932 through the class executive committees have also undertaken a similar plan.

Each of the classes have sufficient funds in their treasury at the present time to be able to carry the policy from three to five years before which time class treasurer will start collecting dues. Each of the classes have placed a policy on one of the youngest members of their class. Russell D. Coyne is the 1930 representative, Edwin Guptill, 1931, and Ralph Brooks, 1932. These policies mature in twenty-two to twenty-four years, at which time they will yield one thousand dollars and any dividends which may be allowed to accumulate. If in case of death of the member of the class the money goes to the University by assignment and is to be held in trust until the twenty-fifth reunion of the class, at which time action will be taken as to what disposition shall be made of the fund.

Bates college has a group known as The College Club which was established in 1891 and to which a few of the outstanding students of each graduating class are elected. The purpose of this club is to take an active interest in affairs at the college and encourage and promote the general welfare of the institution.

Two Third Generation Students in 1936 Class

Among other interesting information revealed by a study of blanks filled out by the freshmen for the Alumni office is the fact that there are two, third generation students in the 1936 group. These two are Edith O. Gardner, daughter of A. K. Gardner '10 of Orono, and Thomas F. Reed, son of Frank R. Reed, Jr., '06 of Bangor.

Miss Gardner is granddaughter of the late Charles E. Oak, class of 1876, who was a prominent citizen of Bangor and well known as an alumnus of the University. Frank R. Reed, Jr. is the son of Mr. Reed, class of 1876. It is somewhat of a coincidence that both of these third generation students should be descendants of men of the class of '76.

There is but one student in this freshman class both of whose parents attended the University. He is Roland M. Gleizer of Bangor. The father, Edward I. Gleizer, is a graduate of the Law School in 1914, and Mrs. Gleizer is a member of the class of 1915.

This study further shows that 123 boys and 50 girls have had relatives attend the University. These 123 boys have had 30 brothers, 10 sisters and 157 other relatives attend Maine. The 50 girls have had 15 brothers, 14 sisters and 107 other relatives who have attended or are now registered at the University.

Early Historical Material

Some interesting historical material has been recently received from J. S. Gould, son of the late Benjamin F. Gould of the class of 1872, to be added to the collection being made by the University, under the direction of a committee of which Registrar James A. Gannett '08 is chairman.

The father whose tragic death occurred this spring was the first man to receive a diploma from the University. The son, J. S. Gould, is endeavoring to locate the diploma in order that the family may present that to the University because of its historical value.

Among the material which has already been received are copies of the 1872 and 1874 Commencement Programs and other programs of declamations and exhibitions as well as some handwritten material which apparently was intended for use, if not actually used, in some publications.

Some of this material is exceedingly interesting reading and reflects some of the thoughts which evidently ran through the minds of students during the first years of the life of the University.

John Oak Will Provides For Scholarship Fund

According to the terms of the will of the late John Marshall Oak of Bangor, class of 1873, as published in the papers, the University will receive fifteen hundred dollars when his estate is settled, the estate being placed in trust for the benefit of his wife during her lifetime. At the decease of his wife there shall remain sufficient balance the University will be given in trust fifteen hundred dollars to found what will be known as the John Marshall Oak Scholarship.

The purpose of the gift is to benefit students in such a manner as may be determined by the President and Board of Trustees of the University but with the expressed hope that the income might be expended for the advancement of the art of public speaking.

Mr. Oak had been active in University and alumni affairs during his earlier years and even though for five or more years he found it impossible to be at the University his interest was no less a biographical sketch of his life and services to the University was presented in the October Alumnus.

In addition to the bequest to the University Mr. Oak provisionally made plans for the establishment of a fund of not less than five thousand dollars to be used for building a public library in Garland, the birthplace of Mr. Oak and the home of his father, Lyndon Oak, the library to bear his family name. Lyndon Oak was one of the outstanding figures in the earlier history of the University and it is after him that Oak Hall was named.

Lamb '32 Makes Thrilling Rescue

Norton Lamb '32 saved the life of a young man at Thomas Pond, South Casco, June 26, by his ability as a swimmer and lifesaver.

Hearing a cry for help as he sat in a cottage beside the lake he rushed out, swam about 100 feet fully dressed to a row boat near where the victim was thought to be Norton lost no time in locating the pros- trate form which had then been in the water some ten or more minutes. He raised the body and with help got the youth into the boat. It was nearly one half hour before signs of life were evident.

High commendation is due Norton for this remarkable feat. Incidentally it also speaks well for Hatchet Mountain Camp, owned and operated by Philip Jones '19, since it was there that he received his Red Cross Life Saving Certificate.
Weymouth '96 Directing Mammoth Project

To bring water 225 miles to thirsty Southern Californians through mountains and over plains, involving the labor of 10,000 men, and expenditures estimated at two hundred twenty million dollars, is the job which Frank E. Weymouth '96 has undertaken. It will be one more, perhaps the capstone of his career of brilliant engineering feats achieved since leaving the campus. Mr. Weymouth is general manager and chief engineer of the Metropolitan Water District of Southern California.

It is believed that this project which is known as the Colorado River Aqueduct is one of, if not the greatest construction project ever undertaken in the United States, if not in the world. Completion of this aqueduct, some six or seven years hence, will be a fitting climax to a career which has won for him the reputation of being one of America's foremost reclamation and hydraulic engineers.

But, before going further with this phase of the story let us first turn back the pages of time a little and follow the interesting career of this alumnus. He was born on a farm in Medford Center, Aroostook County and attended Fort Fairfield High School. In August, 1892, he entered the University, then known as the Maine State College of Agriculture and the Mechanic Arts, being a member of the last class to graduate from the institution while it had that name. During his college days he was interested in sports, especially football, and was an officer in the military corps.

His first work after graduating as a civil engineer was the construction of water works systems for the Massachusetts Metropolitan Water District. Next he was assistant city engineer of the City of Winnipeg, which position he held until early in 1899. That year he joined the Isthmian Canal Commission and was engaged in making detailed surveys and studies in connection with the proposed Nicaragua Canal. This work occupied about two years and it was during this time that Mr. Weymouth returned to Orono and married Maude Lane. For a short time he was resident engineer with the Quito Railroad Company in Ecuador.

