COPPER, TIN AND SHEET

IRON WARE,

Nos. 15, 17 and 19 Central Street,

BANGOR, ME.

BANGOR:
PRINTED BY SAMUEL S. SMITH.
1855.
The Bangor Air Tight Cooking Stove is truly a Bangor production, and is acknowledged on all sides to be the *ne plus ultra* for the kitchen. It is now about two years since I first introduced it to the public, and I have retailed from my store over *three hundred* each year. Its beautiful design, neat and handsome appearance, thickness of casting, and convenience for all the varieties of cooking, are unequalled by any other stove in the market. It is manufactured in this City by Messrs. Estes & Whittier, (the pioneers and inventors of the long known and celebrated Hampden Stoves,) expressly for my sales.
Out of the large and unprecedented sales of this stove, I have yet to learn of the first case of dissatisfaction.

Each Stove is furnished with the following articles of furniture, viz:

One Large Tin Wash Boiler,
" Iron Dinner Pot,
" Dish Kettle,
" Tea Kettle,
" Spider,
" Flat Iron Heater,
" Gridiron,
Two Griddle Pans,
" Sheet Iron Oven Pans,
One Long Handled Dipper,
" Tin Top Steamer,
" Iron Scraper.

The oven for capacity, and evenness of cooking is unprecedented. I annex a list of some of the individuals who are now using the Bangor Air Tight Cook Stove, and to any of which I invite all purchasers of Stoves, to make candid enquiries as to the merits of the Bangor Air Tight Cook Stove, and after fully satisfying yourselves, to give me a call and I trust I shall sell you a stove to our mutual advantage.

Self Heating Smoothing Iron.

Many important improvements have been made since the beginning of the present century, relieving and facilitating the labor of men by machinery and other modern implements: but females have been nearly neglected until the introduction of the Patent Self Heating Smoothing Iron, which will relieve them, in a very great degree, from the excessive and fatiguing labor of Ironing, besides being a great saving of time and expense. This Iron combines economy, convenience, saving of labor, and despatch—one cent's worth of dry charcoal supplies fuel for a whole day's constant ironing. Hard wood coal from the stove answers the same purpose. It can be used in any room, or in the open air. Hatters', and Tailors', Irons are constructed upon the same principle, and possess equal superiority.

For sale wholesale and retail by the subscriber, who is the only Agent for Penobscot County.
