The first one, called The Head Shop, opened its doors to swinging London a couple of years ago, the latest, called The Gazebo, has chosen anything but swinging. Orono as its birthplace. The Gazebo is part of a phenomenon of our times. It is yet another member to the flourishing ranks of shops which deal in the psychedelic.

Located halfway down decky Mill Street beyond the AdE, Gazebo and the bowling alley, the Gazebo is a transplant site of everything that is chic and modern in the major world capitals. From outward appearance it is nothing spectacular—a twin to the homely little yard and families shop next door.

But inside! Inside, the place exudes color with color. The walls are hung with posters each going to screaming limits to attract the eye. Along one wall in bright pots blooms a garden of potted flowers. A monstrous color-gorged orchid of which no jungle forest has ever seen.

There is more to the Gazebo than the world of Psychedelia, however. Incorporated into the shop is the Gazebo Guitar Shop which not only sells guitars and banjos at an excellent discount, but services and repairs well-spun, picks and various other accessories are available, ranging from pick-up to harmonicas and banjos. Finally, the Gazebo offers fishing facilities to guitar and banjo players.

But the Gazebo's treasures are two-fold! So far, they say, business has been good and they are optimistic for the future. Should success continue to come their way they plan to expand both in size and in the amount and variety of merchandise.

The proprietors, like the shop itself, are bright and pleased lot. One or two of the are always about doing something which are 11:00 a.m. to 6:00 p.m. The atmosphere is relaxed. There is no hustle and the proprietors enjoy the art of conversation. So, if you're interested in getting a room with something besides a monogrammed aluminum snuff, or if you simply wish to escape the coldness and dreariness of Mill Street, drop in and look around.

It's Psychedelia! Where else can you find a button proclaiming, "Santa is a pseudo-state" or an orange elephant or disturbing spectacles? The Gazebo is the place if you've adventurous, "out-dere" or just plain frivolous.

The "Pass or Fail" system of grading, introduced by Dean Noble, is effective as of Fall Semester, 1968. Sophomores, juniors, and seniors may take one course per semester under this system, but the course may not be a graduation requirement. A "P" grade affects the student degree hour credit, but does not affect his point average; an F grade affects neither degree hour credits, nor point average. It will not be possible to change from the letter-grade system to the pass/fail system, or vice versa, in the middle of a semester. The pass/fail system of grading will enable students to take elective courses which they previously feared they'd fail, as a poor, but passing grade will no longer affect their average.

Conversely, 14 credit minimum in order to live in the dormitory system has driven many seniors to question the Housing Office, Deans of Men, and the Dean of Women, regarding semester registration. Miss Jones, Assistant Dean of Women, points out that there is no rule stating that a student must take a minimum of 14 credits, if he wishes to live in a dorm. There is a 14 credit registration minimum imposed by College of Arts and Sciences, who has completed his College and his departmental requirements, and who has accumulated 120 credits, may graduate from the University. Seniors, in particular, are affected by this reduction in the graduation requirement. Seniors will be able to graduate in January; many have preregistered for only 9 credits; a few have two credits to take in order to obtain their degrees. Dean Noble requests seniors of their draft boards requirements concerning credit hours, and urges seniors not to waste valuable time at the university by taking only one or two courses next semester.

Lowering the College of Arts and Sciences graduation requirement has been a topic of discussion for several years, says Dean Noble. The change requirement that student must take only 15 credits per semester. He feels that a semester is more profitably spent studying five or six courses in depth, rather than skimming over seven or eight subjects in a five month span.

The University's Soil-Judging Team won the right to represent the northeast in the national contest at Kansas State University in May. The members are, from left to right: Richard Babcock, Peter Naiden, Peter Crane, Paul Hughes, bark row, Kenneth Stratton, Coach Thomas Smith, Wayne Mosher, David Popp, and Coach Darryl Brown.

**Youth-in-revolt signals conflict**

"American liberalism needs to bring its commitments into balance with its resources — ever more at home," says Daniel P. Moynihan, Director of the Joint Center for Urban Studies of M.I.T. and Harvard. Its failure thus far to do so — and in its consequent failure to deliver on its overly ambitious utopian ventures — largely responsible, he contends, for the disillusionment that has prompted today's widespread radical protest of American youth, and such signs of danger as rioting cities and turbulent campuses.

"Unthinking encouragement of blasted expectation leads young persons to compare forecasts with outcome and to conclude hypocrisy and duplicity are at work," writes the former Kennedy Administration official in the opening article in the special Youth Issue of THE AMERICAN SCHOLAR.

"What is asked of us is honesty; and what that requires is a great deal more rigor in matching our performance to our standards. It is now the only way to maintain the credibility of those standards..."

"There is altogether too much that is shoddily and derivative, and in the final sense dishonest, about American life..." the foundations of popular confidence in our system are proving to be nothing like so solid and enduring as the confident liberal establishment has supposed." Moynihan's condemning process has been generated, says Moynihan, by such phenomena as:

1. Our involvement in "an increasingly dangerous and costly effort" to extend the American system abroad, in consciousness of "our opinion, belief in progress, and the possibility of achieving human happiness on earth... The irony, of course, is that it is just because our own history has been so unique that we are led to suppose that the system that has emerged from it can be made worldwide. It is an effort doomed to fail..."

2. The "ugly fact" that, even as we undertake to diffuse abroad the values of liberal democracy, "ours are not sufficiently secure at home... There persists in American opinion a powerful tendency... — including the Christian of Second Century Rome who were "bad citizens, refusing public employment and avoiding service in the army... They had no temples, no altars, no statues, and boasted just that... Of learning they had little and cared less. Nor had they any great interest in respectable people who observed the rules of society and tried to keep it running, they cared only for the outcast and miserable. To be a sinner, they seemed to say, was the only way to be saved. They were altogether of a selfish and revolutionary character."

