## Only Five States Spend Less On Higher Education As Maine Prepares Budget Cut

### U-M Ranks 49th In Per-Student Library Spending

Amid all the controversy over President Elliott's request for a record budget and the Governor's subsequent cuts, information has filtered through that the University ranks forty-ninth among the nation's land-grant institutions in library expenditures.

In the request submitted to the Governor and the Legislature, President Elliott noted that the University expends only \$24 per student for library programs. This figure is just one dollar higher than the library expenditures appropriated by Mississippi, ill-famed as the nation's poorest state. This figure is substantially lower than the national average expenditure for similar institutions of \$52.00.

In the request, Dr. Elliott said that this low figure has not allowed the University to strengthen library resources sufficiently to permit graduate programs to expand to meet the demands of the campus and the State.

Associate Librarian James C. MacCampbell said that Maine is so far behind other land-grant colleges and universities in its library expenditures that, even if they were increased by 15% each year, the University would not be "running fast enough" to catch up. It would be as though we were taking two steps forward and one back while other states are taking three steps forward.

He noted that it is not so much that the University's library is lacking any specific program; rather, that the degree of each program is just too modest to sufficiently meet the demands of current graduate and undergraduate studies. This problem is compounded by the grim reality of rising prices, he added.

Giving a concrete example, he said that the monthly publication, "Chemical Abstracts," is absolutely essential for chemical as well as physics' studies. Because of this, the library must subscribe every year for two copies. This year the subscription rate has risen from \$200 per year to \$500. This, plus the cost of binding, amounts to a total of \$1,200/yr. for the two copies!

A major factor in the library's unhealthy position is the fact that—as more Ph.D. programs are instituted—the library will need to expend more and more money for a limited number of students. To meet the demand of the expanding University, material that is basic to graduate programs, but very, very expensive, must be acquired.

In summation, Mr. MacCampbell said the critical formula that has kept the library behind is:

"The acceleration of prices, plus the rapid growth of the University, plus the fact that we're so far behind (in library expenditures) to begin with."

He grimly prophesied that this same formula is the factor that will retard our growth in the future if nothing is done by the Legislature.

### Elliott Leads Noted Delegation On Fund Quest

Leading a conclave of students, industrialists, and educators, and former Governor Barrows, President Elliott pleaded with Maine legislators to restore Governor Reed's cuts to the University of Maine's budget for 1963-1965. Speaking to the Legislature's Appropriations Committee on Jan. 31

Dr. Elliott charged:

"The University of Maine cannot be allowed to become a second-rate institution, but this is the unequivocal invitation unless the legislature restores the funds as originally requested."

He said Reed's proposed cuts left the University with but three alternatives: higher tuition rates, already at the top among the nation's land-grant colleges; a ceiling on enrollment; or abandonment of any new services or programs.

Elaborating on the second alternative, former Governor Barrows, now a trustee of the University of Maine, pointed out that the University is beginning to feel the squeeze of an expanding population, both from within the state and without. Orono is already handling over one-third of Maine's college-going youth, and by 1965 will be asked to accept an even greater percentage as opportunities for out-of-state matriculation decline.

Pointing out the extreme urgency of the situation, President Elliott said:

"If the matter is left to the 1965 legislature, it will be forever too late for students who will be turned away because of the cut, regardless of that legislature's actions."

He wryly stated that "Maine now ranks 45th among the states in the proportion of its funds spent on higher education, the other five being all in the South."

"In order to present Maine young people with opportunities equal to those in other states, it is an irrefutable necessity that Maine continue as a first rate institution. This would be impossible without the full request."

Two U-M students joined the president's plea on behalf of the University.

William Anderson, a sophomore, from Falmouth, said University students "were appalled at the Governor's cuts. The University must remain able to turn out graduates with modern educations." He concluded with the thoughtful question: If Maine's graduates are not competent enough to run Maine's industry, then who will?

Fellow student Owen W. Wells of Kittery summed up the University of Maine's precarious position when he said:

"The University is at the cross road of a bright future and a dismal decline."

## Concerned Students Present Orderly Protest Against U-M Budget Cuts

Under the guise of a four-man committee, U-M students expressed their dismay over Governor Reed's cuts of the University's budget before a public hearing of the legislative Appropriations Committee.

In a letter to the University's Board of Trustees, the committee, named the "Ad Hoc Student Committee for the Defense of the Proposed University Budget," wrote:

"The University is often represented in the eyes of the legislators as a pamphlet of facts or growth charts and graphs. The legislators must be made to realize that the University is a living part of our society which must move forward

if it is to survive. . . . We must begin the task of educating the Legislature of our problems and needs.

With this avowed objective of "educating the Legislature" the committee of William Brooks, Stephen Drotter, C. William Anderson, and Owen Wells presented the Appropriations Committee with the sentiments of the student body.

C. William Anderson, a sophomore chemistry major, told the legislators that Maine students were "appalled" at the Governor's proposed cuts, that many couldn't believe his lack of foresight. He pointed-out that one of the major reasons

that Maine has been considered a poor 'sight' for industrial development is because of the lack of proper educational facilities.

"Because the University is state supported, it accurately represents the philosophy of the State toward the value of a solid education. The relationship between industry and the State is a two-way road and must be equally traveled both ways."

"The reasons for the exodus of Maine's graduates are not complex. Maine's dilemma of trying to attract new industry while retaining its college graduates can be remedied to a great degree by unanimous support of the State's bulwark of education—the University of Maine."

## Winter Carnival Features Dave Brubeck

The Dave Brubeck Quartet and the Tradewinds will highlight this year's Winter Carnival next weekend, February 15-17.

The Winter Carnival Ball Friday night will kick off the festivities. Les Nadeau and his band will provide the music for dancing from 9 to 1. The 1963 Winter Carnival King and

Queen will be crowned at the dance. Saturday morning dormitory and fraternity entries in the snow sculpture contest will be judged and various trophies will be awarded. The trophies are currently on display in the library. The snow sculpture theme is "Winter in Camelot."

The Dave Brubeck Quartet will

star in a Saturday afternoon jazz concert, "Brubeck Goes Medieval." This will be held in the Memorial Gym from 3 to 5 p.m.

Sunday afternoon the Tradewinds, a folk singing quintet composed of students at the University of New Hampshire, will be featured in "The Tradewinds in King Arthur's Court," from 2 to 4 p.m.

