William S. Cohen, representative to the U.S. Congress from Maine's Second District was the featured speaker at the 151st Commencement Exercises of the University of Maine at Orono, Saturday, May 17, 1291 undergraduate and graduate students received degrees.

Cohen, a graduate of Bowdoin College in 1962 and Boston University Law School in 1965 was awarded an honorary Doctor of Laws Degree and Lewis C. Dowdy, Chancellor at North Carolina Agricultural and Technical State University, Greensboro, North Carolina was awarded an honorary Doctor of Pedagogy Degree.

Cohen was elected to the U.S. Congress in 1972 and reelected in 1974.

Dowdy, former president of the National Association of State Universities and Land-Grant Colleges, is a graduate of Allen University, Columbia, South Carolina. He holds a master's degree and law degree from Indiana State University and a Ph.D. from Indiana University, and an honorary degree from Allen University.

Dr. Dowdy has served in varying capacities for twenty-four years at North Carolina Agricultural and Technical State University before becoming president. He has several posts in state and national Advisory committees and is the recipient of the Outstanding Alumnus Award from Indiana State University.

James H. Paige, Chairman of the University Board of Trustees, issued the following statement to The Alumnus as we went to press:

The Board of Trustees is pleased to announce Patrick E. McCarthy, currently Chancellor of the Massachusetts Board of Higher Education, has been elected second Chancellor of the University of Maine. Mr. McCarthy will bring to Maine when he arrives later this summer, a strong and varied background to his native state. With a new chief executive ready to begin the extensive job confronting all of us who have a deep commitment to high quality, low-cost higher education, we look forward to new direction and reassessment in the hard days ahead for the university.

Mr. McCarthy's talents and experience in diplomacy, planning, education, government, and administration bring a set of dynamic and unique strengths to bear on the mission of the university. He has the full support of the trustees and we look forward to welcoming him into the university family.

The search has been an exhaustive and extensive one, characterized by its openness and its expediency. It has been a gratifying experience for me and I believe for the other trustees on the search committee to have been so intimately involved in a process of selection that included contributions from Maine citizens and different constituencies within the university. We are pleased that that process has resulted in the selection of Pat McCarthy.

Dr. Paulette French

William R. Gorrill, professor of civil engineering and a consulting soils engineer, has been appointed director of the newly created School of Engineering Technology in the College of Engineering and Science at the University of Maine at Orono.

Gorrill, a member of the UMO faculty since 1956, will head up a new school that will be charged with the responsibility for all engineering technology programs which previously have been run in parallel with the engineering programs offered by other departments. The school will also be responsible for the service courses presently provided by the general engineering department. It eliminates the general engineering department as a separate administrative unit and eliminates the division of engineering technology.

Under the reorganization, the new school will have 14 faculty members and the college's administration will be reduced by a net of one-half of a professional position, according to Dean Basil Myers of the College of Engineering and Science.

Charles A. Rice, '17, enlisted as a private in the U.S. Army in that year, was promoted to a lieutenant and died December 22, 1918 in a British Expeditionary Hospital as the result of wounds received in action on the fields of Flanders. He was given a Service Degree posthumously in 1919.

Rice had been New England champion in the 100 and 220-yard dashes in 1914 and won state titles in the 100 and 220 in 1914 and 1916. He earned the varsity "M" in 1914, 1915 and 1916. He was a member of the "M" Club, Track club, Sophomore Owls, Junior Masks, Senior Skulls and Athletic Board.

In June of this year, Roger C. Castle, '21, a former teammate of Rice, presented the jersey once owned by Charles Rice to the university's athletic department. It will be kept in the trophy room at Memorial Gymnasium.

While making the presentation to Harold S. Westerman, UMO athletic director, Castle noted, "In the spring of 1918 the track team had its spring training on the cinders between the railroad tracks in Webster. We changed into our track suits in the railroad's tool shed beside the tracks.

"As I entered the building I noticed the jersey, shoes, and trunks just where Rice had left them in the spring of 1917. His name was on the white trunks. That was 57 years ago. The trunks and shoes are long gone but this is the jersey—some different from today's material."

The Varsity Track Team, 1914

The Harrises Come Back

A. W. "Pete" Harris III was born in New York, but as a small child, summered in Maine. In the early 1930's his family became year-round residents of Southwest Harbor. Like many of the class of '50, he entered the service after high school. He "came home" in December 1945, after 4 1/2 years with the U.S. Coast Guard's submarine patrol. Along with hundreds of other veterans, he started his delayed education at the University of Maine's Brunswick campus, then transferred to Orono. In 1948 he married the former Sue Sausser of Ashland, Pennsylvania, and the Harrises became a part of the post-war Orono campus. It was peopled with a new breed of student—older, experienced, and serious about education. They combined the classroom and family life in a pattern that is now referred to as an era.

"We didn't think of ourselves as a part of history. It's only in looking back now that I can see it that way."

Pete's loyalty to Maine is intense. It disturbs him somewhat that he had to leave and that it's been a long time since he's been back. His grandfather, Abram W. Harris, was President of the Maine State College in 1897, when it became the University of Maine.

1. "It's the first time we've been on campus since graduation."
But, obviously, the weather man was not an alum. He showed no special consideration for Maine's 100th reunion. Friday afternoon when the Harrises arrived, the campus and returning alumni were drenched with June rain. Early arrivals entered the Hilltop Complex with luggage, bags and garment containers well sprinkled.

2. Friday get-togethers with old friends preceded a lobster luncheon and roast beef dinner. Pete and three unidentified friends get reacquainted.

"Something Vincent Hartgen said when we graduated haunted me—I mean, it really made an impression on me. He said 'Recruiters will lure you out of Maine and you'll spend the rest of your life trying to make enough money to get back.' With that in mind, I stayed after graduation. Our first child was born in Bar Harbor."

Pete, to better support a growing family went first to Cape Cod, then took positions with RCA, GE, Philco and the Apollo program in Daytona. He finally bought a partnership in a marina in Florida. "This year I sold my half—I'm going to play awhile."
3. Things get moving at the Fabulous Forties Reunion Banquet. Sue and Peté Harris spot familiar faces among class of '50, the first at the dinner table.

"We were the biggest class to ever graduate from Maine. Remember—they gave diplomas to the wives?"

Pete had a summer sight-seeing boat in Bar Harbor. Sue was a nurse at the Bar Harbor hospital. They were married in his sophomore year.

"Marriage was a good thing for me. I popped up to the Dean’s List. We rented a room for $11 a week on College Road. Sue worked at the infirmary with Dr. Leddy. I went to the Sigma Chi house often. Other couples like us became fast friends. We had a ball."

4. A pelting rain soaked long skirts and coiffures between Wells Commons and the Memorial Gym where . . .

Al Corey’s orchestra played the music of the Forties. Sue and Pete were among the dancers that still knew the right moves for “Jersey Bounce” and “Chattanooga Choo Choo.”

5. “Coming home and switching from the Brunswick campus, where I started, to Orono was one of the most traumatic experiences I’ve ever had. There were 800 some vets at Brunswick. We were pretty thick. We could do anything. If you needed someone to run a tank, you could find him. I remember somebody swiped a bus and left it on the lawn. It took us a while to assimilate Orono.”

Saturday tour of the campus brings back memories of World War II, the Brunswick campus and the changes in Orono since Pete Harris last saw it twenty-five years ago. The tank—an M-42 anti-aircraft tank, and the plane—a 1941 DeHavilland British training plane, commonplace equipment in the 40’s, are now collector’s items.

6. Refreshed alumni, Harrises et al, ignored the dreary weather outside the Damn Yankee Room in the Student Union. They rolled out the barrel and the Dixieland.
7. "I saw a lot of people I know"
"When I look back I can see what a significant effect that time had on my life. It was a valuable experience for both of us."

8. Saturday night at Wells, the 100th Reunion Banquet and a chance to hear former President Arthur A. Hauck reminisce.

9. Pete makes sure he's got the words— "To the gods, to the fates . . . to the girls who will love us someday . . . let every loyal Maine man sing:"
"Maine is a marvelous place. People in a cold climate are more creative. In a warmer climate, like Florida, they are more active . . . this state should have developed more than it has."
"Professor Hartgen was quite correct."

10. "Now that we're leaving, the sun is going to shine." Sue Harris leaves Somerset Hall with hopes for continuing good weather for an extended Maine vacation. Pete takes a last look as he drives away and the 25th reunion of the class of 1950 becomes a page in the Harrises' Orono scrapbook.
Era Pound scholars had a family affair at the University of Maine at Orono June 15 to 17 when over 100 Pound experts met to exchange ideas and information about the controversial poet.

The occasion was a symposium "to celebrate the ninetieth birthday of Ezra Pound" according to the chaste, tanned-colored announcement and it was a family affair by choice. In the spring issue of "Paideuma" the editors noted that the celebration would be run "as sort of a family affair... rather than hundreds it will be more pleasant with fewer." Pound scholars, new and old, would get to know each other better.

From that point of view it was a success, and like most family reunions included children, visitors from all over the United States—and India, Japan and Canada, and an opening banquet of that Maine delicacy, the lobster.

But more importantly, it seemed to be a scholarly success. Bangor Daily News critic Robert Newhall quoted one participant's candid comment: "Frankly, I was prepared for disaster because so often this type of affair crops up with plenty of dull people. But this time, though we had plenty of temperamental scholars, there was unusual bonhomie with real prodigies of interpretation."

Dr. Herbert Schneidau, who made the comment on the final day of the symposium, presented one of the four major papers, "Pound, Fenollosa, and objective verse." Schneidau, who is from the University of California at Santa Barbara, continued the Sunday evening discussion of New Englander Ernest Fenollosa, one of the major influences on Pound's interest in the use of Chinese and Japanese characters for visual vitality in the written language. The Honorable Seiya Nishida, minister at the Japanese Embassy in Washington, was a special guest at that session.

Nishida's remarks covered Fenollosa's importance to the cultural life of Japan where he was Imperial Commissioner of Fine Arts and unofficial ambassador abroad to tell the Western world of the art of China and Japan.

Other speakers and their topics provided insight into Pound the man as well as the poet who probably has had more influence than any other 20th Century American poet on the works of other writers.

Among these speakers were Hugh Kenner, senior editor of "Paideuma" and a Johns Hopkins University faculty member who is considered the U.S. authority on Pound, and Donald Davie of Stanford University, August Frugé of UC at Berkeley, and David Horton who discussed the subject of Pound, money and banks.

The cooperative environment and the chance to work together were applauded by both Schneidau and Kenner. Quoted by Newhall, Schneidau said "The whole is more than the sum of the parts... there was an interaction from personal confrontation."

Carroll Terrell, UMO English professor, had accomplished another first. Three years ago the first issue of "Paideuma" came off the University Press, a tribute to Terry's determination to create a prestigious journal datelined University of Maine at Orono. June, 1975, brought many of the world's leading Pound scholars to campus... and they found it worthwhile.

Paideuma has been described by a critic thus: "It is finely edited and printed and comes at Pound from all angles... May it flourish!"

Terrell has put together a distinguished staff for his scholarly journal that includes editors in nineteen countries, representing five continents.

Contents of the journal run from the highly academic to the personal.

"Of course, putting out a 150 page journal three times a year is a massive job," says Terrell. "However, I have had extraordinary help and encouragement from the administration, the accommodations of a highly professional university press and unde support from the faculty."

"We are in debt to the library in particular. The editorial assistance required by this office is immense. Pound used the linguistic resources of many languages other than English including Greek, Chinese, Japanese, Arabic, Egyptian hieroglyphs and so on."

In its short history, Paideuma has received the attention of some notable people. Archibald MacLeish says of it: "No library can pretend to an adequate 'coverage' of contemporary poetry unless it contains at least the essentials of Pound's work; and one of those essentials is Paideuma..." Robert Penn Warren echoes this feeling: "Paideuma," he says, "is truly indispensable for anyone seriously interested in Pound's work." And from poet Robert Lowell: "I am amazed that so good a magazine as yours can be put out on one recently dead man, even Ezra."

Marion Hamilton is an information specialist for the university's department of public information and central services. She is a graduate of Colby College in Maine and started her career as a reporter for the Kennebec Journal in Augusta and the Portland Sunday Telegram. She is married to Professor Brooks W. Hamilton of the university's journalism department and WMEB-TV. The Hamiltons have four children and live in Stillwater.
ALUMNUS PROFILE

The trim gentleman with the piercing eyes has as complex a character as the elements he works with. He talks about systems, logistics and instrumentation in the same vein that others discuss the morning coffee or the price of beef. And one senses that he is being temporarily patient with those who don’t share his knowledge. Socially, this situation must repeat itself many times since the air that Tom Lynch breathes is somewhat rarified for the average person. Fortunately, he brings his detailed and precise reactions to such interests as music and literature as well as physics and science.

Mr. Lynch is a native of Maine and a 1938 graduate of the University of Maine with a degree in Electrical Engineering. Graduate work followed at Case Institute of Technology and the Sloan Business School of MIT.

He was an early worker in the fields of disc and magnetic recording and in underwater ordnance and has published in these fields. He holds fourteen U.S. patents.

He is chairman of Cleveland Crystal, Inc. and director of three other companies. He is Vice President of the Clevite Corporation and Vice President and Senior Technical Advisor of Gould Inc. He is a Woods Hole Oceanographic Institute Associate, a member of the University of Maine’s Development Council and of Dean Myers’ Technology Advisory Board. His associations are numerous and diversified.

As a business man, Tom Lynch pioneered in the field of underwater acoustic devices, and starting in 1942, with five associates, built the largest torpedo design and manufacturing facility in the world.

He formally took early retirement from Gould Inc. in 1974 and now, relieved of management responsibility, has returned to his early love —applied technology. He continues to serve Gould, Inc. as a consultant in military business and in the broad field of energy technology.

On May 24, he attended the Dean’s Inaugural Seminar at the University of Maine at Orono and allowed his sharp and far-ranging mind to be probed in the following interview.

WCO

TOM LYNCH ’38
Industrial Philosopher

In your lecture at UMO on May 2, you described a future situation of large cars for distance travel and small—perhaps electric—cars for in-city. would this be a competitive industry or a municipally controlled one?

It need not be a municipal system. What is visualized is a small, probably electric car, owned by the individual and used in his daily pursuits in his home area. When he travels, he’ll likely do it by air, picking up another electric at the end of his flight, to do his local traveling. When he decides to go on vacation by car, it will not be electric and he’ll rent it much as we do now. If he lives in a concentrated area, he may choose not to own any kind of car; he need not worry, electricity will be available for self-drive at frequent spaces in the city and he’ll use them as we do cabs, now.

How about AMTRAK?

AMTRAK will never support itself.

How can it be self-supporting? A train is a large structure, an expensive structure that uses an expensive right-of-way. It is ideally suited where you can move large tonnage. Moving people is a different thing. People are a difficult kind of cargo to move.

You cannot have trains going everywhere all the time. You can approximate this with the airplane. Therefore, people will choose the air, and the increased patronage will increase the service. It is an on-going spiral. The contrary reasoning applies to rail travel for people.

Your lecture in May put forth a McLuhanish premise: That in the near future, people will
stay home more during working hours. You stated that only their intellectual presence is needed on the job. Would you elaborate? We already have the technological capacity to do so. I look upon a world that is becoming free from technical limitations. People are free to go to the market without leaving their living rooms, free to go to the theatre without leaving their living rooms and it is possible, through present day communications to make only occasional visits to a place of employment and still conduct business affairs. Acceptance of change by society, however, is another matter.

Do you see a slowing down of the pace of flamboyant industrial programs such as planned obsolescence in automobiles and appliances. Or such as we have seen in the space program? Far from slowing down, we have got to speed up. Immediately, we need another energy source. If you can't get coal and you can't get oil, what are you going to do? These problems are not going to be solved by sociologists and politicians; they're technical problems. This is indicated by the creation of ERDA, the new energy administration in Washington and the increased budget for the National Science Foundation.