Yet, he adds, "The belief of the liberal in due process, in restraint, in the rule of law... involves the most profound perception of the nature of human society that has yet been achieved... It is not a belief to be frittered away in deference to a mystique of youth."
Deactivated base goes co-ed

Dow area a "bargain at any price"

Dr. H. Austin Peck, who is also an economics professor, describes the U. of M. S. plan to acquire and develop a 150 - acre campus at Dow Air Base in Bangor as a bargain at any price.

Negotiations are underway by the City of Bangor and the University for a 30-year lease arrangement to allow college use of a portion of the base. The base is scheduled for deactivation in the 1970's so the university will receive an additional 75 - acre section of the General Services Administration. By November 1, the university hopes to house about 350 of its students at South Campus in dormitories which will accommodate 1200 within a few years. The Eastern Vocational-Technical Institute expects to house all of its students there temporarily. Most of the proposed campus is separated from the rest of the base by a wooded, hilly area that university officials believe will cushion aircraft noise coming from nearby runways. The entire 170 - acre tract is landscaped and most of the buildings are of new construction.

Among the buildings are eight multi - purpose lecture halls, a cafeteria, a chapel, athletic and recreational facilities, an infirmary. The base gymnasium and the hospital will be reserved for use as a student dormitory. The Non - Commissioned Officers Club, which is also included, is for use as a student union.

The old and new campus will use its new campus in the framework of the existing educational programs is still under discussion. Several basic ideas have been accepted.

The name is a clue to its role. South Campus will be its campus, rather than the University of Maine at Bangor, because the new campus will be an integral part of the Orono campus with the same academic, Student Health Center, remedial college and community education and extension programs for residential students.

Diabetes Detection Drive

In cooperation with the State Diabetes Detection Drive, the Student Health Center will be distributing test kits for students from November 13 until November 21.

ROTC scholarships

Col. John S. Gerey, professor of military science at the University of Maine, announced that application for the U. S. Army's 800 - four - year ROTC college scholarships will not be accepted from high school seniors. These scholarships can be used at any of the 247 colleges and universities offering Army ROTC. The scholarships are awarded without regard to financial need, on the basis of academic excellence, performance in extracurricular activities, leadership potential and physical fitness. Recipients receive full payment for tuition, books, and laboratory benches and other small fees in addition to monthly military allowance. The program provides an opportunity for students to complete their college expenses and upon graduation will commission them as an officer in the U. S. Army.

The student must first take the College Entrance Examination Test. The number of students who desire to be commissioned as an officer in the U. S. Army. The test is scheduled for December 3. More detailed information may be obtained by writing Col. Gerey, Dept. of Military Science, University of Maine, Orono, or ROTC scholarships, Fort Meade, Md.

68 Camaro:

Accelerates smoother, hugs the road tighter, rides quieter than ever before.

A quiet car speaks for itself. That's why Chevrolet brought out the 68 Camaro smoother, steadier and more silent than ever before.

Even Camaro's new Astro Ventilation works for your peace and quiet. Adjustable vents built in the instrument panel help outside or circulate without wind or noise. You don't even have to open a window, it will add to the silent ride of quality.

Soft, rubber cushions snuff out road noise and vibrations. Even Camaro's new Astro Ventilation works for your peace and quiet. Adjustable vents built in the instrument panel help outside or circulate without wind or noise. You don't even have to open a window, it will add to the silent ride of quality.

Camaro's big - car ride has been improved with a refined suspension system.

Chevrolet will pack its campaign power in the flower this year. The organization, soon to be antisquishing the campus with your favorite posies, will stage an all - campus operation the week of December 4 through 8.

Proceeds of the Good Will campaign are directed to four major organizations. The largest contribution goes to the World University Service. Academically - centered projects in over sixty countries of the Far East, South Asia, Africa, Europe and Latin America are assisted by college and university communities in the United States through W.U.S. Help to these students is concentrated in the areas of living and health facilities, educational equipment, and emergency aid given to individuals otherwise unable to continue their education.

To the MCA-Foster Parents project in the Pendleton Valley Good Will, and the Student Action Corps will go the remaining funds.

Good Will asks that any individual or organization needing financial help for an urgent and worthwhile purpose seek their aid by contacting the committee chairman, Tony Karsher Hamilton Hall.

Power of the Good Will Flower will be kept up on campus program soon after Thanksgiving season.

GREAT MOVIES FROM FILM CLASSICS

Sunday, Nov. 19

SPY WITH A COLD NOSE

SKY ABOVE, MUD BELOW

Academy Award winning adventure film of the first expedition into the uncharted region of New Guinea.

ALL FILMS 8:00 P. M.

BAIXER AUDITORIUM

"The Hugger"

All these Chevrolet features, too:

- Unitized all-welded body by Fisher.
- Power team choices up to 396-cubic-inch V8.
- Self-adjusting Safety Master brakes with dual cylinders.

Chevrolet will be sure you buy as much as your Chevrolet dealer sells.

All Chevrolet are priced for greater value! The lowest priced 1968 Chevrolets are models not shown. Convoy 300 Sport Coupe $2,199.00, Convoy 300 Sport Dent $2,260.00, Biscayne 2 Door Sedan $3,558.00, Corvette Convertible $4,320.00. Manufacturer's suggested retail prices including Federal Sales Tax, suggested dealer delivery and handling charges, transportation charges, Monsanto, tire and tube taxes.