In 1902 Mr. Weymouth became associated with the United States Reclamation Service. During the first years in this work he was in charge of surveys and investigations of reclamation projects in Montana and North Dakota. In 1908 he was made supervisory engineer in charge of Idaho district. In this capacity he directed irrigation projects in the Snake River region and engineering work involving more than 400,000 acres of land. It included the erection of large storage dams at Jackson Lake, Wyoming, and on the upper branches of the Snake River and Boise River. While serving in this capacity Mr. Weymouth was in charge of building the famous Arrowrock Dam which was the highest in the world at the time of its construction.

In 1910 he was appointed chief of construction in the Reclamation Service and as such was in charge of all work handled by that organization in the western states. Four years later, his ability was still further recognized when he was promoted to chief engineer of the Reclamation Service. It was during this period that Mr. Weymouth, together with Arthur P. Davis, made surveys and prepared plans and estimates on the Boulder Canyon Dam project on the Colorado River, which dam is now under construction and with the exception of a few minor changes is being built according to the plans which he prepared. It is interesting to note in this connection that one of the men who was closely associated with Mr. Weymouth in the Reclamation Service was Frank T. Crowe '05 who is now general superintendent of construction of Boulder Dam.

At the conclusion of his twenty-two years of service with the Government, Mr. Weymouth became president of an engineering firm known as Brock & Weymouth, located in Philadelphia. This, however, was of short duration, for in 1926 he was offered and accepted the position of chief engineer of the J. G. White Engineering Corporation in Mexico, where he took charge of all engineering work being handled by that organization for the Republic of Mexico. He was in active charge of all the irrigation and reclamation projects under the direction of the National Irrigation Commission of Mexico that were carried forward during the administration of President Calles. Three years later he accepted a position as chief engineer of the water works of the city of Los Angeles and was placed in charge of Colorado River Aqueduct studies then being made.

Late in 1929 he was appointed chief engineer of the Metropolitan Water District and in January 1932 was made general manager as well as chief engineer. The Metropolitan Water District is composed of the following thirteen towns and cities which are to be served by the new aqueduct: Anaheim, Beverly Hills, Burbank, Compton, Fullerton, Glendale, Long Beach, Los Angeles, Pasadena, San Marino, Santa Ana, Santa Monica, and Torrance.

The aqueduct will be more than 225 miles long and have a capacity of 1500 cubic feet of water per second or approximately one billion gallons a day. One of the interesting engineering problems involved is the boring of a tunnel thirteen miles long through one of the peaks of the San Bernardino Mountains, said to be one of the longest tunnels in the world. There will be a total of seventy six miles of tunnel. This huge project which will take six or seven years will require labor of some 10,000 men and will span the state of California from the Colorado River to the edge of the Pacific. The cost of this aqueduct is estimated to be about a million dollars a mile.

Such is the career of this outstanding Maine alumnus. Doubtless many alumni will follow with great interest the progress of this mammoth undertaking.

The University of Illinois on June 30, 1931, had $192,983 in loan funds of which $72,000 was from original gifts, $72,000 from additional gifts, and the balance from income.

Pay alumni dues now.
"A GOODLY HERITAGE"

By Mary Ellen Chase, '09

Henry Holt and Company, 1932
Illustrated by Mantland de Gogorza.

298 pp.—pp., $3.00

“My grandmother,” says Mary Ellen Chase, “...was one of those thrice blessed individuals who seem born to have things happen to them, who attract experiences as a magnet attracts steel.” In that sentence Miss Chase has written her own biograph. Some of us have seen her infect a group of listeners with a zest for the marvellous and fantastical happenings which have befallen her and hers. To us A Goodly Heritage comes with a special tang. For it is in the first place a cellar of anecdotes about Miss Chase’s early life in Maine—principally in Blue Hill, although one chapter is devoted to the University of Maine. It is told in an autobiographical form with that effervescent enjoyment of experience which has given many a classroom the semblance of an afternoon tea.

But the book is more. Even before its publication, one suspected that Miss Chase’s life has been woven in much the same pattern as our own, that the thread which made the Golden Asse essays golden was spun out of the author’s capacity for appreciation. She has laid hold upon the common and has made it uncommon. Most of us in Maine have eaten our Saturday beans and brown bread. There have been red geraniums in our kitchen windows. We have played authors on week days and Bible games on Sunday. Latin was studied on our dining room tables while Mother darned red flannel drawers. In our family annals there must have been tales of shipwrecks. We, like Miss Chase, must once have longed for conversion and the gift of grace at the altar. But we have all needed a Jacob to interpret the value of our birthright.

A Goodly Heritage may well be compared to one of Miss Chase’s literary idols, the Wessex novels. Thomas Hardy put into a form which time cannot corrupt the fast-changing civilization of southern England. Miss Chase has done the same for the pre-summer resort existence of Maine. Her book is significant not because it records her own early experiences, but because distilled into the life of one native is the life of all Maine. The social, the religious, the sea-faring, the educational tradition—each lends its special flavor to the vintage. Hence it is that A Goodly Heritage has the impact of the inevitable. It is a book that had to be written.

Ruth R. Stone, Department of English

"FOOD PREPARATION"

By Dr. Marion Sweetman

A new text book by Dr. Marion D. Sweetman of the Home Economics Department at the University, was recently published by John Wiley & Sons. This text which was published both in the United States and in England was “Food Preparation, A Textbook for Colleges on the Science of Food Processing.” The reviews of this 344 page book are very flattering. Dr. Sweetman was acting head of the department of home economics last year during the leave of absence of Miss Pearl Green.

A recent issue of the Bureau of Standards Journal of Research contains an article on “Moisture Expansion” of ceramic whiteware of which A. S. Creamer ’26 was co-author.

“Essays in Legal Economics” by H. B. Kirshen is the title of the latest of the University of Maine Studies. In this seventy-two page bulletin, Dr. Kirshen discusses the development of what is said to be a relatively new field of economics known as legal economics. Dr. Kirshen is assistant professor in the department of economics.

Merton S. Parsons ’29, is author of a seventy page bulletin entitled “Some Economic Phases of the Marketing of Maine Apples,” published by the Maine Agricultural Experiment Station. Mr. Parsons is assistant economist in the Experiment Station and instructor in the department of Agricultural Economics.