It's a wonderful climate for technologists for the next generation. There are so many problems—so many. And planned obsolescence doesn't disturb me. General Electric could make a cost effective toaster that lasts forever, but you wouldn't want to pay for it. A toaster that has to be replaced every few years is within everyone's reach.

And, furthermore, I doubt if you'd want to have your choices last forever. Technology changes; popular taste changes. Let's accept this dynamic situation; it is, after all, the result of a free market, and whatever we may say of it, it does represent a kind of consensus.

How about space research? And your own specialized field—oceanography. How much of it can be applied to everyday transportation problems?

I tend to the general belief that there is a gain to all fields from knowledge in any field. If for no other reason than a high technology society develops an acceptance of technology in the populace, and the process feeds upon itself. So, in general, I approve all of man's intellectual adventures. They have to pay off. It is a religion with me.

To answer the question specifically, an enormous amount of knowledge of materials was developed in space research. A great deal of work with solar energy and the fuel cell was done. These may provide important elements in solving our energy problem.

But far and away greater, in my opinion, is the lesson that man can solve his technical questions, if he will. He willed to go to the moon. We must have faith to turn that enormous power loose on other consensus objectives.

Do you subscribe, philosophically, to any particular school of thought about the future, B. F. Skinner, for instance? Do you see a mechanical, controlled society? In fact, how will the humanities fare in a technological world? Like Orwell's 1984, technology will always be blamed for men's ills. Men make machines. Machines, by themselves, can't do anything. And technology, no more than other disciplines, is responsible for what happens to men's minds.

It's very easy to scream and shout and stamp your foot against technology. "Stop the smoke stacks belching," society says. If you don't want it, engineers will stop it. Then people will find something else to complain about and engineers will take that away.

There is a stage of development in which the machines are related to people, that people are involved with machines. Ultimately, machines fade into the background. They are servants, conceived with men's minds. How society uses them is another thing.

Take TV. TV is an enormous force. If we could get rid of the culch, it would be even a more powerful training tool than any of the schools. But it can also be a training tool to teach garbage. It's like anything else. We've had electricity for a long time, but you can stick your finger in a light socket and kill yourself if you want to. I think we'll get on top of TV. It's still a bit novel.

And as to the theories of going back to pre-technological society, it's impossible. The capabilities of the earth to support the numbers of people living at the present time are due to technological improvements in farming and related fields. If we go back to the days before fertilizer and machines, we will starve to death. Technology has made it possible to feed people today. Primitive methods are not capable of doing so.

We have to have the courage that technology can solve today's problems. It is our only hope.

You are a new member of the University of Maine at Orono's Development Council. If you were asked to reconstruct the university, what would you change and what would you create? That is a very big question, and I don't have any big answers. I assume the University is already a more or less appropriate vehicle for its purpose. It is, after all, an end point of a long evolutionary process. What we want to do, in general terms, I think, is to continue in the evolutionary mode, changing the processes and the emphases in response to the consensus of the students, the faculty, and the people of the state. I guess I'd be inclined to nudge the operation a bit more to general study and would add to the opportunity for exposure to classical matters. I'm sure I'd try very hard to increase the social contact between student and faculty. As I see the picture, we let the students set their own standards. Perhaps this is necessary and desirable, but I believe the university owes them an active opportunity to choose values in music and the humanities that the ages have said are valid. I do not believe they can do this unaided. I think the faculty, by taking an out-of-class interest, can help enormously.

Now here comes that old question that everyone asks a successful man. What would be your advice to student engineers? I think a student should attempt to get, here at the university, a broad education and discipline. He should get the capability of educating himself by getting the basics—math, physics and so forth, and getting them well enough so that they become tools. Then when he moves out, nobody is going to frighten him.

A trade school teaches a specific reaction to specific stimuli. A university, on the other hand, should provide the confidence that one can develop a proper response to any stimuli. In short, I think a university should provide access to as broad a field of knowledge as the student can handle.

What does a scientific engineer do in his leisure hours to unwind and relax? Play golf or collect paintings or what?

Leisure... You know, I started as a practicing engineer and quickly got to the point where I was running programs, then moved to applied engineering, systems engineering, organizing people to do things and moved up in management. Now, I'm out on the other side. I no longer manage people. I'm formally retired and my only role is to look at technology as broadly as I can and try to find ways that my company and other organizations with which I'm associated can use it; spread their resources to do something useful. I like what I do. No, I don't play golf or collect paintings. I like what I do... my enjoyment is there.
There is a story about two American soldiers who hit Normandy Beach during World War II and were forced to share a shell hole for cover from enemy fire. In one of those odd reactions the mind produces under stress, one soldier wryly remarked, "Wouldn't a hamburger from Pat's taste good right now?"

The other soldier said in surprise, "You mean Pat's in Orono?"

Sure enough, they were talking of the same Pat's. By coincidence, the soldiers had attended UMO during the same years but never met until Normandy Beach.

Then there's the story of the diplomas. "A graduation is not complete without a diploma from Pat's" ran an ad. If you own one, hang on to it—he doesn't graduate students anymore.

And, consider yourself old if you remember the meal ticket Pat gave to students of the 40's—$5.00 would get $5.50 worth of food. Today's economy renders that idea impossible—it's almost a fantasy that he ever gave it.

Pat Farnsworth smiled when I explained he was to be a focus of the summer Alumni.

"I bet a lot of people are wondering if I'm still alive," he said with a chuckle.

We went to the office of the café he has operated on Orono's Mill Street since 1931. It was full of organized clutter, a bit yellowed for forty-four years of service. He lit a long cigar and reminisced about the history of his business in his mild, downeast manner.

His association with the café goes back further than its birth as Pat's in 1931. As a high school student, he worked three years for the previous owner. Summers, he worked with his father, George Farnsworth, who was a cook in Ogunquit. During the school year, his father cooked for the Sigma Nu house.

When Farnsworth's Café first opened its doors, Pat sold fruit, candy, ice cream and tobacco. There were four booths and four tables. His total investment was $175.

After a couple of years, food was offered (his mother did the cooking) along with 3.2 beer.

Pat smiles today at the anecdotes he has mentally filed.

In the 40's he had glass tops on the tables. If damaged, his policy was to have the person responsible pay the cost of repair. One evening, a few ATO brothers were in. One of them broke the glass. They exited quickly and quietly, but Pat saw the move and gave chase down Main Street. It was winter and the fraternity men jumped off the Orono Bridge over Stillwater River and ran up the ice to the ATO house.

Pat stepped on the gas and entered the house living room in time to hear the escapades laughing about the one they'd put over.

"They came into the living room and there I was," Pat snickers, "but they got a big kick out of it and they paid the damage fee."

In sharp contrast to today, Pat remembers the 1930's students flocking to his soda fountain on the Sundays following vacations, with classes scheduled to resume the next day.

"There was no room to move. We had waiting lines the length of the store."

To accommodate his over-growing clientele, Pat's basement, the Rathskeller, opened in 1945, completely dug out by pick and shovel. Only bottled beer was served at first; in 1952 drought was installed. That year marked the last renovation on the building.

But the business constantly reflects the changes in student tastes. Pat's been making pizza for the last twenty years. His secret recipe has served him well—he is approaching the sale of his third millionth pizza.

Offers have come from Boston, Canada and all over Maine asking him to open another "Pat's". But Pat has reneged each time. His philosophy of life does not call for the birth of a large restaurant empire. He strives for Yankee simplicity—one small business in one small town.

He also owns a farm where he once raised pigs. Each year he loaned a couple to the fraternities for their greased pig contests. And, he annually gave the hay for hayrides.

But not only does Pat contribute pizza and beer, he provides a thankless service as well. He is receptive to students who need to cash checks. And, he is prepared for emergency situations. Dave Rand, associate dean of student activities and organizations, remembers a concert a few years ago when the band needed to cash their paychecks immediately. Even though it was late, Pat obliged.

Pat's pizza has many fans, and he has initiated a delivery service to dorms and fraternities to keep up with the demand.

The basement is a great spot to watch a game on TV over a few beers. Or, if by Thursday a student is feeling the academic blues, the weekend may receive an early kickoff at Pat's.

Growth of the university and the opening of other business geared to the collegiate market have diluted student impact on Pat's. But the café remains a popular spot. After all these years, Pat Farnsworth still draws a crowd. His business remains a part of the folklore at UMO.

It was Reunion at Maine again for the hundredth time, but the weekend of June 6, 7 and 8 did not bless the alumni with sunshine. It didn’t just rain—it poured!

This year the members of the classes of the 1940’s were special guests—marking the 30th anniversary of the end of World War II. Some, who had not been on campus since the post-war years, knew they had walked back into the same vagaries of Maine weather that they had walked out of twenty-five years ago.

Nonetheless, approximately six hundred alumni accepted the weather philosophically in order to attend the Centennial Reunion luncheon at Wells Commons on Saturday honoring the Class of 1925 and retiring university professional employees.

Later, rain hats and slickers dotted the campus as reuniting alumni took nostalgic looks at the 1941 DeHavilland British training plane flown in by Pittsfield businessman, Kenneth Cianchette, and the M-42 anti-aircraft tank belonging to John L. Bishop of LaGrange, parked on the Mall.

The Albert D. Conley Speech and Hearing Center was dedicated in the Stevens complex and a special memorial service honoring alumni who died during World War II was held in the Peabody Lounge of the Memorial Union. The service was conducted by the Reverend Charles O’Connor, director of the Maine Christian Association Center until 1953.

Sober thoughts and the rain lifted late in the afternoon for what was probably the most popular event of Reunion—a Dixieland bash at the Damn Yankee. The barrel was rolled out—those that still knew how worked up a thirst following the rhythms of “Rampart Street Parade”, “Just a Closer Walk with Thee” and “Muskrat Ramble”.

An intimation of changing times came from one wistful co-ed on the side who watched the dancers and observed, “I wish I could do that.”

The Saturday night banquet offered more of the excellent food that had been enjoyed all through the weekend and also offered a packed house the opportunity to hear Dr. Arthur A. Hauck (UMO President, 1934-1958) speak.

Class meetings took place on Sunday. Other events, scattered throughout the weekend included the annual business meeting with former President Winthrop C. Libby as special guest, a poolside reunion at the Wallace Pool, and an estate-planning workshop for the 40-year anniversary class of 1935.

Alice-Ann Donovan Poeppelmeier ’40, was awarded the Black Bear Award for her devotion and loyalty to the highest traditions of the University of Maine.

A native of Boston, she grew up in Houlton. While at the University of Maine she was active in student government and sports and received the Alumni Association Watch Award in her senior year. After graduation she continued to serve her alma mater in the Alumni Council, in her support of the Alumni Association, and in alumni club events in her hometown of Glastonbury, Connecticut. She has graciously opened her home for receptions for in-coming freshmen. In 1967, she was recognized for her dedication to Maine with the Block “M” Alumni Service Award.

Arthur A. Hauck, President of the Univ. of Maine 1934-1958

No gaps at Reunion... new friends and old meet at Wells Commons.
Gordon I. Erikson '43, was elected President of the University of Maine General Alumni Association during Reunion Weekend at UMO. He resides in Bar Harbor, Maine, and West Boylston, Massachusetts.

Erikson has been active in alumni organization work for the past several years as have the four members of the Alumni Council who will share executive duties with him.

Newly elected officers are: John F. Wilson '33, First Vice President; Mrs. Philip (Eleanor West) Yerxa '33, Second Vice President; James H. Webster '59 Treasurer and Mrs. Harold (Clara Peabody) Hersum '27, Clerk. Fall issue of The Alumnus will feature profiles on each.

Albert N. Parker '28, accepts the Pine Tree Service Emblem Award given for outstanding alumni service. It is the highest award the General Alumni Association presents. Mr. Parker was born in England and after graduation from the University of Maine, attended George Washington University law school and entered private practice in New York. He served in several capacities in the Alumni Association of the greater New York area. He was President of the New York Association and chairman of its scholarship committee. He was elected to the Alumni Council in 1962 and served as a member of the Executive Committee, Chairman of the Stein Club Committee, Chairman of the Council's Nominating Committee and Chairman of the Constitution and By-Laws Committee. Additionally, he served with the Annual Alumni Fund Committee and as First Vice President of the Association before his election to the Presidency in 1971. The focus of his administration was the younger classes of alumni and the relationship of alumni and students.

With great disappointment, Susan Gaudet, Assistant Director for Alumni Activities, announced the cancellation of the TAKE FIVE summer vacation for alumni. However, the Alumni Council has endorsed the program for next year with some program revisions and an earlier mailing schedule. Sue's asking interested alumni to share thoughts and new ideas on the program for next year. The Alumni Association is grateful to those who were willing to participate. We hope you'll TAKE FIVE with us in '76.

Class of 1915
Left to right, first row: Ray Fogler, Mabel Beach, Paul F. Slocum. Second row: George Beare '11, Montford E. Patten, Joe Parker.

Class of 1920

My Dear Mr. Hodgkins:

It is with pleasure that I accept the invitation tendered by The General Alumni Association, to participate at the 100th Anniversary of The HOMECOMING, on Saturday, October 11th of this year!

The University of Maine and its campus occupy a very warm spot in my heart and mind as my solo year there was a most happy one in every way.

It was my first initiation into COLLEGE LIFE and I savored every moment of it.

The saxophone which was a God-Like instrument at that time gave me a popularity even greater than that enjoyed by the Captain of The Football Team and everyone on campus, especially my brothers in Sigma Alpha Epsilon, made me feel very welcome and important in the scheme of things.

Except for a visit in 1933 to entertain and perform with my orchestra, I have not again seen the campus altho from the Alumni Magazine, I find a great many changes, some, I hope have not spoiled the simplicity of the campus as I knew it in 1921-22.

Until October 11th, I remain,

Yours Sincerely,

7430 PYRAMID PLACE  HOLLYWOOD, CALIFORNIA 90046  (213) 876-5423
We've come a long way.....

Our problems are different now. But we've come a long way. We've "seasoned" since 1902, like good Maine pine.

Like this year, for example. Looking back at the end of our campaign, John Wilson, national campaign chairman, assessed the ups and downs and delays and summed up a total of encouraging trends.

Right from the beginning, we knew we had some hurdles. No one could run a fund-raising effort such as the Annual Fund in 1974-75 without taking into consideration the recession. It's a statistic that had to go into the computer. And we're in a year of capital giving for the university. Because of it, we agreed to delay the start of our fund-raising—those statistics had to go into the computer, too.

Nevertheless, our century of Progress campaign had netted $219,092.28 at press time, with contributions still coming in. And our Phonothon was a success with a grand total of $21,508 from seven evenings of calling in-state and out.

"But then," fund director Bob Holmes says, "dollars are one thing; contributors are another."

And here is the real reinforcement from an uncertain year. For instance, out of 545 givers from the previously inactive list, 308 were young alumni. Because of this and other indicators, special emphasis on young alumni will be continued through next year.

However, before we mark "finished" to the bottom of the page, honesty prompts a few footnote reminders still to be reckoned with. More alumni should support their university and it's our job to reach them. Additionally we must find a way to keep getting the message out that through the Annual Fund, we raise money for the university as well as for the Alumni Association.

These problems are part of the challenge of "next year". And we're ready for another 365 days of growing, fair weather and foul.
“No Chance” Baseball Bears surprise NCAA Playoffs

by Len Harlow '48

When the University of Maine at Orono baseball team took the field against St. John's University in its opening game of the National Collegiate Athletic Association's Northeast Regional Playoff May 23 at Stamford, Connecticut's Cubeta Stadium there were few believers in the stands.