GM
Jean de Botton

Chartreuse collides with scarlet red. Powerful lines threaten frail forms. Jean de Botton's "Killing of the Dove" comments upon war and peace. Or perhaps upon the commercial rivalry between the White Knight and the Dove in your kitchen.

Jean de Botton Oils hang in Hauck lobby

by Margaret O'Brien

Jean de Botton, painter, engraver, sculptor, author, choreographer, has been internationally acclaimed by competent critics and art connoisseurs. Through the month of November, the Lobby of Hauck Auditorium will host a Jean de Botton Exhibition; twenty-two oils, brought together by Herbert Chase, of Chase Gallery in New York, will grace the Lobby walls.

Thirty-six years ago, Jean de Botton turned to painting; for two years he devotedly studied the effects. In 1933, the artist burned 350 of his canvases, and, declaring "distilled painted matter" to be his creed, launched himself upon a brilliant painting career.

Botton paints with disciplined fantasy, the mysterious rhythms of bears in a harbor, a lobster on a table, a delicate flower, a skyline of oil derricks in Texas. He finds "lovely arabesques" in the mundane experiences of life.

The artist's forte, however, lies in his hitherto undiscovered harmonies of color. His juxtaposition of color, never simple, often risky, always gay, and frequently surprising, points out the significance of living in a colored universe.

The oils Botton, sewed together, between the lipsticks and the abstractions, taste, emotions, qualities, bitterness, weariness, and despair. The paintings are hopeful, as robust, as unemotional, as optimistic as Somberg's "Chicago." Botton's work presently hangs in museums around the world—Paris, Versailles, Luxembourg, New York, Dallas, Atlanta, Phoenix, Geneva, Cologne. He has participated in two international Expositions and has shown his work in seven International Exhibitions.

New York, London, Seattle, San Diego, Philadelphia, Granada, Paris, Hamm, Salzburg, Vienna, Istanbul, Chicago, and Los Angeles are a few of the many cities that have boasted one-man shows by Botton.

Over 100 prominent art collectors, including those of H. Du Pont, J. Ford, the late E. Hunting- way, W. Clark, J. F. Kennedy, Queen Elizabeth II, and King George V, include works by Jean de Botton.

The Coffee House...

Returning to its typical format, The Coffee House will be open for conversation Friday evening, November 17. The following night's entertainment will be various types of taped music.

Politics and International Relations Club

The Politics and International Relations Club will feature Dr. Smith of the History Department on November 29, at 7 P.M. in 202 Little Hall.

I won't go into business when I graduate because:

☐ a. I'd lose my individuality.
☐ b. It's graduate school for me.
☐ c. My mother wants me to be a doctor.
☐ d. It's graduate school for me.

Can't argue with (c), but before you check a) or b)—pencils up! There have been some changes. Drastic changes in the business scene. But changes in the von populi attitude regarding business...especially on campus...just haven't kept pace.

Take the belabored point that business turns you into a jellyfish. The man who runs most of the nation's successful firms didn't arrive by nepotism, by trusting an Ouija board, or by agreeing with their house. Along the way, a well-modulated "No" was said. And backed up with the savvy and guts today's business demands.

In short, individually is highly prized in much of the business world—the successful much. Even when the business is big. Like Western Electric, the manufacturing and supply unit of the Bell System.

We provide communications equipment for our Bell System teammates, the Bell telephone companies. This takes a lot of thought, decisions, strong stands for our convictions, (and sometimes some mistakes...we're human, every 160,000 of us).

Individuality pays off. Not only in raised, but in personal reward as well. Like an engineer who knew who deep down that there was a better way to make a certain wire connector—and did. Or a WE gal who streamlined time-consuming office procedures, and saved us some $63,000 a year.

Rewards and accolades. For saying "No." For thinking creatively and individually. For doing.

Not every hour is Fun Hour, but if you've got imagination and individually—you've got it made. With a business like Western Electric. We'll even help you answer b) with our Training Refund program. Come on in and go for President!
encourage the development of an attitude in which a student himself becomes a well-guided scholar rather than in a competing grade-getter.

Amherst. Mass.—(P.R.) The Office of Institutional Studies recently conducted a national survey of the "pass-fail" option at the request of the chairman of a Faculty Senate subcommittee on the campus of the University of Massachusetts.

Results: At Pomona College, just two and seventeen had the pass-fail option available in elective courses outside their major for the past eight years. All freshmen senators are graded pass-fail. A student is allowed up to two courses a semester under this option with a maximum of four courses in count toward graduation.

The respondent felt that although a few students try to manipulate the option to improve their grade point average—neither pass or fail is registered in a student's cumulative average—valid use for outnumber possible abuses...making the program a general success.

At Ohio State University, seniors, graduate students and pre-professional students have all been allowed to take one course a term under the pass-fail system in selected schools and colleges including the Graduate School and the Schools of Medicine and Education for general years.

Included are all courses in Medicine and specified courses either in or outside the student's major, e.g., thesis, minor problem, special seminars. There is no specific policy on the number of such courses a student may take and while the students will receive credit hours for an "S" (satisfactory) neither the "S" nor the "F" will be on his cumulative average. The respondent regarded their programs as flexible because "it was at his own discretion what he did with them." The California Institute of Technology began a pass-fail grading system in the fall of 1964 as an experiment to "encourage the development of an attitude in which a student sees himself as a self-guided scholar..." while at the same time in a "computer grade-getter." Their program is unique in that there is no "real" option since all courses in the standard freshman curriculum which all freshmen must take, are graded this way but not for credit. All courses (with the exception of one) are available under the pass-fail option. This policy was so successful that it became permanent in May, 1966 as a result of a "unanimous less one" faculty vote.