Store Directors Re-elect
F.D. Freese ’15 President

F. Drummond Freese ’15 was re-elected president of the University Store Company for the ensuing year at the annual meeting held in October. The report showed that total sales for the fiscal year ending 1932 were off about 2½ per cent. Directors were elected at this meeting.

Under the plan put into effect two years ago there are now eleven stockholders of the store, four of whom are named by the University administration, four by Alumni Council and three by the students, the three students being stockholders by virtue of positions in the Athletic Association to which they are elected. The four University administration stockholders are Robert R. Drummond ’05, James A. Gannett ’08, M. D. Jones ’12 and B. C. Kent ’12, four alumni stockholders named last June by the Alumni Council are F. Drummond Freese ’15, Bangor, Raymond H. Fogler ’15, Chicago, F. Donald Crollwell ’17, Bangor, and C. E. Crossland ’17, Orono, the three students, Swen Hallgren ’33, John Wilson ’33, and Donald Favor ’34.

The gross business done by the store last year according to the treasurer’s report was about $73,000 being $2,000 less than the total of the preceding year. Stockholders felt that in view of economic conditions the business had been very satisfactory. Five directors were elected by the stockholders, the directors being F. Drummond Freese ’05, F. Donald Crollwell ’17, R. R. Drummond ’05, M. D. Jones ’12, and Swen Hallgren ’33.

At the meeting of the directors which immediately followed, Mr. Freese was re-elected president, Mr. Irving Pierce, treasurer, and Harold L. Bruce, manager of the store, clerk.

The program was given by Arthur L. Deerling, President of the General Alumni Association and chairman of the Memorial Fund Committee on “The Facilities of the New Gymnasium.”

During the course of the evening, the chairman called up Perley B. Palmer ’96 and E. E. Palmer ’99 as being the oldest varsity men present and also being brothers. The chairman also called up Guy Hersey ’00 and his son Tom Hersey ’34, father and son, they being the only such combination present.

Before breaking up, a vote was passed, expressing the unanimous opinion that similar meetings should be held in the future and that the chairman should appoint a committee of five to make plans for the future.

(Continued from Page 23)

Brann Given Rousing Welcome

fact, many said they "stole the thunder" of the meeting. A telegram from Roger Bell ’16, captain of this famous team, was read. President Boardman paid tribute to the "M" men. Swen Hallgren, president of the Athletic Association, spoke bringing the student viewpoint. He was followed by Dean Corbett who discussed athletic policies in the brief time at his disposal. The concluding talk on the
Memorial Gym To Provide Many New Facilities

In a month almost to a day the concrete foundation of the Gymnasium was completed. The contractors were favored for the most part with fine weather which made possible this rapid progress. Most of the piers which will support the steel columns were put down from seventeen to twenty feet. By the time the *Alumnus* reaches its readers many of the steel columns will be in place.

Looking at the Gymnasium entirely from an athletic and physical education plant one finds in it no less than twelve entirely new facilities which are not now in Alumni Hall gymnasium and which will greatly increase the facilities and surely the morale of the athletic and physical education departments. These new facilities are (1) a varsity locker room which will accommodate fifty to sixty men, (2) a freshman locker room which will accommodate over one hundred men, (3) a visiting team room which will accommodate forty men; (4) three special exercise rooms for boxing, wrestling, fencing, or corrective gymnastics; (5) two handball courts which may also be used for special exercise rooms if needed, (6) an injuries room adjoining the training or frequently named rubbing room, (7) a drying room in which the wet uniforms of the athletes may be placed and quickly dried; (8) a coaches' room which will give coaches a separate office which they have never had before, (9) a dressing room including a shower for coaches, physical education director and contest officials, (10) an assigned room which may be used for instruction purposes; (11) a gymnasium of sufficient size so that there may be three practise basketball games in progress at the same time, and (12) a faculty locker room. It is believed that these facilities will not only be vastly more convenient than the present quarters of the athletic and physical education departments but also will have the effect of encouraging a greater number to participate in the programs of these departments.

The real value and usefulness of the gymnasium is determined not alone by the facilities it contains but also their relative location and relationship. Every effort has been made to make the interior arrangement of the building such that there will be a minimum of travel for supplies, equipment, etc., and still gain the maximum use of the space. All of these varsity, freshman rooms are located on the west side of the first floor next to Alumni Field, there being convenient entrances to each of the quarters. This side will be equally accessible if the athletic field should be relocated to the west or northwest of the Field House as has been mentioned from time to time. This location of the athletic quarters will be in marked contrast to the present situation which requires that athletes should travel from and to Alumni Hall for every athletic event or practise.

While it cannot be said that the show- ers are a new facility, it should be said that adequate showers have been provided. Herefore, there have been but seven showers available for all purposes which number has been grossly inadequate to meet the demands made upon them. At the present the same showers are used by both home teams and visiting teams. In the new Gymnasium there will be ten showers provided for the use of the varsity and freshmen and five for the use of the visiting teams. These do not include the show- ers in the general locker rooms on the second floor. Immediately next to the varsity room is the training room and injuries room and still a few steps farther is the stock room, all well located with relation to each other.

The main gymnasium floor is to be eighty feet wide by one hundred six feet long or a total of over 8480 square feet as compared with the approximately 5400 square feet in the present gymnasium which has an overhanging balcony of some ten feet wide. There will be no overhanging balcony in the new gymnasium. The main floor in the gymnasium is clear to the roof and depends upon the windows above the balconies for natural light. On this floor there can be three basketball courts laid crosswise which will be as wide as the present gymnasium floor is long, discounting the balconies. For varsity or freshman games a lengthwise court about ninety feet will be marked out.

The balcony seats will be of permanent type and will accommodate about 1250 spectators who will be able to see the entire playing surface of the varsity court. In addition to this number, space will permit the erection of temporary bleachers around the court which will accommodate an additional 1200 at least, making the total approximately 2500.

There are two staircases direct from the gymnasium to the general locker rooms on the second floor where there are three general locker rooms. On this floor also is the faculty locker room. The three rooms for students will have a capacity for over five hundred full height lockers which is considerable in excess of the number now available including those for varsity and freshman team members. On this floor also is a room which may be used for class or on some occasions possibly for sleeping quarters of visiting athletic teams. On the next level are the three special exercise rooms and the two hand ball courts.