Some three hours later after the Black Bears had been demolished by the Redmen to the tune of 17-3, there were even fewer. In fact, not only fans but players on the other teams were openly predicting that Maine would be going home the following day after elimination in the double elimination tournament.

One opposing player was even heard talking to some of Maine's following day opponents. His comments went something like this: "Don't worry about tomorrow's game. Maine's terrible. You should win easily".

In fact, after that first ugly defeat it seemed like the only people that hadn't given up hope were the Maine players themselves. And, as far as they were concerned, their season really was prolonged on the bus ride back to the motel after that first contest.

Assistant coach Carl Merrill had some rather pointed and enthusiastic comments to make. What they were only the players and the coaching staff know for sure—but regardless of the content, they must have had an effect.

There was no similarity between the Maine club that took the field the next afternoon against the University of Pennsylvania and the one that was eaten alive by St. John's. That was even apparent in the pre-game warmups as the Bears went through a prolonged drill in temperatures that reached close to 100 degrees.

Bert Roberge, the junior righthander from Auburn, Me., reached the zenith of his collegiate career that day as he shut out the Pennsylvania team, winners of the Ivy League title, 1-0 on just two hits. It was such an amazing display of pitching that one of the first people to reach the mound after the final out to congratulate Roberge was the home plate umpire.

The toll of pitching in the 100-degree weather was dramatic. Roberge, back at the motel after the game, collapsed from exhaustion, but bounced back after treatment.

Suddenly, Maine was no longer the "terrible" team that many had thought. Other coaches became cautious and somewhat guarded in evaluating the Bears. Seton Hall's coach got on the Maine bandwagon and the St. John's coach wasn't saying much of anything as his club was scheduled for a rematch with the Bears later that evening.

The remainder of the playoffs is history and although the Maine club did not repeat history by overcoming most of the odds and heading to Omaha, Neb., for the College World Series it did make more than a passing impression on the somewhat blasé observers of the collegiate baseball scene in the Connecticut-New York area.

Maine went on to edge St. John's in 10 innings, 6-5, and qualified to meet Seton Hall for the regional championship the next day. Seton Hall, winners of their last 14 games and undefeated in regional playoff action in two years, defeated the Bears, 11-7, after overcoming an early Maine lead.

Thus, it was the Seton Hall Pirates that traveled to Omaha and, incidentally, did well in the College World Series, eliminating the number one ranked school in the country, Florida State, before bowing out.

But the Bears had made their mark. Four Members of the team, third baseman Jack Leggett, shortstop Russ Quattrell, outfielder Ed Flahtery and pitcher Bert Roberge, were named to the all-tournament team.

The country's top baseball magazine, the prestigious Collegiate Baseball, probably summed up Maine's tournament impression as well as any publication. In a cryptic review of the Northeast Regional Playoffs a staff writer noted that Seton Hall had won the tourney, defeating Maine, 11-7. "Maine, by the way, made a surprisingly strong showing in reaching the finals of the tournament", noted the writer.

Most people in Maine would vote that as the understatement of the year.

Len Harlow is the new director of the UMO department of public information and central services.

**Tickets will be mailed after August 20th.**
“The Man with the Golden Gun” is a James Bond movie characterized by a typical chase scene. A car, being heavily pursued, leaves the bank of a river in Thailand, spirals through the air like a football, then touches safely on the other side and speeds off. What has just happened is called the “astro spiral jump,” designed by Ray McHenry, UMO ’53, whose research into transportation safety has made his name a household word with the major U.S. automobile manufacturers.

A native of Embden and married to the former Constance Dostie of Skowhegan, McHenry is head of the engineering mechanics section of Calspan Corporation’s transportation research department in Buffalo, New York. He has developed highly complex mathematical models used in computers to provide greater understanding of automobile crashes.

Mathematical models are research tools in which advanced mathematics determines possible accident situations through computer simulation. The computer offers precise repeatability of these situations; actual experiments have poor repeatability making it necessary to perform several runs for each test condition. This is expensive—computer simulation is much less expensive and there is no hazard to people or property.

The astro spiral jump, developed through a computer, is a set of ramps designed to study the variety of vehicle occurrences associated with single car accidents. It was developed over a six-year period at a total cost of $600,000 financed through the Federal Highway Association of the U.S. Department of Transportation.

“A number of states are using the astro jump concept, but have not fully developed the idea,” explains McHenry. “Texas is a leading user of the technique, with research being done at Texas A&M.”

General Motors is using McHenry’s design to study acoustics. They use the ramps to get the car off the ground to determine at what angle the vehicle is quietest. Also, the astro spiral jump is being used in auto thrill shows, including one at the Houston Astro-Dome where McHenry’s oldest son announces the events.

Computerized experimentation is a long jump in itself from McHenry’s college years at UMO. A musician with his own band (The Ray McHenry Orchestra), he also played with the Al Corey orchestra whenever it was within traveling distance from McHenry’s residence at Sigma Chi. Following graduation and a bachelor’s degree in engineering physics, he had enough confidence in his ability to play the tenor saxophone, that he joined a musician’s union in Detroit, Michigan.

“The problem was,” he quips, “there were no union jobs available.”

So much for the career in music.

Certainly, music’s loss was the transportation industry’s gain. McHenry received his masters in 1955 at the Chrysler Institute of Engineering, and stayed with Chrysler Corporation for seven years. Ford Motor Company in Dearborn, Michigan claimed McHenry’s services for the next seven years. Ford filed three patent applications on his work with suspension systems. He spent two years with the Machine and Foundry Company in Greenwich and Stamford, Connecticut before moving on to Calspan.

McHenry has been cited several times for his work. In 1968 he received the “Man of the Year” award from the “Science and Technology on the Niagara Frontier” magazine for his pioneer work in automotive safety. In 1969 the automobile division of England’s Institute of Mechanical Engineers awarded him the English Crompton-Lanchester medal. And, in 1970, he received the “safety award in mechanical engineering” from the same English Institute.

Among his contributions to transportation safety is the “box-beam” design for guardrails. Through computer simulation, a new design was conceived for the road shoulder guardrails, median barriers and bridge railing. The “box-beam” design has been in service in New York State for about four years, including 10 locations on the Kensington Expressway.

McHenry has also developed computer simulation to study the body motions of crash victims. Scientists may now explore and evaluate safety systems in automobiles.

Recently McHenry was awarded $500 for a paper concerning the astro spiral jump he delivered before the Sixth Annual Simulation Symposium in Tampa. What does a father of six do with the money?

“I took the family to Disney World. So I guess you could say that I broke even on the trip from Buffalo to Florida.”
CLASS NOTES

08 MR. JAMES A. GANNETT 166 Main St. Orono, Me. 04473

Clarence Weston writes from his home in Atlanta, Ga., that the tornado which hit Atlanta this spring tore through a residential section of the city but spared the area in which he and his wife reside. He writes "It was about 7:30 a.m. that it hit, touching down at seven or eight points but making a terrible path through the most well-to-do, or best residential part of the city, about 10 or 12 miles west of where we live."

While clearing out my old files I came across a copy of the Maine Sunday Telegram of July 31, 1919, with an account of our Class Reunion. An important event was the five-inning ball game between '08 and '09. The battery was composed of Lancaster p. and Gordon c., Palmer lb., Dixon 2b., Wood 3b. and Trask ss as the infield and Vickery if, Milliken cf and Fellows rf as the outfield. Class of '08 won 4 to 3. Leslie and Edith (Jordan '10) Lord were guests at a dinner party at Pilots Grill, Bangor, on April 15, given by their three sons, Frank J. '34, Moses S. '38 and Richard C. '44, in observance of Leslie's 90th and Edith's 88th birthday. Other guests were Mrs. Frank Lord of Belmont, Mass., Mrs. Moses Lord of Old Town, two granddaughters and three great-grands. Earle Vickery writes that he and Milliken celebrated their sixth wedding anniversary on April 13 with a dinner, with a friend who supplies their transportation as a dinner guest. Sarah Trask of Duxbury, Mass., wife of late Warren D. Trask of our class died on the 7th of last May. She was the mother of Allen D. Trask '38 of Albany, N.Y., and Mrs. Virginia Gates of Duxbury, Mass. Interment was in the Mt. Pleasant Cemetery, Augusta, Maine.

11 GEORGE D. BEARCE 138 Franklin Street Bucksport, Maine 04416

For many years the late Albert Conley gave UMO funds for a speech and hearing study. He also provided a large sum in his will for this purpose. During Alumni Weekend June 7 a new Speech and Hearing Center was dedicated to the memory of the late Albert D. Conley. President Howard R. Neville officiated and Dr. Madelene Byer Conley, '36 was a special guest speaker at the ceremony held in North Stevens Hall. The bequest from Conley will make possible a full-time audiologist at the clinic. Phoned Parker Cooper and learned that he stayed home in Albin this winter instead of going south. Despite the drizzle and cold there was much fun last week. We are all looking forward to the spring vacation. All the best to you on your trip.

12 MR. WILLIAM E. SCHRUMPF 84 College Ave. Orono, Maine 04473

Bill Hebard has written to us again and it is indeed fitting to quote him, since the dedication of the Albert M. Conley Speech and Hearing Center at the University took place in June at the time of our class reunions. Mrs. Conley was present and spoke at the dedication. "As an entrant in the class of 1911 and a graduate in 1912, my memories span years when there was turmoil on the campus and a paucity of support by the Maine Legislature. The recent Alumnus mentioned the death of Albert Conley, who in spite of speech handicap, was successful following graduation. He was a fellow member of Mrs. Finn's table board on a side street off North Main, and there were nine or 10 others, of whom Herman Harris '11, two others and myself lived on North Main Street. Personally, I am handicapped with arthritis and use a walker in the house and a cane on the rare times neighbors or relatives give me a ride off the premises."

14 MR. ROY W. PEASLEE 60 Bow Bog Road Concord, N.H. 03301

Here we are again. President "Bid" Thomas has a family gathering in view this summer at Old Town and plans to visit the campus as well as several points on the Maine coast. Dr. Albert Ferguson writes from Alamo, Calif.: "I told my home last year and now live in a small apartment with no food to hoe a garden or haul in wood, 2521 Danville Blvd., Apt. 39, Alamo, Calif. 94507. I recently sent out a note to Nathan Trask and Elizabeth Trask, class of '43, who were on the campus 10 years ago. Now I am living in a small apartment and just have time to write a chapter on basic x-ray of the bones and joints for an orthopedic textbook to be published this fall. I continue to indulge my hobby of writing an article on continuing education. I am writing a paper for the March issue of the National Home, which is now on my 234th article. My sphere of physical activity is limited although my health is good enough. I sometimes see Nick Makanna on his trips to California. Aileen Libby tells us she had a pleasant winter visiting her daughter in Westbrook and accompanied her to University of Vermont to see their grandson who is a medical student. Now she is at home—Milford—enjoying other grandchildren who visit her cooky jar often. "Tubby" Leach and the Mrs. celebrated their 60th Wedding Anniversary in July 1974, have two children, five grandchildren and seven great-grandchildren, live in Burlington, N.C. but winter in Ft. Lauderdale, Fla. Floyd Verrill writes "I am still alive and kicking. Although I have been retired for several years I manage to keep quite busy. My son runs the farm, but I live near him and take care of fifty-six head of young stock every day. Last winter I cut, saved and split five-six cords of wood. We have a place in Maine near Bebe in Maine near Bebe where we like to spend some time each month during the summer. Mr. Ted Holder, class of sixty-six, is located in Cohasset, Mass. and writes "My time is taken up with several things including a small business interest in a partnership that handles some real estate matters, a few hobbies mostly connected with improving our house and working in the garden, travel only to the local shopping center and the town dump, and lots of reading of anything I can get my hands on. Not at all exciting is it? But after many years of activity it is good to take time to look back on the time we all spent together and get some feeling that perhaps it was not so bad after all."

17 MR. HAROLD COFFIN (Grace Bristol) 17 High Street, Bangor, Maine 04401

'17 held its annual reunion dinner meeting again this year. Present were Mr. & Mrs. Charles Crossland, Mr. & Mrs. Paul Brawn, Edith (Ingram) Glover, Noel Godfrey, Mrs. & Mr. Roy Higgins, Mr. & Mrs. Bryant Hopkins, Flora (Howard) Mayo, Mr. & Mrs. George Sweet, Mr. & Mrs. George Wadlin, Grace (Bristol) Coffin. Garth Noyes, joined us at the Senior Alumni breakfast this morning. Members of '17 celebrating their 50th, had dinner with us and adjourned for their own meeting. Messages were received from absent members, Ruth (March) Doloff, Elwood Clapp, Dorothy (Mercer) Furbish, "Hubby" Hiller, Carl Johnson, Helen (Greeley) Libby, John Locke, Bill Nash, Linwood Pitman.

Helen Libby wrote that Seth had not been very well this spring and we find that in those succeeding weeks he has passed away. We wish to extend sympathy to Helen. Also the sympathy of the class goes out to Ed Dempsey whose wife, Myrtle, had come to seem like one of us. John Locke had been in the hospital recovering from a coronal attack, but was returning home on our reunion day. The Lockes had a very fine European trip last winter. The Wadlins are also travellers. This year a midwinter cruise took in some South American ports as well as the Caribbean Islands, and in the spring it was the Bahamas. Paul Brawn was in an automobile accident and came out with a broken collar bone and a fractured nose. As he related to a member well known at the time of the reunion, the Higgins were in California visiting their daughter during the winter. Ed Glover has quite a story to tell of her trip north this spring. Ask her to see you. Mrs. Nathan Trask has been in Continuing Education at U. of Machias ever since his formal retirement; thirty-four courses so far. Noel didn't mention it, but Pres. Charles told us that all salary received is being set aside and is accumulating to become a scholarship endowment. What a generous act.

The class scholarship fund now amounts to $24,075 and provides help for eight students each year.

19 MR. STACY L. BRAGDON 47 Parker Road Wellesley, MAss. 02181

We wish to heartily congratulate our classmate, Ed Adams, for his supremely generous contribution to the Adams Scholarship Fund this year in addition to previous gifts. Following is a big thank you from the UMO President under date of April 15:

"Dear Mr. Adams: I learned a day or so ago of your most recent gift of $15,000 to the Adams Scholarship Fund. It is generous, indeed, and will help many students over many years. It is the conquering of young dedication of alumni such as yourself who will in the end make this place the kind of institution it ought to be and can be. On behalf of my colleagues, thank you very much."
for this latest gift to your alma mater. I hope one of these days we can meet and talk about the University. Best regards and thanks again. Sincerely yours, Howard A. Nevil.

A letter from Mark R. Lawler in Weaverville, N.C., says, "I can sympathize with you about getting news for the Maine Alumni. I have been editor of the Weaverville Lion's Club Newsletter, and I have to make sure my name is on every page. I'll be glad to help you with anything." Mark, you've never met me, but I've been working on the archives for the Maine Alumni. I hope we'll be able to get together in the near future."

Our Fiftieth Anniversary:

20 MRS. BETTY MILLS TOWNER
560 Orange Street
New Haven, Conn. 06511

"20 enjoyed its 55th reunion renewing old friendships. We missed all who found it impossible to come. Since 1970 we have lost 15 of our members, the latest being Walter Tolman who passed away in January and Elmer Williams in April. To their families we extend our sympathy."

"Danny" Buzzell is our new President, replacing Verne Beverly, our hard-working past President. Stuart Corrier was elected Vice-President. Henry Butler continues as Treasurer and Betty M. Towner as Secretary. Henry says there is $100 in the Treasury, and adds, "We are in good shape." Gertrude Peabody is in a nursing home at 1841 Trapolco Road, Wakeham, Mass. 02154 and is no longer able to attend meetings. Leo and Mary Lee Hill, 255 Lowell Street, Lexington, Mass. Notes and cards would be welcome. Your efficient Reunion Chairperson, Minerva French Anderson, and your Treasurer, Henry Butler, gave messages that I have printed elsewhere in this issue.