The three highest ranking students in the University of Maine's department of sociology and anthropology have been selected to spend the spring semester at the Merrill-Palmer Institute in Detroit, Mich. Dr. Raymond Forer, head of the department, said that the girls selected are Barbara Lawrence, Bath; Gail Brackett, Boothbay Harbor; and Elaine Granata, Norwalk, Conn. All three girls are juniors majoring in sociology. Merrill-Palmer is a specialized educational institution for the study of human development and family life. Only three sociology students from the university are eligible to attend each year and are selected by a university committee and approved by the institute before they are accepted.

### Forer Announces Speakers For U-M Criminology Course

Speakers for a University of Maine course in criminology for the spring semester have been announced by Dr. Raymond Forer, professor of sociology and head of the department of sociology and anthropology.

The speakers are connected with various aspects of crime and the criminal. Classes for the course, Criminology: The Adult Offender, are held in Room 28, South Stevens, and Dr. Forer said that a limited number of seats would be available for anyone who would like to attend. The class meets at 10 o'clock.

Captain Clifton E. Sloane, captain of detectives in the Bangor Police Department, will be the opening speaker Monday, Feb. 11. Capt. Sloane will bring a member of the department who will assist him in presenting data on the adult criminal.

Other speakers and the dates they will appear are David P. Lopez, education supervisor, Maine State Prison, Monday, Feb. 25; Dr. William E. Schumacher, director of the Maine Bureau of Mental Health, Monday, March 4; Judge Ian MacInnes, Bangor District Court, Wednesday, March 20; Lt. Emery R. Jordan, commander of the State Police Bureau of Identification, Monday, March 25.

### University Publishes Results Of Mental Retardation Study

The results of an outstanding and comprehensive study of mental retardation in children have been published in the latest book in the University of Maine Studies series at the State University.

Published by the University of Maine Press, "Retarded Children in Maine: A Survey and Analysis," was written by Mrs. Elizabeth J.

Levinson of Orono. Mrs. Levinson received her master's degree in psychology from the university in 1958 and is a certified psychologist.

The 265-page book represents years of study by Mrs. Levinson, whose youngest child is mentally retarded. Mrs. Levinson has lived in Orono since 1926. Her husband, Dr. Ronald B. Levinson, retired last year as head of the university's department of philosophy.

# YOU CAN TAKE A BIG STEP CLOSER TO YOUR FUTURE

That's when the Linde Company representative will be on campus. He will be interviewing qualified engineering students who feel their future lies in research or applied engineering.

The LINDE Laboratories, for example—at Tonawanda (Buffalo), N. Y., Speedway (Indianapolis), Ind., and Newark, N. J.—provides an unusually stimulating environment for the scientific-minded to grow and develop. The many achievements of LINDE people in research and applied engineering have borne a rich harvest of progress: Over half of LINDE's current sales volume comes from products and facilities that did not even exist 15 years ago.

Plan now to save this date for the LINDE representative... and get one step closer to your future. Contact your engineering placement office for an appointment.

### Association Chooses Keyo National Trustee From District One

Howard A. Keyo, Director of Public Information at the University of Maine, has been chosen to serve a three-year term as a National Trustee from District One of the American College Public Relations Association.

Announcement of Mr. Keyo's selection came at the concluding business session of District One's annual conference, held at Williams College on Jan. 9, 10 and 11. Mr. Keyo succeeds Howard Curtis, Secretary of Brown University, and will take office on July 1.

The annual meeting of District One (New England), ACPRA, attracted a record number of 120 college and university administration officials to Williamstown.

Stuart P. Haskell, Jr., Assistant Publicity Director, represented the University at the conference in addition to Mr. Keyo.

PHYSICISTS**

**MATHEMATICIANS**

Technical representatives  
of the MITRE Corporation  
will be conducting interviews  
on campus

February 8, 1963

MITRE designs and develops systems that enable our military commanders to detect attack and retaliate instantly. Typical systems include Nuclear Detection and Reporting Systems, North American Air Defense Combat Operations Center, and Back Up Interceptor Center. MITRE is also experimenting with techniques for future air traffic control systems.

For the young systems engineer there is no more rewarding work. You associate with the top men in your field. You work in an atmosphere that allows you to extend your capabilities professionally and academically.

At MITRE, men trained in single disciplines are encouraged to grow beyond their original fields of interest. Systems designers learn to work from an increasingly broad base.

You may work in such diverse areas as information theory, computer design, display techniques, propagation, or human engineering. You may analyze. You may synthesize. You may deal with systems or individual components. At the highest levels, you may have to consider political, economic and social factors... as well as the available and predictable technology.

Requirements, B.S., M.S., or Ph.D. in these disciplines — electronics, physics, and mathematics. MITRE is located in pleasant, suburban Boston. If an interview will be inconvenient, inquiries may be directed in confidence to Vice President — Technical Operations, The MITRE Corporation, Box 208, Dept. MC1, Bedford, Mass.

MITRE, an independent nonprofit corporation, working with — not in competition with — industry, serves as technical advisor to the Air Force Electronic Systems Division, and is chartered to work for such other Government agencies as the Federal Aviation Agency.

### Husband And Wife Exhibit Graphics In Carnegie Hall

Twenty-five graphic arts by a husband and wife are on exhibit at the University of Maine in the print room at Carnegie Hall until Feb. 28.

Both Krishna-Reddy, a native of India, and Shirley Witebsky, who was born in Minneapolis, Minn., worked with the Atelier 17 group in Paris, a mecca for serious artists studying advanced techniques in the field of intaglio-graphics. Both artists also studied sculpture with Zadkine in Paris and have exhibited extensively in the United States and Europe.

### Dr. Beechhold To Discuss Writings Of James Joyce

One of the 20th century's most controversial writers, James Joyce, will be discussed by Dr. Henry Beechhold in the University of Maine's Humanities Lecture Series Sunday afternoon, Feb. 10.

Prof. Beechhold, whose interest in Joyce has led him to a study of linguistics and Irish history, will discuss particularly Joyce's preoccupation with words and his use of them in his last book, "Finnegans Wake."

The lecture series, presented five times during the year, is a joint venture of the English Department in the College of Arts and Sciences and of the Memorial Union's Fine Arts Committee. Anyone interested in the lecture subject is invited to attend the lectures which are given in the Union's Bangor Room Sunday afternoons at 4 p.m.

Remaining lectures in the series are Surrealism in Art by Harry L.

Greaver, assistant professor of art, March 10, and Sumner and Keller, Anthropological Sociologists, by Theodore Weiler, professor of sociology, April 14.

