A brand-new customer used the telephone this morning. Betty Sue called up that nice little girl around the corner.

Every day, hundreds of Betty Sues speak their first sentences into the telephone. Just little folks, with casual, friendly greetings to each other. Yet their calls are handled as quickly and efficiently as if they concerned the most important affairs of Mother and Daddy. For there is no distinction in telephone service. Its benefits are available to all — old and young, rich and poor alike. To Betty Sue, the telephone may some day become commonplace. But it is never that to the workers in the Bell System.

There is constant, never-ending search for ways to improve the speed, clarity and efficiency of your telephone calls . . . to provide the most service, and the best, at the lowest possible cost.

Bell Telephone System
"A Democracy in Scholarship"

In the year 1897, as the college term at the Maine State College of Agriculture and Mechanic Arts was drawing toward its final months, a small group of senior students in a corner room in the front of Old Brick Hall discussed an idea. A young man by the name of Marcus Libby Urann, a serious, far-thinking fellow, was explaining it to the others, for his was the idea.

It seemed to him important that, at Maine, high scholarship, in whatever line of endeavor, should be recognized; that the men seemingly best fitted for research and theoretical work should be given recognition and respect in the eyes of those with a more practical turn of mind, more fitted for application. He thought of a new honor society. "I hoped," he says, "that this society would be the means of showing the interdependence of these two philosophies of life, while at the same time broadening each." Also, "I wanted to bring the various groups of students nearer together and it seemed to me that these men would be drawn from all classes and all groups and all societies, hence would have a leveling and social influence." Such was the idea being expounded to a few of his classmates and friends.

Faculty members and President Abram W. Harris had approved the idea. The students, too, thought well of it. Someone suggested that Mr. Urann draw up a constitution and by-laws. "This," he says, "I did one night while sitting in my old room, the second floor, a corner in Oak Hall."

From this small beginning was born, forty years ago, the honor society of Phi Kappa Phi, now a national fraternity of recognized importance in the field of education, breaking down barriers of college and subject, standing, as Dr. Roy M. Peterson of Maine, editor of the Phi Kappa Phi Journal, has said, for "A Democracy in Scholarship." Today with 49 chapters in 36 states, Hawaii, and the Philippines, Phi Kappa Phi, once only the idea of Marcus Urann, looks back over forty years of vigorous growth to the University of Maine as the place of its nativity.

Early Days

The society was thought of at first, quite naturally, as a local one. At its founding in 1897, it took the name Lambda Sigma Eta; in addition to Mr. Urann, Charles H. Farthing and Howard E. Stevens, all members of 1897, are to be regarded as the original founders; ten members of that class were finally elected to membership, after the faculty had approved and supported the plan. These ten original members were: William T. Brastow, Stanwood H. Cosney, Lindsay Duncan, Charles H. Farthing, Perley F. Goodridge, William L. Holyoke, Andrew J. Patton, Joseph W. H. Porter, Howard E. Stevens, Marcus L. Urann. From the faculty were elected President A. W. Harris, Professor G. H. Hamlin, and Professor J. N. Hart.

In 1899, two years later, the name of the society, still a local one, was changed to the Morrill Society in honor of the author of the Morrill Act of 1862 which created the Land Grant Colleges. The next year, however, the name was changed once more to its present one, and through the interest and enthusiasm of President Abram W. Harris began its national growth. In his office, then in Coburn Hall, therefore, the real founding of Phi Kappa Phi as a National Honorary Fraternity took place. The occasion was a meeting of the Association of American Agricultural Colleges, during which President Harris interested the presidents of Pennsylvania State College and the University of Tennessee; chapters were formed at these institutions and shortly afterward at Massachusetts Agricultural College. A constitution and ritual of initiation were prepared, with the cooperation of Dr. James S. Stevens. Dr.

(Continued on Page 10)
THE SUMMER SESSION, A Historical Sketch
by Dean Emeritus James S. Stevens

Among the many innovations which came from the fertile brain of President A. W. Harris was the establishment of a summer session. In the catalog for 1895-1896 there appeared an announcement that, beginning June 15, 1896, there would be held a summer school running for three weeks. It was to be under the joint control of the president of the college and the superintendent of common schools. I am sure it will interest the reader to print a certificate given to Superintendent Frank A. Day, now of Princeton, Maine, who attended the sessions of 1896 and 1896.

STATE OF MAINE,
EDUCATIONAL DEPARTMENT,
AUGUSTA, MAINE

This is to certify that Frank A. Day attended the summer school at Orono during the year 1896, and is awarded this certificate as a testimonial of professional skill and faithful attendance. In witness whereof we have hereunto subscribed our names this second day of September, A.D. 1896.

A. W. Harris, President of Maine State College.
W. W. Stetson, State Superintendent of Common Schools.

There were 23 students in attendance at this first session. During the next two years it was carried on by the college alone with 158 and 123 students, respectively. It was then discontinued until 1902, when it was resumed with the coming of President Fellows. That year 13 students and in the following year 19 students were registered. No notice appeared in the college catalog, but in 1904 the school was advertised to begin June 25 and run for five weeks. A tuition fee of ten dollars was required for the first time. Prospective students were asked to apply to the writer of this article for information about the school. In the 1904-1905 catalog the summer faculty was listed, and in the succeeding year the courses were outlined. Between 1907 and 1917 the attendance numbered around one hundred. In 1917 and 1918 the session was omitted because of war conditions; but this was the time when Bates College was foresighted enough to start a summer school.

In 1920 Dr. Aley took charge of the school and a special bulletin was sent out for the first time. There were 129 students registered. The following year the writer resumed the directorship and continued until 1925. The number of students varied from 250 to 300. In 1925 the duties connected with the deanship of the College of Arts and Sciences had considerably expanded, and since Mr. Stevens was carrying a rather heavy teaching schedule, President Little relieved him from the directorship of the session. Dr. Milton Ellis took over the work and continued until 1930, when it passed to Dr. Roy M. Peterson, the present director. During these years there has been a steady increase in attendance, and in 1935 it reached 473, and last summer it reached the maximum registration of 527.

During the early years of the summer session the work of the teachers was largely a labor of love. Very small salaries were paid and for some years there was no compensation at all. Dr. Aley proposed in 1920 that the faculty take on the summer work as part of their duties. This proposal met with no enthusiasm and it was not pressed. In recent years the teaching salaries have been quite satisfactory and many educators of high standing have been brought from other institutions. Among these may be mentioned Dean Hoving and Dr. Slater, of Rochester; Dean Lebricks, of Syracuse; Professor Hinton, an English economist and lecturer in a large number of universities; and a number of outstanding professors in the department of education.

Special attention should be called to the uniformly high standard of the summer session requirements. It has always exacted a full equivalent of work for credits earned, and the campus atmosphere has been characterized by a spirit of intellectual activity.

Dr. Wilber E. Bradt
New Head of Chemistry and Chemical Engineering

Dr. Wilber E. Bradt, professor of chemistry and head of the department of chemistry and chemical engineering, is one of the newcomers to our faculty. He came to this extreme northeast corner of the United States from the furthest northwestern state, being called to Orono from the College State of Washington where he was on the faculty for six years.

Following his graduation with a B.A. in 1923 from Indiana University, Mr. Bradt took his master's degree in physical chemistry the next year and his doctorate in organic chemistry in 1926. Since then he has published some 35 research papers in all fields of his science, but more especially in organic and electro-chemistry, and a textbook, "Study Units in General Chemistry." His most recent studies, which have been published by the Electro-Chemical Society, have been concerned with the electro-deposition of metals in industrial production. A paper on a purely organic topic is now awaiting publication in the Journal of Organic Chemistry. He is a contributing editor of the Journal of Chemical Education.

Prof. Bradt is a member of the National Committee for the Revision of the Constitution of Phi Beta Kappa. He is also a member of Sigma Xi.

As an undergraduate Prof. Bradt, who stands six feet and weighs about 200 lbs., won his letter as a member of the Indiana swimming team. He still keeps fit playing handball and tennis.

Continuing an interest in military activities since his S.A.T.C. days at Indiana, Mr. Bradt has been a member of the National Guard in Indiana and Washington and has now affiliated himself with the 152nd Field Artillery in Maine. During the past ten years he has been an officer. He was a first lieutenant, holding a certificate for a captain's commission in the 161st Infantry, when he left Washington.

Prof. Bradt is introducing certain modifications in the present curriculum in order to differentiate the training of chemists and chemical engineers. As a consultant to several industrial firms in the field of electro-chemical production, Prof. Bradt is in close touch with the opportunities for employment of college graduates. Having already found places for several of this year's seniors, he is confident that the prospects for next June's graduates, especially in chemical engineering industries, are bright.

NOTICE

Copies of the February and March Alumni are much needed at the Alumni office. Alumni not caring to keep theirs are earnestly requested to forward them to the Alumni Secretary.
Dr. Patch of America

The cryptic, italicized words Patchia or Thecaunia patchii or even Eriosema patchia might to most of us seem of small moment and little fame, entered in a ponderous entomological volume, but in the case of Dr. Edith Patch, M.S., 1910, Head of the Department of Entomology at the Experiment Station, they are indicative of a lifetime of devoted, painstaking, and brilliant scientific research in her chosen field. Dr. Patch, who will retire from active service on June 30 this year, completing thirty-four years of service with the Experiment Station, is an authority in the study of aphids, having discovered, and described habits, characteristics, variations, food preferences, and new species in this large family of common insects; as a result, for her have been named one new genus, and several species. So widely has her work in this study been recognized by her scientific colleagues throughout the world, that her advice and authority are sought from all corners of the earth; in scientific books in Europe, Asia, Africa, she is spoken of as “Dr. Patch of America.”