Among the reasons for adopting this policy permanently was the fact that the freshmen attrition rate decreased considerably and that freshmen anxiety was not as evident. The morale among sophomores who had participated in the pass-fail program was also considerably higher. One negative effect was that some freshmen had "no conditioned themselves to the top awards that they suffered a real psychological shock when those awards, in the form of grades, were not obtainable."

Of the remaining six respondents presently offering the pass-fail option, only Stanford University, with one year of experience, had any policy in effect longer than one term. At all six schools the option was available to both juniors and seniors and at all but one to sophomores as well. All freshmen at Stanford and the University of California (Berkeley) and second term freshmen at Tufts University are allowed to participate in this program. At only two of six institutions was the option limited to selected schools, but four of these respondents limited the option to courses outside the student's major.

At Berkeley students were allowed to take courses in their major for a pass-fail grade with their major department's consent. At Oberlin College, although the option is generally available only in courses outside the student's major, a faculty member may elect to have the satisfactory-un satisfactory grade option apply for all students in a course. Enrollment in such course does not deprive the student of his option.

At Tufts, Mount Holyoke College and Lehigh University, students were also allowed to take distribution requirements under the pass-fail option although at Lehigh foreign languages are excluded. At all six institutions a student was limited to one pass-fail course per term. Mount Holyoke restricts the number of such courses in a student's college career to three. Lehigh to four and Tufts to eight. At none of these schools was a grade of "Pass" entered in the student's GPA, but at Tufts, Lehigh and Mount Holyoke "Fail" is included in the GPA.

Although not included in this survey, Princeton University and the University of California (Santa Cruz) have also had some experience with the pass-fail grading option. The pass-fail option at Princeton, in effect since Spring term 1966, is available to all undergraduates. Only one elective course a year (outside the student's major) may be taken for a pass-fail grade. At Santa Cruz, an experimental evaluation program has been in effect for the past five years. As stated in their 1966-7 Bulletin, "Evaluation will take three forms: faculty comment, comparative examinations and grades."

Concerning grades, "Students in lower division courses normally will be graded "Pass" or "Fail." Students in upper division courses will be graded "Pass" or "Fail" except that a Board of Studies, in courses for departmental majors, will assign letter grades to students pursuing a major in that field."

Thus while the pass-fail is only one aspect of their evaluation scheme, they have had considerable experience with this method of grading. Their impression is that pass-fail does "give students courage to explore" and that while many suffer some dissemination at the start, most adjust and learn to "work for themselves." These are, however, unreported transcript and class rank problems, especially regarding the draft.

Conclusion: Most of the respondents felt it was too early to judge how successful their policy has been. One school, however, although feeling it was too early to justify any firm judgment, felt that not all students were using the pass-fail as had been intended. While the faculty had hoped students would use it as an opportunity to "explore new fields and broaden the base of their education," many students appeared to be using it to schedule a "safe" pass and reduce study and grade pressure.

Although there are many variations on the regulations governing pass-fail, several practices seem widespread. Generally, freshmen are not allowed the option. The student is usually only allowed one course a term, frequently with a maximum number of credits to be earned this way, and then not generally in his major field.
New two-year forestry program to begin in fall

A new two-year technical program in forest land management will be offered at the University of Maine's Orono campus beginning in the fall of 1968. The program, offered by the School of Forest Resources, was recently approved by the U. M. Board of Trustees and authorized to proceed as follows:

VOCATIONAL INTEREST TESTING

Tuesday, November 28, 7:30 p.m.
140 Bennett Hall

Open to all students. Results and interpretations available about two weeks after test date. Sign up at Testing and Counseling Service, 102 Education Building.

For liberal arts majors

*Professional Qualification Test—A prerequisite to qualify for a career position with the National Security Agency.

WHEN: December 9, 1967
WHERE: Contact your Placement Office for location of test nearest you, or write to NSA (address below) right away!

If you expect to receive a liberal arts degree before September 1968 register for the Professional Qualification Test. Taking and passing the PQT doesn't commit or obligate you to anything, but we urge you—even if you are not now fully certain of your future interests—to investigate NSA career opportunities.

An Agency of national prominence, this unique organization is responsible for developing "secure" communications systems to transmit and receive vital information. How and why does that affect you? Because NSA has a critical and growing need for competent people—regardless of your academic major.

You will participate in programs of national importance, working in such areas as: Cryptography (the making of codes and ciphers), analytic research, language research, data systems design and programming, and administrative management.

At NSA your professional status and earning power grow rapidly from the day you begin, without having to wait for years of "experience." Starting salary of at least $5,700 (for bachelor's degrees), regular increases, excellent advancement possibilities...and all the benefits of Federal employment.

Another advantage is NSA's location, convenient to both Baltimore and Washington and a short drive from ocean beaches and other recreational attractions.

Plan to take the PQT. It could be your first step to a great future!

IMPORTANT: THE DEADLINE FOR PQT APPLICATIONS IS NOVEMBER 27. Pick up PQT Bulletin at your Placement Office. It contains full details and the necessary registration form.

Applications must be U. S. citizens, subject to a complete physical examination and background investigation.

Katharine Gibbs Memorial Scholarships

Full tuition for one year plus $500 cash grant

Open to senior women interested in business careers as assistants to administrators and executives.

Applicants may be obtained from Memorial Scholarship Committee, Katharine Gibbs School, at the New York address below.