All this has been laid out so that if a wing is added to either side of the building it will not impair the usefulness of the quarters as they have now been planned or that changes can be made conveniently.

Technology Faculty Raises Professional Requirements

Requirements under which alumni may secure professional engineering degrees have been modified by the faculty of the College of Technology according to an announcement by Dean Paul Cloke. The new requirements are as follows: The professional degrees of Chemical Engineer, Civil Engineer, Electrical Engineer, General Engineer, or Mechanical Engineer, may be conferred upon graduates in the curriculum of Chemistry or Chemical Engineering, Civil Engineering, Electrical Engineering, General Engineering, and Mechanical Engineering, respectively, upon the presentation of a satisfactory thesis which shall constitute an original contribution to the advance of engineering.

The candidate must hold a position of responsibility and must have accomplished professional work of eminence for a period of at least five years subsequent to graduation. A full and complete statement covering the professional experience of the candidate must be presented at the time of registration.

Former Trustee Lord Dead

Hon. Henry Lord who served the University seventeen years as Trustee, being president of the Board for sixteen years, died at his home in Bangor September 18 at the age of nearly eighty-six. Mr. Lord who had been very active in affairs in Bangor and recognized as one of the leading citizens of the State retained his interest in the University as shown by the fact that he was a regular attendant at several of the functions that annually take place on the campus.
With The Faculty

Paul Cloke, Dean of the College of Technology, has received two honors in recent months. At the annual meeting of the Society for the Promotion of Engineering Education held in Oregon the latter part of June, he was elected as one of two vice-presidents of that organization.

In September announcement was made of Dean Cloke’s appointment as a member of the State of Maine committee of the National Council of the National Economic League. The purpose of this league is to create an informed and disinterested leadership for public opinion. Elections are made without reference to political party or occupation. Members of committees from each state are elected separately by preferential vote. Among the others chosen to represent Maine are Hon. William P. Pattengall ‘84 and Dr. Clarence C. Little, Honorary ‘32. The National officers include some of the foremost men in the country headed by Charles G. Dawes, former Vice-president of the United States.

Professor Edward F. Dow, acting head of the History and Government Department, spoke before the Bangor-Brewer Lions Club October 5 and before the Bar Harbor Chamber of Commerce October 10, and again before the Masonic bodies at Old Town October 24.

Professor Maurice D. Jones spoke before the annual meeting of the Penobscot County Farm Bureau in Kenduskeag October 29. He also spoke before the Norway-Paris Kiwanis Club and also Oxford County Farm Bureau during October.

Assistant Professor Cecil Garland, of the department of Economics and Sociology, spoke in Winterport early in October on the subject of Taxation and Government Operating Problems.

Professor H. W. Leavitt attended a meeting of New England and New York Testing Engineers held in Boston October 17 and 18.

Dr. James H. Munlesburg, dean of the College of Arts and Sciences, spoke before the University of Maine Teachers’ Alumni Association October 27, his subject was, “The Changing University.”

Dr. Charles A. Brautlecht, head of the department of Chemistry, gave an address on, “Executives for Future Pulp and Paper Mills” at the fall meeting of the Northeastern Division of the American Pulp and Paper Mill Superintendents Association at Jefferson, N. H. Dr. Brautlecht also spoke on, “The Romance of Cellulose” at a meeting of New England Association of Chemistry Teachers held in Lewiston October 15.

Professor Donald Young, head of the department of Zoology and a graduate of Amherst, will represent the University at the inauguration of Dr. Stanley King, new president of Amherst College. This ceremony occurs November 11.

Professor A. S. Hill of the Electrical Engineering Department was awarded the degree of Master of Science in electrical engineering by the University of Michigan last June.

Dr. H. S. Boardman broadcasted over station WLBZ, Bangor, October 13. The subject of his talk was, “How the University Saves the State.”

Williams ‘05 Is Chairman Council Executive Committee

Arthur L. Deering, president of the General Alumni Association, has appointed six members of the Alumni Council to constitute the Executive Committee for the year 1932-33. This committee transacts the business of the Alumni Association between the sessions of the Council.

George S. Williams ’05 of Augusta, vice-president of the Association, is chairman of the committee. The other members are C. Parker Crowell ’98 of Bangor, Harry E. Sutton ’99 of Boston, Robert W. DeWolfe ’07 of Portland, Harold Cooper ’15 of Auburn, and Raymond H. Fogler ’15 of Chicago.

Sylvester ’27 Gets Harvard Travelling Fellowship

Arthur C. Sylvester, of Merrimac, Massachusetts, a graduate of the University of Maine in 1927, has been awarded the Charles Eliot Travelling Fellowship in Landscape Architecture, which is the highest award of the School of Landscape Architecture at Harvard University.

The award was made following a contest calling for plans of a community club and social center. The winning drawings were submitted by Sylvester, a third-year student in the School of Landscape Architecture. Under the terms of the scholarship, he will spend a year abroad, travelling in France, Spain, Italy, and England.

Sylvester majored in horticulture at the University. He was active in athletics, winning his M in football.

Mrs. Jordan Presents Photograph

Mrs. Emma W. Jordan, wife of our late distinguished alumnus, Dr. W. H. Jordan, recently presented to the Department of Chemistry and Chemical Engineering, a large framed photograph of Wilbur O. Atwater who was prominent in the early history of nutrition and chemistry in the United States.

This large photograph has been hung on the west wall of the third floor corridor of Aubert Hall.

437 at Last Summer Session

Registration at the summer session which was held July 5-August 12, was somewhat lower than last year but much higher than in any previous year, the total being 437, including 19 who registered for the course in Marine Biology conducted at Lamoine.

Dr. Roy M. Peterson, head of the department of Spanish and Italian, was director of the Summer Session. A weekly news sheet entitled “Maine Notes” was brought out and the usual week-end trips and entertainments were provided.

Generally speaking, those who were registered at the school seemed to have a more serious purpose than has been true of some of the former sessions.

Oberlin college has prepared a plan which calls for construction of twelve residence houses which together with a Men’s Club will constitute Men’s Campus. The first of these houses has just been constructed. They will accommodate 475 men.