21 MRS. STORMONT JOSSELYN
(Emile Kritter)
229 Kenova Avenue
Haverhill, Massachusetts 01830

Our Fiftieth Anniversary:

22 LESLIE W. HUTCHINS
30 Albam Road
Waban, Mass. 02186

"Dear classmates, the mail from the members of our class has nearly evaporated. I have for years tried to keep the column alive by attending meetings, sick patients, and photographs. I am no longer able to make many visits, and do hope that any of you who care, will take your pen in hand and send along to Mrs. Owen or me anything at all about your present activities or lack of them and why, if you wish to let us know, because there is someone in your class who cares about you even if you have been leaving Orono in 1922 have quickly rolled away and passed into memories. Perhaps you would like us to know how you are doing? I am a class member to visit you or write to you? Do you receive all the news of Maine necessary to keep your interest in Maine alive? Why don't we have a more active class column, especially since this year our group have always been so active? We would like to hear from any of you and such answers would please me and perhaps help you. I will answer any letter sent to me. The classes are now smaller and we are called Senior Citizens. We no longer meet as class members, but we meet as Maine men and women, and the class columns usually pass away as the old soldier does in history. May we hear from you soon?"

Our friend and class treasurer Ardis Laney Moore reports, "I am no longer able to keep up with the news from Florida, attended two of the St. Petersburg murials with George and Lee Ginsberg, also the excellent U. of M. Sarasota meeting where "Les" Nadeau was our special guest." Thanks Ardis for always filling the gap in the news. Another "regular reporter", Martha D. Chase, reports, "I missed my visit with Ardis Moore at Clearwater, Florida, but met that of the Nutrition clinic at the University Hospital, Boston after ten years and moved to Melrose, Mass. to be near my sister." Thank Martha for writing about your change and we hope that you both are well. Wyman E. M. Troutt, a former secretary of the Heifer project's International New England Committee, a worldwide, self-help organization financed by voluntary contributions that provide livestock, poultry and related agricultural products to people in developing countries. Hawkes was an instructor at the Bristol County Mass. Agricultural High School for 42 years.

23 MRS. WILLIAM W. RICH
Ruth Spear
Prides Crossing, Mass. 01956

The Golden Wedding Anniversary of Mabel Peabody and Arthur Wilson was celebrated on Sunday, June 15 with a Service of Worship in the Beneficent Congregational Church, Providence, R.I., where Arthur served as minister for many years. Immediately following the service there was a reception in the church yard with about five hundred people attending. Sunday evening a few close friends joined the family at the Wilson home for a buffet supper. Their daughters Mary from India, their two sons, their grandchildren and Mabel's three sisters were among the group of fifty. On Monday night a chicken barbecue was held at their home for the family and the church members who had planned the celebration for them. Mabel said it was like having a three-day house party and they enjoyed it all. Dave and Elsie Perry Hoyt were back to Orono for reunion this year and Elsie says they are looking forward to visits this summer from their daughters with their families, Laurel from California and Jean from North Carolina. Also back for reunion were Virginia (Averyl and Roger Castle '21 and Fernald Stickney and his wife '21, and Elsie Hovind and her husband). I retired from Manchester this summer through September and then returns to his permanent residence, 299 N.E. Augusta Ave., Port Charlotte, Fla. Alfred Hempstead and his wife will be at Onawa Lake again this summer.

24 MRS. FRANK W. HOWARD
Ethelyn M. Percival
Route 1, Box 5
Canton, Maine 04221

We extend the sympathy of the class to the family of Leslie Fayle who died in April. Harold Durbin writing me reports that he is president of the Assistant Secretary of the Rutland, Vermont, Savings Bank. He retired two years ago from Central Vermont Public Service Corporation. Philip Woods writes that he and his wife had a wonderful time at our 50th class reunion last year. He is enjoying retirement by traveling, playing golf and raising raspberries and other fruits in Gardiner, Me. Irene Guppy Parsons is writing non-fiction articles, hopefully for magazines. One in, "The Beloved Garden" is a wonderful weeks last winter (New Zealand's summer). She had accepted an invitation of twenty-two years' standing and has decided that the "kiwis" have all the answers to safe and happy living. Neal Phillips hopes writing and gardening. He is the Secretary of the Kiwanis Club of Lima, Ohio. Tom Carlin was with his wife, Rosemary (Curtin '25 at her reunion in June. They have four children, two of whom graduated from UMO, and nine grandchildren, one of whom enters UMO in September. Tom was with paper companies in Quebec City and Louisiana. They now live at 14 Hunnewell Road, Woster, Massachusetts and will celebrate their 50th wedding anniversary in 1978.

25
Sprow and Evelyn were in Florida last winter and in New Jersey last summer. Bertha Weekes, the new second Vice President of the Delta Zeta alumnae in Clearwater.

Bernie Plummer and wife had a ten-day trip in April to England with the Methodist Heritage Tour. They will observe their 50th wedding anniversary on July 5 this year. Bernie was auditor this year for the Senior Alumni, and Woodbury is the new second Vice President of the MRS. Squadron of Pottawatomie, and Mrs. David Toranjoeau’ of Cape Elizabeth, who is now alumni secretary for her class. When World War II broke out Hammie joined the Red Cross Overseas Unit, and was eventually elected to the Red Cross Captor. She received a Certificate of Commerce and was the President of the Board of Directors.

Bernie has been a member of the Board of Directors of the Alumni Association since 1974. He has served on the Committee on the 100th anniversary banquet of the Alumni Association. Eight 1912’ registered. 

Ted Hatch of Templeton Road, Fitzwilliam, New Hampshire 03447, has made and furnished a seven-acre garden in the field of occupational health, has co-authored two books and has travelled throughout the world as a consultant and lecturer. He was Professor of Industrial Health Engineering at University of Pittsburgh in Pennsylvania. He is now Professor Emeritus from the Graduate School of Public Health at the University.

Now, will the rest of you please send me some news for our next column.

25 MRS. WILLIAM E. SCHRAMPF (Mildred G. Brown) 84 College Avenue, Orono, Maine 04473

The 50th Reunion of our class was just great! Fifty one classmates registered and with their spouses, there were 92 at the class dinner. “Prexy” Bob Haskell presided and introduced President Howard Neville who spoke to the group. George Ginnberg ’21, welcomed the class to the Senior Alumni. Louise Lord added the festivities with a gift of orchids for each person. At the class meeting, Louise Lord was elected class president (Does our class have the first woman class “prexy”? and Chester Baker, vice president.

Velma Oliver was reelected treasurer and your class secretary was reelected. Bob was raised from the class solicitation by “Prexy” Bob, and was voted for the Athletic and the Associated Class Scholarship Fund and, with a generous contribution from Bob. Our class will have its annual place, dedicating the foyer of the new Performing Arts Building.

Just because you could not get to the reunion, don’t let it keep you from sending in notes about yourself for our class column, since our members voted to keep our class organization. Bob Haskell was honored as a dinner in Bangor on the 50th anniversary of his association with the Bangor Hydro-Electric Company by the Board of Directors of the company. He was presented with a duct of a silver cup, congratulation from your classmates, Bob. Hubert V. Vallee will perform at UMO on Oct. 11 in the memorial Gymnasium.

Ray Burton writes, after he and June flew up for reunion this past weekend, a bang-up good time and do hope we’ll all be there to report in 1980. “So do we, Ray. Ray is vice-president of the Gold Coast Sigma Nu Alumni for the Fort Lauderdale, Fla., area. The group holds annual meetings every year for Sigma Nu in the Southeast section of Florida. Class members extend sympathy to Aura Coburn, Sanibel Island, Fla., on the death of his wife just before reunion.

26 MRS. TRYGVE HEIDSTAD (Shirley Roberts) 

Sylvan Way 

Meadowlark Manor, Maine 04551

J. Murray Hamilton: Hammie joined the W.T. Grant Company in 1927 and was transferred to Berlin, N.H.

as manager in 1933. There he met and married Ruth Stahl. He was with the company stores until 1959 when he joined his father-in-law in the family fuel business, Simon, Stahl, and Sons. Ruth and Hammie have two daughters and three “lovely grandchildren.” The daughter, Mrs. Michael Plummer of Petaluma, CA, and Mrs. David Toranjoeau of Cape Elizabeth, who is now alumni secretary for her class. When World War II broke out Hammie joined the Red Cross Overseas Unit, and was eventually elected to the Red Cross Captor. She received a Certificate of Commerce and was the President of the Board of Directors.

Hammie has been a member of the Board of Directors of the Alumni Association since 1974. He has served on the Committee on the 100th anniversary banquet of the Alumni Association. Eight 1912’ registered.
Classmates reported under the weather were Keith Foster and Horace Pratt. We hope they'll both be able to make our 50th. It was reported that Tom Bond is now in Gray. I do not have a more definite address.

Dorothy Culley Coburn wrote that she had retired in 1974 after 52 years with Univac. Now she is moving to a new home at 701 Ave. H, N.E., Winter Haven, Florida 33880. This spring she is taking a twenty-day trip to Japan so had to miss our reunion. We are sorry to report she lost her husband last October. Do try to make our 50th.

John Morrison's letter was returned. Does anyone know where he is? We missed Peg Warren Cook whose husband is not well so she couldn't attend. Polly Dunn was not returning from the South until June 14th but will be in West Caldwell for the summer. It was great to see Dr. Mary Crowley Malvey who had not been back to campus for many years. Mary is head of the Adult Education Department of the Providence (Rhode Island) Public Schools. Rufus Jasper reports that he is enjoying retirement "on the farm" and has seven grandchildren including twin boys. Ray Ward spends his winters in Florida but returns to Maine in the summer. Chris Norwood retired as Director of Guidance at Arlington, Massachusetts High School in 1970. She now lives in North Seavert machining care of the home and her mother. Lydia Douglas Rollins retired in '67 and her husband in '74. They spend the winter in Mt. Dora, Florida and will return there in '76. Bud Higgins, Col U.S.A. Ret., has purchased a condominium in Fort Pierce, Florida which will be his permanent residence but he plans to be at his summer camp, Lakewood, South Casco, each summer. Jennie Waterman and Alden sent "Hello" to her 1930 classmates. Many who said they planned to return for reunion didn't make it. Hope the rain didn't keep them away. We were happy to see Jim Booker, who came all the way from Australia for the event. Rosella and Lillian Loveit, Frank Larrabee, Vern Hodgkins, Tom Smith, Lewis Roberts, Charles Stover and several others whom we hadn't seen for many years.

# RETIRED VICE PRESIDENT

Alfred W. Perkins, BA '31 and MA, '33, retired June 1 as executive vice president of Union Mutual Life Insurance Co. He had been with the company 28 years. His insurance career, which included being commissioner of insurance in Maine during the 1940's, spanned 40 years. Perkins studied actuarial science at the University of Iowa after earning his masters at the University. He joined Aetna Life Insurance in 1935 and Fan American Life Insurance Company four years later. In 1942 he was appointed Maine's insurance commissioner, a career that was interrupted by duty with the Navy during World War II. After his discharge in 1946, he was reappointed commissioner. He joined Mutual Life as associate actuary in 1947 and played a prominent role in building the company into a national organization.

In retirement, Perkins plans to do consulting work in employee benefits, surveying, and hunting and farming at the new North Brooksville home he and his wife have completed recently.

# 31 FRANCIS MCGUIRE

59 College Avenue
Orono, Me. 04473

Many thanks to those of you who have sent along a few personal notes recently--a stern reminder to those who still owe this column a brief biography, copyright 1975! Erma "Pat" (Barton) Painter writes that she plans to teach one more year in the Augusta, Maine, school system on a more permanent basis. Also, her son, Stanley, Jr., D. O., is practicing in Winthrop, Maine, and occasionally thrills the Methodist Church congregation at the keyboard of their pipe organ. Hang in there, Pat! After spending the winter in Naples, Florida, Louis and Noella Krieger arrived back in Maine (Sugartop) just in time to wrestle with the great blizzard of 1975, on April 3. You weren't alone, Lou.

Ehle ("Jackie") Saunders recently returned from travels to Egypt and the Middle East. Jackie retired in 1970 after twenty-five years as head of the Northampton, Massachusetts, High School English Department. Grace (Lemoine) Einik retired May 1, 1975, after fourteen years with the Los Angeles County Health Service. Grace plans to re-visit Maine, spend a month in England and then grow beautiful flowers at her home in Alhambra. Whatever happened to the hideaway at Big Bear Lake, Grace? Helen (Beasley) Ernst is still working in program follow-through—Tucson Early Education Model in Lakewood, New Jersey, as Program Assistant. Her hobby is "rock hounding." Last summer was spent in North Carolina and this summer Helen plans to poke around Maine and New Hampshire. You'll need more than one summer in this country, young lady! Lastly, Richard Tucker ("Dick"

Page writes that he is retiring July 1 from his position as Director of Kersey's Water Pollution Control Program in Topeka.

# 33 MISS BLANCHE HENRY

70 Beechwood Street
 Thomaston, Maine 04861

Classmates who registered at Alumni Week were:

John Wilson, Dr. John McCarthy, Robert Zottoli, Eleanor West Yerxa, Evelyn Plummer Miller, Edwin Giddings, Arthur Forrestall, Dick and Emily Elliot, Luther Burton Dawson and myself. Hope I did not miss anyone.

During the Alumni Fund Phonophone John Wilson talked to Carl G. Hand and received news in a letter. Carl's address is P.O. Box 543, Danville, Cal. 94526. Carl retired from the Federal Aviation Administration in August 1974 after nearly 40 years of government service, the last 26 years as manager and district Airport Engineer for Northern California and Nevada with an office in San Francisco. Now he keeps busy two or three days a week as an Aviation Consultant. By now we hope the open heart surgery has corrected the problem and that you have made a good recovery and can have the planned trip East. Tom and Muriel Holmes Maine are retired in Windsor, Maine and keep busy. He with golf and fishing and she sells photography, crafts and antiques at many shows throughout Maine. Polly Brown Pierce was planning a trip to Tahiti to visit her son. She lives in San Diego, California. Dr. John McCarthy has retired from active practice and resides at 4114 68th Street, Woodside, N.Y. Stacey Miller '82 and Evelyn Plummer Miller had a trip to Jamaica with friends in the Internal Farm Youth Exchange Program. En route they visited Evelyn's 94 year old mother Fannie Plummer in Florida. Art Forrestall keeps busy as President of the Navy League in Portland and as Treasurer of the Maine Historical Society. Mr. and Mrs. Robert MacLa-
37 MRS. JAMES A. BYRNES (Barbara Bertels) 15 Kensekaeg Avenue Dayton, New York 14440

On June 5, Dr. Harold Young, coordinator of UMO's Complete Tree Institute, was a featured speaker at the Logging Residue Conference at West Virginia University in Morgantown, West Virginia. In a way it was a return engagement for him. It was his first job as summer at West Virginia's Monongahela National Forest. He's gone a long way since that time. Ernie Dansmore writes that he and Joan would welcome old friends driving to Canada during the summer months via US 1. Their cottage is at Orange Lake, nine miles east of East Machias. "Please drop in," he says.