Entering her laboratory and study in the corner of Holmes Hall which has been her scientific workshop for thirty-four years, one meets a most modest and friendly person. Fame and success rest lightly on Dr. Patch’s spirit. In her warm and quiet voice, laughing easily, very human, she will lightly speak of the work of months and years, painstaking study, including her manuscript now nearing completion, Food Plant Catalogue of the Aphids of the World in the preparation of which she has grown from a little known Minnesota school teacher to a world renowned scientist. Yet this work alone has not been enough for her spirit. As an undergraduate in the University of Minnesota she majored in English; when a senior she won a prize for the best sonnet written in one of her courses. Her friends felt that she would follow the field of literature as a life work. If she has the mind of a scientist, she has the soul of an artist. This is the basis of her unique personality and charm.

Scientist

For many years after leaving the University of Minnesota, her deep love for her science held precedence in her life. She herself explains that she liked to write and was deeply interested in nature, but felt the urgent necessity of a technical background from which to present the truth of her subjects. Soon she found that she liked Entomology so deeply that she determined to follow it as a career, even though at that time “it was not a work for women” as she was told over and over again by the agricultural stations to which she applied in nearly every state in the Union. For two years she taught school in Minnesota, trying again each year to find the coveted opportunity. Finally in 1903 she heard from Maine. Here Dr. Charles Dayton Woods, Director of the Agricultural Experiment Station, became interested in the Minnesota school teacher with the strange determination to become an entomologist; to him it mattered little whether his workers wore “trousers or skirts so long as they did the work.” Would she be willing, he asked, to come to Orono as a volunteer assistant without salary to organize a Department of Entomology in the hope of being its Head the next year? This, he probably thought, will tell us if her idea is just a young girl’s notion or a scientist’s determination. When she accepted without hesitation, enthusiastic for the opportunity, Dr. Woods, convinced, arranged for her to teach a class in Entomology and in Agricultural English with a regular salary. Thus did Dr. Edith Patch in 1903 become the second woman on the faculty of the University of Maine. At the time of her appointment at Maine one agricultural writer said it was a mistake to appoint a woman as an entomologist because “a woman could not climb a tree.” Another criticised her appointment on the basis that she would “have a hard time catching grasshoppers.” To which remark Dr. Woods replied that he thought it would be a fairly lively grasshopper that could get away from Miss Patch.

Her progress since that time has been sufficient answer to all criticism. In 1904 she became head of the Department of Entomology which she had organized, and her active teaching duties ceased. From the University she received her M.S. degree in 1910. In 1911 she obtained her Ph.D. at Cornell, thus fulfilling an old desire by studying at that institution under Dr. Comstock. When a girl, she had bought one of his books on insects with money won in writing a prize essay on butterflies and became at once an ardent admirer of his work.

Her technical publications, in addition to the life work on aphids now nearly completed, include nearly a hundred titles. During 1927 she was invited to England to do research work at the great Rothamsted Experimental Station in Harpenden, Herts. In 1930 she was chosen as the first woman president of the Entomological Association of America, a notable scientific recognition. This year she has been elected President of the American Nature Study Society. Her memberships in other learned scientific and honorary societies make a long and impressive list.

Author

There is, however, another side to Dr. Patch’s life, for as we have said, she has the soul of an artist, and science alone has not been enough for her vigorous and beauty-loving spirit. It is natural that her love of nature, her love of truth, and her love of writing should supplement each other; her delightful, accurate, and charming nature books for children to which she has devoted her spare time for nearly fifteen years have an important place in the field of scientific literature. In writing nearly twenty of these volumes as well as some eighty articles for various periodicals on similar subjects, Dr. Patch has fulfilled the prophecies of her teachers and friends who believed her fitted for a career in literature.

Such books as the four “Holiday” volumes—Holiday Hill, Holiday Pond, Holiday Meadow, and Holiday Shore—or the six grade readers for children from the first through the sixth years of school, or her latest publications, Mountain Neighbors and Desert Neighbors, written in collaboration with Dr. Carroll Lane Fenton are important contributions to the child’s education in nature and science. Nothing learned by a child from a book (Continued on Page 11)
College President

John R. Tunis, the popular magazine writer, has been so unkind and appeared to be so biased and unjust, if not misinformed, in some of his articles on college subjects, that one is tempted at once to discount his present offering, "College President," in the February Harper's. He has in the past belittled alumni secretaries, blasted college athletics, and rather ridiculed the idea of alumni attachment to their Alma Mater, if not questioned outright the value of college education.

In this latest article, "College President," however, Mr. Tunis has set forth many of the factors and problems which confront college presidents of today, especially perhaps those of state universities. Few people other than those who are close to the administrative head realize the multiplicity of demands, considerations and situations which come up almost daily. Some are so ridiculous that one might think they could be dismissed unceremoniously. But not so. Each must have its attention. Mr. Tunis might have portrayed other knotty problems which are terrifically time consuming and which require extreme patience and tactfulness.

The "Mr. Brown" depicted as the composite young president is not entirely as we would conceive him nor do the illustrations cited fit the University; nevertheless for those who would like to get a better insight into the problems of the College President, we would suggest reading this article.

A Distinguished Record

With the retirement of Dr. Edith M. Patch, the Agricultural Experiment Station and the University will lose the services of one of its ablest scientists. While her brilliant work has won for her, personally, a position of leadership, it has added also to the prestige of the University.

Because of the fact that but a limited number of undergraduates have had any contact with her, Dr. Patch is perhaps not so well known among our alumni. Had she been on the teaching faculty, she would have won a place of affection in the hearts of those who might have been in her classes. Her congenial, co-operative attitude, as well as her mastery of entomology and allied subjects, would have been an inspiration which would have caused them to work with enthusiasm and real interest. Few have risen to accomplish prominence both as a scientist and an author. And with it all, she is extremely modest.

Entirely aside from her profession achievements, she has been a fine member of the University family. Her interest has been in the whole University. Indeed she is one of the very few, if not the only, advanced degree graduate of Maine who has year after year been actively identified with the Alumni Association and its activities.

We congratulate Dr. Patch upon her excellent service to Maine and to her profession and wish for her continued delight in her retirement.
George Hitchings '37, of Orono, a senior in the Department of Economics, was one of thirty students in the country to receive the award of a scholarship from the National Institute of Public Affairs providing him with a year's opportunity for what is termed an "internship" in one of the departments of the Federal Government at Washington. He will serve as a full-time, non-salary assistant to an official of the government. The scholarship will pay all his necessary expenses.

This opportunity to observe and participate at first hand in the business of government is made available to thirty outstanding seniors in the country through the Rockefeller Foundation. The recipient of the scholarship has his choice as to the department under which he wishes to serve.

Hitchings, a grandson of former Professor Edson F. Hitchings '75, State Entomologist for six years and Professor of Horticulture at the University, is an outstanding member of the graduating class. Last fall he was one of three students selected from Maine to represent the University as a candidate for a Rhodes Scholarship; he is a recipient of one of the University Trustee Scholarships. He is a high ranking student, specializing in the field of banking. He has also been active in athletics, serving as captain of the tennis team and receiving his varsity letter in track.

Arm the Man, a three act play by Bernard Shaw, was presented by the Maine Masque on Wednesday and Thursday evenings, March 3 and 4. With Faith Shesong '38, of Portland, in the lead as Raina, Robert Hussey '37, of Bangor, as the soldier Bluntschili, Elwood Bryant '37, of Bangor, playing the part of the supposedly model soldier, Saranoff, the play was admirably acted. One of the best character parts portrayed recently was given by Robert Laverty '38, of Newton, Mass., as the coumfrified, hen-pecked Major Petkoff. Eva Chase, of Lime- stone, a newcomer to the Masque, presented a fine picture of Louka, the ambitious serving girl.

Hebron Academy was the winner of the University freshman scholarship cup this year, in an annual competition based upon the first semester averages of all graduates in full standing in the freshman class from each secondary school that is represented by three or more students. Bangor High School placed second.

The debating teams of Maine have been busy this month with numerous meets participated in by both men and women students. On March 15 the American International College of Springfield, Mass., debated the subject of government ownership of utilities; on Tuesday, the debaters met the University of Florida on the subject of Congressional regulation of wages and hours in industry. The girls' team was represented by Leona Runion and Ruth Gray on Wednesday, March 17, against Bangor High School in a practice debate, and on Thursday opposed a girls' team from Bates.

Delta Pi Kappa, the University Music Club, sponsored the Annual Music Night on Friday, March 19, under the direction of Professor Adelbert W. Sprague '05. The combined efforts of the University band with sixty players, the Chorus with seventy singers, and the Orchestra with thirty-five presented a fine program of instrumental and vocal selections. Soloists on the evening's program were Gerald Hart '38, of Brewer, trumpet; Ruth Trickey '40, of Pittsfield, soprano; Marion Hatch '38, of Melrose, Mass., cello; Albert Salkind '40, of Brooklyn, N. Y., violin; and a Spanish dance by Frances Reynolds, of the Women's Physical Education Department.

Twelve students were this month elected to membership in Phi Beta Kappa, oldest honorary fraternity in the country; the members elected included eight seniors, two juniors, and two alumni.

The seniors who were elected this year are: Paul Burke, of Bangor; Faith Folger, of Fryeburg; Walter Greene, of Bradford, Mass.; George Hitchings, of Orono; Flora Lutz, of Old Town; Marjorie MacKinnon, of Topsham; Josephine Snare, of Hampden Highlands; and Ralph Wentworth, of Bangor. The two junior students were: Francis Bradbury, of Brewer, and Mildred Dixon, of South Eliot. Two alumni from the class of 1922 were elected, Doris P. Merrill and Bernice S. Smith.

