New committee ponders feasibility of UM museum

by Jim Mann

An historical museum or museum complex may be part of the University of Maine campus. University Librarian James MacCammell said Acting President Winthrop Libby has asked the new committee to consider the idea.

The committee was formed recently to "get the ball rolling," according to MacCammell. He said the committee was formed and tasked for study of the question.

MacCammell said committee members are in sympathy with Sen. Harry A. Gove in his effort to secure a storage space for the University of Maine Fine Arts Department. As for money, he said, "the situation now is to hope for gifts.

The museum, concerned primarily with the state of Maine, would serve a teaching function, but would be open to the public. It is possible a museum complex incorporating displays by different university departments would be established.

Members of the new committee are Sen. Michael Gove; Professor Vincent Henriques, Dean of the College of Education; Dr. James MacCammell, chairman; Albert Naugle, Director of School of Forestry Resources; Associate Professor Richard McNab; and Dr. Paul E. Taylor, Professor of English.

Shared power

McNeil, Senate meet

The new Chancellor of the University of Maine, Donald MacNeil, addressed the Dec. 17, 1968, meeting of the General Student Senate because he felt it was appropriate to have a formal address at the University of Maine to make known his views to the student body. He thought it good that the student government and the student representatives be involved in campus curriculums. The role of the student is changing. To be involved with the campus, like the government, must be the avenue of shared power," according to McNeil.

However, the Chancellor believes students have the right to demonstrate, but it has to be done in the framework of peace, harmony, and productivity. During the Senate discussion he made the point that in discussing the role of students, he thought the General Student Senate has been well represented by students present.

He defined his position by saying, "I am the Chancellor and I am the chief executive officer, and in constitution with the president and the governor, the representatives will make recommendations to the Board of Trustees." He later added that "all legislative and gubernatorial relations will be handled by the students through the General Student Senate who will represent the student body in the Senate of the University of Maine and not the university. The faculty and students can govern the campus together in consultation with the Chancellor.

"I am not going to make any policy decision at this time. At the moment I am at a complete loss to know exactly what is going on; I have come into a new situation. I have been a dean of a college for the first time. I am accustomed to being a vice president of a college and dealing with the administration of the college. Now I am the chief executive officer of a large university.

"It is my view that the University of Maine is going through a period of change and growth, and in the course of this growth, there is an enormous opportunity for the students to enlarge their roles. The students should participate in the decision-making process. They should not control the University of Maine, but they should be informed of the whole campus. I am interested in the process and the growth of the institution, the continuing education of the students, the teaching, and the quality of the education that they receive. I am interested in the growth of the University of Maine and the University of Maine's growth in the community."

Libby to review Open House Policy

Acting University President Winthrop Libby will give his decision on the revised partial hours report at a meeting of the Student Life Committee scheduled for Jan 14. "The first stage of the new rules will be considered an extension of the present policy and will not have to be approved by the Board of Trustees," Libby said.

Hughes said that indications were Libby would work with the new rules. There is some question as to whether there is provision for enough Dorm Administrators. Hughes said that there should be no problem in implementing the new rules. He expressed assurance that at least a plan for Jan 14. a plan that is acceptable to both sides will be worked out.
Stewart granted leave

Carville appointed acting dean

Linwood L. Carville, 37, Assistant Dean of Men with primary re-
sponsibility for men's residence halls, has been named Acting Dean
of Men at Orono effective Feb. 2, 1969, the univ-

The appointment, subject to the
approval of the university's Board of Trustees,
was announced by Acting President Witherup C.
Libby.

Carville, former freshman basket-
ball, football and baseball coach at
Orono, replaces Dean of Men John E. Stewart, who has been granted
a leave of absence for the spring semester. Stewart, Dean of Men since
1951, will retire from the post
in June of this year.

Carville came to the University
Sept. 1, 1960, following four years
of coaching at Wareham High in

New course approval
plans submitted to Libby

Robert Kelly, nationally known
poet, will read from his own works
in the Cote Lounge Thursday, Jan. 14
at 4 p.m. Kelly's reading will replace
the poetry hour.

