TWENTY CENTS

## 1912 at Its Last Reunion

## UNIVERSITY STORE COMPANY

ORGANIZED in 1911  
and conducted for the  
past fifteen years in the  
interest of the Athletic Asso-  
ciation, contributing yearly from  
its profits to the support of  
athletics.

Taking many mail orders  
from the Alumni for books  
and supplies; making special  
reunion banners.

May we be of service to  
you?

# EUROPE

## \$260

### All Expenses

*Yes—it's true!* You can go abroad, and spend  
a week in London or Paris, all  
expenses paid, for \$260. And the trip takes only 23 days!  
Or, if you can spare 37 days for your trip to Europe, you can visit En-  
gland, Holland, Belgium, France—see the best of all four countries—for  
only \$365. Price includes round trip ocean passage; all tips abroad;  
European transportation by steamer, railway and motor; hotel accommo-  
dations at good hotels; usual meals, motor trips as specified in itinerary;  
admissions to galleries and museums; services of guides and conductors;  
transportation of baggage. Extensions if desired to Ireland, Scotland,  
Switzerland, Italy and Germany, at the same proportionately low cost.  
These remarkable travel values are offered on our Collegiate Tours

### via CANADIAN PACIFIC

"WORLD'S GREATEST TRAVEL SYSTEM"

We also offer *Guild Cabin Tours*, at \$850 and up, visiting  
France, the Riviera, Monte Carlo, Italy, Switzerland, Germany, Holland,  
Belgium and England. 51 to 57 days. . . . *Empress Tours*, at \$1500, visit  
the same regions, using first class accommodations on shipboard, and the  
very best hotels. 60 days. All sight seeing in private motors. . . .  
For *Fraternity People*, we offer the Second Annual Panhellenic Tour to  
Europe, visiting England, Holland, Belgium and France. 37 Days, All  
Expenses, \$385. Extensions if desired. For detailed itineraries, address—

## RECENT FRESHMAN CLASSES

By Dean J. N. Hart, '85

At the request of Secretary Clark I am very glad to give some facts regarding the last three Freshman classes.

The following tables show very clearly that the University is distinctly a Maine institution. Eighty-seven per cent of the Freshmen during these three years have come from our own state. All of the counties in the state are well represented. Penobscot naturally sends us the largest number, Cumberland is a fairly good second, Aroostook and Kennebec are tied for third place, with Oxford, Hancock, Washington and York only slightly behind.

For individual schools Old Town is second to Bangor. Portland, Hebron, Augusta, Brewer, Orono, Millinocket, Auburn and Lewiston are among those which have sent large delegations. It will be noted that in 1926, 41 Maine schools and academies sent us three or more students each, but as students were received from 128 schools and academies that year, there were 87 that sent only one or two students.

The alumni may be surprised to note that the entering class of 1926 was not quite as large as that of 1925. The tabulation by schools gives a key to this difference. The delegation from Bangor entering in 1925 was from a class that entered the high school when the city changed from nine grades below the high school to eight grades. The class entering the high school in 1921 was consequently a double one, naturally a larger number graduated, and as a very large percentage of Bangor students going to college enter the University, we had 30 more students from that school in 1925 than in 1926 and 34 more than in 1924.

Number of academies	89	90	64	

For the last three years we have gathered from the entering students some in-

formation that had not previously been secured.

A. Student's Questionnaire. Each candidate fills out a questionnaire showing his parentage, school activities, recreations, earnings and financial plan to meet college expenses, reasons for wanting a college education and for choosing a particular course in college.

B. Supplementary Information from Principal. The Principal is asked to supplement the school record with his own estimate of the candidate's favorable and unfavorable traits, the quarter of the class in which he stands and a definite statement regarding his character and habits.

C. So far as possible a personal interview is also held with each candidate. During the school year 1925-26 56 high schools and 23 academies were visited for this purpose. These included practically all of the larger schools in the state. Some of the items gathered from interviews and questionnaires are given below for the class entering in 1926.

### FAVORITE STUDY

The table of favorite study and least liked study shows very clearly that students who are planning to take a Technical course very generally prefer mathematics and science to language and history. It seems rather surprising to find that among the Arts students fewer give Latin as their favorite study than Mathematics or Chemistry or English. Under disliked study Latin clearly leads. Among the Technology candidates there are more who dislike French than Latin, but probably many more of them offer French than Latin.