Support your local Association.
Rena Campbell Bowles, graduate of 1921, now located in Bangor, was elected last June as an alumnae representative on the Alumni Council. In addition to work at Maine she has attended Columbia University summer school and also the Merrill Palmer School at Detroit, Michigan. She holds a master's degree in home economics from the University. For two years following graduation she taught home economics in Old Town and then was at Somerville, N. J. for one year, after which she returned as instructor of home economics at the University beginning in the fall of 1924, later being promoted to an assistant professor. For five years she was director of North Hall, the home economics practice house on the campus. In 1931 she resigned and married Merrill H. Bowles of Bangor, since which time she has been active in Red Cross, Girl Scouts, and other community affairs.

Estelle Spear Robbins, class of 1919, of Scarboro, was elected last June as one of two new alumnae representatives on the Alumni Council. Mrs. Robbins had been active in the Portland Alumnae Club of the University of Maine Women, being a past president of that organization. She is one of the few alumni who have taken, and graduated from the four year course of agriculture. She majored in horticulture. During her undergraduate days she was active in the girls' glee club and a member of the Prism Board. Soon after graduation she became a homemaker and now has three prospective Maine students. She is surrounded by a Maine atmosphere, her husband, Hamlyn N. Robbins, being a graduate of the class of 1919 and her brother, Willard W. Spear, a graduate of the class of 1924.

Florence U. Salley, graduate of the class of 1921, now located in Providence, R. I., has been a leading alumnae member of the Rhode Island Alumni Association, having been on the executive committee of that organization and a factor in the success of their meetings. Miss Salley majored in French at the University and has since done advanced work at the Rhode Island College of Education, at Brown University, and at the University of Maine summer session, having nearly completed requirements for a master's degree. She was one of the leading undergraduates during her time in college, being especially active in musical and dramatic organizations. Following graduation she taught French and other subjects in high schools in Bethlehem, N. H., South Norwalk, Conn., and Providence. She is now serving her fourth year as student adviser on vocational and educational subjects in the Nathan Brown Junior High School of Providence.
Editorials

Merit Recognized

Every once in a while we are sharply reminded of how little we actually know about what is taking place. Unless an event or a person is made conspicuous by publicity or otherwise, we fail to note much about, if not understand the significance of what is involved.

This is exactly true of the work which C. Parker Crowell '98, has been doing for the Alumni Association and the University. Elsewhere in this issue of The Alumnus is a statement of some of the more important services which Mr. Crowell has rendered and as a result of which he was awarded the third Alumni Service Emblem. We take this opportunity to congratulate Mr. Crowell on the honor which has been conferred upon him and the Committee on Award for its choice. The work which he has done has not brought him into the limelight very much. More than once alumni have paid him this tribute, that whenever he accepts a committee appointment or other responsibility you can always count upon him to be present at the meetings he is supposed to attend and discharge the duties of his assignment conscientiously.

Generally speaking, a relatively small number of alumni know of the real importance and true value of service rendered by those who are filling offices or otherwise assisting in alumni and University work. It is those who are serving in these capacities who are in the final analysis the backbone of alumni progress. Such services demand time, expenditure of funds, and often times interfere with personal affairs and yet without the counsel and assistance of these men the Alumni Association would make no progress. Credit for any accomplishment goes to them. Mr. Crowell has been rendering just such service now for over a score of years.

Looking Twenty-four Years Ahead

The action of the three classes of 1930, 1931 and 1932 in taking out endowment insurance policies for the purpose of creating funds that they may present the University with a gift on the occasion of their twenty-fifth anniversary is certainly a commendable one. This seems to be another illustration of an old saying, "And a little child shall lead them." The action of these young alumni certainly should set the older classes to thinking.

It is not alone the idea that a fund is being created but the thought that they appreciate the University sufficiently to be willing to make a gift of such amount as they feel they can raise. It is quite possible, even probable, that if satisfactory conditions exist when these classes reunite they may be able to supplement the amounts for which they are now providing.

It is a regular practise at a number of colleges and universities for the class observing their twenty-fifth anniversary to present their Alma Mater with substantial gifts. This would certainly be a most delightful practise or custom to establish at Maine.

A word of appreciation should be spoken for the work done by William Daley in getting this idea so well started.

John Oak’s Name Lives On

It is gratifying to University and alumni officials to know that John Marshall Oak should have thought of the University in his will and yet those who knew this ardent alumnus cannot claim surprise at this action for Mr. Oak had a profound interest in the institution. Even less than two weeks before his passing, at the age of eighty-one, he called the Alumni office as he had done several times this summer to discuss certain matters in connection with the University, thus reflecting that even near the close of his life, his Alma Mater was being given a place in his thinking.

As commendable as is the gift itself and the generous way in which it was left to the University it is the spirit which prompted the bequest which stands out, and always will be a reminder of the true gentleman he was.

More than the monetary value of the bequest, as helpful as that will be, is the important thought that the genial, courteous, thoughtful, earnest and with all modest spirit of his personality is written into the University history. Would that these commendable qualities might be inculcated into the lives of those who will for countless years, perhaps ages, benefit from the generous disposition of one whose loss to the University measured by his knowledge of and devotion to the institution and her alumni is irreparable.

Dartmouth has instituted a plan whereby seven of its outstanding seniors are named “Fellows”, who are given entire freedom during the senior year to study such subjects as they may choose.
Western Maine Alumni to Honor E. B. Winslow

Western Maine Alumni Association is to hold its fall meeting November 9 in the State of Maine room, Falmouth Hotel, at 6:30 p.m. The meeting is to be in the nature of a banquet in honor to Mr. Edward B. Winslow who received an honorary degree from the University last June and who served the University many years as Trustee including some time as president of the Board of Trustees.

It is expected that Dr. Boardman will attend and speak briefly bringing the tribute of the University to Mr. Winslow. Robert W. DeWolf is president of the Association and together with John T. Marshall, secretary, are making arrangements for the meeting. All alumni in Western Maine are invited to attend and are requested to notify the secretary of their intentions.

John T. Marshall
42 Atlantic Street
Portland, Maine

Pittsburghers Have Bean Bake

The annual bean bake of the Pittsburgh Alumni was held at the home of J. W. Brown '99, ten Maine alumni with their wives, and friends enjoyed a pleasant afternoon and evening. At the business meeting which followed, the following officers were elected for the ensuing year:

President, Donald Babb '26; vice-president, R. B. Adams '29; secretary-treasurer, S. J. Pierce '27.