ARE YOU INTERESTED IN A CAREER IN MEDICAL RESEARCH?

If so, BIOCHEMISTRY IS PROBABLY THE MOST USEFUL MEANS OF ACHIEVING THIS GOAL

The Department of Biochemistry of the University of Illinois College of Medicine has a number of openings for qualified students holding a B.S. or B.A. in Chemistry or Biology. Fellowships, Teaching or Research Assistantships and Traineeships pay $2400-$2800 per year, tuition and fees are waived, and complete support of the student's research is available. We have excellent facilities in a large, modern, active Department, with a wide range of research interests.

Application forms and booklets entitled "Career Opportunities in Biochemistry" and a complete description of the Department's "Graduate Student Program" are available upon request.

LENGYEL HALL
8:00-12:00 P.M.
50¢ a couple

That's the date you can "brainstorm" with our representative on your campus. Use this interview to find out what's going on in your field of interest... be it research, engineering, manufacturing, programming, or marketing/sales.

Ask him how Xerox fits into the entire spectrum of graphic communications. Probe into the publishing aspects. Inquire about information storage and retrieval. Put your questions on a global basis and relate them to the knowledge explosion that's going on all over the world. And, don't be surprised if you begin to form some new ideas about Xerox.

Xerox is that kind of company.

If you want to be a little more specific, question him about LDX (Long Distance Xerography). Find out what it is today and what role it will play in tomorrow's scientific and business communities.

We're looking forward to meeting you and answering your questions. As well as posing some of our own.

To arrange an appointment, see your Placement Director.

XEROX
An Equal Opportunity Employer (M/F)

XEROX AND LDX ARE REGISTERED TRADEMARKS OF XEROX CORPORATION
Perhaps the main reason that our involvement in Vietnam is such a bitter pill for so many people is the fact that literally hundreds of thousands have been killed by the Vietnamese army, and the stakes may well be the collective future of the next generation. And whether we get out of Vietnam, stuff the backdoor crap, and have "love-ins and reading sessions", or whether we win this war, the South Vietnamese are going to be under the control of the Vietnamese army, which means that they have to give up much of their freedom, and that this is only a first effort and things should hopefully get better with time. The accent of the Orono Free Press is like the underground press has reached the University of Maine. Well, we have a psychopathic hippie shop and some resident acid-rock groups and an official SDS chapter and an official university bookstore which sells the latest in "in" posters, and we've even heard, although we wouldn't know for sure ourselves you know, that there are some who take drugs! So, why not an Orono Free Press?

We may have ROTC and we may be about the last college in the country to really take fraternities seriously, but we too are a part of the modern youth scene, however tardily. The "free" in Orono Free Press may be taken in two ways. Free, as in Radio Free Europe. If it is, the latter, we here at the Campus may be congratulated as sometimes valiant lackeys working for an official University publication who have in this case had guts enough to defy the fact taskmasters by reporting the existence of the underground to the other enslaved masses on campus.

It would be unfair to judge the Orono Free Press too harshly at this point. In appearance it is the sloppiest most helterskeltier mess imaginable. Its editors obviously have no respect for the law—that is, the standard lows of grammar, diction, and punctuation. But these may very well clear up in succeeding issues. This is, after all, a first effort.

The Orono Free Press includes articles from other so-called underground papers as well as some home-grown editorial and poetic contributions. The writing is generally semi-illiterate and polemical. Again, it is well to remember that this is only a first effort and things should hopefully get better with time.

As Blake announced Dancy Wright. One of the last names was incorrectly left open.
osculate the war

by Circe

Hey, you lucky people, it’s cuddling weather again. Time for all the love birds to migrate indoors and resume their nesting on the dorm divans. The cold brings out not only red-knee caps and the red-above-the-knees look, but also the puckered lips. Okay, the lounge beards say, where can we go? Love cannot exist on book-carrying and face-pecking alone. There has to be a little... well, I can tell you, there ARE places to go. For example, the back steps leading to the Dean’s Office in the library is a veritable private Eden. You are only one step away from at least two good passates and one quick smooch before the click on the steps below, wars of an instructive persuasion.

All in all this is a Wasteland and it’s a shame to waste all that hot air on mere words. I think that it is high time for Maine to build a walk-in park-in. Sort of a both in for roosters.

Lovebirds could just look in the yellow pages under R—

ASK ANY PHI MU OR CALL 942-4903
Ever wonder what Alan Ginsberg's great-grandfather one-thousand times removed looked like? Like to see Oceania's parallel to the H-bomb? How about Cochee's dinner jacket... probably a wild set of threads, ma? Curious? A visit to the Anthropology Museum, third floor South Stevens, will provide the answers.

The museum features cultural artifacts from Africa, the Arctic, Oceania, and the American Indians. You can find out about fossil man and his weapon and tool technology.

Among the Indian artifacts are basketry, bead-work, an efficient looking breastplate, and a Cheyenne headress made from the crown of a U. S. Cavalry hat. Equally delightful is a shirt decorated with human hair, the product of a bloodthirsty brave and his deftly wielded scalping knife.

On the brighter side, a unique Polynesian custom shown in the museum is the use of the "love stick." A "love stick" with its distinctive designs, is made by each young man of the village. The maidens commit the design to memory. Then, at night, the young man thrusts his stick through the grass hut beside a sleeping girl.

A lethal section of cold steel is on display in another part of the museum. A Fijian blad with its sinister stone-grey curves catches the eye. Other weapons exhibited are spears, swords, bow-guns and darts, and hoes and arrows—each representative of a primitive technology.