## SUCCESS IN COMPETITION

Seventy-nine candidates reported that they had been successful in some kind of athletic competition and thirty-six in scholastic events. The returns on school honors must be regarded as very incomplete because the most of the interviews were held during the Senior year before class parts had been awarded.

## MAGAZINES READ

The prominent place among magazines read held by the Literary Digest is no doubt due to the fact that in very many schools this magazine is used as a basis of class discussion. Of the periodicals chosen by the students themselves The American is evidently the most popular.

Literary Digest	84
American	70
Saturday Evening Post	52
National Geographic	20
Ladies' Home Journal	15
Popular Science	12
Cosmopolitan	11

## BOSTON ALUMNI ASSOCIATION

Report of the President  
March 11, 1927

When the present Board of Officers took command of the affairs of your Association approximately two years ago, they brought with them the experience of the preceding two or three years, and an abundance of optimism and enthusiasm. While we have not attained the success we had dreamed of, we have nevertheless a fair record of achievement, and by no means do we count as wasted the many hours of hard work we have given to the cause.

The problem of attendance held the focus of our attention from the start, and it is still the greatest problem that the Association faces. This is not a condition peculiar to our organization. To secure an adequate attendance is the burning question before nearly every alumni association.

Our method of attack was as simple and as direct as we could devise. We tried to build up a system and an organization to operate it known as the key man system, which would give the association a close personal touch with every alumnus. The first year the territory embraced by the Association was divided into sectors and zones, with a key man and assistants in each sector. The results were approximately in direct proportion to the efforts of the key man organization. In some sectors the results were good, and in others they were nil. The second year a similar effort was made, but instead of a geographic division of our territory, class groups were used with one or more key men for each class, or in certain cases a group of classes. The results were approximately the same as above mentioned.

In both years the special drive was for attendance at the annual dinner. There were various theories of the causes of poor attendance at past annual dinners, most prominent of which were high cost and poor entertainment. An attempt was made to escape both criticisms by securing an underwriting pledge from approximately 25 interested alumni, which would enable us to keep the cost below a stated amount which was considered reasonable. These funds were used to provide speakers and entertaining features, so that the tickets gave to the holders considerably more than they were actually paying for. We believe that the speakers and the entertainment were appreciated both years, and but few criticisms have been received of the charges. These efforts did succeed in securing attendance slightly better than in the preceding years, but not nearly the increase we worked for. We tried especially to reach the younger alumni by giving members of the younger classes

places of prominence on our committees and on our programs but without satisfactory results.

Another point in our records of the past year which should be mentioned is our action on the alumnae question. In answer to the constant and increasing demand that the alumnae be recognized in our gatherings, it seemed to the officers that they would not be administering the affairs of the Association faithfully if they continued to ignore this demand as in past years. We were unable to discover that the women were not entitled to the same rights and privileges as the men. We knew of only a few conscientious objectors to the women and of very many who strongly favored them. We, therefore, invited the women of Maine, and the wives of Maine men to participate in the annual dinner. The move met with very nearly unanimous approval from both men and women, and thus far I know of but two men who stayed away because the women were included.

Based on the experience of the past two years I am going to make a few observations which I hope will be of value to the incoming officers. I wish it understood that these views are personal and not necessarily the opinion of the officers as a whole, although I believe in general they concur with me.

1—I recommend that the women of Maine be invited to participate in our annual dinner. I further recommend that a committee be appointed to formulate a plan by which the alumnae will have a place in our organization, possibly by having a joint organization, and a separate organization for the men and one for the women with independent officers. This is the scheme which is now followed by the Boston Bates Association. Another plan which might be considered would be two separate organizations which would act jointly on certain events. This would entail no change in our organization but would necessitate organizing the alumnae who are at present unorganized.

2—Every function should be self supporting and the cost of operating it should not be assessed until the attendance is known—then make every one share equally. A splendid spirit was shown by the underwriters whom I called upon for assistance, and I believe their action has enabled us to prove that one or two of the pet theories regarding attendance were not well founded. This scheme has served its purpose and should not again be adopted.

3—Of the two schemes tried for reaching the alumni I believe the class scheme to be much the better and

suggest that the organization be developed along this line.

4—The problem of securing the interest of the younger alumni is a disturbing one. Try as we would we have accomplished practically nothing in this direction. I am forced to the conclusion that the trouble starts at Orono, and it is beyond the powers of our local association to bring about very much of a change. I believe certain plans of the general alumni association may help on this question if they materialize.