Funds were collected for the Pittsburgh Alumni Scholarship of $30.

Selden J. Pearce '27, Secretary.

N. E. New Yorkers Picnic

The Northeastern New York Alumni began the season on September 10 with a feast of corn-on-the-cob and hot dogs. Thirty alumni and alumnae with wives, husbands and children gathered at Geyser Park picnic grounds, Saratoga Springs. The group thoroughly enjoyed both the eatables and the games of horseshoes and dart throwing to such a degree that few thought of going home until dusk.

P. W. Ham, '22, Secretary

Ohioans Like Picnics

The Northern Ohio Alumni Association held a very successful fall picnic at Metropolitan Park, near Brecksville, Ohio, on Sunday, September 25. This was the second picnic of the season for the Ohioans, and twelve alumni with their families and friends were present. The total attendance was forty-six. We'll have to give the loyalty prize to the 1904 class for our 1932 season, with its three members present at both picnics.

It is our intention to establish a weekly luncheon during the winter and we shall advise our members soon concerning our plans.

Also we wish Ohioans to please note that a general get together will be held the evening of the Maine-Bowdoin game. Place and exact date will be announced soon, but bear in mind we shall expect a large meeting.

To the members who missed the two parties this season we wish to say that we hope you'll be with us at our next meeting.

Our Ohio Association wishes the University a most successful year in all its activities.

C. G. Cummings, '10, Sec.

New York Adopts New Luncheon Plan

At an Executive Committee meeting held September 27th, plans for the ensuing year were discussed.

It was decided that the customary telegraph returns and play-by-play report of the Bowdoin-Maine game be abandoned this year because of lack of interest. In lieu of this, a beefsteak party will be held on the evening of November 4th. This party will be held at the New York Athletic Club. The State of Maine Society and the Bowdoin Alumni Association are both cooperating with us in an attempt to have this a gala event.

Instead of having an Alumni Luncheon each week at one designated place as in the past, luncheons will be held at three different locations every week. This arrangement will enable any alumni to have their families and friends present. The total attendance was forty-six. We'll have to give the loyalty prize to the 1904 class for our 1932 season, with its three members present at both picnics.

It is our intention to establish a weekly luncheon during the winter and we shall advise our members soon concerning our plans.

Also we wish Ohioans to please note that a general get together will be held the evening of the Maine-Bowdoin game. Place and exact date will be announced soon, but bear in mind we shall expect a large meeting.

To the members who missed the two parties this season we wish to say that we hope you'll be with us at our next meeting.

Our Ohio Association wishes the University a most successful year in all its activities.

C. G. Cummings, '10, Sec.

Have you paid your alumni dues?
Pajama Parade

The night shirt parade of old was once more enacted again this year but like others of recent years, proved to be of short duration for under the new regime the freshmen are a few handfuls more than the less organized sophomores can discipline on such an occasion, with the result that freshmen soon broke ranks and the party was over.

New Parking Rules

Recent alumni will be interested to know that students this year have been assigned space in the rear of Stevens Hall, formerly Arts and Sciences building. This will be pleasant news to those who had to park their cars over by the Indoor Field heretofore.

Senior Skulls

Herbert Lewis has been elected head of the Senior Skulls and Monroe Romansky as secretary and treasurer.

Honor System

Considerable discussion has been aroused on the campus regarding the possibility of establishing the honor system. This was a subject of a week-end gathering sponsored by the Maine Christian Association and was later supported editorially by the Campus.

All Maine Women

Grace Quarrington is President of the All Maine Women and Betty Brown, secretary and treasurer.

Prism Board

Neither the editor-in-chief nor the business manager of the 1934 Prism returned to the University this year. George E. Osgood was chosen editor-in-chief and Roy J. Gavin selected as business manager.

Another Robbery

Early in October some well informed night intruder visited several of the fraternity houses and succeeded in getting in excess of one thousand dollars in money and clothing. This is the fourth such robbery which has taken place within a year.

Scholarship Standing

According to figures given by Registrar Gannett the average rank of all the students of the University for last semester was 2.33. The average for women was 2.43 and for men 2.29.

Maine Masque

Ernestine Merrill '33 was elected president of the Maine Masque, Harold Barrett, vice-president, Barbara Sawyer, secretary, and Warren Kane, business manager. The first production of the Masque will be early in November, the title of the play being, "As Husbands Go".

Newspaper Paper

With the third issue of the Campus the publication adopted what is commonly known as news print paper. It was done to give it a more modern and more newspaper like appearance.

Ermo Scott Leads Assembly

At an assembly held October 20, Ermo Scott '31, now a teacher at Eastern State Normal School at Castine, led a song assembly. This is the third year that such an assembly has been held and judging from the attendance and singing was one of the best.

S. P. E. E. Meeting

The Fall meeting of the New England section of the society for promotion of engineering education was held on the campus October 8. The attendance at the complimentary luncheon held in Merrill Hall was 89.

Vermont Defeated in Debate

The University of Maine debating team, upholding the affirmative of the question, "Resolved that most advertising tends to be detrimental to the best interests of the general public," defeated the University of Vermont team October 18 by a score of two to one. Hamilton Boothby and Max Rapoport represented Maine.

By the time this Alumnus reaches its readers the students will have taken a straw vote for President, this vote being conducted by the Maine Campus.

Record Number at Worcester Meeting

The round-up held at Worcester October 8 was attended by 163 alumni and friends, being the largest alumni meeting ever held in the city and one of the largest alumni gatherings ever held off the campus. The meeting was a cooperative affair the active work being done by a committee of Worcester alumni headed by Dr. James E. Masterson '16 with cooperative committees from the nearby Springfield, Hartford, Providence, and Boston associations to bring out representative attendances from each.

Joseph McCusker '17 of Boston was toastmaster being introduced by Leon E. Seekins '13, president of the Worcester Association. The speakers for the evening were Mayor Mahoney of Worcester, Ted Curtis, Faculty Manager of Athletics, Dean L. S. Corbett, Coach McEwan of Holy Cross, Alumni Secretary C. E. Crossland and Rudy Vallee. The appearance of Rudy was an outstanding feature of the program. He attended the Holy Cross-Maine game in the afternoon.
Attractive Wings Being Added to Stevens Hall

Many alumni who came back for Homecoming were surprised to see the progress which had been made on the construction of the two wings to Stevens Hall, formerly known as Arts & Sciences Building.