38 MISS JO PROFFITA 149 Dartmouth Street Bangor, Maine 04401

Unfortunately, because of a juxtaposition of commitment, I was unable to make an appearance on campus for reunion activities. I felt badly enough as it was, but when I heard that OUR VERY OWN Dr. Arthur A. Hauck was a luncheon speaker, I was desolate. The fact that I learned from various sources how treman- dous he had been (no big surprise to me) did nothing to lessen my annoyance. Dr. Hauck, we love you! Now for the less important members of the class. Let's face it, with what has superseded my stay in Rome, especially, was unparalleled in ways too numerous to enumerate, the pasta I consumed was laden with calories and the inevitable weight gain did nothing to improve my dress. Dolce vita, baby. Chatty letter from Norma (Leaders) Baker tells of the emergence of her offspring into various fields of endeavor. At the time of writing, daughter Ann was a sophomore medical technician at Marquette, Cathy was graduating from the University of Dayton, Alan had completed his Ph.D. in physics (plus graduate associate in chemo-biology) and was getting his J.D. June from Rensselaer Polytechnic Insti- tute and still another daughter, Marty, was working as a dental hygienist in Clevelend where her husband had just passed his architectural boards in Ohio on his first try. It must make Norma feel proud of her wonderful job she has done with her family and we share that pride. Another welcome letter came from Carl Osgood. He retired in 1970 after 20 years with the RCA Space Center and has been in consulting practice since, chiefly with the Space Agency of the Canadian Ministry of Communications in Ottawa and for the Association of American Railroads in Chicago. Last I heard, served as recitation leader for Princeton's Forrestal Labs, the work they are doing to the design and construction of very heavy fusion power devices. The indefatigable Carl is on the ASTM Na- tional Committees for Fatigue and for Fracture, and the SAE Fatigue Evaluation Group. In 1973 he con- ducted a series of Design Reviews for the Canadians at their Italian vendor's plants near Milan, and on the same trip, chaired the Fatigue Sessions of the Interna- tional Conference on Fracture, hosted by the German Iron and Steel Institute in Munich. Kudos to you, Carl, and many thanks! (Aside to the editor: My gratitude to you for "swell- ing" my column last issue.) Peace and love!

39 MRS. THOMAS L. BARKER (Barbara Corbett) 49 Captain Road Longmeadow, Massachusetts 01106

I'm sorry not to have had a column in the last issue but I am sure you all understand since the Editor took over with an explanatory message. Thanks to all of you who have sent expressions of concern. Such messages are very helpful at this busy, confusing time.

I know you will all be saddened to learn that Bob Kugler was not only a friend but also a valued member of the faculty. He served with great distinction for many years and his contributions to the University of Maine and to Maine will be long remembered by his many friends and colleagues. He is survived by his wife, Mary, and their two daughters, Anne and Jane. We extend our condolences to the family and wish them the comfort of their memories.

Thank you for your understanding and support.

23
dent of Operations, headquartered in Montreal. Both his son and daughter teach in colleges, Spain and Texas respectively. Harland Leathers came out of his den long enough to attend the reunion, which is in the Portage Department, Washington, D.C. after getting his law degree at Duke. He was a captain in U.S. Army 1942-46. Wheeler Merriam, our President of ’32 class, still is Dean at Franklin Pierce College, N.H. A. Howes, who hails from Bangor, wrote that he had just returned from trailer trip to Fla. and Ariz. (no other news. Muriel (Ross) Macho lives in Wichita. They have a son and a daughter, a geologist and postal inspector, respectively. Priscilla Noddin (History) retired this spring from UMF as Assistant Professor of English. Taught thirty-three years in Maine, N.H., Mass. and U.S. Army and Air Corps, Wiesbaden and London. A whopping thirteen of us were at mini reunion June 7, Orono, at the real special luncheon (where champagne flowed freely). Of the thirteen, plus wires, there were only three ex-coeds, Don’s wife, Helen, Florence Elliot ’31 and Kay Butler ’31. Meg with Bates, Al McLean, A. Jack, D. Lester, D. Hanaburgh, A. Denaco, H. Paul, B. Prince, W. Libby, R. Zottoli ’33, W. Johnson, P. Butler and yours truly. Paul and wife furnished the champagne which Don and Helen will furnish spring of 76. We had luncheon on third floor of Memorial Union in a special room with kitchen, large enough for group. Real exclusive!  

40 NAT DOTE  
4 LaRiviere Road  
Framingham, Mass. 01701  

We were wondering about you when some forty of us 40’s gathered on campus for our 55th reunion. A great Class Banquet at Wells Commons, (about where the University Press and the MCA buildings were located in that dim past) was also attended by other war year classes. Following a dance at Memorial Gym, we adjourned to Somerset Dorm Lounge for visiting, etc. Saturday morning we held a Class Meeting for transacting business and election of officers. Elected were: Alice-Ann Donovan Peepmpeiler, President; Charles Weaver, Vice President; Nat Doten, Secretary and Personnel Editor; Richard Morton, Treasurer; Ruth Trickey Parker, Reunion chairman and Class Agent; Executive Committee: Bill Treat, Polly Weatherbee, and Virginia Pease Dogherty. The Treasurer’s Report indicated that our Class Fund we established in 1965 is serving a most worthwhile purpose and we voted to continue it. It is known as the Student Emergency Fund and is disbursed by the Administration for special critical needs such as fire losses of clothing and books, family emergency travel, etc. We hope that many will specify 1940 Class Fund in their annual giving. We also gave a vote of thanks to retiring President Bill Treat for his great leadership over the past thirty-five years. We were all delighted when the Alumni Association honored Alice-Ann with the Black Bear Award. It was also a real thrill to have Frexy Hauck as the banquet speaker.  

Among those attending reunion were: Virginia Tuttle Merril, Arlo Gilpatrick, Louis Harris, Mr. and Mrs. Phil Hinkel, James Shiro, Walter Schultz, Polly Jellison Weatherbee, and husband Art ’38, Mr. and Mrs. Nat Doten; Harry Nelson, Jr., Priscilla Bickford Nelson, Pat Gogan Burney, Ed Cook, Mr. and Mrs. Clarence Perry, Ralph Grant, Basil Smith, Alice-Ann Donovan Poepmeiler and husband Vinc, W. Dwight Barrell, Bob Robertson, Charles Weaver, Roger Cotting and Mary Cooper Cotting, Eileen Flannigan Baragwanath, and husband Al, Virginia Pease Dogherty, Barbara Welch Wilson, Earle Bessey, Richard Morgan, Ruth Trickey Parker and husband Bob ’35, Wayne Shipman, Betty Libby Staillard and Husband Elbert, Mr. and Mrs. Steve Gross, Mr. and Mrs. Oric O’Brien, Frances Rhoda Richards, and Peggy Hauck Ladd. I hope all are included. Items I gleaned while on campus included: Jim Fitzpatrick is now managing the Branch Brook Camp Ground in West Campton, New Hampshire. The Norman Fays have built and moved into a smaller home at 15 Latural Circle, Needham, Massachusetts. Their three daughters are now married and living nearby. They still spend summer weekends at their cabin in Woolwich. Gooden Gray writes that he is District Utility Sales Manager, N.Y.C. for Babcock & Wilcox. Wife, Dorothy; older son Stephen is M.D. at Yale-New Haven Hospital; younger son, Donald, finished Berkeley Law School this June; daughter Cheryl at home. Harold Gerrish is serving as Califoria and Western Regional Chairman for the Second Century Fund.  

Thus ends my first effort as your class notes editor. Do send me some material so I do not have to write fiction for the 1940 column. My address is 4 LaRiviere Rd. Framingham, Mass. 01701 Phone (617) 877-6331. Our home is in the Saxoville part of town and about a mile from the Natick exit on the Mass. Pike. Do drop by, call or write.  

41 I. C. SHIPMAN  
Star Route  
Vol Field, N.H. 03894  

Well, kids, it was a great centennial reunion. Even after driving hours in teeming rain. It was worth it to mingle at the reception and dinner, and to dance to the music of the “Fabulous Forties.” (Now aren't you really sorry you couldn't make it? How about next year?) We know some planned to attend but weren't able to at the last minute, such as Mavis Creamer Wilson (missed you, "Skip"); while others were committed to local events, such as commencement at Loomis Chaffee School that weekend, which meant Ginnie and Larry Muzzoll couldn’t make it. Larry still teaches math there, while Ginnie is a catalog librarian. Those in attendance included: Walter and Charlene (Perkins) Stran, Connie (Philbrook) Leger, Lawrence and Virginia (Moulton) Emery, Lawrence and Patricia Burney, Wallace and Madeline (Smart) Beardsell. Furasing the paper recently, I came upon an article announcing the retirement from the Portsmouth Naval Shipyard of Horace G. Bracy, personnel staffing specialist, after twenty-seven years and eleven months. And the sympathy of the class goes to Winslifred (Blanchard) Oliver on the death of her husband, Clifford, of Farminston. One of eight considered for the post of Chancellor of the University System, George H. Ellis withdrew his name upon being elected President and a trustee of the Home Savings Bank of Boston. He has also been chosen a director of the Maine Central Railroad.

42 MRS. JOHN E. HESS  
(Barbara Perry)  
54 Pine ledge Road, R. #4  
Bangor, Maine 04401  
Pete and I were at the Reunion this year which honored all war year classes 1940 through 1950. Perhaps the torrential rains that weekend of June 6 partially accounted for the disappointing turnout of 1942 classmates. We did enjoy an excellent roast beef dinner served at Wells Commons, in the company of class president Wally Francis and his wife, Marnie, who had come all the way from Connecticut for the occasion. Also sat near Lee Carter, who was proudly announcing the June 1 arrival of twin granddaughters, Amy and Beth, to his son Robin and wife. They also have a daughter, Kathy, aged five. Lee drove up from Ipswich, Mass. Saw Nancy Philbrook and sister Connie Leger. They look fine, and still live in New Hampshire. From Bangor came Millie and John Bower and Larry and Ginnie Emery. They are about to celebrate the fifth wedding in their family. Son Timmy will marry Virginia Webb in Houlton on July 5. Their youngest, and only daughter, Peggy, graduated from UMO in May. Elizabeth F. Houston will become chairman of the Department of Business Administration beginning with the 1975-76 academic year at Westbrook College. She will continue her teaching duties, which include courses in typing, shorthand, office adminis-
tion and business law. Miss Honan is an active member of the Portland Alumni Club of UMO. Erna D. Wentworth is no longer employed by the University, but still living in Orono. William L. Irvine, an associate of the Maine agency of the Mass. Mutual Life Insurance Co., has completed one week of specialized training as a member of the company's 18th Career Development School for 59 of its field representatives from 22 states.

44 DR. FRANK P. GILLEY
Tip Top Farm
Box 175, East, 
Brewer, Maine 04412

This may be a longer column than I had planned upon. In fact I had not planned to write any column, but because Peg Coffin decided for personal reasons the column could not continue as correspondent I thought I'd give it a try at least until I get a willing volunteer. It may take a real arm twisting to get a correspondent but I am hoping for the best. Please, would some articulate member of '44 volunteer to keep our class notes up to date.

First, a thank you to Peg Coffin for her work as correspondent for the last five years. Your temporary correspondent, Mary Ellen, attended the June 6th banquet at Reunion UMO. Accompanying us were Larry Emery '42 and Ginny Moulton Emery '41. We arrived a little late due to one of our June, should we say April, rainstorms. Although it was not our reunion year we did see some '44's there. More on that later. As of this time there are two sad notes that I want to mention. One is the loss of Phil Sweetser. I remember him well but have lost track of his career. The Class of '44 will never forget him. Next, Mert Meloon. You all remember the rosy cheeked boy from Kazar Falls who joined us in the fall of '40. Mert was one of the outstanding members of our class. Always present at reunions with his good wife, Jo Clark '45. At the time of his death Mert was Claims Manager for Liberty Mutual Insurance Company in Fitchburg. Mert with his open friendly manner and love for life will be deeply missed. All the notes that I received via the Alumni Office are that Arletta Thorpe Rice had a son, Mark, graduate this year at UMO with a major in physics. C. Lincoln Jwett writes that he has been promoted to Senior Vice President, Howard P. Hoff- man Associates, Inc., affiliate of Lehman Brothers, Inc. Lincoln's address is 122 East 42nd Street, New York, New York 10017. John Tschamler writes that as of July 1, 1974, and his helper, Mary Ellen, attended the Executive Vice President and Treasurer of Young Fire Equipment Corporation in Lancaster, New York. Congratulations to these three members of '44. Saturday, June 14 Mary Ellen and I had a post-dinner Tan and John, Bill and his dog Davis had kind words for them, and had just visited their daughter in Bangor earlier in the day. The June 6 banquet Waldo Libbey was his usual busy self trying to keep the reunion program on schedule. Did have a chance to chat briefly. Ruth Blaisdell Silsby and Mida Wooster Roberts attended together and we had a chance to discuss old times. Others who returned were Tom Stotler now director of the Bath and Barbara 45, Steve Jacobs and Isabel. Frank Spencer, Al McNeillty and Arthur Moulton. It was a pleasant time in spite of the adverse weather.

Hope to hear from any classmates who may have news and would especially like suggestions for good witty correspondent who is available. Best to all and have a good summer. How about that?

47 MRS. RICHARD L. BANTON
(B. J. Durgin)
Barrows Point Road,
Newport, Maine 04953

My thanks to the Committee for the following items: Arnold Hedlund has recently retired as Supervisory Forester, U.S. Service, New Orleans. He will continue to reside in the New Orleans area and summer at booths Harbor. Congratulations, Sir! "Rehearsals of the Year" of New Hampshire is Armada Paquette, president of Pako Homes. He has been building homes—nearly 700—in Cheshire County for the last 20 years and moved to Keene, New Hampshire. Congratulations! Our alumnus, Evie Moulton, will be married June 6 at 8 a.m. at Orono. Hopefully this will not interfere with the best news of the day. You may have heard that Richard Banton is a classmate of Dr. Robert and Evie Smyth of Amherst. Massachusetts, have been associated with U Mass since 1947. Bob teaches genetics, and his wife, Evie, which is his passion is a special kind of cocker spaniel. They have at least twenty dogs in residence at a time. Grace (Wentworth) King has been associated with Barnard for thirty years now, after finishing her Ph.D. in chemistry at Yale. Her husband, a professor at Columbia, died last year. Her son Andrew is in UMO in a master's program, and she is serving as Senior Class Academic Advisor, as well as teaching in the Chemistry Department. More news from your new correspondent, Barb Bouldwin.

HONORED AT AMHERST

Allen L. Torrey '48 Treasurer of Hampshire College and former Town Manager of Amherst, Massachusetts, was awarded an honorary Master of Public Administration degree at commencement exercises at Amherst College on June 6. The citation praised Torrey, stating, "Amherst College owes you much," and commended his guidance of the development and growth of the Town of Amherst, and his service to both the College and the town. He was further cited for "ably preserving the past and accommodating the new."

Torrey served as a pilot in the U.S. Army Air Corps from 1943 to 1946 with twenty months of active duty in Europe. After receiving his degree from Maine in 1948, he served as town manager of Camden, Maine and Lancaster, N.H. before coming to Amherst.

During his twenty-one year tenure as principal municipal officer, the student population of Amherst and Hampshire Colleges and the University of Massachusetts has grown from six thousand to over twenty-five thousand.

Manager of HVAC and Support Systems for Mechanical and Nuclear Engineering in an offshore power systems company which has headquarters in The Woods. 12925 Deep Lagoon Place, Jacksonville, Fla. Thanks, Jessie—it was good to hear from you! Betty Botefer sent word that she has remarried and is now Mrs. Richard Kahn, 29458 Wel- son, Dearborn, Mich. She was formerly married to Gilbert C. Bird, '50 who is deceased. "Thanks to the little fellow that was born when we were South Apartment residents," is how we miss what was he is a grandfather! Congratulations, Chet! With daughters in three different schools, Margaretie (Sulli- van) is now finding time to be the assistant libra- rian in the Lebanon Library. Susan will graduate in '76 from UMO. Kathleen is at Holy Cross and Donna at Colby. Roger Pendleton will graduate from the U.A. Army College in July, '75, as a Colonel, U.S. Army Reserve. He has been president of a company in Maine, and is currently treasurer of the Washington D. C. area chapter of U. of M. Alumni Association. Have a wonderful summer and drop me a card with your news.