Prof. Beechhold, who teaches a course in The Science of Language, says his interest in Irish history and linguistics is entirely due to his major interest in James Joyce. Both subjects are essential to an understanding of Joyce and his work, he says. Although Joyce left Ireland as a young man, he was rooted in the tradition and history of Ireland and examples of this are used in "Finnegans Wake."

The charge of obscurity has been leveled at Joyce, frequently because of his preoccupation with the manipulation of words and Prof. Beechhold will explore this "Joycean Wordscape," with particular attention to "Finnegans Wake."

### D'Amico Collection Will Be Shown At U-M During February

One hundred pieces of ceramics from the collection of A. A. D'Amico of Bangor will be shown at the University of Maine during February.

The exhibit is presented against a background of dark blue panels and white birch arranged by Prof. Vincent Hartgen and Prof. Harry Greaver of the art department. Almost every state in the nation is represented in D'Amico's collection and particular interest is shown in New England potters, who have a long and famous tradition.

Maine potters included in the collection are Denis Vibert of Sullivan, Carolyn Ingraham of Greene, Robert Dunlap of Mt. Desert, who had a one-man show at the university last year, Weston and Brenda Anderson of East Boothbay, and Rowantrons of Blue Hill.

The collection includes almost every great name in contemporary ceramics in America, many of them chosen by D'Amico himself from the workshops and studios of the artists.

David R. Campbell, president of the American Craftsmen's Council, commenting on the exhibit, said that "This exhibition, coming as it does from the work of artist craftsmen in various parts of our country, demonstrates the fact that this new excitement in the crafts is not regional but crosses the boundary lines of all states, and that the potter and enamelist are making a truly significant contribution to our times."

## THE BELL TELEPHONE COMPANIES SALUTE: BOB FISK

Bob Fisk (B.A., 1954) joined New England Telephone in Boston during 1957 and in less than three years was promoted to the position of Accounting Manager.

