Biographical / Historical

Much of the material in this record group is related to testing animals for diseases, particularly pullorum disease which is an infectious poultry disease caused by the bacterium salmonella pullorum. Pullorum testing began in Maine in 1921 under the supervision of Maine Extension Service (now known as the Cooperative Extension Service) poultry specialist O. M. Wilbur. Working alongside the Extension Service were faculty and staff from the University of Maine's Department of Bacteriology and Veterinary Sciences (part of the College of Agriculture), including Dr. F.L. Russell and Florence Chandler.

In 1922, Elmer Reeve Hitchner was appointed associate professor of bacteriology. The Department of Bacteriology and Veterinary Sciences first officially tested for pullorum disease on September 30, 1930 and produced accredited lists for flocks tested that didn't have the disease. In 1933, the Department was renamed the Department of Bacteriology and Hichner was appointed department chair.

In 1938, Maine adopted the U.S. Department of Agriculture's National Poultry Improvement Plan. The University of Maine was the official state agency for the administration of the plan and through its Pullorum-Typhoid Testing Service was responsible for testing flocks for thypoid and pullorum diseases.

Professor Hitchner would oversee the Pullorum-Typhoid Testing Service until his retirement in 1959 (Hitchner Hall is named in his honor), at which point the Service was placed under the supervision of Dr. John Franklin Witter, Head of the Department of Animal Pathology who had come to the University in 1932 as a professor in animal industry. Dr. Harold L. Chute, professor of animal pathology was appointed program director; a position he would hold until 1969 when he became the University's Director of Development.

Roscoe F. Cuozzo was appointed the director of pullorium laboratories in 1965. Cuozzo was also the director of the American Rabbit Breeder Association and was employed by the Extension Service as their rabbit consultant and hatchery inspector (1939-1943).

In the 1968-1969 academic year the department was renamed the Department of Animal and Veterinary Sciences with Stanley D. Musgrave appointed as its chair. Dr. John Franklin Witter retired as professor of animal pathology in 1971 with Witter Farm named in his honor. In 1986, Donald D. Stimpson replaced Musgrave as department chair. Donald D. Stimpson (1986-1990) and Robert G. Hawes (1991-1996) both served as chairs of the department.

By the 1997-1998 academic year the Animal and Veterinary Sciences was a program in the Department of Biosystems Science and Engineering with Charles R. Wallace as its chair. In 2003, Martin R. Stokes with appointed chair. For the 2013-2014 academic year, the Animal and Veterinary Sciences program was no longer its own department, and was instead part of the School of Food and Agriculture.

Scope and Contents

The records mainly contain textual information created and curated by the University of Maine Department of Animal and Veterinary Sciences (also known as the Department of Bacteriology and Veterinary Sciences and Department of Bacteriology), but there are photographs from Pullorium disease testing.

The record series Conference Proceedings & Publications includes copies of various conference proceedings regarding pullorum and avian diseases, material on the U.S. Department of Agriculture's National Poultry Improvement Plan, Maine's contribution to the Plan, lists of approved flocks, American Rabbit Breeder Association yearbooks and programs, various articles regarding rabbits, Roscoe F. Cuozzo's thesis on the study rabbits, and various miscellaneous brochures and reports.

The record series Disease Record Cards contains pullorum disease records for various flocks of birds across Maine.

The record series Hatchery Station Testing Records contains copies of Sanitation Reports that include the results of various tests of air quality samples for bacteria and molds.

The record series Mycoplasma Synovia Test Records contains the results of various tests.

The record series Pleuropneumonia Like Organism (PPLO) Test Records contains the results of various tests.

The record series Pullorium Disease Testing Summaries includes summary reports of various pullorium disease and "white diarrhea work" carried out by the Maine Extension Service (now known as the Cooperative Extension Service) and the University of Maine's Department of Bacteriology. Also, photographs of Pullorum Testing and copies of Extension Service brochures describing research.

The record series Mycoplasma Gallisepticum Testing Records contains results of tests carried out at farms across Maine.

[^ Return to Table of Contents](#)

Arrangement

The Records Group is broken down intellectually into the following record series: 1. Conference Proceedings & Publications, 2. Disease Record Cards, 3. Hatchery Station Testing Records, 4. Mycoplasma Synovia Test Records, 5. Pleuropneumonia Like Organism (PPLO) Test Records, 6. Pullorium Disease Testing Summaries, and Mycoplasma Gallisepticum Testing Records. Physically the boxes are arranged by subject. Some file names and dates were changed to make them more meaningful and to correct errors. Material was separated and divided into multiple sub-folders where necessary. Material was rehoused into archival quality storage.

Accruals

Accruals from the School of Food and Agriculture which features an Animal and Veterinary Sciences program are anticipated.

Conditions Governing Access

Kept at Fogler Library's offsite storage facility. One week's notice required for retrieval. Personal identifiable and sensitive information will be redacted before release.

Conditions Governing Use

Information on literary rights available in the Raymond H. Fogler Library Special Collections Department.

Processing Information

Processed by Matthew Revitt and student worker Julia Haberstick, July-August 2018, Raymond H. Fogler Library Special Collections Department. Processing involved a collection survey and intellectual arrangement into series and the creation of this finding aid. Material was rehoused into appropriate archival folders and the boxes and folders numbered and titled using information from ArchivesSpace.