Members of the Women's Physical Education classes in modern dance gave an exhibition of studies and dances under the direction of Miss Frances Reynolds, Tuesday, March 23, in the Little Theatre. Several studies were presented by the advanced class; a dance, "Moon and Tide," was given by the beginners' class; while solo dances and studies were done by Ruth Leavitt, Barbara Whittridge, Mildred Walton, and Henrietta Holmes.

The Women's Student Government Association has made the following nominations for its officers for the coming year: president, Mary Wright, Georgia Taylor; vice president, Ruth Pagan, Eleanor Crockett; secretary, Edna Louise Harrison, Madge Stacy; treasurer, Alice Ann Donovan, Elizabeth Jones, Elizabeth Kruse.

The following nominations were made for the Portland Alumni Watch awarded by the Portland Club of University of Maine Women to the woman member of the graduating class who in the opinion of students and University Administration has done most for the University: Elizabeth Asby, Faith Folger, Madeline Frazier, Josephine Snare, Carol Stevens, Alice Stewart, and Elizabeth Story.

The next and last Masque play will be "The Petrified Forest" by Robert Sherwood with Clark Kunsy '39 taking the leading role, that of Alan Squire which was played by Leslie Howard in the recently released movie version.
Placement Bureau Sees Increase in Employment

Employment activities at the University so far this year have given every indication of a very encouraging increase over recent years, according to information gathered by the director during the first quarter of the year. Employment has already been offered to nearly 40 members of the senior class through interviews conducted on the campus by national business concerns, with several more offers anticipated within a few weeks.

Up to this time representatives of 12 companies have visited the University for the purpose of interviewing seniors for employment. In addition, a great deal of active employment recommendation is being carried out by correspondence through the bureau and a considerable number of interviews have been arranged for seniors during the spring vacation.

From the number of companies interested in employment this year and the general increase in the numbers employed by individual companies, the bureau anticipates the most satisfactory placement year since 1930.

Through individual interviews with all interested members of the senior class, the director has determined the interests of the seniors and information relative to their qualifications for various types of employment. Approximately 75 percent of the class will this year be registered with the Placement Bureau, in addition to a number of graduate students, to make the heaviest registration since the beginning of the bureau in 1935.

The companies which have so far visited the campus are—January: Federal Land Bank of Springfield, Ingersoll-Rand, Bausch & Lomb Optical Company; February: E. I. DuPont de Nemours, Scott Paper Company, Eastern States Farmers Exchange, Swift & Company; March: Babcock & Wilcox, W. T. Grant Company, Montgomery Ward, General Electric Company, Liberty Mutual Insurance Company. From three to five additional companies are at present planning to visit the campus following the spring vacation, making a total number of such visits far in excess of any obtained in recent years.

Rollo Walter Brown, nationally known author and lecturer, spoke at the University during the morning and in the evening of March 18. His first subject was "The Romance of Being a Student," in which he gave undergraduates some sound advice, presented in amusing, easily remembered form. In the evening he gave a lecture entitled "Next Door to a Poet."

Good Progress Reported On Hart Scholarship Fund

The Hart Scholarship Fund being raised in honor of Dean James Norris Hart, '85, is, according to the committee in charge, progressing very well. Over $3000 have been received for this fund up to this time. Some 300 contributions, ranging from 50¢ to $100 have been coming in from former classmates, students, and faculty associates of Dean Hart. Gifts have been coming in quite steadily with no noticeable tendency to drop off sharply as yet. It is hoped that the goal set at $5000 will be exceeded before the first of May.

The purpose of the fund is to establish a scholarship to perpetuate the name of Dean Hart who for fifty years has given devoted and helpful service to the University. The plans of the committee in charge under the chairmanship of Fred D. Knight '99, of Boston, include printing a special book of tribute to be presented to Dean Hart at commencement this year. This book will contain the signatures of every contributor to the fund, large or small, with no indication of the amount contributed. The general purpose is to receive all gifts as a personal tribute to the Dean without distinction as to the amount donated.

One of the most gratifying features of the scholarship raising efforts is a continual receiving of letters from old friends and old classmates full of warm praise and unfailing esteem for their former teacher, dean, and friend.

Charles B. Adams, '13

Unanimously elected a Superior Court Judge of Vermont at a joint session of the State Legislature in January, Charles B. Adams, of Waterbury, Vt., graduate of the Law School, adds to a record already distinguished for public service as Town Clerk, County Attorney, State Senator, and State Representative.

Mary Ellen Chase '09, Professor of English at Smith College and one of Maine's outstanding literary alumnae, will be a speaker at general assembly on the campus April 16. She will be on the campus for two days, April 15 and 16, and will speak also the evening of the first day.

Two New Associations Join the "High Ten" List

Alumni of the Maryland and Western New York Associations have put their organizations in the high ten list of dues paying groups. Lehigh Valley maintained its position of leadership; Chicago moved up a notch as did Missouri; while Philadelphia stepped up two places. Androscoggin Alumnae and Northern Ohio Associations were forced out by the newcomers. Of the big associations Boston with 26.1% and New York with 24.5% top the list.

Commencement Committees Appointed

Committees to take charge of the various details of Commencement this year have been appointed. A faculty committee chosen by President Hauck, alumni committee by George S. Williams, president of the General Alumni Association, and a student committee elected by the seniors, make up the entire list.

Members of the alumni committee are: Guy A. Hersey, chairman, '00, of Bangor; Mrs. Barbara D. Hitchner, '20, of Orono; Mrs. Rena C. Bowles, '21, of Bangor; and Prof. Walter W. Chadbourne, '20, of Orono. These alumni appointed by Mr. Williams are all members of reunion classes this year.

The faculty committee appointed by President Hauck consists of Prof. Harry Watson '18, chairman, Prof. William E. Barrows, '02, Professor Benjamin C. Kent, '12, and Professor Dwight Demens, '19.

The senior class recently elected George Seth Williams, of Augusta, from among their number as chairman of the senior commencement committee.

Varsity Track

Maine 92½—Colby 24½

By taking every first place on the card, breaking six Colby college records, and equaling others, the Maine track men left no doubt of their superiority over the Colby squad at Waterville on February 27. Headed by high-scorer Johnny Gowell, of South Portland, who picked up 18 points by winning the 40-yard dash, the 45-yard high hurdles, and the broad jump, the Pale Blue team put on a real show of ability.

In addition to his high scoring, Gowell was also responsible for setting two new Colby records, in the broad jump and in the 40-yard dash, and equaling the time of the 45-yard high hurdles—23 ft. 3½ in. for the jump, 4½ sec. for the dash, and six seconds for the hurdles. Sid Hurwitz, of Roxbury, Mass., was another outstanding performer, winning the 300-yard dash in the record-equalizing time of 34½.

Maine 64½—Bates 52½

By virtue of a nine-point sweep in the high jump, one of the last events to be completed, added to six other first point places and consistent strength among the second and third place men, the Maine track squad turned back a fighting and able Bates team on March 6. One record was lowered during the meet when timber-topping Johnny Gowell, of South Portland, pulled the 45-yard high-hurdle mark down to a new low of 5½. Competing in the fifty-yard dash shortly afterward, however, Gowell, who has been Maine’s outstanding threat in both hurdles and the broad jump, pulled a leg muscle which kept him from trying for a new broad jump record.

The meet, which saw-sawed all the way until the last few events was opened in the visitors’ favor when the great performance of Anton Kishon put the Bates team three points ahead by winning firsts in all three weight events. Only the general strength of the Maine squad as a whole enabled it to win, because the Bates men totalled eight firsts against six for Maine.

Northeastern 59⅔—Maine 57⅓

In one of the closest, best contested, and at times most spectacular meets to be staged in the field house in years, a star-studded Northeastern track squad fought off a weakened but determined Maine team on March 13. Handicapped by the absence of Johnny Gowell, South Port-

22 Colby at Orono
24-25 State Tournament at Orono

land hurdle and broad-jump ace who pulled a leg muscle the previous week, and Johnny Murray, of Bath, star dash man who was unable to compete because of illness, the Maine team put up a fighting bid for honors that left the outcome uncertain until the very last event, the 300 yard dash.

The men from Boston were forced to their limit to keep up with Maine and to finish with the slender margin of 1⅔ points advantage. The outstanding work of Sid Hurwitz, brilliant runner from Roxbury, Mass., in winning the 70 yard dash, the 600, and then as a climax, the spectacular 300 yard dash, the final event, brought a total of fifteen points to Maine, although high scoring honors went to Henderson, Northeastern sprinter and hurdlner, who battled Hurwitz in two events, with a total of sixteen, two firsts and two seconds.

Varsity Basketball Reports Good Season

The resumption of varsity basketball as a major sport with a regular schedule of games in the New England Conference this winter for the first time since 1929 has proved very successful, according to Ted Curtis, Faculty Manager of Athletics. The season’s result of three wins out of eight games in itself was satisfactory for the first year, and the caliber of the players' ability and the interest and enthusiasm of both student body and local fans were particularly gratifying.

Playing on the home floor, Maine was able to cope successfully with all competitors except the unusually able Rhode Island Five; Connecticut, Northeastern, and New Hampshire were defeated.

Basketball Men Honored

Dwight Lord, of Camden, guard on the varsity basketball squad, was picked as one of the guards on the first team for the All New England Conference teams selected by the coaches of the participating colleges, and Harold Woodbury, of Portland, who was graduated in February, was selected as a guard on the second team. Honorary mention was given also to big Bill Webber, of Bar Harbor, center, and acting captain Phil Rogers.