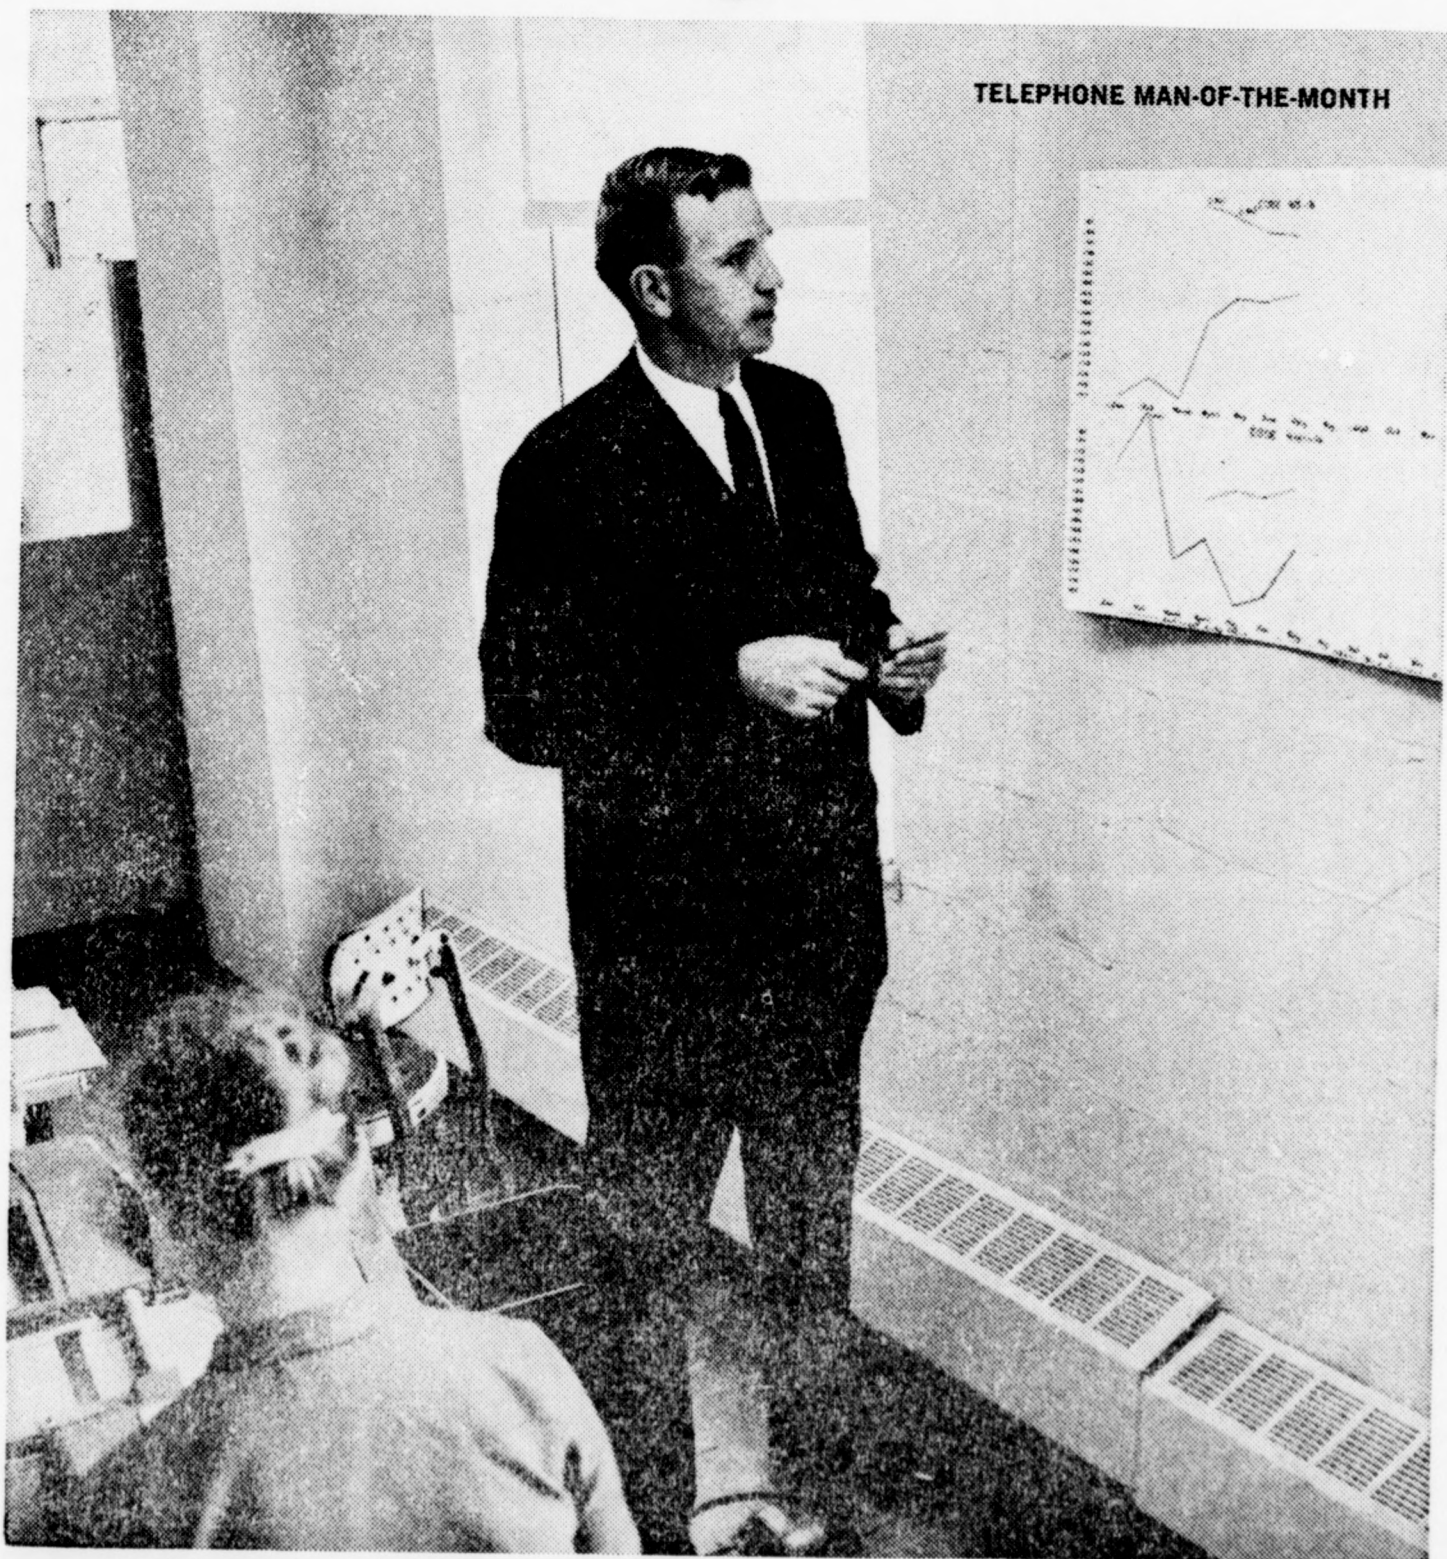

Quite an accomplishment when you consider Bob is responsible for the work of five supervisors and 45 employees! He needs a staff this large to handle the immense job of preparing monthly bills for southeast Boston.

Bob earned his latest promotion after outstanding performance on earlier assignments as a Supervisory Assistant and Directory Staff Assistant.

Bob Fisk and other young men like him in Bell Telephone Companies throughout the country help bring the finest communications service in the world to the homes and businesses of a growing America.

### BELL TELEPHONE COMPANIES

### Former Professors Jackman And Weston Die

Two former University of Maine professors recently passed away. Dr. Ernest D. Jackman, 79, professor emeritus of education since his retirement in 1952, died January 30 at his home in Stillwater. Dr. Charles P. Weston, 87, professor emeritus of mechanics since his retirement in 1941, died Monday evening at a convalescent home.

Dr. Jackman was graduated from Colby College in 1912. He received an A.M. degree from Columbia and an L.H.D. degree from Colby. He joined the University faculty in 1930 as an associate professor and in 1944 was named professor of education. Contributions in memory of Dr. Jackman may be sent to the College of Education's fund for an endowed chair for a visiting professor in education. Gifts may be sent to Harry Gordon, U-M treasurer.

Dr. Weston, an alumnus of the University of Maine, was graduated in 1896 with the degree of Bachelor of Civil Engineering. He was a member of Phi Kappa Phi, Tau Beta Pi, and Beta Theta Pi fraternity. In 1899 he earned the degree of Civil Engineer. Dr. Weston received a Master of Arts degree from Columbia in 1902 and was awarded the honorary degree of Doctor of Science by the University of Maine in 1941. In 1946 he received the Alumni Service Emblem award.

## Encouraging Response

It was most encouraging to witness the spontaneous response in support of the University's budget request for the next biennium, despite Governor Reed's recommendations. The press throughout the state voiced its dissatisfaction at the governor's proposals to severely cut the university's funds. *The Bangor Daily News*, in an editorial on January 21, criticized the governor's proposals on the grounds that "more money is needed to provide essential facilities and additional teachers for the larger student body" and that "The University of Maine could make a great contribution to the state's development efforts with adequate research facilities." The paper concluded by saying that the governor's recommended cuts was not their idea of sound economy even though "This paper is a consistent advocate of economy and prudence in fiscal affairs."

Former Governor Lewis O. Barrows; Roderick O'Conner of the Maine Industrial Building Authority; Lloyd K. Allen of the State Development Commission, and W. Gordon Robertson, President of the Bangor and Aroostook Railroad, were some of the interested citizens who appeared before the legislature on behalf of the University. They pointed out what the Governor overlooked when he made his recommendations—that Maine's future and the future development of the University go hand in hand. To fail to provide the University with anything but the most essential financial resources is to impair the economic structure of the state. The Governor has grossly underestimated the University's value to the state. We hope that the legislature does not follow in his misguided footsteps.

Not only is the University educating 4,500 future citizens on its two campuses, but it is also carrying on an extensive adult education and training program throughout the state; it is carrying on research programs for industry and agriculture; it is providing Maine's farmers with agricultural aid; and it is serving as a site for many important conferences and seminars which have affected Maine's economic structure. This is a vast undertaking; it is also a very necessary undertaking. It is not a luxury—it is a necessity. Maine cannot afford to be bypassed by industry because she cannot provide the trained personnel and the research facilities that modern industry needs.

The University has not been extravagant in its requests. It is already operating on a shoestring. What President Elliott has requested for out-right state grants is far below the national average. Moreover, in requesting a \$20 million bond issue, which the governor failed to recommend, the University has shown that it is more than willing to shoulder the greater portion of the burden. Such a bond issue will not be paid by the state, but rather by the student body. In light of this honest effort on the part of the university to assist the state in her economic growth without severely burdening her treasury, it would appear to us that the Governor should have fully endorsed the budget instead of cutting it as badly as he did.