The museum has a fine section of primitive art. Exaggerated fertility figures, venerable ancestral figures, dance masks and charms set off the African section. The Arctic exhibit offers Eskimo art, carved ivory and soapstone, weapons, clothing and utensils peculiar to the region.

In the immediate future, an archeology department is anticipated addition. Also, more gifts to the museum are hoped for, such as the Passamaquoddy Indian canoe given by a father of a student. Made before the turn of the century, the canoe illustrates spruce-root sewing and pine-pitch seams.

The Anthropology Museum is of community-wide interest, and depends upon the general public for building and maintaining the collection. During a semester, hundreds of school children, hospital staffs and Sunday school classes pass the various exhibits. Rightly so, for a culture study of mankind is of undeniable benefit to everyone.

Museum hours are Tuesday through Friday, 8:00 a.m.-4:00 p.m. A visit to this fantastic place will be an interesting—if not really rewarding—experience. Who knows, Polynesian courting customs might become the vogue next year?

The scavenging or "natural acquisitiveness," as the Director calls it, is due for the most part to the excessively modest budget of the museum. Most of the material is donated to the museum and Professor Emerick owns many of the artifacts. Some acquisitions must be purchased and exhibits loaned to the museum require financial backing. Thus the Anthropology Museum suffers from the main problems affecting all museums—money and lack of space.

The future may see the Anthropology Museum moving from its present location to a museum building, sharing quarters with a natural history museum of the Zoology Department.
Long range psychic, physical effects of L.S.D. unknown

by Dr. Charles Major

While LSD is a problem, it is a minor problem. So, it is most of the confusion. Little is known about the long range LSD effects. This frightening scientist who simply do not know whether users are committing themselves to something which causes irreversible damage.

Early work with LSD compared normal mental patients with normal groups of volunteers, Cohen and Dimohrow. The American Association for the Study of Mental Illness (1965) reported that there were few adverse effects in the normal control group with only 8 in 10,000 showing psychiatric episodes of one or more days. This seems straightforward enough, without noting for the few early extrusions with the drug. By 1961, laboratory was noted in that year Klimos, at the Sixth Research Conference on "Conerative Studies in Psychiatry and School Research Approaches in Mental Illness," indicated an accumulation of evidence showing, that different personality types respond differently to the drug. This point has become clearer over the last two years. Highly introverted, anxious types, with a history of intellectual and academic interest show fewer external physical changes during a trip but much more marked mental confusion. This has been seen before, notably in the early cocaine work, where the drug's potency was seriously underestimated. The test group in the cocaine study consisted of research chemists and this group is not high in the dependent, depression-inclined personality types most susceptible to the drug. Since 1961, original research importance was its induction of a pseudo-aggressive state, the original volunteers were carefully screened for stable psychological profile, and the volunteer group required 300 ugms of LSD for the effects to ap-pear. Word of mouth reports from laboratory groups that "many" individuals can take off on LSD may be valid in a dynamic, young industry. In 1960, the early problem was how to turn you on-rather than at suburban, walk in traffic, scuba diving, etc.

There have been a rash of suicide reports on LSD users but that the rate is exceptional or that it is due to the drug is impossible to specify with only scientific validity. A number of LSD trips terminate in a prolonged normal episode of up to a year's duration. The percent of cases that end like this is very small that such cases occur is undeniable. Methods for handling prolonged psychosis episodes and halothan trips are now standard emergency room procedures at urban medical centers. Other effects are noted: There is one well-documented report of a child, taking LSD by accident, who showed a 30 point drop in IQ after wards, and in whom the effect persisted for at least six months. This might be considered exceptional ex-cept that some early work on trained rabbits showed their performance fall off after LSD treat ment. Human adults show this ef-fect, a drop of 30 percent in test performance after LSD, but it is apparently due to deterioration of inattention rather than to changes in the capacity to perform. A sub-ject has appeared lately where some cases of hepatitis were found to be due to sharing of syringes while mainling LSD. The psychic effects are not the only effects. Recent evidence shows physical effects such as chromosomal abnormalities and embryonic malformations. Dr. Egerman was quoted in a recent Congress article as saying "Not everyone who has taken LSD sustains chromosomal damage," but he set the threshold level for this effect at 150 ugms.

To look closely at his state-ments and compare them with his recent paper (Draw and Egerman, Science, 157: 311, July of this year). From his own data, 5 percent of his user group showed chromosomal abnormalities as, while not every one is affected, most are. His method of approach, while having its advantages, has been attacked in that the only evidence that his sub-jects have taken LSD is provided by the testimony of his volunteers, some of whom may not be as unconven-tional as they claim to be. In some cases his data is further complicated by subjects who claim to have used a multiplicity of drug types.

Independent of this study, there is some evidence found by addition of LSD to leucocytes cultures. This also produced chromosomal abnormalities that Cohen's group -- Science 132: 1417, 1967, Gebrer (Science 132: 266, Oct. 1967) in-jected LSD, mescaline, or bromo...
**The Maine Campus**, November 16, 1967

**Dr. Poulton appointed as director of proposed South Campus in Bangor**

The appointment of Dr. Bruce R. Poulton, head of the department of animal sciences at the University of Maine, as director of the university's proposed South Campus at Dow Air Force Base in Bangor was announced Friday by U. M. President Edwin Young.

The university expects to acquire some 170 acres with the deactivation of Dow Air Force Base this summer, and by fall the university expects to house and have classes for more than 2,000 students there. Maine voters Tuesday approved a bond issue providing $450,000 for renovation of the facilities, which are valued at $25 million. Within a few years some 1,200 students will be enrolled on the South Campus.