Basketball baseball prospects received a hard blow this month when southpaw pitcher, Donald Kilgour, of Lovell, a senior, was declared unable to play because of a serious attack of pleurisy. Kilgour, who with Johnny Greene, of Pomfret, Conn., and Ernie Reidman, of Auburn, both right handers, handled the brunt of the pitching assignments last year, was expected to be one of the mainstays of the Bears’ attack this season.

Prospects, however, look good for a capable team in spite of the loss of Kilgour, according to Coach Bill Kenyon; although needing to find a catcher and first baseman to fill the losses of Harold Woodbury, last year’s sluggish first sacker, and Ken Pruet, of Kittery. he will be working with a nucleus of two infielders and two outfielders from last year’s first string squad. Dwight Lord, of Camden, at third and Frank Tapley at shortstop look good to retain their old positions, and Alton Bell, of Dennysville, and Clarence Keegan, of Robinson’s, one of last year’s Olympic players, will help out in the garden.
Lehigh Valley Alumni met at the home of Paul Armstrong '21, in Easton, Pa., on March 1. A total of ten alumni and wives attended the meeting where plans for contributing to the general scholarship fund were discussed. Refreshments and general conversation concluded the evening.

Worcester County Alumni on March 2 met for bridge at the home of Dr. and Mrs. Masterson. Twenty alumni and guests were present to enjoy the bridge and discuss future plans. The annual banquet will be held this year on April 10 at 27 Mechanic Street, Worcester, with President Hauck and Alumni Secretary Crossland among the guests.

Lehigh Valley Alumni held their January meeting on the 25th of that month at the home of Mr. and Mrs. Cuylet S. Poor '27, in Bethlehem, Pa.

Southern Kennebec Alumni enjoyed the presence of Gov. Lewis O. Barrows, President Arthur A. Hauck of the University, and George S. Williams, President of the General Alumni Association, as speakers, and Frank E. Southard as toastmaster at the annual banquet and business meeting in Augusta, February 23. Other guests included Dr. Harold S. Boardman, former president of the University, and Charles E. Crossland, Alumni Secretary. One hundred one members and guests were present, many of them members of the Legislature. Officers for the ensuing year were elected as follows: G. Harris McGouldrick '23, president; Williams G. Getchell, Jr. '27, vice president; Ralph Kennison '22, secretary-treasurer.

Rhode Island Alumni will hold their annual meeting in Providence on Saturday evening, May 1. Plans are being made to have a baked bean supper. The place of the meeting will be announced shortly.

Portland Alumnae report their monthly meeting, held March 4 at the Columbia Hotel, with an attendance of thirty members and guests. Professor Ava Chadborne of the School of Education brought to the alumnae recent news of University life as guest speaker. Plans were discussed for undergraduate luncheon to be given by the Club on April 3, and for a scholarship to be made available for women students.

Boston Alumni Dinner

The annual dinner of the Boston Alumni Association will be held in the University Club, Boston, Friday, April 9, at 6:15 o'clock. The chief speakers of the evening will be Governor Lewis O. Barrows '16 and President Arthur A. Hauck, with the Hon. William R. Pattagall '84 as toastmaster.

It is hoped that delegates will be sent from nearby alumni associations, and it is expected that the occasion will prove to be the largest gathering of Maine men ever held off the campus. A program has been arranged which the Committee in charge feels will give every man present a grand time.

The Committee cordially invites any Maine men or faculty members who happen to be in Boston on April 9 to join in this gathering.

The Maine Club of Auburn-Lewiston is the oldest alumni group to be organized. It is composed of the men residing in that vicinity and has for its purpose the promotion of monthly dinner meetings. Thirty were present at the February dinner. This group will supplement the work of the regular Androscoggin Valley Alumni Association.

“A Democracy in Scholarship”

(Continued from Page 3)

Harris worked also with others to prepare a suitable motto which was put into Greek by Professor J. H. Huddleston—its meaning being that the love of learning should rule mankind. The familiar badge with its eight-rayed world was designed by President Harris himself. Commemorating the vision and enthusiasm of President Harris and the nationalization of the fraternity, the society had installed in Coburn Hall, close to the location of the former office of President Harris where the society was finally brought into being, a tablet bearing a notice of the founding.

The growth of the society has been remarkable. From the original ten students and three faculty members in 1897, there were in 1922, on the twenty-fifth anniversary, an estimated 6,000 persons enrolled; today the number is over 15,000. Marcus Urann, today a prominent lawyer and industrial leader in Massachusetts, who through his genius as an organizer in cooperative endeavor, has become the recognized leader in the cranberry industry in this country. He has every reason to recall with pride and satisfaction the results of the idea which he discussed with his friends at the Maine State College in 1897.
written by Dr. Patch will ever need to be unlearned.

Her understanding of the child's interest in nature has its beginnings in her own life. Born in the outskirts of Worcester, Mass., she spent the early years of her life in learning at first hand many of the native flowers, birds, and insects of Massachusetts. When her family moved to a Minnesota prairie farm in her eighth year, she continued her interests among the new surroundings. So varied were her collector's tastes, that her family, in desperation at being kept awake by crickets singing in the night, and by being confronted with caterpillars, little snakes, and animal pets by day, gave her a room of her own to indulge her hobby.

She still recalls her outraged anger at reading, during her youth, a silly and inaccurate nature story for children. "I do not become angry very often," she says, "but I can still feel the hurt of that story."

It was then that she determined to write accurately about nature for children. She has done much more than that, however, for she has managed to combine strict scientific accuracy with a charm and persuasiveness that give to children something of her own boundless feeling for the eternal wonder and beauty of nature. She also writes occasional poetry reflecting much of her own quiet charm.

Reading her books, articles, and poems one glimpses the fundamental outlook Dr. Patch has toward the world. Nature is her life; she brings to it a sympathetic, broad outlook that goes deeper than her scientific researches. She has taken for her domain the entire world of nature, and she is so keenly aware of the multidinous wonders and ways of that world that even the casual visitor feels instinctively a rare and splendid broadness of vision. Beyond mere learning, beyond Latin names and scientific classifications of facts, Dr. Patch has not lost a sense of deeper meanings.

Pulp and Paper Alumni Association Meeting

Thirty-nine alumni engaged in the pulp and paper industry attended the annual dinner meeting of Pulp and Paper Alumni which was held February 23 in Hotel Sheraton in New York. This is the largest attendance at any dinner which the association has ever held. Francis O'Rourke '16, secretary of the association, was in charge of the arrangements. J. N. Stephenson '17, was master of ceremonies and Dr. R. H. McKee, Professor of Chemistry at Columbia, and Prof. Paul Bray '14 were speakers. George D. Beare '11, of Bucksport, was elected secretary-chairman for the next year.

Deaths

1920

Albert Hinckley Brown, of Milford, died at his home on March 2 after a short illness. He was a native of Old Town and had for years been active in the business and civic life of that city. For sixteen years he served as manager of the Eastern Trust and Banking Co. and for twenty-five years conducted the newspaper, the Old Town Enterprise. He maintained always a keen and active interest in the affairs of the University and his fraternity, serving for years as secretary for his class up to the time of his death; he was also for two years President of the General Alumni Association. For some time he conducted a column in his paper concerned with activities of alumni of Maine. He was a member of various organizations and held during his life many civic positions.

1997

The sudden death of James A. Reynolds, of Gainesville, Florida, occurred on October 28, 1936, in that city. Mr. Reynolds had for years been Associate Highway Engineer for the U.S. Bureau of Public Roads. Details of his passing are not known at this time.

1912

Lester W. Jacobs, of Bay St. Louis, Miss., resident manager of the Lake Pontchartrain Bridge, Slidell, Louisiana, and husband of Margaret Flint Jacobs '12, author of the successful novel, The Old Ashburn Place, died suddenly on March 18 of a heart attack. Mr. Jacobs, a native of Rockland, Mass., graduated in Civil Engineering, a member of Tau Beta Pi and Sigma Nu fraternity. He served during the World War as a Lieutenant of Engineers, and was with the Army of Occupation in Germany until 1919. During the last eight years, he has been manager of the Pontchartrain Bridge in Louisiana.

1914

Lieutenant J. Strother Brooks, of Oringo, died in the Veterans Hospital of Togus on March 1 following a long illness. Lieutenant Brooks, who was a native of Orrington, served fourteen months overseas in the war as a lieutenant of Infantry in the so-called Lightning Division. Following his return from service, he was appointed instructor in drawing and designing at the University. He held this position for seven years and then entered the service of the State Highway Department where he held attained the rank of senior engineer at the time of his death. He was highly regarded in engineering circles and had been actively interested in alumni and University matters.

1923

Captain Herbert G. Pratridge, of Searsport, World War aviator, and actively identified with commercial aviation, died at the Veterans Hospital, Oteon, North Carolina, on February 21. Captain Pratridge served during the war as an inspector testing planes. He was commissioned as an expert pilot

By Classes

1877

Next Reunion, June, 1938

E. H. Dakin, of Bangor, is wintering at Fort Myers, Florida. Mr. Dakin’s picture was in the Bangor Daily News recently.

1881

Next Reunion, June, 1937

George W. Sturtevant, formerly an engineer in Phoenix, Arizona, is retired and living with a sister at Richmond, Maine.

1882

Next Reunion, June, 1937

Friends of Mr. Joseph F. Gould, distinguished attorney of Bangor, will be sorry to hear that he has been a patient in a Boston hospital where he was obliged to submit to an operation for removal of one eye which had been seriously affected and could not be saved.