The state should pay tribute to President Elliott for running the University as efficiently as he has. He, perhaps more than any other person, has been instrumental in increasing the industrial and educational capacity of the state. But, he cannot continue to perform the impossible without adequate state aid; something has to give.

## Faculty Council Debates Maine Day's Future

Editorial

Maine Day's in trouble again. The elected members of the Faculty Council meet this month to consider the advisability of continuing that mid-week May activity. Should the elected members go back to the whole Council with a negative appraisal, chances are that the 28 year old tradition, the mayoralty campaigns, and fall football rallies will fade into nothingness.

As in the past, apathy is the problem. Poor turn-outs, sloppy work on the projects, few mayoralty candidates, and finally no mayor at all have culminated to cast doubt upon Maine Day's future.

Last year one week before Maine Day Dean Stewart told members of the mayoralty committee that if no candidates came forward the administration would have to discontinue that activity. In order to encourage the reluctant fraternities to enter a man they shortened the campaign from five days to a single day. Three candidates entered the campaign, and Nero, Paul Graves, won by a substantial margin. Anybody who has ever read Meg McMullen knows the story from there. Poor rallies, poor football

games—we lost four of the first five—and a "why should I care anymore" attitude brought the question up again...why keep something around that no one wants anymore?

The trouble is nobody can actually say whether most students want Maine Day. Come that May Wednesday, in fact, quite a number of them show an overt preference for the rocky Maine sea coast and, on occasion, many more of them stay away from the Friday night rallies than attend them. Though just about everyone is unanimous in agreeing that a mid-week vacation is desirable (especially the Bar Harbor crowd), how many think of Maine Day as anything more than just that, a vacation?

The *Maine Campus* feels that most of our student body do want Maine Day. We think that a referendum would bear us out. Possibly such a vote would have some effect upon the final Faculty Council decision.

Maine Day and the Campus Mayor make up a great part of our school tradition. We've had some excellent mayors (remember Pete Berry and Rick Menkin) and despite the fact a few sun worshipers will decide to take the Ellsworth route, we feel that it is still worth while.

Even if it isn't, let's give the students a chance to vote on it.

## Letters To The Editor

### Good Idea

To the Editor:

WGUY in Bangor is currently sponsoring a plan to send one of its disc pockeys to Florida through a unique program. I say unique because I have never heard of exploiting a charitable organization to further his own interests. In case you don't listen to WGUY this is how the plan works. For every dime listeners bring in or send to WGUY, an anonymous donor will give a dime to the disc jockey for his trip. The dimes collected by the station are to be turned over to the March of Dimes.

I would like to propose a furthering of this plan. Perhaps if we got together and all send a dime or even more, we could send the whole damn station to Florida. I doubt if the anonymous benefactor would go along with this plan, however.

I think this would be beneficial to both the March of Dimes and the Bangor area.

R. Y. Ingraham

## Letters To The Editor

some Civil Defense shelter signs put up by the University, even condoning, in a way, those who removed them. I think the real issue that Mr. McGuire brought up in his original remarks were not concerned with whether or not CD programs are worthwhile, but whether or not anyone has the right to take those signs. Although Mr. Thurlow or anyone else may see no need for them, there is hardly a valid excuse he could give for taking them.

Honest John

## WHAT'S NEW IN THE FEBRUARY ATLANTIC?

"How Not to Teach Teachers": The training of American teachers is "unwieldy, slow-witted, bureaucratic... a failure," says James D. Koerner in this incisive, critical analysis.

## U-M Studies Fowl Diseases

The National Institute of Health, division of the Public Health Service, recently presented an \$11,960 grant to the University of Maine's department of Animal Pathology.

Dr. Harold L. Chute, professor of animal pathology, recipient of the grant, said it was the final grant for a three-year study of fungal infections in birds.

A third-year grant of \$3,000 from Abbotts Laboratories in North Chicago has also been received for continuing research by Dr. Chute of chronic respiratory disease (C. R. D.) in chickens. This disease is an important one to the Maine poultry industry.

## U-M Team Wins Five Debates

Two University of Maine Varsity debaters participated in the Harvard University Debate Tournament at Cambridge, Massachusetts January 31 and February 2.

Irene Brown and Richard Hall won five debates and lost three. They defeated teams from Tufts University, Fordham College of Education, Osgood Hall College, Princeton University, and the University of Notre Dame.

## Dr. Viola Kleindienst Joins U-M Phys. Ed. Department

A nationally-known figure in the field of women's physical education assumed her new duties at the University of Maine on Monday, Feb. 4.

Dr. Viola K. Kleindienst became head of the university's division of physical education for women.

Dr. Kleindienst has served as professor of physical education at the University of Missouri for the past two years. Previously, she held the rank of associate professor at Montana State University from 1955 to 1960 and was an instructor at the University of

Connecticut from 1950 to 1955.

During the 1949-50 school year she taught in the public schools of Essex County, N. J. She held the rank of lieutenant senior grade in the U. S. Navy from 1943 to 1946 and taught at Haverling Central High School in Bath, N. Y., during the 1942-43 school year.

At Missouri, Dr. Kleindienst has taught courses in organizing and administering elementary school physical education programs on both the graduate and undergraduate levels.

Her experiences include attending the 1952 Olympic Games at Helsinki where she worked with Dr. R. K. Cureton in testing Olympic champions for physical fitness.

She has been active in state associations of health, physical education, and recreation in Missouri, Montana, and Connecticut.

She has written articles for several journals and is co-author of a book, "Intramural Sports for Men and Women," which has been accepted for publication by one of the nation's leading publishing firms.

Dr. Kleindienst received bachelor's degrees from Cornell and Denison Universities, and her master's and Ph.D. degrees from New York University.

She succeeds Dr. Marion Rogers who resigned from her position at the university last year. Associate Professor Eileen Cassidy has been serving as acting head of the women's division during the fall semester.

Schools of Business Administration, Forestry, Home Economics, and Nursing were established at the University of Maine in 1958.

Present Sophomore women interested in the position of Junior Resident for Freshmen next year should obtain application blanks from the Dean of Women's office within the next week.

## U-M Will Institute Program To Honor High School Students

A unique annual program for recognizing and honoring high-ranking Maine high school graduates will be instituted at the University of Maine next fall.

The program, approved by the trustees at their most recent regular meeting, calls for the admission of 50 Maine residents to the university who will be designated as "Distinguished Maine Students—Class of (1967)."