NEWLY CREATED POSITION FOR DR. E. F. SULLIVAN '49

The Great Western Sugar Company has announced the promotion of Dr. E. F. Sullivan, senior agronomist in the newly created position of manager-crop establishment and protection, at the firm's Agricultural Research Center, Longmont, Colorado.

He received his degree in agronomy and farm management following a four-year tour of duty with the U.S. Army Air Force. He worked as a research assistant at Cornell University while completing his masters and doctorate work ('51 and '53). Dr. Sullivan has been an assistant professor at the University of Illinois, Urbana, Southern Illinois University, and Pennsylvania State Univer- sity. He is recognized as an authority on chemical weed control in sugarbeets. Dr. Sulli- van and his wife, Madeline, live in Longmont.

50 MRS. DAVID L. NEEDLEMAN
( Frances R. Luboff)
56 Clearwater Rd.
Chesnut Hill, Mass. 02167

Congratulations are well in order to Bob Freeman, Class Secretary from 1970-75, for a really good job keeping us informed. Bob is on the roll to follow, with me luck. Bob's closing message is: "Thanks to you who took the time to write personal notes; please others do the same." And I second that request.

David L. Needleman, '43, has moved to Orono, Maine, Florida, Washington, Georgia, Maryland, New York and New England. And where were the rest of you? Much of the class business meeting was devoted to organizing for a BIG turn-out for our 50th. And we elected Bill Bodwell, President; Margaret McIntosh, Vice-President; Alton Hopkins, Treasurer; and Harry Bickford, Jr., Class Agent. Don Barron, Dot (Butler) and Irv Marsden, Joan (Burton) and Gay Rowe, and Jim Brady are our new Executive Commit- tee. Heartiest thanks and congratulations to all past officers from all of us! It was voted unanimously that The Maine Alumnus should place more emphasis on alumni news. So let's back up the motion with an abso- lute deluge of letters! Dr. John Denison is Director, Stockbridge School of Agriculture, University of Mas-achusetts at Amherst. Joanne and Guy Rowe are pleased to announce the forthcoming marriage of their daughter, Linda, to Robert Jordon, Jr. on August 23; it will be a home wedding. And taking my own advice, my personal note is: after getting an M.S. degree in librarianship at Simmons College, I worked at the Yale University Library for 10 years and came to Mas- sachusetts Institute of Technology as Head, Catalogue Dept. My husband David, an Assistant Computer analyst also at M.I.T. In our spare time we have a pet food distribut- ership and for fun (?) we constantly remodel our house as a do-it-yourself project, tend an amateur vegetable
garden, the current vogue, haunt the antique galleries, and chase our German Shepherd through the Arnold Arboretum. NEWS CLIPS: Colby Chandler became Executive Vice-President of Eastman Kodak Co. in 1974, having served in many responsible positions with Eastman Kodak since 1950. Colby is a member of several professional sciences and is involved in many academic and community organizations. A class taught in the Weymouth, Mass. adult evening courses by Thomas C. Higgins, director of Learning Resources at Middlesex Community College has resulted in a cooperative venture with the Weymouth Historical Society. They have presented a three-day Civil War Commemorative Program, one of the largest and most successful exhibits in the East. Maurice Fenderson, Wells, has been appointed Manager of Production Control for Simplex Wire and Cable of Portsmouth. Moe is currently a candidate for an M.B.A. degree at University of Maine at Portland-Gorham. Dr. Carl N. Fenderson, academic dean for UMA, was the speaker at the weekly Kiwanis Meeting (Kennebecs) on May 29.

Carl Bache-Wilg, newly elected secretary of Augusta-Hallowell Lions Club, was presented the Lion of the Year plaque in May. Joseph B. Oppenheim is now studying photography and architecture at Brevard Community College. Paul Payson and Jeanne (Day) '49 will visit UMO in the fall to register daughter Cindy. Bruce Poulton, Administrative Assistant to Maine Governor Longley, was named first Chancellor of the University of New Hampshire System, effective July 1st. Elbert Prince, Falmouth Foreside, was elected President of the Maine Good Roads Association. Bessie Rush, Falmouth, is Elementary School Supervisor K-3 in the Falmouth School Dept. Harold Young, Cedar Lake, Indiana, writes that son Bryan is teaching Biology at Munster High; son Bruce is a junior at Ball State University, also majoring in Biology. George Johnson, Greenville, retired USMC, a pilot for the State Forestry Dept. of Conservation since 1969, has a son (19) in the USN and a daughter (17) in high school.

There'll be lots more news next time, IF I hear from you. Until then, have a great vacation-time.

MAINE GRADUATE STUDENT HONORED

Monmouth College in West Long Branch, N.J., presented its first annual award for distinguished teaching to Professor Rose Mary Miller who completed her graduate work at UMO in 1951. She is a member of Monmouth's mathematics faculty. The award was established this year through the Daily Register's president and editor Arthur S. Kamin. It honors classroom performance, dedication to students and their interests and solid participation in professional activities.

Before going to Monmouth, Prof. Miller served for three years as Dean of Women at Vermont College. She is a graduate of Middlebury College and holds a graduate degree from the University of Vermont.

Hampton Beach High School where she was a member of the American Symphonic Band and Chorus that toured Europe this summer. Her older daughter, Susan, is a sophomore at UMO and a member of Phi Beta Phi. JoCunningham Street writes she is a licensed Real Estate Salesman. Her son, Douglas, is a junior at Illinois State College; daughter, Linda, is a high school senior and young daughter, Jamie, is an active fourth grader. Jo's address is R. R. #4, Macomb, Ill. Clair Shirley is District Scout Executive for Monadnock Council, Boy Scouts of America, Gardiner. Carl (52) and Trudy Wight's oldest daughter, Carla, graduated from UMO last spring and is now in London attending art school. While taking their daughter, Deb, back to Eastham College, Ind. as a pre-med sophomore, Maxine (52) and Gerry Robbins discovered it's a small world. There they ran into Frank and Ruth Butler enrolling their son, Peter, as a freshman. The Robbins still live in Vassalboro while Gerry works for Keys Fibre in Waterville. Congratulations to Mary Dean Yates Floyd who received her Master of Library Science Degree from the University of Maryland this year. Son, Phillip, attends Univ. of Maryland; Michael is a freshman at Villanova and Peter plans on Western Maryland after high school this year. Francis Stevens is a poultry specialist with the Extension Service. He and his wife live on the Brown Rd., Poland. Their older son, James, is at Central Maine Vocational Technical Institute, and Donald is an Edward Little High School student. In January, this year, Henry Laskey joined the Edward C. Jordan Company in Portland, Maine, as a senior process engineer. He will be residing at 359 Tuttle Road, Cumberland Center. The current President of the National Association of Academic Affairs Administrators is Marion Waterman Meyer, but no address, Marion.

PENOVAR '53 WITH U.S.D.C.

The U.S. Department of Commerce has announced the appointment of William E. Penoyer as Director of its Construction and Forest Products Division in the Domestic and International Business Administration. Prior to joining the Department of Commerce, he held several managerial positions with the National Forest Products Association and Weyerhauser Company. He holds an M.F. from Penn State University. The Penoyars will reside near Annapolis, Md.

of interest to chemical engineers. Dr. Sheng, associate professor of chemical engineering and materials science, has also been granted several patents on chemical engineering design. In addition to his interest in developing interdisciplinary curriculum relating technology to environment and social consequences, he has studied extensively scientific and technological developments on mainland China. Dr. Sheng is a native of Shanghai, China, received a Ph.D. from the University of Oklahoma and a master's degree from Purdue University. Gerald R. Wescott, Jr., of Leola, Pennsylvania has won membership in 1975's President Club of National Life Insurance Company of Vermont. His outstanding client services and sales also earned him attendance at the Club's educational conference, Grand Bahama Island. Gerald has frequently exceeded a million dollars in personal life insurance sales.

Penny Rich Wilson is busy keeping up with the activities of five children. Husband Pete '55, is plant manager at MacBick in Fitzwilliam, New Hampshire. Llewelyn Clark has been named Berkshire County (Mass.) chairman of the UMO second-century fund.

THE AMERICAN BROADCASTING COMPANY ANNOUNCES...

...that Mark Cohen '54, has been elected Vice President, Finance and Planning, for ABC Television, by the Board of Directors of American Broadcasting Companies, Inc. He will be responsible for the supervision, coordination and consolidation of all financial activities of ABC Television, which includes the ABC Television Network, ABC Entertainment, ABC Sports and ABC Owned Television Stations.

Mr. Cohen had been Vice President in Charge of Planning and Development for ABC Television since February, 1974. He has been with ABC since November, 1958.

A native of Lewiston, he received his B.A. from Maine in Business Administration and also holds a Masters degree in TV Production from Syracuse University. From 1955 to 1957, he served as a First Lieutenant in the U.S. Army.

Mark and his wife, Jane, live with their two daughters, Beth and Cathie, and their son, Jonathan, in Armonk, New York.

GOVERNOR’S APPOINTEE

J. Neal Martin, President of the 1st Consumers Savings Bank and President of the Maine State Chamber of Commerce, was recently appointed by Governor James B. Longley to serve on the Commission on Maine's Future.

Mr. Martin is a BA, Class of 1950.

51 MRS. RICHARD W. NOYES (Shirley M. Lang) 115 Mass Ave. Millisncott, Me 04462

Norman and Louise Cummings are still at 4 Eisenhower Drive, East Quoque, Long Island, N.Y. Their daughter, Kathryn, is a senior at nearby West

54 MRS. ROBERT L. DAVIS (Elizabeth "Lu" Leighton) 28 Donald Avenue Holden, Mass. 01520

The national office of the American Institute of Chemical Engineers has invited Youngstown State University faculty member Dr. Henry P. Sheng to participate in their 1975-76 Speakers Bureau Tour. The speakers bureau includes representatives from universities, industry and government who are authorities in an area

MAINE MAN NEW HEAD OF ATHLETICS AT COLBY

Richard J. McGee '54, has been named chairman of the department of physical education and director of athletics at Colby College. McGee taught and coached at Winslow and Fairfield before joining the coaching staff at Bowdoin College in 1965. He joined the faculty at Colby in 1967 as assistant professor of physical education and varsity football coach. He will continue football coaching duties.

In 1974, he received the Murray Lewis Memorial Award for his "outstanding contribution to New England College football."
Miss Hilda Sterling
10 Ocean Boulevard
Apartment 2C
Winthrop, Maine 04064

Gang, it's been wonderful to receive some notes from "lost" classmates. Let's all come alive in '75. Write before those postal rates reach 13¢.

Dana (Dee) Livingston
Mazar, NYC, is an AAS Professor at the College of William & Mary. He is the treasurer.

Karen (Bontrum) Haggrave was also disappointed that she couldn't be with us, but her sister, Anne, 66, had chosen the same date for her wedding. The Haggravens will be moving to Southern Connecticut this summer.

The prize for "in the presser dates for the '55' went to Ted and Ruth (Dow) Durst, Walnut Creek, California. They proudly told us that the trip was a gift from their children—Terri Anne, 18, Ricky, 17, Lorry, 15, and Michael, 14. Joie Huf, Reg Bowden, Al Healy and I joined Sal and Joanne (Barberio '58) Scarpato and Karen and Joe Di Giovanni for a fun-filled evening at the home of Kaye and Bill Mantein, 274 Parkway South, after evening prayers had been said in St. Mary's Church.

You haven't laughed until you have heard Sal tell a story! Raymond Devine, who will celebrate his second birthday on November 5, leads a busy life and shares his free time with his wife, Mimi, and Noni (Dinsmore '53) Devine—Wally, 10, and Deirdre, 8.

Stan Milton Associates, an advertising and public relations firm, has been founded by Stan Milton, who has been in the field since 1956. A former sales manager of WGAN-AM-FM, he worked with WRUM, Rumford, WHCM, Skowhegan and WMMZ, Bath, before going to Portland in 1959. Stan was associated with the Maine Broadcasting System 10 years before joining WGAN.

Dana Daggett, who resigned as Director of the Bureau of Public Administration, South Campus, Bangor, in early 1973 to accept a position as the Washington representative for the International Personnel Management Association joined the Office of Revenue Sharing, Department of the Treasury as Municipal Finance Officer on November 1, 1974. He remarks, "We are the ones who are sending the incidence tax $$$ back to the states and cities. Assure all my friends that I personally have no $$$ to share with anyone (except for a little to UMO)"

We congratulate Bob Bartlett, who has been appointed as President of the Maine Society of Professional Engineers. He is employed by the Maine Department of Transportation.

The Chip "Moody" included this news with his annual alumni fund contribution: "I have formed an engineering, marketing and professional placement corporation—The Moody Group, Inc.—which began servicing the New England states in May 1973". Other Maine grads associated with his venture are Del Boudin, John Coppens and Frank Ford '58.

MRS. EBEN B. THOMAS (Sue Stiles)
5 Spruce Street
Winthrop, Maine 04064

Herbert Cohens (Judy DeMerchant), Larry and Martha (Mansfield) Noddin, Ginny Freeman and Youri truly spent a grand old time reminiscing about Maine and those good old days. Larry, Martha and family are in Needham, Mass., and Larry is Senior Engineer, Quality Assurance, at the Polarcold facility in Norwood. Bob and Molly Nagle plus family are in Keene, N.H. while John and Associates Research and Development for the Markham Industries. The Luebers (Ted '57) are in Chelmsford, Mass. Debbie is maintaining a dean's list average at Middlesex Community College where she is enrolled. While Ted is still in the pharmaceutical business. Lew Clark ('54) is now Director of Research and Development for R. J. Jones, the former owner of the Beloit Co. Lew, Martha, Rocky, Susan, Debbie and John are also visiting family in Hollywood, while Maine. Our gracious hosts are also busy as bees. Ann is quite active in the movement for the ordination of women to the Episcopal Church and John is Financial Vice President of the First Financial Group of New Hampshire with offices in the Manchester Bank, Manchester, N.H. Had a long talk with Judy DeMerchant Cohens the other day following their trip to Switzerland and Israel. They left Boston May 31st and traveled for two weeks. Herb is still there on business visiting varying shoe factories in England, Germany, France and Italy. "HOST" is the name of which he is president. Judy told me that they were aboard the inaugural flight of Swisair into Israel. She told me that security is very tight in Israel, especially at the airport, but they have no feeling they have entered the middle of a potential battlefield. They toured the West Bank, Bethlehem, and the old city of Jerusalem plus a portion of the Italian Alps, Zermatt and Geneva. The Cohens are living in Wayland, Mass. and frequently run into the Robert McCloskeys (Lois Danzig and their four girls plus the John Shanes (Charlotte Reddell)—both of whom live in Wayland.

MRS. ROBERT T. MUNSON (Nancy Roberts)
30 Tanglewood Drive
Glastonbury, Conn. 06035

A great letter from Nonni Hilchy Fitzgibbon brings news that she has just become President of the Center for Curriculum Development of Harcourt Brace Javanovich, Inc., N.Y.C. She is responsible for the entire editorial operation of the HBJ textbook division. Congratulations Nonni! Husband Tom was promoted to President of the Psychological Corporation of HBJ which produces all the educational and psychological tests of the company. Their daughter Colleen was one of the first winners of the International Experimental Film Festival in Brussels last winter in a field of 140 entries. Son Tom is going into his final year in Electrical Engineering at Carnegie-Mellon University, Pittsburgh, Pennsylvania, and is now living in Armonk, N.Y. I received a fascinating packet of information from Eric Bolen who is happily transplanted in southern Texas. Eric is assistant director of the Rob and Besee Welder Wildlife Foundation, a most interesting concept which incudes 7,800 acres of land, a ranch, administrative buildings as well as a foundation for research and education in wildlife, in conservation and in related fields. Eric received his M.S. and Ph.D. from Utah State University with research in marsh ecology and management and the ecology and biology of waterfowl. He served as Asst. Professor, Asst. Professor, and now Professor, at the Dept. of Range and Wildlife Management at Texas Tech University between 1966-1973. He is currently President of the Texas Chapter of the Wildlife Society and an Adjunct Professor at Texas A & I Univ. Corpus Christi as well as his position with the Welder Foundation. He had done extensive foreign travel, received numerous grants for studies in his field and published many articles in professional journals, as well as numerous to enumerate but fascinating accomplishments. He is married to the former Becky Woodhull and they have a son Brent, age 2. He may be reached at the Welder Foundation, Shiner, Texas.