1887

Next Reunion, June, 1937

Charles F. Sturtevant is located at 1215 No. Berendo St., Los Angeles, California. Plans are getting under way for a very enjoyable Commencement. John S. Williams, of Guilford, as secretary of the class, is making arrangements for this celebration of the fifty year reunion.

1896

Next Reunion, June, 1938

Paul D. Sargent, of Portland, was named a vice president of the Maine Society, Sons of the American Revolution. Mr. Sargent is manager of the Corrugated Metal Pipe Mfrs. Assoc. of New England and receives his mail at the Eastland Hotel, Portland.

1898

Next Reunion, June, 1938

Ralph Hamlin is a registered Civil Engineer and affiliated with Hewitt, Setter & Hamlin, Inc., Architects, with offices at 1200 Second Ave., South, Minneapolis, Minn.

1899

Next Reunion, June, 1937

William W. Haney is residing at 235 W. End Ave., New York City. He gives his occupation as engineer and is with the Public Utility Div., Eastern Underwriters Inspection Bureau.

H. H. Oswald is at the Berkshire Hotel, Reading, Pa.

C. C. Whitter, an engineer, is residing at 6025 University Ave., Chicago, III.

1900

Next Reunion, June, 1937

W. N. Cargill is a sales engineer with business address at 185 Devonshire St., Boston. He lives, however, at 7 Woodland St., Arlington, Mass.

Charles H. Lombard is an estimator for the Pennsylvania Railroad and is residing at 31 Isabel Ave., Glenolden, Pa.

1901

Next Reunion, June, 1937

H. H. Leonard is living at 167 Elmwood Ave., East Aurora, New York.

Alson H. Robinson is a clergyman at 1345 Highland Ave., Plainfield, N. J.
1902

Next Reunion, June, 1937
Henry E. Cole is residing at 6100 Stanton Ave., Pittsburgh, Pa.
Allen F. Wheeler, a plant engineer with W. S. Libby Co., of Lewiston, has his home on 121 High Ave., Auburn, Maine.

1904

Next Reunion, June, 1941
Louis C. Smith is living at Lake Ola, Tangerine, Florida, where he is engaged in raising flowers.
John E. Olenbaum is living at Lake Gertrude, South Winter Garden, Florida.

Scribner's

NOW A COLLECTOR'S PIECE

50th Anniversary Issue already doubled in value

It boasts such writers — past and present — as Bret Harte, Richard Harding Davis, Theodore Dreiser, Edith Wharton, Stephen Crane, Jim Tully, Ernest Hemingway, John Ames Mitchell.
Artists who enrich its pages include Howard Chandler Christy, Charles Dana Gibson, A. B. Frost, Frederic Remington, Will James, Rockwell Kent, Arthur Rackham.

HIGH PRAISE

Rochester Democrat-Chronicle. "Here is all the fun of running across an old magazine in the attic — Antiquarians of the future will pay well for it."

Washington Star. "writers and illustrators pledged to the noblest ideals."

Memorial Concourse Appeal. "For the man or woman forty and over and above we recommend a 50th anniversary number of Scribner's, for it is so composed that it reminds one of past pages of history or the place he may have watched in the writing. For the young it is a sort of a handbook on the nation as they never know it."

Plans for reunion next June are in preparation under the lead of Class Secretary, Arthur E. Silver, 360 No. Fullerton Avenue, Upper Montclair, N. J. It is predicted that this Anniversary, the first since passing the third of a century mile-post, will find a large return of grads and former members.

Distant members already are writing of their interest to know of the Reunion plans. A get-together is promised with full opportunity for renewing friendships and reliving the doings and memories of campus days. The secretary asks suggestions.

1906

Next Reunion, June, 1940
John L. Tewksbury was elected town clerk to succeed himself for the town of Camden, Maine.
James Adams Colby is a lawyer and chairman of the Trustees of Roger Williams University. Mr. Colby's business address is 508 Tremont Temple, Boston, Mass., and his residence 29 Lincoln St., Malden.

1908

Next Reunion, June, 1940
Raymond J. Smith is with the U. S. Forest Service, Northern Rocky Mountain Experiment Station at Missoula, Montana. His title is Principal Forest Ranger.

The many friends and classmates of Daniel Chase, sports official, will be sorry indeed to learn that while trying to board an express train, he became critically injured, receiving a fractured left collar bone, internal and back injuries. Mr. Chase was on his way to Norwalk, Conn., to address a Y.M.C.A. forum when he tried to get on the moving train. He was dragged some few hundred feet before the train could be stopped. A recent report has not been received but the word shortly after the unfortunate accident occurred stated that he was resting as comfortably as could be expected.

1909

Next Reunion, June, 1940
Mr. W. A. Kimball is now on the S. S. Roma as cruise lecturer for the Italian Steamship Line docks at a Mediterranean cruise which lasts until April 18th. Mr. Kimball has just finished two camp trailer books, "Touring with Tent and Trailer" and "The Trailer for Pleasure and Business."

1911

Next Reunion, June, 1939
Dr. Hill H. Cheney is in the X-Ray Dept. of the Vancouver General Hospital, Vancouver, British Columbia, having recently made a change from the Ottawa Civic Hospital, Ottawa, Ontario.

Arthur B. Richardson is Assistant Vice-President and Director of the Cheesbrough Mfg. Co., Lons., at 17 State St., New York City.

1912

Next Reunion, June, 1937
James F. Jackson is connected with George F. Hardy, Consulting Engineer, 365 Broadway, New York City. His residence is at 129 Dewey Ave., Great Kills, S. L., New York.

John E. Ash, a bookkeeper with the Bar Harbor Motor Co., resides at 22 Ash Place, Bar Harbor, Maine.

Henry H. Eastman is living at Limrick, Maine.

Lloyd E. Houghton, superintendent of St. John Operation of the Corner Paper Co., lives at 178 Leighton St., Bangor.

1913

Next Reunion, June, 1938
Dr. Forrest B. Ames, of Bangor, president of the Penobscot County Medical Association, presided at a recent meeting of this association held in February.

1914

Next Reunion, June, 1939
Professor Paul D. Bray attended the annual convention of the Technical Association of the Pulp and Paper Industry in New York the week of February 22, 1937. Mr. Bray delivered a paper on "The Refractometry of Mechanical Pulps and Its Relation to Refining."

1915

Next Reunion, June, 1938
J. E. Weeks, of 4663 Summit St., Toledo, Ohio, writes and tells us that he and Mrs. Weeks have a daughter, Barbara Jane, born June 2, 1936. Mr. Weeks is still transport master of the D. T. & S. L. R. and wishes to convey his classmates and friends hearty greetings toward their greatest success.

Omer Davian, a druggist at 1 Silver St. in Waterville, resides at 27 Summer St.

Eugene W. Goodwin is Senior Mechanical Engineer, Designing Mech. and Elec. equipment of Federal Buildings. He gives his mail and residence address at 7024 Hampden Lane, Bethesda, Md.

John A. Cyris deals in Men's Wear with business at 21 Hancock St., Boston. Mr. Cyris is probably better known to his classmates as "Jack."

1916

Next Reunion, June, 1938
Carroll M. DeWitt, formerly of Brewer, Maine, and now living in Belfast, was married to Mrs. Jessie H. Allen of Belfast, on February 27, 1937. Mr. DeWitt is employed in the federal project at Frye's mountain as a U. S. government engineer. They will make their home for the present on Bay View St., Belfast, Maine.

William M. Kincaid, of Presque Isle, was elected vice president of the Presque Isle Merchants Association.

1917

Next Reunion, June, 1938
Mr. and Mrs. Berton E. Bartlett and children who have returned to Bangor after spending several weeks with Mr. Bartlett's mother, Mrs. J. M. Bartlett, College Road, Orono, have taken a residence at 279 Pine St.

Wade L. Bridgman was named recorder of the West Brookfield Municipal Court by Gov. Barrows recently. His term does not expire until November, 1938.

Harold L. King is residing at 25 Broadway, Long Beach, L. I., New York North.

David O. Rodick is Commander of the Bar Harbor Legion which is taking up an emergency relief corps plan and some time in studying protection for Bar Harbor against fires or other calamity. They are to study fire and traffic problems.

Bryant L. Hopkins, of Presque Isle, was re-elected secretary and treasurer of the Maine Association of Engineers at the
26th annual meeting in the Falmouth Hotel, Portland, recently.

1918

Next Reunion, June, 1937

W. S. Evans, of Orono, was re-elected to the Board of Directors of the Maine Association of Engineers, the annual meeting of which was held recently in Portland.

It is with deep sorrow that we record the death of Marjorie Moul who was the wife of Arthur F. Moul. Mrs. Moul died on February 2, at Buffalo, N. Y. Mr. Moul is with S. S. Rogers & Co., 191 Dutton Ave., of that city.

Wallace R. (Phil) Ham is now working in the Augusta area of the Central Maine Power Co. His address is still 738 Main St., Bath.

Lt. Col. Frank S. Clark, an officer in the U. S. Army, is now stationed until June 30, 1937, at District No. 2, CCC, Wabanash Bldg., Pittsburgh, Pa.; after July 1 he will be stationed at Fort Monroe, Virginia.

1919

Next Reunion, June, 1937

Tom Davis of Veazie, was elected chairman of the Penobscot County Agricultural Conservation Committee at a meeting held during February.

Lt. Col. Lewis, Augusta, is a vice president of the Maine society of the Sons of the American Revolution.