"Each will be cited financially and publicly," according to Dr. H. Austin Peck, vice president for academic affairs at the State University.

The students will receive minimum stipends of one semester's tuition at the university. Additional amounts will be determined by the financial need of the student as calculated by the university's student aid office in cooperation with the selection committee.

In addition, the students will receive public recognition and will be placed in a special high-level honors program or seminar during the freshman year which will take the place of one of the regular freshman year courses.

According to Dr. Peck, the 50 students will be selected on the basis of outstanding preparatory school records, strong potential as indicated by test scores, and excellent personal recommendations from high school officers. The students will be chosen by March 1 and they will be notified by March 15.

"This new program is another important step towards the University's goal of ensuring that challenging and unique academic opportunities are available to those who have demonstrated a potential for superior academic achievement," Dr. Peck concluded.

### SUMMER EMPLOYMENT

The University Placement Bureau requests that any students interested in being notified of summer employment openings shall register with the Placement Bureau at the beginning of the second semester.

## Show Features Clam Project

February 10 the University of Maine and You television series will feature a discussion of the United States Department of the Interior's clam project. Guests this week will be Walter Welch, associated with the research program at West Boothbay Harbor, and Professor Richard Hill of the University of Maine Engineering Department. Professor Hill will discuss his part in the manufacturing of a water control machine.

This program is presented weekly from 12-12:30 over WABI-TV, Bangor and WAGM-TV, Presque Isle.

## Engineers & Scientists

## Discuss Current Openings with RAYTHEON

### CAMPUS INTERVIEWS

February 14, 15, 1963

See your placement director now to arrange an interview with the Raytheon representative.

Raytheon offers challenging assignments for BS and MS candidates in EE, ME, Mathematics and Physics. Openings are in the areas of:

RADAR, INFRARED, MISSILE & SPACE SYSTEMS, COMMUNICATIONS & DATA PROCESSING, SOLID STATE, SONAR, ELECTRON TUBE & COMPONENTS TECHNOLOGY, MICROWAVE ELECTRONICS, MANUFACTURING & FIELD SERVICE ENGINEERING

Facilities are located in New England, California and Tennessee. If an interview is not convenient on above date, forward your resume to Mr. G. W. Lewis, Manager of College Relations, Raytheon Company, Lexington 73, Massachusetts.

An Equal Opportunity Employer

## Notices

### GREEN HORNET

The *Green Hornet*, the famed companion of Charlie Gerb, Jr., passed away in Newport, Maine on December 31, 1962.

Born in Detroit, Michigan, in 1951, she later moved to Cohoes, New York, where she became associated with Gerb.

She is survived by the members of Beta Theta Pi, U. of Maine.

Funeral services were held at 4:30 p.m. Jan. 3rd, 1963, at Newport, Maine.

### WMEB-FM

WMEB-FM is planning an enlargement of the broadcasting day and schedule in the near future. This increased programming will better provide for campus activities and your enjoyment. Watch the *Campus* for the exact date of this new programming schedule.

### ROLLER SKATING PARTY

A roller skating party will be held in the Women's gym this Friday night at 7:30. The admission is 50¢. The proceeds from these parties sponsored by the W.A.A. are the principle income for the Helen A. Lengyel Award.

### FLY TYING CLASSES

Fly tying classes will start at 7 p.m., February 11, in the Bumps Room of the Memorial Union.

### POSITION OPEN

Letters of application for the position of Editor and Business Manager of the *Maine Campus* for the 1963-64 school year are being accepted by Professor Brooks Hamilton, 2 Fernald Hall. Applications must be in no later than February 11.

### INTERNATIONAL CLUB

The International Club Elections will be held at 7 p.m. on Tuesday, February 12, in the Union. Check the notices for the room.

### CAREER SUPPLEMENTS

The first in a series of career supplements published by the *Yale Daily News* titled "Careers in Insurance" are available for those interested. The supplements can be picked up free of charge in the *Campus* office, 3 Fernald Hall.

### LUTHERAN STUDENTS

There will be a meeting of the Lutheran students at 7 p.m., February 10, at the home of Dr. and Mrs. John Coupe, 3 Mainwood Avenue, Orono. Students desiring rides meet at the Louis Oakes Room at 6:45 p.m.

### PEACE CORPS EXAMINATION

A Peace Corps placement examination will be given at the University of Maine on Saturday, February 23. Application forms for the Peace Corps may be obtained at Philip Brockway's office, 102 Education Building. Arrangements for the testing will be made by Dr. Robert Apostol.

### FRESHMAN CLASS MEETING

There will be a freshman class meeting at 7 p.m., Tuesday, February 12, in the Main Lounge of the Memorial Union. Plans will be made for the class banquet and dance to be held March 9.

## Hey there, you with the raft of ideas!

### ME, EE, AE ENGINEERS

Get that raft afloat fast, and head for the land where ideas multiply. But before you set your course, you'll want to compare the opportunities . . . the challenge . . . offered by potential employers with what *you* can bring to your employer.

What's up at Hamilton Standard? In brief, a diversification program that includes design and development of propulsion controls, life support systems, other environmental control systems, electron beam machines, automatic stabilization systems, propellers, and ground support equipment.

We're looking for men with ideas . . . ideas ready to be launched. If you're an engineering student looking for the best means to an end, pick up a Hamilton Standard brochure at your placement office. It may hold the first clue to how you can get started toward the best company for you.

A Hamilton Standard college personnel representative will be on campus soon. He'll be glad to answer your questions, and to take your application for a position if you decide you like what you've learned about us.

THE DATE: February 20, 21, 1963

## MacLaughlin Named Educational Television Program Manager

Robert K. MacLaughlin, a member of the University of Maine faculty, has been named program manager of the Maine Educational Television Network.

MacLaughlin has been serving as an assistant professor of speech and as an information specialist in the department of public information and central services, holding each position on a half-time basis. He has

also been responsible for producing the weekly university television program, "The University of Maine and You," over Bangor and Presque Isle television stations.

In his new position, MacLaughlin will be responsible to Network General Manager John Dunlop for the development of the television broadcast schedule, the co-ordination of program activities with the State Department of Education program specialists, program development on the campus, co-ordination of program activities with the teachers' colleges and private colleges, and the development of a student training program in coordination with the university's speech department.

## Father Hagmaier Will Speak During Brotherhood Week

Father George Hagmaier, C. S. P., associate director of the Paulist Institute for Religious Research in New York, will be the guest speaker at the University of Maine during Brotherhood Week, Feb. 17 to 23.