Dr. Poulton, who has been a U. M. faculty member since 1956 and head of animal sciences since 1958, was on leave of absence during the 1966-67 academic year as an American Council on Education Fellow in Academic Administration, an internship program financed by a Ford Foundation grant.

One of his duties at Michigan State University was the establishment of a student government with the right to sponsor student organizations and the president of the organization. A number of these student organizations have sponsored student government and other legal acts, it is not a violation of the law. Thus, while SDS members are trying to destroy our national security by acts against the United States, they are getting other people to join them. This is the worst thing about SDS. They have exceeded their rights of freedom of speech and the press. They are trying to destroy the national security of the United States and therefore the national security of the world. They are trying to stop the draft. They are trying to destroy our national security because of their communists' beliefs.

Pool said he is opposed to SDS because its members are trying to destroy our national security by acts against the United States. They are sabotaging our war effort. everybody's
doing it...

by Maria Dare

The impact of a college on local, state, and regional economy has been described by a University of Maine graduate student in a recent issue of the New England economic review published by the Federal Reserve Bank of Boston. The article is based on a master's thesis by Howard Vizard, who was graduated with a master's degree from the U.M. College of Business Administration in August, 1967. The entire report will be published as a stand-alone supplement by the bank and is available on request to foundations and organizations studying the impact of higher education on the states. Vizard found that total spending in the Greater Bangor Area attributable to the college, staff, and students amounted to $2.26 million. The largest source of expenditures was student spending and above college fees. In 1966, the year the data was collected, Vizard noted, the average supplementary expenditure of a student living in a dormitory was $46. An additional average of $66 was added if the student owned and operated a car.

All of this sum represented a net addition to the economy, however, since one quarter of the students came from the area and others received income from jobs, loans or scholarships within the area. The funds generated within the Greater Bangor Area were deducted from total spending, funds from outside amounted to $1.48 million, or 66% of the total spent.

Faculty Council convenes by television and WATTS line

Last Monday, the Faculty Council convened over television and WATTS line. A group of Portland members had both video and audio contact with Orono, although remote communication was only audio. The council voted to recommend that professors be allowed to teach only one three-credit CED course per semester in addition to a normal departmental load. The proposal, submitted by the Committee on Academic Affairs, must be approved by President Young before it is final. In discussing the new CED policy, the council indicated that an increase in salaries would probably make it unnecessary for some faculty members to augment their incomes by teaching several CED courses—often at distant branches of the university.

Two Maine TEP Grads honored

The newly elected Council of Tau Epsilon Phi Fraternity in New York, New York, was installed by Tracy Bronson. The council convened in the Little Theater in Alumni Hall was an experiment in linking the University's WATTS line. The meet-

OFFICIAL NOTICE

Applications for men's residence hall counselors for the Spring Semester 1968 are now being accepted. All applications must be submitted prior to December 1, 1967, to be considered. Application blanks may be obtained from the head counselor of the residence hall in which the applicant resides. Applicants not living in the residence hall system may obtain application blanks from the Office of the Dean of Men.

Orchestra to perform

by Tracy Bronson

The University Orchestra, under the direction of Clayton Hare, will make its first appearance of the year on November 20 in Huskie Auditorium at 8 p.m. Although the orchestra contains some community instrumentalists, it is basically a university group. Members with only elementary knowledge are accepted along with more accomplished players. The program includes a Spanish overture, Mozart's Overture No. 11 Pastore, Haydn's Symphony Number 97, Jig from St. Paul's Suite by Holst, Liebess (Tone Poem) by Czech composer Smetana, Stravinsky's Donner and Blitzar, and Rachmaninoff's Rhapsody on a Theme of Paganini.

Bear Facts... by D. A. Steward

The University of Maine football team has just solidly nailed down its first winning season in 22 years. Coach Walt Abbott, called 34-12 loss to the Rams of Idaho the best game his team played all year. Sadly enough, it's probably true.

Again this week the overconfident Bears held off a far superior team for three quarters and even managed to get on the scoreboard after a four-game drought. At the start of the final period the score stood 13-12 in favor of the Rams, despite the fact that Maine failed to put up a decent running attack. In the final stanza UBI racked up 21 points to clinch the "battle" but game.

No one can build a winning team from a few individuals. Coach Abbott needs more depth and much more talent. Yet what does he have to offer? Prestige? Money? About the only thing that comes to mind is convenience and economy, applicable only to Maine athletes. Even the local boys go elsewhere when offered a sizeable scholarship. Example: the current captain of the Yale team, Rod Watson from Bangor.

There are a good many reasons for having an athletic program, not the least of which is money. An exceptional college team with adequate facilities can draw enough in admission charges to finance the team completely, and then some. Like it or not, many people, including state legislators, voters, and cash-contributing alumni, base their opinion of a university on its performance in its most publicized activities—athletic events, especially football.

The sensational '65 season won't be matched for a long time unless there are some very basic changes in University of Maine athletic policy. If things remain as they are now, the Black Bears of the future will seldom be able to field a team capable of competing against schools like Massachusetts or the Citadel.

Maine is in a different league than it was when Hal Westerman coached 15 straight winning seasons. Either U-M is going to have to play their kind of game or get used to losing whole seasons at a time. U-M has about the same resources at its disposal as the real world of college athletics. That means athletic scholarships and a recruiting program.

Of course, the Bears can always go back to playing the BBC circuit. Such a retreat, however, would probably raise more questions than it answers.