The Charles A. Coffin award, the highest honor the General Electric Company bestows, was recently presented to Elmer J. Wade, research engineer for outstanding accomplishment in 1936. Mr. Wade greatly extended use of explosion protector gaps and developed testing technique in equipment for these and other protective apparatus requiring measurement of high voltage transients.

Frank O. Alley heads the medical division of the organization of the Emergency Relief Corps of Bar Harbor which is to protect and organize this town against fire and other hazards.

Seth Libby is Liaison Officer of the Bar Harbor Legion, the George Edwin Kirk Post, of the American Legion.

1920

Next Reunion, June, 1937

Clayton McCobb with a vote of 493 was named a trustee of the town of Camden at its annual town meeting held on March 8.

Robert W. Averill, forester, is with Prentiss & Carlisle Co., Inc., of 12 Hammond St., Bangor. He is living at 118 Royal Road, Bangor.

Corinne M. Barker is at the Hotel Barbison Plaza, 101 West 58th St., New York City.

S. M. Currier is a buyer for Montgomery Ward in New York City. He gives his residence as 143-17 38th Ave., Flushing, L. I., New York.

Gertrude D. Peabody, Dean of Women at Temple University, resides at 1510 N Broad St., Philadelphia.

1921

Next Reunion, June, 1937

Wilfred A. Taylor is an engineer for the General Electric Co. at 140 Federal St., Boston. His residence—71 Winthrop Ave., Reading, Mass.

Paul F. Corbin is vice president and director with the L. E. Carpenter & Co., Inc., Pyroxylin coated fabrics, with headquarters at 444 Pelinghuyzen Ave., Newark, New Jersey.

Andrew Adams, resident engineer in the Bridge Division of the State Highway Commission, is living at 4 Dayton St., Augusta.

Dr. Frank E. Barton is a surgeon and has his business at 15 Bay State Road, Boston. His residence—60 Colbert Rd., West Newton, Mass.

1922

Next Reunion, June, 1941

Paul E. Murphy is connected with Falvey Waddell & Co., Inc. (Investment Securities) of New York City and is making his headquarters at 465 Congress St., Portland, Maine.

1923

Next Reunion, June, 1941

It looks as though the Secretary would have to take the offensive again in grubbing for news, so it seemed a moment ago, on examining the files, however, the following information came to light:

Stanley Hall, Associate Professor in Mathematics, University of Illinois, is one of our many members who hold a Master's degree and teach.

Roland L. Wilkins is Principal of Weld High School, Weld, Maine. He has studied two terms and one summer term at Massachusetts Agricultural College, and in 1928 took the coaching course at the summer session of the University of Maine, for, like many other teachers, Wilkins not only teaches mathematics and science, he coaches as well.

Percy Johnson is Professor of Biology, Missouri Valley College, Marshall, Missouri. Directly after graduation in 1925, Percy became graduate assistant in Biology, Syracuse University, taking his Master's degree from there in 1925 and later receiving his Ph.D. from Johns Hopkins.

Nelson B. Aikens is Instructor in Mathematics and Physics in Billings Polytechnic Institute, Polytechnic, Montana.

Heiman E. Wilson is chemist in a woolen concern in Lisbon Falls. In research he has worked successfully in the improvement of indigo blue dyes on woolen and has contributed a number of articles to professional magazines. He is a 32nd degree Mason.

Ralph and Ruth Coombs are located at 14030 Cloverlawn Avenue, Detroit, Michigan, where Ralph is Manager of the Operating Department of the Buell Land Company, Detroit. They have one daughter, Betty Jane, born January 13, 1928. Ralph has contributed a number of articles for magazines covering the building industry.

Marion Day Quinn, ex-23, has just retired as President of the Bangor Alumni Chapter of Alpha Omicron Pi. Miss Edith Buzziell, of Old Town, succeeds her.

Glady Willey Sterling, also ex-23, is teaching art in the grade schools of Westbrook. Her husband teaches in Westbrook.

Elizabeth King

1924

Next Reunion, June, 1941

B. G. Hoos, research chemist with the Brown Company at Berlin, N. H., is co-author with M. O. Schur, of an article on nitration of purified wood fibre, recently published. Illustrating the article are half-tone cuts, including an airplane view of the Brown Co., Kraft Pulp Mill, one of the largest Kraft mills in the world, at LaTuque, P. O. Canada, of which J. D. McCrystle, B.S. in Chemical Engineering, U. of M., 1922, is superintendent.

Mr. Hoos has been associated with many patent applications pertaining to wood pulp.

The new manager of the Bar Harbor office of the New England Telephone and Telegraph Company is Armando J. Con- ni, Jr., who has been manager of the Bath office.

Carleton W. ("Speed") Merritt has resigned his position as backfield coach at Providence College in order to devote his full time to business. He is now assistant superintendent of Estate of W. U. Far- rington, Manufacturers of Dextrines, Softeners and Textile Finishing Specialties at East Greenwich, R. I. The first arrival to the Merritt family was a son, Alan Farrington Merritt, born June 7, 1936.

C. Weston Steward has recently been made research engineer at the Chance Vought Aircraft Division of the United Aircraft Corporation of East Hartford, Conn., as a result of his development of the art of welding the strong aluminum alloys by the spot welding or electrical resistance methods. Chance Vought Aircraft is considered to be far in advance of any of the other aircraft manufacturers in the world in this process. Mr. Steward has written three articles on this subject for the magazine, "Aviation." These articles appeared in the August, September and October issues of last year. He has also developed an improved method of riveting which provides a smooth surface.

and insures an extremely strong joint in thin sheets of the strong aluminum alloys. Mr. Steward has been employed with the Chance Vought Aircraft Division for two years; previous to that he had been associated with the Curtiss Aeroplane and Motor Co. for a period of ten years and was granted four patents pertaining to air craft during that time.

1925

Next Reunion, June, 1940

Hello:

Well! Have I been travelling! Since I wrote in the February issue I’ve been on a three day trip to Washington and on a two weeks’ trip to Florida. Helen Clark Potter ’22 and three other Boston girls and myself drove down. Had a grand trip and we were wild over Florida. Made a short call on “Chuck” Hutton in Aroldine, Pa., on our way down. Met Mrs. Hutton and their little girl. “Chuck” is history teacher, in Aroldine High School.

When I was in Washington I looked up ‘Tete” Ward Goodnow, in fact she took me out to Mt. Vernon. She had a list of questions a foot long, to ask me about you all. We had a great time, “Did you knowing” and “have you hearing.” One evening we called on Judge Edward Curran. He is Judge of the Police Court of Washington. He is married and has a daughter two years old and a brand new one too.

heard that James P. Boyd (Pick) is receiving mail at F. O. Box 434, Laramie, Wyoming. He is manager of Svensen Studio, Inc. Edgar Thomas is Assistant Chief Chemist of Grasse Flyer Branch of Dupont’s. His address is 727 No. Wood Ave., Linden, N. J.

Victor Hudson is plant superintendent of the National Grain Yeast Corp. in Belleville, N. J. His home address is 15 Overlook Terrace, Bloomfield, N. J.

Carroll J. Bridge is a farmer at R.F.D. #1, Guilford, Maine.

Reginald F. Cratty was elected a member of the board of directors, and vice president of the Bangor Chamber of Commerce at a recent meeting.

Mr. and Mrs. Clifford Irish announce the birth of a daughter, Merle Josephine, on October 23, 1936.

Clyde and Helen Patton were down to New York on a vacation trip in January. "Gee" Frants and wife, Carl Libby and Gertrude and Wes Ames ’24 and his wife were down the same week-end. They were guests of Rudy Valley at his apartment for dinner one night.

Well,—Tilly-Ho,

Dear Classmates:

The news this month is practically minus. How about some letters? Harold F. Clough is agent for John Hancock Mutual Life Insurance Co., office at 1655 Main St., Sanford, Maine. His home address is R.F.D. #2, Alfred, Maine.

Alexander F. Waldron is assistant forest with the state of New Jersey and resides at R.F.D. #2, Trenton, N. J. Did you know that Mrs. Waldron was formerly Grace Bridges?

The Portland Sunday Telegram recently carried a long article telling of the fine 4-H Club work done out under the leadership of Earle T. Blodget, who is club agent for York County. He and Mrs. Blodgett reside on Maple St., in Sanford.

Peggy Preble Webster

Next Reunion, June, 1940

Dear Classmates:

The January issue of “Ceramic Age” contained an article, “Measurement of Moisture Expansion” written by Ansel S. Creamer and Mr. R. F. Giller. Mr. Creamer is located at 3723 Veazy St., N. W., Washington, D. C., and is employed as chemical engineer by the U. S. Bureau of Standards.

Arthur Albert Smith is an assistant patent examiner in the U. S. Patent Office. His business address is at the U. S. Paten Office, Washington, D. C., and his home address is 803 Maple Lane, Silver Spring, Maryland.

Erla "Kid" Stairs is teaching English and Dramatics at Winterport High School and her address is Winterport, Maine.

Congratulations to Mrs. Clarence R. Libby on the arrival of a son, Wayne Gordon Libby, March 4, 1937. The Libbys’ address is Truman St., North, Conn.

Clair C. Wilson is teaching in Melrose High School and lives at 52 Rockland St., Melrose Highlands, Mass. Blair also has a son, David Logan Wilson, 2nd, born January 18, 1936.

Kenneth C. Lovejoy, State 4-H Club leader of the Extension Service, will give an illustrated talk on the work of 4-H Clubs at the Mid-Winter Institute of the Penobscot Valley Circuit of the Epworth League. Kenneth is also to be one of the speakers at Farm and Home Week.