Already, the exterior walls on the north wing up to the roof have been nearly completed and the south wing has risen to the first story. These two wings are to be 50 x 125 feet, two stories in height, and will very nearly, if not quite, double the capacity of Stevens Hall. They will make a very pleasing addition to the original building. The architect's conception of the completed structure is shown in the accompanying cut.

The wings are to be of brick with granite trimmings, slate roof and reinforced concrete floors. The structure is the nearest to fireproof construction to any building on the campus. The floors in the corridors are to be terraza and those in class rooms will be linoleum.

The plans for the building were drawn by Crowell & Lancaster, Bangor architects. The general contract was awarded to Louis Malo & Sons of Lewiston who were low bidders. C. H. Babb and Company of Bangor are doing the heating and plumbing. G. A. Close Company of Portland, the electrical work. The total cost of the structure will be about $140,000. Work was started on the building about August 10 and is scheduled to be completed by February 15 next.

Cornell awarded last fall $28,500 in scholarships to freshmen, based on the results of examinations.

1909 To Have Week-end Party

Once more the class of 1909 comes into the limelight by arranging a week-end party Nov. 5-6 in connection with the Bowdoin game somewhat similar to that of two years ago.

The first event on the class program will be breakfast, Saturday morning, November 5, when those driving up from Massachusetts will join over a cup of coffee in the town of Hampton. For lunch at noon, a larger number is expected at Yarmouth. The 1909 people have purchased 40 tickets for the football game, after which they are to take supper together in Yarmouth. Many of them are to stay over night in cabins and enjoy a Sunday breakfast.

This class is the only one to have the distinction of undertaking such enjoyable gatherings other than at the time of the regular class reunion on the campus.

Varsity Field Hockey Defeat Alumnae

Alumnae who had obtained distinction in field hockey during their student days, were not equal to match sticks with the varsity girls in a game played during the forenoon of October 29 as a part of the Homecoming program. The score was 7-0. The alumnae who took part in this game were as follows:

- Margaret Fellows '31, Alma White '28,
- Mary Robinson '29, Ellen Mullaney '30,
- Thelma (Shea) Lapworth '30, Marion Rogers '30, Pauline MacCreedy '32, Alice (Webster) Sinclair '29, Caroline Collins '29, Elizabeth Murphy '30, Katherine Trickey '32, and Virginia (Smith) Lamb '28

Dr. Boardman Appointed Head Survey Committee

President Harold S. Boardman has been appointed chairman of a committee to study the effect of the depression on the land grant colleges and universities. His appointment was made by the chairman of the Executive Committee of the Association of Land Grant Colleges and Universities. Dr. Boardman prepared a questionnaire, the answers to which would reveal the effects in various ways of the depression upon registration, finances, etc., of the various institutions.

As chairman of the committee he will assemble and analyze the data and prepare a report for the committee which will meet in Washington just prior to the annual meeting of the Association of Land Grant Colleges and Universities. Dr. Boardman is scheduled to give an address at the annual meeting of this Association discussing the results of the survey.

There are nine members of the committee, the other members are: Presidents of the State Agriculture Colleges; University of Florida; Montana State College; University of Nebraska; Virginia Polytechnic Institute; Texas A. and M. and Deans of Iowa State College and State College of Washington.

Massachusetts Institute of Technology has recently reorganized its administrative staff by creating a position of vice-president and also establishing sub-divisions of the Institute into Schools of Science, Engineering, Architecture, Humanities and Industrial Cooperation.

Plan to be on the campus Alumni Day, June 10.
Conn. Aggies Beaten 33-0

From the first kickoff it was evident that Connecticut Aggies was not equal to the Maine team. While they fought hard, once holding Maine for downs on the four yard line, they had neither the offensive nor defensive strength that Maine had. The score was 33 to 0, the game being played on Alumni Field October 1. Reports indicate that Maine made 25 first downs and 500 yards as against but one down for Connecticut. Unfortunately Maine lost the services of Don Favor as a result of this game because of a pulled ligament in his knee. Maine's backfield men worked good while the forward line succeeded in stopping opponents' plays and opening up big holes for the secondary.

Maine Bows to Holy Cross 32-6

To just read the score Holy Cross 32-Maine 6 at Worcester October 8 would not be doing justice to the Maine boys. They played a hard game against what has been spoken of as one of the strongest teams in the East. Evidence of the offensive power of the teams is shown in the fact that Maine matched Holy Cross yard for yard in rushing but did not seem to have the power to score, once giving up the ball at the five yard mark and again at the fifteen. Holy Cross score was augmented by some long, beautifully executed forward passes. Maine's only score came at the fourth period when Romansky got away for a long run of 75 yards.

New Hampshire-Maine Tie

A block punt gave New Hampshire a 7-7 tie score with Maine in the game at Durham October 15. Maine paid rather a high price for this tie losing one regular, Wight, with a broken ankle bone and Johnny Wilson, quarterback, had a hip injured so badly that it took him out of play for a week or two. Maine's score came as a result of a 30 yard forward pass Wilson to Means. Maine had seven first downs as against New Hampshire's six. After Wilson was injured about the middle of the game Maine's offense seemed to have been considerably weakened, this together with the absence of Favor's punting was sufficient to force Maine to accept a tie.

touchdown but was not quite equal to push the ball over the last stripe. New Hampshire scored in the third period by blocking a punt near the goal line. Maine made seven first downs as against New Hampshire's six. After Wilson was injured about the middle of the game Maine's offense seemed to have been considerably weakened, this together with the absence of Favor's punting was sufficient to force Maine to accept a tie.

Bates Defeated 6-0

By defeating Bates 6-0 on Alumni Field October 22, Maine atoned for its defeat of two years when Bates without making even a first down defeated Maine 2-0. Looking at just the cold figures Bates seemed to have the edge on Maine for they had made eleven first downs for gains totalling 188 yards to Maine's four of 105 yards. The game was a defensive one throughout with the exception of a few minutes in each of the halves. During the first quarter Maine was at some disadvantage having to kick into a very stiff westerly wind, Favor held his own and when the second quarter rolled around he more than demonstrated his punting ability. In fact it was his kicking which in considerable measure kept Bates away from the Maine goal line.