5—I would like to see the Boston Association revive the old plan of providing a scholarship or prize to be awarded annually for some meritorious work at the University.

There have been many other problems with which we have grappled but to my mind they are trivial in comparison to those above mentioned.

In closing I want to express my sincere thanks to my fellow officers and the committees who have done so much for the Association. In most instances it has meant a great sacrifice of time but I am sure that in every case it was looked upon as a labor of love gladly given to Maine. I feel that I should especially mention the excellent work that our Secretary, Mr. Little, and his able assistant, Mrs. Little have done. So far as I know our records have never been in as clear and satisfactory condition as at present.

Fred D. Knight '09

March 11, 1927

### STUDENT-FACULTY- ALUMNI BANQUET

The fourth annual Student-Faculty-Alumni banquet, as have those of previous years, was a real success and held in the main dining room of the Bangor House. Every place was taken and the banquet thoroughly enjoyed by old and young. This year's program was one of constructive criticism and held the interest of all attending until well after midnight.

Alumni Secretary, Robert P. Clark, '15, was toastmaster, and he introduced in order Edward M. Engel, '27, who spoke for the student body; Dean Paul Cloke, of the College of Technology, who represented the faculty; Justice William R. Pattangall, '84, of the Supreme Court of Maine, who spoke for the alumni; and Dr. Harold S. Boardman, '95, president of the University, who summed up the remarks of the previous speakers and then told of the efforts the administration was making to improve the services rendered by the University.

The University Trio played during the banquet and a quartet from the Glee Club sang. The evening closed with the Stein Song.

### HARTFORD

Seventeen Alumni in and around Hartford met with President Boardman and Alumni Secretary Clark at the City Club for luncheon this noon. After the luncheon, Bob Clark spoke on alumni activities throughout the country, giving us a very comprehensive resume of athletics and the important part the new gymnasium armory was playing in the matter of athletics in general.

Quite a few questions were asked by the alumni which all tended to make the gathering more pleasant.

President Boardman gave us an informal talk on the extension work carried out by the University and discussed plans for the future.

There were several impromptu speeches by the Alumni.

Mr. C. C. Elwell, Class of '78, chairman of Public Utility Commission in Connecticut, made a few remarks and said among other things that he had known every President of the University of Maine. He was very glad that a Maine man was President of the University at this time and felt that the University deserved such a man as its President.

Jim Rhodes, Law '17, said a few words as did Fred Cole 1900.

Meeting broke up about 2:30 P.M.

The following alumni were present:

Guy Dyer '13, R. W. Wetherbee '13, William G. Jones 1900, George Brookes '25, George S. Longley '18, William C. Holden '92, Fred E. Wiley '10, A. W. Hanmer, Jr., '26, E. C. Waterhouse '26, Carlton A. Walker '22, Fred Cole 1900, A. A. Packard '16, C. C. Elwell '78, James E. Rhodes, Law '17, W. O. Haskell '11.

E. H. May, Secretary

Hartford Alumni Association

### EMPLOYMENT

Alumni between the ages of 25 and 30, who would be interested in learning to be executives in the chain store field may learn of an opening by writing the Alumni Office. The Company concerned operates a chain of department stores in New England and specializes in selling low and medium priced merchandise. Men entering this work generally train to be store managers. Single men preferred. Excellent positions for capable men.

### WANTS POSITION IN MAINE

Graduate of Maine, 1923, wishes to make a change. Has been working in Boston in the General Engineering Department of the New England Tel. & Tel. Company. Experienced on transmission, valuation and economic selection. Much interested in finance and banking. Best of references as to ability and integrity. Write 1923 Graduate, in care of Alumni Office.

## The Maine Alumnus

Published monthly by the General Alumni Association of the University of Maine during October, November, December, February, March, April, May and June.

Subscription, \$1 per year. Single copies, 20 cents.

## Editorial

### STAND OFF A MILE

It behooves all of us, in both our personal and business affairs, to stop occasionally for stock taking. Just as children grow up without apparent change from day to day and just as all of us grow older without realizing it until we look backward and ahead, so do our problems change and every so often new ways of handling them should be devised.

Your Alumni Association is growing up. It is finding new problems to face.

No one wants to get in a rut. This is a very strenuous age in which we are living and one must think fast and often to keep the pace. Petty things must be relegated to the back ground and the bigger things given our best attention. How fine it would be if we could stand off a figurative mile and view our lives and values from a distance so great that only the big things, the essential things, the things that are really worth while could be seen.