Speaking of Farm and Home Week, Jane Estes is a teacher of Agriculture and Nutrition Agent in Aroostook County, and William E. Schrumpf, Assistant Agricultural Economist, Maine Agricultural Experiment Station, are also among the speakers.

Clara Elizabeth Sawyer, of the English Dept. at E. N. S. at Castine, was one of the judges at the annual junior reading of Bar Harbor High School.

I received a "newsy" letter from Mabel Kirkpatrick Folsom. Martha Stephon’s address is 1900 West Polk St., Chicago, Illinois. Martha has been working there in the Children’s Hospital in charge of the milk laboratory since last October.

Mabel’s sister, Muriel (Mrs. Elwood Folsom) is living at 70 Dean Place, Bridgeport, Conn. Elwood (Clum) himself works for the General Electric Company and Muriel also has a business—a yarn and knitting shop of her own. They have two children, Earl, 8, and Alan, 5.

Mabel and Harold have been living at 3 Pleasant St., Newport, Maine, since December. At present Harold is working for the N. E. Tel. & Tel. Co. in Waterville. They have two boys, Harold Sidney, Jr., 8, and Glenn Raynor, 6. I also had a letter form George Grantlett Beckler (Mrs. Philip Beckler). They have been living at 79 Kinderhook St., Chatham, N. Y., for over four years. Phil is connected with the Albany, N. Y., office of the Equitable Life Assurance Society. They have two children, Phyllis, nearly five, and Edward, two and a half years old.

Barbara ("Bobby") Pierce Skofield
52 Harlow St., Brewer, Maine

1929

Next Reunion, June, 1939

Dear Classmates:

News seems to be rather scarce this month. What has become of all the ‘29ers? The coeds particularly are among the missing with only one news item in two months.

"Hank" Goudy has recently been appointed manager of the Portland Extension district of the N. E. Telephone and Telegraph Co. with headquarters in Portsmouth. Hank was previously employed by the telephone company in Lawrence, Mass.

Dr. and Mrs. Allison Hill have arrived
in Bangor where "Hillie" plans to hang out for a while. He has recently been connected with the Royal Victoria Hospital in Montreal. His wife was formerly Miss Katherine MacKenzie, of Regina, Sask., Canada.

"Ed" Kelley is now located in Philadelphia as Research Biochemist for Biochemical Research Foundations at the Franklin Institute. He is living at 10 S. Hillcrest Road, Springfield, Pa.

Kay Marvin is located at Memorial Hospital, Worcester, Mass., where she is assistant dietitian.

Phil McSorley is erection engineer for Cincinnati Grinders Inc. His address is 5122 Kenwood Road, Madisonville, Cincinnati, Ohio.

Stanley Winch is employed as test engineer by the Wright Aeronautical Corp. at Paterson, N. J. His residence address is 300-15th Ave., Paterson.

Alice W. Sinclair
Pittsfield, Maine

1930

Next Reunion, June, 1939

Unfortunately Polly Hall writes that this month she has been unable to compile the professional, marital, and family news of 1930 because of an unexpected absence from home. But she promises to make up for it amply next month.

1931

Next Reunion, June, 1939

Dear Class of '31

News this month is scarcer than hen's teeth. But here's a nice letter from Herb Gallison, who's living at 2018 Monument Avenue, Richmond, Virginia, which I'm going to start off with:

"Dear Class of '31:"

"I was recently in the vicinity of my old job, and it was interesting to see how the building is coming along. The work is going to be done by a contractor who specializes in this kind of construction. The building is scheduled for completion by the end of the year, and it promises to be a fine structure." 

Sincerely yours,

"Herb Gallison"

Lois Perkins is principal of West Brooksville Grammar School, West Brooksville, Maine.

Charlie Browne was up this week with his husky youngster, Charles Frederic. What a football player he'll be when he's ready for Maine. Charlie gave me news of two other Beta Kappas: Stacy Sillings is selling Fords in North Berwick and "Nellie" Spurling has been promoted with a raise in pay to the Brooklyn Navy Yard where he's doing some sort of drafting. He's living at 65 So. Portland St., Brooklyn, N. Y.

And that ends my news—I'm sorry to let you all down with so little, but perhaps it will be an incentive. C'mon, write me a postal about yourselves.

Mary C. Stiles
110 Revere Street
Portland, Maine

1932

Next Reunion, June, 1939

John Barry was an eye-witness to the recent disastrous flood in Bangor. He was forced to move from his home and to broadcast from points outside the city. John gave a first-hand account of the flood to the Bangor Daily News.

Clarine Coffin resigned from the staff of the Bangor High School to accept a fellowship at the Harvard Seminary Foundation in Hartford, Conn. The fellowship is in Philosophy and Clarine will work toward her B.D. degree. She plans, upon completion of the work, to teach a combination of Biblical and English Literature.

The marriage of Miss Naomi Atkins to George H. Loane took place on January 1, in South Mills, North Carolina. Mr. and Mrs. "Pat" Loane are living at 3020 Orange St., Norfolk, Virginia.

Kenneth S. Ludden is clerk in the Auditor's Dept. of the Bangor and Aroostook Railroad Co. in Bangor. He is living at 78 Kenduskeag Ave.

Fred V. Overlock is employed by the Maine State Planning Board as technical supervisor. His address is Augusta, Maine.

Lindsay A. Patchell is a junior foreman in Tree Surgery at Wytopitlock. Mr. Edward Patten, Jr., and Miss Barbara Fling were married last September in Plymouth, N. H. Mrs. Patten is a graduate of Plymouth High School and was employed at the Penmigewasset Hotel. Ed was a surveyor in the Penmigewasset Valley and in Bristol. Mr. and Mrs. Patten are residing in Rindhamton, N. Y.

Harland Poland is employed by the Westinghouse Electric and Mfg Co. at East Pittsburgh, Pa., as graduate student engineer. His address is 454 Swissvale Ave., Wilkinsburg, Pa.

Stanley J. Protas is student assistant in research in criminology and penology for the Commonwealth of Mass. His address is Box 43, Norfolk, Mass.

Jesse E. Ray, Jr., is an employee of Scott Paper Co., Chester, Pa. His residence is 2070 Edgmont Ave., Chester, Pa.

The marriage of John Roche and Miss Virginia E. Daley was solemnized on Feb. 29 at Eastport, Maine. Mrs. Roche is a former employee of Samuel H. Kramer.

Mr. and Mrs. Roche will make their home at Quoddy Village.

Oscar T. Thompson recently accepted a position in the Dye Works Plant of the DuPont Co. at Carney's Point, N. J. He is living at the Y.M.C.A., in Wilmington, Delaware.

Helen S. Hincks
Apt. 25, Section 1
349 B. Pleasant St.
Malden, Mass.

1933

Next Reunion, June, 1938

Hello, Everybody.

Another month is here and with it comes a letter from the "Portland Network on the Air" and signed "from a '33er." Many thanks to the writer, anyway—it contains...
many bits of news that we are all glad to hear about.

Tillie and Charlie Bunker are now residing in Portland. They have purchased recently a lovely new home in South Portland.

Kay Small Lufkin and Art Lufkin are living on State Street in Portland. Kay recently had the leading role in the Portland Players' production, "Mr. Pip Passes By." Her work was excellent. Recently, Kay entertained Ernestine Merrill, Barbara Sawyer, and Dot Findlay at dinner.

Winona Harrison is now located in the Old Age Assistance Office at the City Hall, Portland, Maine.

Dot Findlay is librarian at the Nathan & Henry B. Cleaves Law Library at the County Court House. Dot enjoys the work and has great fun assisting the lawyers with their cases. Who knows but what she may become a lawyer in her own right. Anyway, Dot has been here since last April. I'm only eleven months behind this time, Dot.

On Feb. 12 the Portland Club of University of Maine women held a Supper Dance at one of the local hotels and everyone was there including the governor and his wife. Among those seen "hitting it up" were John Sturgis, Tillie and Charlie Bunker, Eleanor West Yerxa and Phil, Polly Stearns Loring and Dick, Virginia Smith Lamb and Noddy, Peg Merrill Pratt and Syl, Katherine Bussell, Louise Hill, Carl Hone, Dot Frye, Kay Small Lufkin and Art, Dot Findlay, Hazel Sawyer, and about a hundred others. Virginia Berry Humphreys and daughter, Claudia, were recent visitors in Portland.

A letter to Portland from Peg Humphreys (working in New Hampshire) disclosed the news that she drove to Poughkeepsie, N. Y., a few weeks ago with Bill and Mary Scott Brown and they "say 'Hello' to Evelyn Gleason who is located there as a buyer.

May we hear again from the "Portland Network on the Air?"

Grace Quarriington is secretary of the Portland Club of U. of M. Women, and Dot Findlay is the president. At least we hold fifty per cent of the major offices!

Gerty B. Sansom, formerly of Belfast, is employed as assistant secretary to the manager of the outside sales department of I. J. Fox Furriers, of Boston.

Ludger A. Lucas is operator of a cocoa butter plan for Rockwood & Co. in New York. He is living in 45-491st Street, Long Island City, N. Y.

Stan Frouth has forsaken New England for a touch of warmer clime. Last month he sailed on the S. S. Monarch from New York for a trip to Bermuda.

He left Bangor where he is employed by the Fresse Co. in the advertising department, first, to visit his parents in Cape Elizabeth, where he enjoyed a "Bon Voyage" party at the Conduskeag Canoe and Country Club. About 25 couples attended.

Edward Haggett, Jr., an Electrical Engineer, has just secured a position with the U. S. Patent Office and has been assigned to the Automobile Signals Department. He is also attending George Washington University law School, as is customary for the employees of the Patent Office. His residence is 3104 Douglas Street, N.E., Washington, D. C.