Bates furnished excitement during the closing minutes of the first half marching nearly the length of the field to the fifteen yard line when the whistle blew. Maine's score came in the fourth period. It was successful largely because up to this time most of the passes had been thrown to either the ends or to the quarterback and Bates was not expecting Romansky to be on the receiving end. Following Maine's touchdown, Bates put on a real drive to get a score but a fumble on the 26 yard line stopped Bates' offensive. There were no gains of any consequence through the lines. While the entire Maine line functioned well particularly, credit goes to Kane, Craig, and Parsons. Bachrach who went in after Cobb was injured, also did well.

Cross Country Team Loses and Wins

New Hampshire University cross country team defeated Maine at Durham, October 15, by the score of 17-41. Black, Maine sophomore, was the only one of the Pale Blue team to break up a perfect score by New Hampshire. He finished in fourth place. New Hampshire has practically a veteran team, having won the New England championship last year and placing well in the I.C.4A meet.

A week later, the varsity team came back to defeat Bates at Orono, by a score of 27-32. Although Jellison of Bates took first place, Kenneth Black, Maine sophomore, was scarcely more than 100 yards behind him.

The positions of the Maine men were as follows: Black, second; Earle, fourth; Shaw, sixth; Booth, seventh; and Marsh, eighth.

Freshman Football Ties 2—Loses 1

The 1936 team opened the season with Bridgton Academy, October 8, at Orono. The game was true to many early season contests, being marked by fumbles and other loose plays.

A week later the Freshmen played another scoreless tie with Coburn Classical Institute. The freshmen looked somewhat better in this game even though they failed to tally. Sargent, qb; Littlehale, fb; and MacDougall, rg; looked good for the freshmen in this contest.

October 22, the freshmen were defeated by Kents Hill, 18-6. In this contest, Littlehale, fb; Doherty, re; and Costa, c; stood out for the yearlings.

New Plan for Appointment of Team Managers

Beginning this college year, managers of University athletic teams will be chosen under a new plan which aims to make certain if possible, that the students who have most faithfully and efficiently served their apprenticeship will be chosen for managements.

Under the new plan the coach and the faculty manager of athletics will make recommendations to the Athletic Board which will make the formal appointment. Heretofore managers have been chosen by a system of voting whereby the captain, the manager, the team, the retiring manager, and the faculty manager each have had one vote, and the popular vote of the student body has counted for two, making a total of seven votes.

This action is somewhat in line with the action taken two years ago, and which became effective last year, whereby the coach of a sport names a playing captain for each game and the letter men elect a captain, called honorary captain, at the close of the season.

This is Coach Brice's twelfth year at Maine.

Maine Leads in Championship Series

What a State Series, as far as it has gone, at least.

Right now Maine leads in the championship hunt by virtue of two 6-0 victories over Bates and Colby. Colby stands second with a 25-0 win over Bowdoin and a loss to Maine. Bates and Bowdoin are tied, each having a loss and a tie.

There is no use to start guessing on the Bowdoin-Maine score, November 5. In the first place, Maine is to be at Brunswick and things have happened down there before which do not bring too pleasant reminders. The most recent such reminder was two years ago. Secondly, the team that holds Bates 0-0 must have much strength.

It would appear that the worst that could happen to Maine now would be a tie for championship with every reason to hope for a clear title.

Colby Defeated 6-0

Three plays during the first five minutes in the second half, told the story of the Colby-Maine game, which Maine won 6-0. From the center of the field, Butler, a sophomore back, rolled off some 25 yards, Romansky added two more and then Don Favor shot a pass to Mel Means who took the ball on the gallop for a score. With that accomplishment, the rooters in the Maine stands had plenty to cheer about at the game which was played on Alumni Field, October 29. While there were other bright spots in the game, this series of plays are really all that counted.

Each team made about the same number of first downs, although during the last quarter, Maine had the ball within Colby's 20 yard line most of the time and why our boys failed to score, even after thinking the game through calmly, is somewhat of a puzzle.

Maine tried six forward passes, four of which were intercepted but the one which was successful, counted for victory. Colby attempted 13 passes, two of which were completed and two intercepted.

The game was largely one of punting, Colby having three capable kickers. Alden in particular saved the bacon on two occasions for Colby, with two long kicks of 50 and 60 yards from behind his own goal line. Favor, however, was not outdone in this part of the game, for his excellent kicking was a vital factor in Maine's success. Several times his accurate placing of the ball left the opponents at a serious disadvantage.

In the second period, Colby gave Maine rooters two real scares, carrying the ball down to the 10 yard line or better in each instance.

Favor's work in kicking and passing have already been mentioned. Butler, relatively a newcomer, gained most of the yards for Maine. Cobb stands head and shoulders above others in his defensive work, while Parsons' work at end was of the highest order. Kane, substituting for Pike was conspicuous in many plays and Means' handling of punts and the team in general was very pleasing.

The summary:

relected on September 12, as a Repub-
lican to the Maine House of Repre-
sentatives. He had been a member of the 
committee on resolutions of the Hancock County Teachers' Association.
You are likely to think of the telephone from your individual point of view, as a convenience, as a necessity, as a means of transmitting to others your own thoughts and desires.

But your telephone is of equal importance to those who wish to get in touch with you. Right now as you are reading, someone, somewhere, may be calling you. It may be merely a friendly greeting . . . or news of importance to change the course of your life.

"Have dinner with us tomorrow." . . . The greater part of social goings and comings are maintained by telephone. "Come quickly! You are needed." . . . In crises and emergencies the telephone is indispensable. "That contract is entirely satisfactory." . . . Wheels of industry move in direct response to messages received by telephone.

In a moment your telephone may ring. It may be a call from across the street, across the continent, across the sea. As you receive this message, of vital importance or mere daily detail, you share in the benefits of the great chain of communication which links up the activities of the world.

AMERICAN TELEPHONE AND TELEGRAPH COMPANY
**24** Mr. and Mrs. Weston Steward announce the birth of a son, Donald Vandeveer Steward, on July 13. Mr. Steward resides at 163 Westgate Road, Kenmore, N. Y.