The University's athletic program is currently the topic of many bull sessions and even more serious gatherings. Despite the inherently static nature of U-M policy, something CAN be done to remedy this pathetic situation. We are encouraging people, especially alumni, to voice their opinions. If something is wrong — or right — in sports at Maine, write to The Maine Campus. The address is: Bear Facts, Maine Campus, 106 Lord Hall, University of Maine 04473.
MOC cleans a section of the Appy on outing
by Sherry Dresser

The weekend of November 4-5 the Maine Outing Gun Club regularly held its back to back job of cleaning a section of the Appalachian trail. With high hopes, personal creativity, cooperation and perseverance, the club accomplished its aim and returned having lost that empty, restless feeling having been filled by the pride of accomplishment. Broken bridges,Arrowheads, "painted monies" and waterlogged swimmers were but a few of the catastrophies that plagued the weekend. Yet, the memory of the trip is utterly rich and the minds of each member as a fantastic experience.

If around the campus you see a few hunched over "pick-bucks", a lot of coed-pull pushers with realism, tapping Levi, you know you're seeing some M.O.C. members. They will be recuperating from the Appalachian trail hike and looking forward to the weekend's trip. Ever get the urge to go?

Maine Riflers attend Coast Guard tourney

The University of Maine Rifle Team, coached by Master Sergeant George Pritchard, defeated Norwich 1307-1250 last Saturday for their 27th consecutive win in regular season matches. Dennis Burgess had high score for the second straight time this season, tallying 269 points. Jim Buttlar was second with 264. and Charlie Smart tied down 3rd with 261. Carl Sanborn racked up a 260 to beat Rothwell from Norwich out of 4th place.

Women's interdorm basketball practice

Practice for women's interdorm basketball has begun and will continue every afternoon from 4-5 at Lengyel Gym until after Thanksgiving.

Maine defeated Bowdoin on October 28 at Brunswick in their first meet of the season. The next match is here in Orono on December 9 against Dartmouth.

Henry K. Woodbrey, D.M.D.
announces
the opening of his office for the general practice of Dentistry on Hamlin Street in Orono.

Tel. 866-2513
The University of Maine's soccer team is on fire this season, as evidenced by their recent victory over Rhode Island. The bear left inner Holly Dunn, center forward Gayle Dormers, left halfback Lois Matlack, left wing; Bette Kjell-Humen, right inner; Joan Sawyer, left wing; Meredith Barker, left fullback; Rosemary Warren, right fullback; Gerry Waterhouse left halfback; Cathy Wheeler, left inner; and two other fullbacks, Karen Gray and Cheryl Waterman.

Jim Drummond, in the dark whether to kill for the quick change in black, red, navy, or blue, seems undecided on jersey, seems undecided on a URI soccer player. The University of Maine's soccer team are: Holly Dunn, right halfback and captain; Lois Smith, goalie and manager; Sally Tarr; center forward; Gayle Dormers, left halfback; Lois Matlack, left wing; Bette Kjell-Humen, right inner; Joan Sawyer, left wing; Meredith Barker, left fullback; Rosemary Warren, right fullback; Gerry Waterhouse left halfback; Cathy Wheeler, left inner; and two other fullbacks, Karen Gray and Cheryl Waterman.

Soccer saves 22
Soccer Bears beat R.I.

The University of Maine's soccer field hockey team lost its last game of the season to Bates, 2-1, November 8. The game was played at Bates from 3:00-4:00 in 20 degree weather. Maine's single goal was made off a Bates stick when the ball, driven down the field by Maine player Cathy Wheeler, ricocheted off an opponent's stick and into the goal cage. Members of the Maine team are: Holly Dunn, right halfback and captain; Lois Smith, goalie and manager; Sally Tarr, center forward; Gayle Dormers, left halfback; Lois Matlack, left wing; Bette Kjell-Humen, right inner; Joan Sawyer, left wing; Meredith Barker, left fullback; Rosemary Warren, right fullback; Gerry Waterhouse left halfback; Cathy Wheeler, left inner; and two other fullbacks, Karen Gray and Cheryl Waterman.

Women's field hockey team
loses last game to Bates

The University of Maine women's soccer team are: Holly Dunn, right halfback and captain; Lois Smith, goalie and manager; Sally Tarr, center forward; Gayle Dormers, left halfback; Lois Matlack, left wing; Bette Kjell-Humen, right inner; Joan Sawyer, left wing; Meredith Barker, left fullback; Rosemary Warren, right fullback; Gerry Waterhouse left halfback; Cathy Wheeler, left inner; and two other fullbacks, Karen Gray and Cheryl Waterman.

The University of Maine's soccer team is on fire this season, as evidenced by their recent victory over Rhode Island. The bear left inner Holly Dunn, center forward Gayle Dormers, left halfback Lois Matlack, left wing; Bette Kjell-Humen, right inner; Joan Sawyer, left wing; Meredith Barker, left fullback; Rosemary Warren, right fullback; Gerry Waterhouse left halfback; Cathy Wheeler, left inner; and two other fullbacks, Karen Gray and Cheryl Waterman.

Jim Drummond, in the dark whether to kill for the quick change in black, red, navy, or blue, seems undecided on jersey, seems undecided on a URI soccer player. The University of Maine's soccer team are: Holly Dunn, right halfback and captain; Lois Smith, goalie and manager; Sally Tarr; center forward; Gayle Dormers, left halfback; Lois Matlack, left wing; Bette Kjell-Humen, right inner; Joan Sawyer, left wing; Meredith Barker, left fullback; Rosemary Warren, right fullback; Gerry Waterhouse left halfback; Cathy Wheeler, left inner; and two other fullbacks, Karen Gray and Cheryl Waterman.