English resigns
managerial post

Dr. James Clark, Vice President
for Student Affairs, presented an
outline of the proposed revisions in
programs and course approval
procedures. Approval of the new
system should prevent duplica-
tion of courses in different areas
of study, according to Dr. Clark.

Approval would be accorded by
the appropriate curriculum re-
view committees; for UMP, the Di-
rector of Instruction; for the Gr adu-
ate School, the Curriculum Com-
mittee of that college's faculty.

He will appear in the Student
Un ion.

A dedication program for the University of Maine's Hook and Hastings organ which has just been installed in Lord Hall Recital Hall will be presented Jan. 10 at 8:15 p.m. by Mrs. Nellie A. Lovell, music department head, said the Friday evening concerts in the music department will have become because there are not enough Friday evening available for the number of concerts planned.

The university's new organ, originally installed in a church in the Boston area in 1968, was rebuilt in 1968 by the Neurk Organ Company of Andover, Mass. In the reconstruction all new pipes were used, and some principles of the Baroque period of organ building were incorporated. The result is an organ similar to the one played by J.S. Bach, according to Godwin, the outstanding qualities of the Baroque organ which a clear, ringing sound, homogenously toned for home, and individuality of sounds necessary for tracing separate voices in polyphonic music. The 18th Century method of mechanical, or tracker, action is also used in the organ which is a two manual, seven-rank instrument.

The Maine Agricultural Experiment Station, a pioneer leader in research on remote sensing for plant diseases, published the results of Manzer's and Cooper's research in Station Bulletin 646, "Aerial Photographic Methods of Potato Disease Detection, in March, 1967."

Although the Jan. 10 program is taken entirely from the period of Bach and his immediate predecessors, the organ is also well-suited to the playing of contemporary works, and certain types of romantic literature.

Mrs. Munroe, a part-time instructor in the music department where she teaches one course and instructs the organ class, received her bachelor of music degree at Lawrence Conservatory in Appleton, Wis., and her master of music degree at the University of Nebraska. The wife of Kenneth Munroe, IBM lecturer in the department of chemical engineering, she is also organist and director of the First University Church in Bangor.

The dedicatory program will include Canzona by Andrea Gabrieli, Chaconne by Louis Couperin; Dialoge in D Minor by Nicolas de Grigny, Toccata Avanti la Mensa di Letti Donatoso by Giovanni Francesco, Chaconne by Louis Couperin; Dialogue in D Minor by Nicolas de Grigny, and Toccata N° 1 by J. S. Bach. Choral Prelude: Nun festigt der Heiden Heiland, by J. S. Bach, and Suite for a Musical Clock similar to the one played by Mrs. Munroe, are arranged by Richard Purvis.

We encourage job-hopping. We do try to keep it instrumental—with Du Pont that is—and we do have a more formal title for it, "planned mobility."

"Having had all this, I feel I was better prepared for my present position of training supervisor. But aside from the fact that variety can help you, I believe most people just like a change after working at one job for a period of time."

"Take a good look around you, and you'll see people at Du Pont who've had a lot of movement through very different kinds of jobs. There's no doubt that this diverse experience helps you. For example, I had four assignments concerned with different aspects of polymers, casting, stretching and finishing our polyester film base."

"I'll like your latest information on opportunities at Du Pont for graduates with degrees in--"

Marketing at IBM

"Working with company presidents is part of the job."

"I'm pretty much the IBM Corporation in the eyes of my customers," says Andy Moran. "That kind of responsibility's not bad for an engineer just two years out of school."

Andy earned his B.S.E.E. in 1966. Today, he's a Marketing Representative with IBM, involved in the planning, selling and installation of data processing systems.

Plenty of business experience

"Engineering was my first love," Andy says, "but I still wanted good business experience." So far, he's worked with customers involved in many different computer applications, from engineering to business. His contacts go from data processing managers all the way up to the president of his largest account.