Father Hagmaier will speak at a Brotherhood Week banquet Wednesday evening, Feb. 20, at 7 p.m. in South Stodder dining room. "Brotherhood—Pretense and Promise" will be the subject.

Father Hagmaier is co-author of Counselling the Catholic, a book widely-acclaimed and translated into seven foreign languages. He is presently at work on another book, "The Lapsed Catholic."

The first priest to be awarded a doctorate degree by the department of Marriage and Family Life at Teachers College, Columbia University, Father Hagmaier is also the author of numerous articles for magazines and journals.

He has served as a visiting lecturer at Columbia and Fordham Universities, Catholic University of America and at the Pastoral Institute, Conception Seminary, Mo.

## Graduate Fellowships Available For Three Psychology Students

The department of psychology of the University of Maine is currently seeking qualified applicants for three Title IV National Defense Graduate Fellowships which were recently awarded to the department.

These fellowships are three-year awards, and provide stipends of \$2,000 for the first year, \$2,200 for the second, and \$2,400 for the third, together with an allowance of \$400 a year for each dependent.

The purpose of the fellowships is to assist graduate students who wish to pursue work toward the Ph.D. degree in general-experimental psychology with the aim of preparing themselves for teaching psychology in the nation's colleges and universities.

The department of psychology is currently offering Ph.D. level work for students who wish to specialize in learning, motivation, perception, child behavior, and animal behavior. Opportunities for thesis research work in the Division of Behavior Studies of the R. B. Jackson Memorial Laboratory at Bar Harbor may also be arranged.

Qualified applicants should be holders of the B.A. degree in psychology, or should expect to receive this degree or equivalent before September of this year, from an accredited college or university.

The deadline for the receipt of applications is February 15. Persons wishing information about these fellowships should apply to Prof. A. D. Glanville, head, department of psychology, University of Maine, Orono, Maine.

## SCIENTISTS, ENGINEERS—GIVE YOUR FUTURE A FINAL EXAM

Put AC to the test, and you'll come up with the right answer to your future. AC Spark Plug, the Electronics Division of General Motors, is one of the leaders in the field of design, development and production of Inertial Guidance and Navigation Systems. Current projects include the APOLLO Navigation-Guidance System, TITAN II and THOR Inertial Guidance Systems, B-52 (C&D) Bombing Navigational System, POLARIS gyros and accelerometers.

Challenging projects are available in Milwaukee, Los Angeles and Boston for MS and PhD candidates with interests and academic backgrounds in the inertial guidance-navigation field.

Milwaukee—BSEE, ME, or Physics and Math graduates joining AC are offered a 32-week Career Acceleration Program which moves them rapidly into an actively productive position. The two-phase program consists of: PHASE I... Eight weeks of formal engineering classes in the areas of: Servo-Mechanisms • Semi-Conductor Technology • Theory of Inertial Guidance • Related Inertial Navigation Topics.

PHASE II... Actual work in the organization's three main technical areas: Engineering • Reliability • Operations. Following this training period you will be reassigned to

AC SPARK PLUG • THE ELECTRONICS DIVISION OF GENERAL MOTORS  
MILWAUKEE • LOS ANGELES • BOSTON • FLINT • An Equal Opportunity Employer

your original department in Design, Development, Manufacturing or Reliability.

Boston—Advanced Concepts Research and Development On-the-Job Training Program—AC's Boston Laboratory is engaged in development of navigational systems for manned aircraft, ballistic missiles, and space vehicles.

Los Angeles—Advanced Concepts Research and Development On-the-Job Training Program—AC's Los Angeles Laboratory is occupied with advanced guidance research for space vehicles and ballistic missiles, plus research in special purpose digital computers.

CONTACT your College Placement Officer regarding a General Motors-AC campus interview, and send for the informative brochure, "At AC, Navigation is Our Business."

For your Free copy of "AT AC, NAVIGATION IS OUR BUSINESS" fill out coupon and send to:

## Grades Hit Team Hard Bears Face U-Conn. Sat.

The Saturday before finals saw Maine's Black Bears meet a fired-up Wildcat crew at Durham and drop a high-scoring contest, 101-84. New Hampshire definitely had a very hot hand, ringing up 43 buckets in 91 attempts from the floor.

Halftime saw UNH with only a 47-39 advantage, but the cats really opened up in the second canto to pull out the 17-point verdict.

Coach McCall indicated that the Bear's nemesis all season long—rebounds—really made the difference. Center Jim Ball and forward Jim Rich combined to snatch 38 bounces for UNH, four more than the entire Maine team garnered. The discrepancy in the team-rebounds was only superficial; the offensive bounces told the story as UNH was able to get many "percentage" shots, attempts in-close which cut the nets with a greater frequency. These percentage shots were instrumental in the Wildcat floor average of 44% for the evening.

Both clubs had balanced scoring. UNH notched five men in double figures, Maine showed four. Rich of the Wildcats and Dave Svendsen of Maine shared game scoring honors with 24 apiece. Johnny Gillette and Laddie Deemer followed Svendsen with 18 and 16, respectively.

### Seat-Squirmers at Mass

Maine resumed action following the final exam break January 31st at Amherst, Massachusetts, against a fine U-Mass team, which has been coming on strong of late. The team recently threw a scare into one of the East's best clubs, Canisius, when it lost by a mere two points.

The 80-68 final score was no indication of the tempo of the game.

The score was close throughout, with the lead swapping hands many times. Midway in the first half, advantage.

The spirited Bears came back strong in the second half and with 3:27 remaining, it was anybody's game with the score knotted 61-all.

Late in the second half, Mass got the breaks. After Bob Stickney's 6' 6" frame retired to the bench via the foul route, the tide slowly turned. Redmen high-scorer and All-Conference ace Roger Twitchell, hampered with four fouls, began to move. With the score tied at 61 points, he put his height to work and moved in close to complete a 3-point play, then netted a fielder to boost his club to a quick five point bulge which was never made up.

Maine moved to a three-point deficit, 71-68, with just over a minute to play, but at that point Mass inserted a driving little guard named Hill who accounted, almost individually, for the remaining nine points.

Johnny Gillette, playing his final game of the season due to scholastic difficulties, had a fine game, scoring 20 points. He was backed-up by Dave Svendsen, Dennis Vanidestine, and Laddie Deemer who all scored in double figures.

Coach Brian McCall was quite encouraged with the team spirit as Maine was definitely "up" for this one. He also expressed satisfaction with the team's improvement in field-goal percentage and rebounding. The Bears as a team out-rebounded Mass., 47-39, which was definitely a surprise.