William Doane is employed as a Levelman in the Construction Department of the Baltimore and Ohio R. R. His residence is 1127 St. Paul Street, Baltimore, Md.

Dorothy Goode, of Bangor, has recently become the adviser for the Merryweather Club of Girl Reserves in Bangor. Since graduation from college she has attended the Columbia University Library School in New York City and is now employed at the Bangor Public Library.

Berla Smythe has accepted a position in the obstetrical department of Johns Hopkins hospital after completing her course at the Johns Hopkins School for Nursing in Baltimore, Md.

I do wish that some of the following would send in a word or two about themselves, Dixie Dickson, Blanche Henry, Bunny Callaghan, Betty Tryon, Polly Brown and about four hundred of the rest of you. There haven't been a word from some of you since graduation in 1933. Mr. Crossland said that we should, at least, hear about everyone once in two years. Haven't you got a word for me? Stayed in the dark about long enough?

During the past month, I have been doing some substitute teaching in the Public Schools of Norwich. Tom has acquired an additional class in American History for the last semester. In another three weeks, the coming season will begin and he will be busy with coaching.

Expect we shall be up in Maine the last of March and first of April for spring vacation. Perhaps we will see some of you who are in Portland.

So-long,
Tom and Marnie Baldwin
275 Broadway
Norwich, Conn.

1934

Next Reunion, June, 1938

Washington's Birthday has come to mean something besides the birthday of our President—It is the big weekend of excursions when old friends get together and the railroad works overtime taking people back home to see old friends. The highlight on this Washington birthday was seeing my old roomie Merle Shubert. It is not necessary to tell you where I was visiting Jack over the week end. When good friends meet only once a year that is something. Merle's still playing the double role of looking dollars and teaching domestic science on the side. Jack is nearly through law school—just three more months and then it looks like wedding bells. I feel years younger after seeing them and living over our old days at Maine.

As usual the North Station was a regular alumni meeting. Old friends and familiar faces and everyone going back to Maine but me—but such is the life of a career woman.

I have found that my greatest and staunchest supports are the well-known and respected salesmen who have traveled the country and see things and people—Bob Russ isn't a travelling salesman but he does go places and sees people and is a big help in keeping me in contact with the outside world. Wouldn't some of the rest of you like to become star reporters? A friend of a friend of Bob's recently met Leif Sorensen at a Beta party in Minneapolis and now don't tell me it's not a small world. Leif has been transferred from Chicago to Minneapolis, he is still working for the Liberty Mutual. Leif and Effie and Tommy are living there. Evidently they believe in going west. Tommy is now eleven months old and from all reports is the pride of his Mother and Daddy's life. There's nothing like this family life—

Bud French wasn't in our class but probably many of you remember him as I did as somebody very special. Bud was married at Christmas time to Elizabeth Rowe (I think). Bud is with the Mortgage Loan Dept. of the Travelers Ins. Co. and is in Des Moines, Iowa.

Rusty Walton is with the Remington Rand and is in Hartford, Conn., unless he has recently moved.

Little Old New York is such a tiny place that people just happen to meet on Madison Ave., it's such fun, isn't it? Bob Russ met Bill Gilbert the other day and the last we knew Bill was in Chicago. Talk about your Mexican Jumping Beans, this class has the originals—Bill and wife and baby are in the east again.

New York is fast becoming the center of Maine alumni. Jean and Bruce must have had to buy a new bean pot with so many hungry down-easters about. They are living in Jackson Heights, L. I. When people get to be commuters isn't that a sign of prosperity? And I might whisper so that you can hardly hear me, "There aren't any more twos!" Someone was deaf in both ears when they thought they heard that. Please accept my humble apologies for making a big noise.

Cliff Todd is underwriter in the Inland Marine Insurance Dept. of the Commercial Union Assurance Co., Ltd., N. Y. C. Todd Ltd. intrigues me by getting him off from the rest of us—he has recently been promoted.

Ken Foster also is doing very well and barking ahead in the Horatio Alger manner as only Ken could do. He is assistant
As they
THINK
you are

Advertisers are funny folks:
They look at people in bunches and draw some amazingly inaccurate conclusions. They seem to think that a yachtsman goes to his office in blue coat and white trousers, that a horseman wears spurs to keep his feet from rolling off his desk. Here's what they think about college graduates:

They think all your daytime hours are spent yelling at football games.
Never do you buy an automobile.
We've got to change that notion.
Are you going to buy a car this year?
If so, please tell us;

They think you spend your evening hours at class reunions.
You wouldn't think of buying an electric refrigerator.
Or would you?
Please tell us.

They think you spend your vacations at Commencement get-togethers.
You're not one of the people who go abroad.
Or are you?
If so, please tell us.

It comes down to this:

This magazine is a good advertising medium but it is hard to convince the advertiser of it. We are in competition with the big national magazines that spend hundreds of thousands of dollars a year on market investigations and research. The big fellows prove what they've got. We little fellows must prove it too. The most convincing proof is definite statements from our readers as to their intended purchases this year.

We hate to be a nuisance. We realize fully that requests for information of this sort are distasteful but we are most anxious to get advertising. All advertising revenue is plowed back to improve the magazine and thus redound to the prestige of our college.

We appeal to your loyalty to fill out the adjoining prepaid questionnaire and send it to us today.
manager of Insurance for the Long Island Lighting Co., and on top of it all is attending law school nights. You just can't keep a good man down.

Another New Yorker is Arlene Archambault. She is in the Building and Loan Real Estate Office of Consolidated Edition Co.

Just so you won't think everything happens the other side of Boston, let's get back to New England. Bill Crockett has just been made president of the Little Theater Group in Bangor.

Rachel Adams is Club Agent for Aroostook County.

Ronald Jones is working on a dairy farm and is on the milk route in Berlin, N. H.

Frank Skillin is working as collector for the Refrigeration Co. of Portland.

Ernestine Booth is teaching freshman and sophomore English in Wincham High School.

Neil Hamilton is proprietor of Norton's Hardware Store in Gretna Falls, Maine.

Ralph Dougherty is in the Sales Dept. of Simonds Saw and Steel Co. in Boston, and that is all this month for New England—-the rest of us are scattered to the four corners.

Elliott Reid is chemical engineer for the Bethlehem Steel Co. in Bethlehem, Pa.

Wesley Juddman is in the department of Horticulture of the Ohio State University. He was a graduate student of Ohio State University.

Joe Senuta is located in Philadelphia with the Dill & Collins Paper Co. He is living very near the University of Pennsylvania campus. John Quinn, like all good foresters, is still traveling. He is now in the Great Smoky Mountains National Park and for those of you who aren't up on your geography, that is in Gatinburg, Tennessee.

Just to make our humble addresses look a little more demonstrative, here's a real honest-to-goodness address: Jesse Wadleigh, Yugenio Santa Fe, San Pedro de Macoris, Dominican Republic, and that all goes on one envelope. Jesse is assistant electrical engineer for Central Romana Inc.

And that is nearly the end, but it's against my principle to write a column without adding one member to the roll of future Maine alumni—-this month it is Russell Lowell Jamming, II, son of Ted and Eve Jamming. Russell's name was entered on the roll about two months ago. Sometime soon I must figure up and see how many we have.

Peanut Bunker

Boston, Mass.

1935

Next Reunion, June, 1938

Dear Classmates,

Let's get this month with our hats off to the brides, grooms and prospective.

Margaret Avery was married in February to Roy Lawrence in Bangor. Margaret and Roy are planning to live in Bath, where Roy is connected with the Bath Iron Works as a supervisor in the welding department. Both Margaret and Roy are '35ers you know. And now, Paul Bean was married on February 8 to Miss Barbara Holland Boynton, of Boston. Mrs. Bean attended Vassar and the Erksine School in Bath. Paul is associated with his father as assistant engineer of the Union Water Power Co. in Lewiston and he plans to live in Auburn.

I am sure all the '35ers join in congratulations, Paul and Roy, and wish you all the very best of everything.

And now very naturally Mr. Stork appears and announces that a daughter, Roberta, was born on January 23 to Mr. and Mrs. Robert K. Stork.

Ray Larcom is a student at Michigan State Veterinary School in East Lansing, Michigan. Remember him well.

Brian Winfield, freshman, found that his week identification mark was new. He is a member of the Little Theater Group in Bangor.

Ronald Jones is working on a dairy farm and is on the milk route in Berlin, N. H.

Frank Skillin is working as collector for the Refrigeration Co. of Portland.

Ernestine Booth is teaching freshman and sophomore English in Wincham High School.

Neil Hamilton is proprietor of Norton's Hardware Store in Gretna Falls, Maine.

Ralph Dougherty is in the Sales Dept. of Simonds Saw and Steel Co. in Boston, and that is all this month for New England—-the rest of us are scattered to the four corners.

GROWN ON

SUMMERS SPECIAL POTATO FERTILIZERS

Pride of accomplishment! Satisfaction at digging time! Call their facial expressions what you will—here are growers of potatoes that are POTATOES! Produced by an expert. Soil and farm conditions ideal. In short, depicted herewith is an example of Aroostook at its best.

We, ourselves, take pride in reproducing this picture. Selected from scores of others, we feel it best portrays—in language more forceful than words—what experienced farmers achieve when they USE SUMMERS FERTILIZERS.

SUMMERS is a balanced plant-food ration. In modern plants, from a wide variety of the purest ingredients, we produce—in the words of this expert grower—"Fertilizer that is a FERTILIZER."

Quality Fertilizer is your cheapest crop insurance.