Charles L. Mutsch, Assoc. Professor of Geology at the University of Minnesota, Duluth 55812 returned to the UMO campus last summer to teach geology in...
Wanted for Special Collections

The twins graduated from Medomak Valley, Waldoboro. Jim Robbins is living in Birmingham, Ala., with wife, Beverly, and children, Catherine, 10, Steven, 9 and Christopher, 5. Jim is a pulp and paper staff engineer for Rust Engineering Co.

63 PRISCILLA (SAWYER) FREDERICK
6 Bridge Street
Salem, NH 03079

Peter O. Olson is presently working as an operations research analyst at Ft. Bliss, Texas. Peter recently completed course work for a doctorate in science in industrial engineering at New Mexico State University. Peter and his wife, a music teacher, are the parents of five sons. Gary A. Dorsay is working for Lovain Products Corporation in the field office in Chicago. Alan W. Erle is an associate professor of industrial education at Oregon State University as well as president of Dirigo Electronics in Corvallis, Oregon. Joyce (Lundgren) Thomas and husband John are residing on Somerset Street, Bangor. John is a chef at Gallagher’s Restaurant. They have 5 children. Alan B. Flaschner, assistant professor in marketing at the University of Toledo, has been awarded a $1000 research grant for his project entitled “Understand What Potential Students Expect from University of Toledo.”

The appointment of Paul A. King as a field research and development representative for the Gulf Crop Protection Products Department, Gulf Oil Chemicals Company, has been announced by G. C. Bryars, General Manager. Mr. King will be located in De Moines, Iowa and will be responsible for the north central states. A Lewiston native, he holds an M.S. from the University of Mass.

MRS. ALLAN G. STEWART
(Millie Simpson) Old Bank Road
Brunswick

Dick Leonard was named Principal of the Year by the State Elementary Principals’ Association in May. Principal of Winthrop Grade School, Dick was particularly cited by fellow administrators who said his “primary interest is children, and to that end he has supported and developed such programs in his school as art, guidance services, special education and parental conferences.” Dick is a member of the United Methodist Church, Winthrop Rotary and a founder of the Kennebec Valley Principals’ Association. John Power, Lyndeboro, N.H. has been selected vice president of Craftmen Inc. of Merrimack, N.H., a company he has been associated with since 1972. Jeff Lyon takes over as chairman of the science department at Medomak Valley High School, Waldoboro, in the fall, and Peg will teach grade one at the Friendship Street School, also in Waldoboro. Penny Mitchell Lehman wrote a “newly” letter telling how she arrived at Walnut Glen, 7301 Lennoxx Ave. B-5, Van Nuys, Calif. 91405. Penny is now a “sun-worshipping Southern Californian” and is in the home territory of her husband, Bernie. She is into her sixth year with the Los Angeles Chapter, American Red Cross, where she is the casework consultant for Services to Military Families in the Van Nuys District office. Since 1962, Penny has been a social worker in Greenwich, Conn., three years as a probation officer with the Juvenile Court, Bridgeport, Conn., and in 1967 she went with the ARC as a social worker in the Service to Military Hospitals program, assigned to Valley Forge, Pa., General Hospital. She was married in 1968. Ronald C. Gledden passed along this word to the alumni office: “Enjoying our tour in Germany. Located in Frankfurt if any former classmates are passing through.” Dr. Robin R. Loeschner has joined the Bath dental practice of Dr. John H. Hartleb. Rob has been a dentist at Pineland Center, Pownal for the past three and a half years. A graduate of Georgetown University School of Dentistry, he is married to the former Ginger Snyder of Alexandria, Va., and they reside in Gray. Judith (Morgan) Very, Brunswick, was married to Thornton F. Conant in February, 1974, and their son, William M. was born in December. They are the “proud parents of a combined family of 10—six boys and four girls.” G. William Porter is a research associate at the Center for Occupational Education at North Carolina State University, being on the faculty since 1975. While employed by the N.H. State Department of Education in 1971, he received an EPDA Leadership Development Award at NSCU. He and his wife, Diane (Holmes) and children live at 208 Chamberlain St., Raleigh. Leland Crooker is head of engineering for the Maine-Cascade Iron Works in Clinton. One of Robert Jordan’s twin daughters, Dawn, will attend UMO in the fall, and the other twin, Donna, will go to UMF. Tim, 11 and Teresa, 9 are students at the Warren Intermediate School.
Sylvia A. Tapley
49 Beal Avenue
Ellsworth Maine 04605

I apologize for doing a "rush" job of our classmates this issue but I am flying to London within hours and I have the usual last minute details to complete.

Those few who attended our tenth reunion seemed to have an enjoyable time in spite of the terrible rainy weather. The most frequent comment noted was "How do we get more classmates to attend our reunions?" Do you have any suggestions? Bev (Watson) Sharp came all the way from Denver. She is expecting a first child this fall. Bonnie (Schlosberg) Fortini told me that she did some studies in elementary reading at UMPG. She and her husband live in Limington. Allan Arch and his wife braved the cold weather; they flew up from the sun and warmth of Florida. Three of the class officers were re-elected at the business meeting; namely Horace Horton, President, Douglas MacDonald, Vice President, and Harry Ellsworth, Treasurer. I was "officially" elected Secretary. Janet Foye, husband, David and daughter Alison, 4, are living in Ithaca, New York. David is working toward Ph.D. in Animal Breeding at Cornell. Sandra Arbour is still working in Germany, received her master's degree this fall. This year, Jaren Gore is currently a wildlife biologist with the U.S. Corps of Engineers working on southern Illinois lakes. Nancy Kinney received her MA in American politics from the University of Michigan in May. Husband Mark has been a research associate there after receiving his Ph.D. in socio-cultural foundations of education from George Peabody College in Nashville, Tenn. in 1974.

I had a letter from Kay (Guerette) Lissette, living in Beverly, Mass. She and Bruce '64 welcomed a second daughter, Rebecca, on Feb. 11. Bruce is teaching biology at Beverly High School. Sadie (Auburn) and Don Archer have moved to till Lake City. Don is a Supervisor of Research and has several research teams throughout the state under his supervision. It must be an exciting life for John F. Adams, living in Paris, France with his wife and three children. John is now an officer of the Chase Manhattan Bank. Anne (Cathcart) 66 and Murray Sprague moved back East to Conn. after seven years in Wisconsin. They have three daughters. Bruce Kemelgor is Assistant Professor of Management and Organizational Behavior at Western Michigan University. David Lyon was appointed the new Principal of Caravel Junior High School in S.A.D. #25. David holds a master's degree in education from UMO and is a candidate for a certificate of advanced study in school administration. He is married and lives in Newport. Carol (Moon) Ouellette is now living in South Bend, Indiana with husband Peter Masler, a doctoral candidate in genetics at Notre Dame. Marney (McLean) Miles, who received a degree in art education from UNH, has been teaching for eight years in San Francisco school system. She is presently teaching emotionally handicapped students at the Garfield School there. Marcia (Savage) McGee will be the School Librarian for the new Stonington-Deer Isle High School. Pat (Hayden) and Don Herrick and three children have moved from Virginia back to Maine and are living in North Berwick. Diane and Barry Titcomb have very recently moved to Bethel, but Barry will continue with his teaching position in the Math Dept. of the Berlin, N.H. High School. I hope you all have a happy summer. Keep in touch!!

Research Laboratory in Japan for the next three years. Donna (Abott) Ingalls is now Day Care Coordinator for the Penquis Community Action Program in Bangor. Her husband in the C.P.A. firm of Brooks and Carter of Bangor. Gerry and Charlotte Page have two children, David Allen, 5 and Robin Lynn, 1/2. He works as a process engineer at International Paper Co. of Pittsfield. "Goodstein is now an instructional consultant for the Hartford Insur- ance Group. He will be responsible for evaluating all training programs sponsored by the Hartford. After having commanded a captain in the Army Medical Service Corps, Larry Buck is now supervisor of Clinical Microbiology at Berkshire Medical Center, Pittsfield, Mass. Charley Dumas writes that he is living in St. Louis, with his wife, daughters, 2 and 5, and are now residing in Louisville, Kentucky, (9006 Ken- nom Lake, 40222) where Charley works for Anheuser-Busch, Inc. as the District Sales Manager for the state of Kentucky. Charley received a M.B.A. from Michigan State, then spent some time in the Army both in Ft. Lee, Va. and in St. Louis. Before coming to Louisville, the Dumasens were in St. Louis, Chicago and in Iowa. Arnie and Gay (Atwood) Amoroso and child are living in Kennebunkport where Arnie is the head of the media center at Kennebunk High (he also teaches two film making courses) and Gay is in the library at "where she carries among many other things, the works of Hanne and Harry Greaver (former UMO art faculty members). Hazel (Constantine) Gull, a graduate from the New England Deaconess Hospital School of Nursing, received her B.S. in Nursing from the Uni- versity of Arizona where she was chosen as a member of Phi Kappa Phi. She and her husband, an arm- amnent at Kitt Peak National Observatory, have two children, Michael, 5 and Matthew, 3. James and Marilyn Tarbox have two children, Jeff, 4 and Jennifer, 1. Mary (Pensinger) Finnegan writes that she, her husband, Andy, and daughters Kerry, 6, and Andrea, 3, are now living in Louisville, Kentucky.

You hope you'll make an effort to contribute to the Alumni Fund and if you do, please drop me a note in the Alumni Office with your suggestions so that we can keep you and your classmates informed at the same time!

Mrs. Robert R. Laughlin
(R. R. 2, Box G-10)
East Olden, Maine 04429

Hope that summertime and vacation time will prompt all of you to drop me a line or two. We'd all enjoy knowing your whereabouts and what's happening.

Got a couple of couples for the confetti column. Cheryl (Bicknell) Huard and James (TOFURI) Huard are natives of Rome, N.Y. and are now residing in Fairleigh Foreside. Carol is a teacher resident at Middletown, Conn. while her new husband is senior engineer for the State of Connecticut Dept. of Environmen tal Protection. Mrs. Dennis Kalos, alias Diana Shaw surfaced in Santa Clara, Calif. Roger and Linda (Rand '69) Clark are still marvelling over the delivery the stork made at their house last July 30. Matthew Roger thinks they're pretty special too. Feb- ruary 25 our feathered friend visited Neil and Sharon (Cort) Ashton with an 88 lb. pink bundle! Keeping up the pace, the stork is due to make a summer deliver- y at the home of her husband. Wayne, a long (Gardiner) Parker. The stork knows the way quite well by now having made two prior visits... a son both times. Then, I understand, he's off to Three Rivers, Mass. to the home of Denny and (Edwards) Dreyer. This will be for them!

Most of you have probably heard by now that John Huard is going to give pro ball another try, this time with the Spring Agamirons. For those of you who missed the Spring issue of The Maine Alumnae, and wondered, "What did they do to Sue?", well, the G.A.A.'s Assistant Director for Alumni Activities, our own Susan (Gowen) edwards has been named one of three honorary members of the All-Maine Women. As you'll all remember, that entitles her to wear a pine tree on her cheek and a white hat... you've come a long way

Miss Joyce McPherson
160 Bates Street
Skelton, Maine 04482

Weddings: Paul McGuire to Christine Margaret Teufen on April 5. Paul is employed by Shared Appli- cations, Inc. at Ann Arbor, Mich. The couple now reside at 1075 Barton Drive, Ann Arbor... Marriana Jane Miller to William C. Irwin. She is with the mer- chandise system development and coordination divi- sion of the J.C. Penney Co. ... Laurene Gallant to Roger Carl Juhola on April 19. She is a physical education instructor at Hingham High School and is presently employed by Jackson and Moreland Ind. Architects... Best wishes to Daniel James McGrath married to Dawne Alma McLennan and living in Presque Isle. Both are employed at Bureau of Rehabilitation.

News Items: James and Donna (Cote) Leland write that Jim is now a First Lieutenant in the USAF, stationed at Grissim AFB, Ind., as a navigator for KC-135s. They have two children, Stacey, 5, and Christopher, 2½... Linda Archer writes that husband Doug is a microbiologist for the Food and Drug Admin- istration in Washington, D.C. Linda taught school for six years but is now enjoying being home, tending their daughter, Jennifer... Carol (Utterback) Guerin says that in September of '74 she and her husband moved to 79 Vinton St., Long Beach, N.Y. and that on February 7, 1975, they became parents of a daughter, Michelle Lee. ... Mary Ellen Veno writes that she recently married and is now Mrs. Roland Normand. They reside at Mousam Lake Road, Springvale 04083. Patricia G. World is currently an instructor of biology at the University of South Dakota. James and Susan Greenleaf Flynn have two children, Kelley Anne, 3 and Robert Edward, nine months. Jim is working with H. F. Hood in the ice cream field, Conn.

Personal Correspondence: I have received a very nice letter from Jim (69) and Ellie (Kent) Peavy saying that Jim is now Production Manager of the Wayne Manufacturing Plant in Cortland, N.Y., which is owned by Agway, Inc. Ellie is still employed as a Cooperative Extension 4-H Agent in Onondaga County. Bob (67) and Pauline (65) Farnell are the Master's Degree from Syracuse University and was tapped to become a member of Pi Lambda Theta, National Honor and Professional Association for Women in Education. David Broadhurst has visited the Peaves twice, as have Rome and Katherine Rankin, who now live in Lexington, Ky. The Central N.Y. Chapter of U. of M. alumni met for their Spring Ban- quet in Fayetteville, N.Y. and Jim and Ellie were elected Vice-President. They served as secretary-treasurer in '74. The chapter plans to hold a lobster picnic in September.

Thank-you, Jim, and for your new letter. Here's hoping that some of you other 68ers will write.

Patricia (Tofuri) Bicknell
4 East Eighth Street
Yarmouth Maine 04096

Hi! Hope this summer's been enjoyable for you all.

Elaine and Joel Marquis have a new daughter--Rachael Marie, born May 2. The Marquises have three other children and live in Norwalk, Conn. Paul W. Schaefer, who received his Ph.D. from Orono in 1974, is currently a research entomologist for the U.S. Dept. of Agriculture. His job is to establish the Asian baby! John H. Hart, Jr. has received his doctor of chiropractic degree from Wheaton College, Ill. He graduated from the National College of Chiropractic, Lombard, Ill. and is completing his residency at the clinic there and Chicago General Health Services Clinic.

Paul Leeman reports that after being retired from the Los Angeles City Sheriff's Dept. in February '74 due to an injury sustained while on duty, he is the owner/operator of Paul's Transports. Bill and Cheryl (Evans) Costella of Middletown, Conn. have bought an old Victorian home which they are renovating. What's your news? Wouldn't you like to share?