The capacity crowd leaving the Amherst gym certainly left with considerable respect for an under-

dog Maine team which nearly pulled a big upset.

Maine held a seven-point lead and an upset appeared to be materializing, but the poised U-Mass club didn't fold, emerging with a 36-33

### Unconn here Saturday

Maine faces some very stiff competition this week-end when UConn moves into the field house fresh from a 33-point bombing of Vermont on the Catamounts' home court. It is apparent that UConn has its big guns leveled at the YC crown and it appears that they will be next to impossible to stop.

The departure of John Gillette will cause a definite weakness unless one of his teammates can come through to offset his loss. Needless to say, Coach McCall was very displeased with his team's performance at Storrs earlier in the year and will be pulling all the stops to make a decided improvement.

### INTRAMURAL WRESTLING TOURNAMENT

The Intramural Wrestling Tournament will be held the last Tuesday before Spring Recess. Those out for Frosh or Varsity Sport must report not later than three weeks preceding the first match. They must work out under the instructor at least three times per week. If not out for Frosh or Varsity Sport, they must report and work out under the instructor at least three times per week beginning not later than the first Friday following the beginning of the Spring Semester.

## Indoor Trackmen Lose To A Strong Dartmouth Team

By JOHN LIPSEY

The University of Maine suffered its first loss of the indoor track season by dropping a 65-44 decision to Dartmouth College in Hanover, N.H. This was the first meet held in the new fieldhouse and although they lost the varsity meet, Maine did squeeze out a 53-50 victory in the freshman meet.

Dartmouth took ten of a possible thirteen first places, but all three of the Maine victories were meet records. In the Shot Put Arnold DeLaite led a Maine sweep with a throw of 48' 11", while Baron Hicken took the 50 yard High Hurdles in 6.7 seconds, and the team of Bruce Hanson, Tim Carter, Jerry Ellis, and Lorrimer Hodges won the two mile relay in 8:19.7. Two Dartmouth standouts were Peter Wells and Gerald Ashworth. Wells won both the one and two mile runs while Ashworth set

meet and cage record and tied a Dartmouth College record with a 5.3 second clocking in the 50 yard dash.

In the freshman meet Maine won the meet by winning the last event, the 1½ mile relay, in the meet record time of 6:09.8. Maine also set four other meet records two in the field events, and two in the track events.

In the Pole Vault Mike Skaling set a record with a vault of 12' 6", one inch short of his freshman record, and Mike Zubko set the other field record with a leap of 6' ½" in the High Jump. In the running events Howard Shaffer won the 1000 yard run in 2:22.6, and Fred Judkins won the two mile run in 10:15.6.

This weekend Maine is at home for an interclass meet and a week later, Winter Carnival Weekend, Maine is again at home for a meet with Brown University.

## Numerous Intrafraternity Basketball Games Mark The 'Swing Into Spring'

By FRED SAMPSON

With the start of the Spring Semester, the fraternity intramural basketball schedule now moves into high gear. Most of the crucial games will be played within the next four weeks.

Present leaders are Phi Gamma Delta, 3-0 and Phi Eta Kappa, 2-0 in the American League. The National League has a three way tie with Kappa Sigma, Phi Mu Delta, and Sigma Chi all posting 2-0 records.

The predictions made in the last issue of the *Campus* proved 100% correct as Delta Tau Delta utilized a good bench to edge an improving Beta Theta Pi team, 54-49. Sigma Phi Epsilon downed Theta Chi, 46-34, in a rough and tumble contest. Alpha Gamma Rho buried a hapless Sigma Nu team, 41-11. Lambda Chi Alpha was the unwary victim of an all-court press as the Betas pulled a 53-38 upset and broke into the winner's column for the first time.

## Outdoor Angle

By DICK STAIGER

The ice fishing season for salmon and trout opened February 1, and several AGR's were there to take advantage of it. The party of seven were at Moosehead Lake and took five togue ranging from "throw back" to about 20 inches. They said that when they pulled their lines up to check bait the lines froze on contact with the air. I guess the cold is half the sport.

Speaking of Moosehead, Warden Harriman of Rockwood was extending warning of dangerous ice near the mouth of the Moose River. It seems that water from Brassua Lake is being drawn off into Moosehead and thus causing day to day changes in the ice conditions. Caution if you're going to Moosehead.

The Maine Fish & Game Department has completed its mid-winter waterfowl count. The count was prepared by Howard E. Spencer, Jr., Leader of Waterfowl Research. The report noted generally good numbers of birds dispersed along the coast. The dispersion of birds was thought to be due to the lack of ice

which usually concentrates the birds in the open water. The largest representation was 19,923 Black ducks and 13,328 Goldeneyes. Several other species were counted and the total tally was 57,101 as compared to 50,160 last year.

The Fish & Game Department has extended a reminder that there is a law prohibiting the free roaming of dogs in deer-inhabited areas. The deer-dog situation has not become critical yet this year, and it won't become critical if dog owners will keep their dogs tied and away from the deer.

There is someone, "Born on a mountain top in Tennessee," trapping the Hartland area. Warden Gilbert, Hartland, reports, "There's a modern Davey Crockett trapping beaver in my district. He uses a Mexican donkey for transportation and is dressed as follows: Coon-skin hat, complete with tail, and buck-skin jacket with fringe and leggings." Makes you wonder, he must be interested in the aesthetic pleasure derived.

## ADVANCED AEROSPACE PROGRAMS AT DOUGLAS

have created outstanding  
career opportunities for  
**SCIENTISTS and ENGINEERS**  
B.S. degrees or better

Assignments include the following areas:

**Servo-Mechanisms**—relating to all types of control problems

**Electronic Systems**—relating to all types of guidance, detection, control and communications

**Propulsion**—relating to fluid-mechanics, thermodynamics, dynamics, internal aerodynamics

**Environmental**—relating to air conditioning, pressurization and oxygen systems

**Human Factors**—analysis of environment affecting pilot and space crews, design of cockpit consoles, instrument panels and pilot equipment

**Heat Transfer**—relating to aircraft, missile and space vehicle structures

**Structures**—relating to cyclic loads, temperature effects, and the investigation of new materials, methods, products, etc.

**Aerodynamics**—relating to wind tunnel, research, stability and control

**Solid State Physics**—relating to metal surfaces and fatigue

**Space vehicle and weapon system studies**—of all types, involving a vast range of scientific and engineering skills