"At first I was a little nervous about working at that level," says Andy. "But then you realize you're trained to know what he's trying to learn. That gives you confidence. You're helping him solve his problem."

With his working partner, the data processing Systems Engineer, Andy has helped many customers solve their information handling problems. "I get a broad overview of business because I run into every kind of problem going. Sometimes I know the solutions from experience. Other times I need help from my manager.

"That's one of the best things. My manager is more of a backup than a boss. He's there when I need him. Usually, I pretty much call my own shots."

Andy's experience isn't unusual at IBM. There are many Marketing and Sales Representatives who could tell you of similar experiences. And they have many kinds of academic backgrounds: business, engineering, liberal arts, science.

They not only sell data processing equipment as Andy does, but also IBM office products and information records systems. Many of the more technically inclined are data processing Systems Engineers.

An Equal Opportunity Employer

IBM
On Christmas morning I got away from the grip of my honor and went next door to see some friends. At the mouth of the family gathered, I heard behind her the unmove of her sons and daughters and friends, engang and single. For 10 m. It was a very small household.

While everyone was being loud and happy I sat down with Danny, the youngest son, whom I hadn't seen for the two years he was in jail. He asked me if I could lend him fifty bucks which led me to think he must like me too. I said I couldn't, but he reminded me of the time several years ago when he found 1000 dollars at a deserted house. For a week he carried it around in his pocket, which made a big bulge, and then he lost it.

He needed money now to go to California. He told me he was recently married to a girl who had gone out there with her mother to live. The girl is 16.

"In two weeks I'm going out to visit her," he said. When the dawn came, "I'll bide here.

But as easily as that he tells of an undertaking nears, people would call him a fool. The next time I saw Danny, 17, his arms tattooed, the upper half of face, already two years in jail. When he was in jail he had to go out on work parties in the winter to clear land. When he got back from working he would break into the prison laundry and with a friend, take items inside an automatic drier to get warm. And although he was sure he had learned his lesson in jail, he won't wear what he was given back. He's working. He thought he might join the funny when he gets home from prison. I asked why he would do a stupid thing like that, and one of the thousand other aimless things he does. He only shrugged and said, "There's nothing better to do.

Danny was drinking gin punch two years in jail and any of the thousand other aimless things he does. He only shrugged and said, "There's nothing better to do.

Danny-

impression

In 10 years, probably won't let me come.

I found myself enjoying the place. It wasn't a traditional Christmas but it was merry. Some kids were playing records, others were yelling, and a sailor (the friend of one of the girls) was demonstrating locally how he was the 1964 Yo-Yo Champ in North Carolina.

I called my college and the next day I received a letter. It said, "I never met anyone like him. He talked about a friend who was in a forwarding business. "It don't really interest me," he said, "I mean fighting will hurt you, but drugs will kill you." He asked me about college and said he would like to try college. I knew he had quit school in the seventh grade. Or maybe he was thirteen one month.

"Where do I go to find college?" I asked Danny. "What are you looking for? I don't know you looking for. Are you looking for the girl," he said, "or are you looking for things?" Danny was thirty years old.

"The Casual Vomiter" is worth far more than
the price of the book. Somebody said satire isn't possible
in the 20th century. I mean you can't satirize something that no-
tobody takes too seriously anymore.
In any case, I can't create a satirical piece that I think will
say what I want to say to you. At least I hope not.

"The Casual Vomiter" is not easily forgotten, the
spitless, tail-tipped, griffins-toasted whisk, up-chucking over the
whole unfledged void. To conceive of it is one thing; to do it is another.

Student Ombudsman Moscow

A fourth-year student is the Col-
lege's Student Ombudsman, John
W. Moore, who was appointed to the
position three years ago.

Announced by Edward I. Levi,
President, the Student Ombuds-
man will receive student griev-
es and, at his discretion, bring
them to appropriate people or
institutional authorities in those
cases where a review by an of-
cial or official body is warranted.

Reports dealing with student
problems will be kept in confi-
nity.