Rockland, Maine 04841

There are two births to report, but no marriages?  
What happened?  Charles Edward born to Mary  
(Squires) Rosenhall on February 7, 1974. She has  
married to Mr. Cal.  He and his husband, serving  
two years in the army. They plan to return to Maine  
in 1976. Kristin Ann born to Richard and Joan (Silva)  
French on Sept. 24, 1974. NEWS: Martha (Orrico)  
Visscher writes that she has obtained a degree  
in inorganic chemistry from Indiana University in  
August 1973. In 1974 she became a member of the  
chemistry faculty. She resides with her husband, Ronald,  
at 822 Campus View, Bloomington, Ind. 47401. Doris  
Beltfe-Bonner and daughter, have had a very  
great year teaching English in a private school in Philly!  
Next year promises to be even better since John and I  
have decided to leave the city and resettle in Auburn,  
Maine. John will practice law and I'm still hoping I'll  
be able to teach. We're excited about going home.

Thomas M. Atkinson  
has been promoted to  
manager of underwriting  
services at Unionmutual.  
Portland, Maine. Tom  
and his wife, Karen, are  
presently residing in  
Scottish, Maine. Togi  
Ches Harrison has been  
named the Air Force  
Communication Service  
Outstanding. Air National  
Guard Electronics Installa-  
tion Chief of 1974,  
a national award. He is  
an engineer with New Eng-  
land Telephone and Telegraph Company and resides  
in Yarmouth with his wife, Judith, and two daughters,  
Michelle and Terri. He is presently working toward a  
degree at the University of Maine in business  
administration.

Dick and Diane (Richardson) Turner and their  
daughter Jenny are still enjoying the warm Florida climate.  
Janet (Pay) and Doug MacMillan and their  
5% year-old twin daughters and 9-month-old son live at  
71 Grant St., Needham, Mass. 02192. Margaret Talbot  
writes that she is a  
social worker for Denver Department of Social Services.  
Gail Grzegorowicz teaches fourth grade at the  
Franklin Ele. School in Durham, Conn. and is presently  
working on her master's degree in reading from Southern  
Con-necticut State College in New Haven, Conn.

Well, that's all folks! Please keep me posted on what is  
happening to you and yours.

1956 DR. MARTIN HAGOPIAN, 50, of the Bronx, N.Y. on June 13. He was born in Madison, Maine, attended Higgins Classical Institute and held a doctorate from Fordham University. At the time of his death he was a research associate at New York Medical College and previously had been a research associate at the College of Physicians and Surgeons, Columbia University. He was one of Maine’s outstanding athletes, a member of Phi Gamma Delta. Dr. Hagopian is survived by one sister.

1959 ROBERT KIRKLAND, Jr., 58, of Marshfield Hills, Mass., on May 17. He was a native of Philadelphia, Pa. and at the time of his death was president of Thermotec, Inc. He served as a Captain in the Army Engineers during WWII and was a member of the Westminster Masonic Lodge, a life member of the Quincy Yacht Club, associate member of the Mechanical Contractors’ Assoc. of Boston and a member of the Commission Engineers’ Society of New England. At Maine he was a member of the Scabbard and Blade and Beta Theta Pi. He is survived by his wife, two sons, two daughters and four grandchildren.

1957 JOHN A. LITTLEFIELD, 40, of Randolph, in an automobile accident in Pittsfield. He was born in Bangor. A well-known GOP official, he had been a reporter for the Kennebec Journal and the Bath-Brunswick Times Record. At the time of his death he was serving as a researcher and statistician at Thomas College in Waterville. He had been chairman of SAD 11 in Gardiner, advisor of the Gardiner YMCA, chairman of the Kennebec County GOP Committee. He is survived by his wife, a sister, grandparents, a niece and four nephews.

1958 JOHN WILLIAM DUDDY, 42, of Western Springs, Illinois at Maywood, Illinois on May 27. He was a native of Bangor and at the time of his death, he was employed by the Western Bell Works in Chicago. He is survived by his wife, and his parents.

1960 LEWIS JACQUES CARPENTER, JR., 37, of Long Island, N.Y. in an automobile accident on May 15 at Hauppauge, N.Y. Mr. Carpenter was born at Ballston Lake, N.Y. He served in the army from 1960 to 1964 in Germany and at the time of his death was employed by the federal government in the Bureau of Disability Insurance. He is survived by his wife, his parents and two sisters.

1969 DOUGLAS BEAL GOULD, JR., 27, of West Old Town on June 7 at Veazie in a fishing accident. He was born in Lewiston and was employed with the State Highway Commission as a chemist. He is survived by his wife, one daughter, his parents and one sister.

1970 ARTHUR C. MIDDLETON, 27, of Great Barrington, Mass. died in a motorcycle accident on April 17. He was born in Williamsburg, Virginia and attended the Lenox School for Boys and the Cheigwell School. He was active in athletics. He is survived by his parents, the Rev. and Mrs. Arthur P. Middleton, one sister and two brothers. He was a member of St. James Episcopal Church, in Great Barrington.

1974 WARREN L. JOHNSON, 27, of New Sweden in a boating accident at Princeton on May 6. He was born in Caribou and graduated from the Southern Maine Vocational Technical Institute in 1974. He served from 1966-68 as a specialist in the U.S. Army Corps of Engineers. At the time of his death, he was employed by the Allen Commercial Electrical Company in Bangor. He is survived by his parents, his paternal grandmother, his maternal grandparents, one brother and two sisters.

1976 LAWRENCE J. EMERSON, 21, of Damascus in a drowning accident. He was born in Damascusc and was a 1971 graduate of Lincoln Academy. He was a participant in Boys State and the Outward Bound School on Hurricane Island. He is survived by his parents, the Rev. and Mrs. Arthur P. Middleton, maternal grandparents and paternal grandfather.
John M. Blake, Vice President for Finance and Administration, stepped out of his practical role for an evening, this year, to speak to UMO honor students about a more idealistic consideration—continuing their education. Many who heard the speech were impressed by it and the Alumnus is happy to share an edited version with its readers.

The “Knowledge Explosion”, by now, is boring and fails to move most people as it should, because new things to know have developed faster in our generation than in all preceding generations of recorded history. Simply stated, there is now so much to learn in order to survive and to live successfully that the process of learning can no longer end with any formal grade of education or even a terminal degree. From both a good business practice standpoint and academic principle, I think we should now print diplomas and degrees on parchment which will disintegrate in five years or less. Only by earning adequate continuing education units could academic credentials be replaced.

Scientists sometimes refer to the possibility of immortality on earth. The television series depicting a “six million dollar” bionic man and woman may be fiction now as Buck Rogers’ rockets to the moon were a generation or so ago. If anything approaching this should happen, we would be left with a major problem of achieving success in developing man’s relationships with other people. The continued study of how we get along with each other may well be a more serious problem than those in the technical or scientific problem areas.

Consider the challenges implicit in the fact that human beings are the only animals capable of controlling both themselves and their environment, and we have yet to control either one very effectively. And there are some less obvious reasons why all of us should consider continued learning as a lifelong process. There is the simple and very important matter of competing for jobs and promotions. A continued process of learning can be justified as a very practical matter in maximizing income and improving our roles in job situations and in our communities. The rewards that are to be provided by employers and society in general tend to go to those who do not completely rely on performing today’s tasks with yesterday’s learning.

From the beginning of time, leisure moments—well used—have created and built civilizations, culture, higher levels of living, shorter working hours and more fulfilling lives for the thinkers and the rest of society. The advancement in “teaching hardware” makes possible more effective use of that time.

Today’s learning leads to an ability to solve problems that are centuries old. We are today only twenty-five years away from the year 2000. With knowledge accumulated and applied, we can, for instance, hope to enter the next century with the age old problem of hunger behind us.

It is not hard to imagine that we are also near a point of controlling major causes of illness. Scientists expect the world may see its last case of smallpox this year or next. Problem illnesses like cancer are slowly yielding to research and medical science. Continued dedication to learning through research will provide the ultimate medical answers.

Furthermore, it may not be hard to imagine we will live to see labor saving devices which will free man all over the world from much of the drudgery of labor. The application of continued learning to the various disciplines in technology will undoubtedly continue to make the world an easier place in which to live.

Will it even be possible for human beings to be born with a capacity to inherit education? At the present time, we have the problem of requiring each individual to go back for him or herself and learn all that has ever happened before he or she arrived. If we could only inherit what our parents have already learned, we could go on from there.

Nonetheless, we are approaching an age when it will not only be much easier to learn but where there will ever be more to learn. The methods of teaching and of learning are improving spectacularly. Continuing education has become so important to society, it is no longer left to professional educators to run. Now we find all sorts of businesses and non-academic organizations providing formalized education programs. There is a greater variety of learning available outside educational institutions than inside the ivy covered walls today.

Continuing education is a subject which can have no “bottom line".
University of Maine at Orono President Howard R. Neville officiated at ceremonies dedicating the University's Speech and Hearing Center in memory of the late Albert D. Conley of Freeport. The dedication was held at North Stevens Hall adjacent to the center. Mrs. Conley (Dr. Madelyn Dyer Conley '36) was the special guest and speaker.

Conley was a native of Portland and earned a B.S. degree in chemistry at the Orono campus in 1911 and B.S. degree in chemical engineering in 1914. In 1916 he received his masters in chemistry at the university and was employed for a number of years by the U.S. Bureau of Standards in Washington, D.C. and the U.S. Industrial Alcohol and Air Reduction Company in Baltimore, Maryland. In 1928, he retired and moved to Freeport, spending his winters in Sarasota, Florida.

Conley's continuing interest in the university's speech and hearing center resulted from the understanding of his own lifelong speech impairment and the belief that in accepting him as a student, the University of Maine had "allowed me to do something with my life."

In 1961, he established a scholarship fund to aid speech handicapped students. In 1963, a generous contribution to the summer speech and hearing clinic expanded its program from diagnostic services to therapy and permitted the center to continue throughout the year.

According to Dr. William R. Dopheide, director of the center since 1968, Conley's gift has expanded programs directly beneficial to the handicapped in the community and made available a laboratory training program to provide professionals for schools, hospitals and communities in Maine.

A major bequest from Conley, who died Dec. 24, 1974, will make possible the addition of a full-time audiologist at the clinic this coming fall.

On May 30 ten students of the University of Maine at Orono left Boston for Warsaw, Poland on the first leg of a six-week intensive language and culture study tour of the Soviet Union. The group is under the direction of Ms. Sandi Mayewski, instructor in Russian at UMO. This is the second study tour to the USSR from UMO. Last summer 26 students visited Russia and the Ukraine on a three-week culture tour under the direction of L. Rex Pyles, Asst. Professor of Russian at UMO and Ms. Mayewski. Members of last year's study tour received 3 credits; members of this year's will receive 6.

The group's itinerary is taking them to the cities of Lvov and Kiev in the Ukraine, Moscow, Krasnodar, Baku in Soviet Azerbaijan on the Caspian Sea, the Crimean Peninsula, Odessa, Kishinév in Soviet Moldavia, Bucharest (Romania), and Vienna.

During their month-and-a-half stay in the USSR the students have pledged to speak only Russian. In Krasnodar, a city of about 500,000 in southern Russia, they are to be enrolled in a Soviet language institute where they will attend a 15-day seminar on the Russian language taught by Soviet instructors.

Members of the group are: David Anderson of Berkley Heights, New Jersey; Geoffrey Feiss of Baltimore; Lisbet Hanson of Burlington, Vermont; Marianne Leavenworth or Orono; Jayne Logan of North Attleboro, Massachusetts; Robert Mountford of Dover-Foxcroft; Daniel O'Leary of Cambridge; Sherrill Pickard of Bangor; Paula Schuckers of Bangor; Susan Slocum of Westerville, Ohio; and Ms. Mayewski. The group returns to the United States on July 15. Those interested in future study tours to Eastern Europe and the Soviet Union—whether for language or culture—should contact Professor L. Rex Pyles, Department of Foreign Languages and Classics, 201 Little Hall, University of Maine, Orono, Maine 04473.
Folklore and History of the West and Southwest will examine the mythology of the trans-Mississippi region and attempt to identify the point at which truth leaves off and imagination takes over. Elements and institutions which give the West a special character as well as special problems will be studied.

Frantz is the author or co-author of numerous publications, including "The American Cowboy, the Myth and the Reality," "Six Thousand Miles of Fence," and "Readings in American History." He is a member of the NASA Historical Advisory Commission and historical advisor to the Governor of Texas.

The fall telephone verification is designed to contact all alumni who have responded to the survey. Many alumni who failed to answer, will also be called.

At that time, and at that time only, those contacted will be given the opportunity to purchase the directory. Directories will be made available to alumni only. On the basis of these pre-publication orders, the Harris Company will determine the number of copies to be printed.

Computer listing of the data will be returned to the Alumni Association to update the new computerized GRADS (Gift and records for alumni and development system).

The University of Maine at Orono will have its first alumni directory in twelve years by May, 1976. The directory, to be published by the Bernard C. Harris Company of New York, will list alumni alphabetically and geographically.

The Harris Company, publisher of many college directories, will compile and market the UMO volume at no cost to the university or the Alumni Association. Advertising sponsorship and sale of directories will pay the tab.

Information for the directory—its completeness will depend on alumni response—will be gained through two mail surveys and a telephone verification.

According to G.A.A. Executive Director Les Nadeau, the first UMO mailing in January, 1975, brought an encouraging return from 33.8% of alumni. The second survey was mailed April 7 and the immediate response brought the percentage level to 41%.

The collection of surveys will continue through June 30, at which time the data will be delivered to the publishing company.
THE SECOND CENTURY FUND

With increased alumni activity in many areas of the country, the Second Century Fund passed the halfway mark of the $3.5 million goal in July.

The $500,000 bequest from the estate of J. Russell Hudson '14 which will be added to the Performing Arts Center, combined with $25,000 which is being generated from received contributions, makes a total of 2.15 million.

"The next six months of the alumni phase of the campaign should essentially complete our goal—that is if everyone does their share," said Donald P. Corbett '34, National Alumni Chairman.

In Maine, activity was centered around Sagadahoc and Washington counties. On June 4, Sagadahoc chairman, Frank W. Hagan Jr. '33 of Bath, organized a kick-off meeting in Bath with his co-chairman for the area, Arthur F. Mayo III '58 and Mrs. Evelyn W. Desmond '47.

On June 16 in Calais, Francis C. Brown '43, Washington County Chairman, ran a kick-off meeting with his area workers.

Three thousand miles away in the Far West, the Second Century Fund has begun to organize for the solicitation of over 1,500 alumni living in the coastal states, which are under the leadership of Regional Chairman, Harold A. Gerrish '40 of San Francisco.

On July 14, 15, 16 and 17, orientation meetings were held for the San Diego, Los Angeles, San Francisco and Sacramento areas.

The state of Washington began its drive at a dinner meeting in Seattle on July 18 under the key leadership of Mr. and Mrs. J. E. Colcord '44 and '48 of Seattle.

Dr. C. Seymour Card, Jr. '51 of Moscow, Idaho is acting as area chairman in the personal solicitation of alumni in Idaho, the extreme northeast of Washington and the western tip of Montana.

At a meeting in Denver, Colorado on July 28, alumni fund volunteers, State Chairman Donald E. Crossland '45 and Regional Chairman Alvin S. McNeil '44 of Houston and Dr. Harold L. Chute, Director of the Development Office, met to plan the wrap-up of the Colorado campaign.

The Greater Worcester campaign under the leadership of Preston W. Hall '54 of West Boylston held meetings on June 1, 2, 6 and 8 in four separate campaign areas.

Greater Boston's 650 alumni are being organized by Terry A. Dorr '74 of Malden, who held an orientation meeting for her team captains on June 24. They are Fritz Bigney '74 of Boston, Susie Pierce '74 of Newton, Peter Rattigan '74 of Brookline, Katy Young '75 of Dover, Nathaniel Doten '40 of Framingham, Mr. and Mrs. Frank Butler '57 and '54 of Topsfield, Penny F. Blaisdell '68 of Marblehead, Frank Koch '71 of Stoneham and Mr. and Mrs. David Simard '65 and '65 of Norwood.
