PLANNING, QUESTIONS - Part of Student Affairs

Purpose is to help you find your life style...decide what subjects you want to study...help you plan the future...

What is special about me that I should develop and use?

What sort of life do I want to lead after college?

What sort of job will let me live the way I want?

What training or education do I need for this job?

What courses at UMO will provide this education?

What other activities and experiences will help me learn?

What personal things do I know about myself?

Do I read fast enough?

Do I understand what I read?

Is my math background poor?

Am I a "morning person" or a "night person"?

How much time do I need to spend with friends?

Do I have any handicaps that I must accept?

Do I need lots of friends or only a few?

How much time to I need to be alone?

Will I need financial help?

Where can I study quietly?

Will I need to work while in college?

Do I need help in finding the right job?

You probably don't know all the answers to these questions. Remember planning always is tentative. New ideas and new opportunities can change your present thinking. Than you may choose new goals. That's part of the growth that takes place during college. But you have to start somewhere.

Giving and receiving selves is a tender, loving, risking matter in which we are vulnerable. While training may proceed without much risk, education is always full of risk. CAN I BE ME WITH YOU? WILL YOU BE YOU WITH ME? See “Authority,” “Common Unity,” “Education,” “Error,” “I Am,” and “Training.”