The achievements and worth of man should not be measured entirely in dollars and cents. A man who has loyalty, sincerity, affection for his fellow and interest in him both individually and collectively; a man who puts his shoulder to the wheel when a deserving cause needs his

support, does much to justify his existence and merits the appreciation of all.

When you became an alumnus of the University of Maine you should have acquired along with the other many component parts of a college education, certain cherished memories and affections and, we hope, a real and sympathetic loyalty to that rapidly growing fraternity of Maine men which is the connecting link between you and your old time friends, and between you and your Alma Mater—The General Alumni Association. Have you got it?

If you have been a loyal alumnus of Maine; if you support your alumni association by paying dues annually; if you subscribed to the Memorial Fund and are meeting your payments, you have.

If you have not yet discovered that you have a real and sympathetic loyalty to Maine, consider the matter now. Stand off that mile and see if Maine does not stand out among the big things in your life. If it does we believe you should support your alumni association. It exists for Maine and Maine alumni.

Let us make Maine stand for loyalty, not of a few but of all.

Pay Alumni Dues!

### WITH OUR AUTHORS

Edith M. Patch '10 has recently written "First Lessons in Nature Study." The book is published by the Macmillan Company. It is a very simple, exceptionally readable account of the common plants and animals, wild and domestic, found in North America. It combines the accuracy of a book of science with the charm of a story book. Beautifully illustrated

with photographs and drawings by Robert J. Sim.

First Lessons in Nature Study introduces to pupils in the lower intermediate grades common plants and animals, wild and domestic, encountered throughout North America. Material is presented in such a way as to increase the child's power of observation and to lead him to apply out of doors knowledge acquired in the class room. The text reads like a continuous narrative; questions and answers are grouped in one final chapter instead of after each individual one. A full index is provided.

The style is preeminently adapted to young readers through simplicity of diction, charm of phrase and general attractiveness of the presentation. Miss Patch combines to an unusual degree the accuracy of the scientist with the facility of the story-teller.

Miss Patch, Professor of Entomology at the University of Maine, and scientist of note, is distinguished for a wide variety of scientific publications, and especially for her nature stories.

William C. Monahan '14 has won national recognition in the poultry field. He is Extension Professor of Poultry Husbandry at Massachusetts Agricultural College at Amherst, Mass., and also editor of "The New England Poultryman." On the advisory staff of this magazine are two other Maine alumni. A. W. Richardson '06 who is Professor of Poultry Husbandry at the University of New Hampshire and O. M. Wilbur '15, who is poultry expert of the Extension Service at the University of Maine.

Monahan is author of "Profitable Poultry Keeping," President of the Massachusetts Federation of Poultry Association, Secretary and Treasurer of Massachusetts Association of Certified Poultry Breeders, Inc., Member of Executive Committee National Poultry Association and Educational Committee American Poultry Association, Chairman, National Committee on Curtailment of Poultry Thieving.

### BATES DEFEATED IN IN-DOOR TRACK MEET

The stock of the Maine track team took a decided boost when the blue won an indoor dual track meet from Bates in the Indoor Field at Orono 65½ points to 51½ on Saturday, March 5th.

Over 500 people, mostly students, held their bleacher seats until the last event was over. Bates was favored to win. Two records for the Indoor Field were broken, the shot put and the pole vault. Thompson, Maine, put the 16 pound shot 43 feet, ¼ inch and Captain Hobson vaulted 12 feet, eight and ½ inches.

Bates has a splendid group of distance runners, headed by Wills, a miler of national reputation. Rowe of Bates was high point winner of the meet.

Three Maine men won first places in varsity competition for the first time and thereby deserve an introduction to Maine alumni.

Niles in the 300 yard dash

Noyes, a sophomore in the two mile run after a spectacular race in which he outraced both Taylor of Maine and Wardwell of Bates, two veterans, to win in nine minutes, 58 seconds.

Hammond, a junior, ineligible last year, won the high jump at five feet, eight and ⅝ inches. He also placed second in the high hurdles.

The summary will show fine work done by the rest of the squad.

#### SUMMARY:

45-yard dash—Rowe, (B), first; Niles, (M), second, Hamlin, (M), third, time, five and one fifth seconds.

45-yard high hurdles—Torrey, (M), first; Hammond, (M), second; Parks, (M), third, time, six and two fifths seconds.

One mile run—Wills, (B), first; MacNaughton, (M), second; Brown, (B), third, time, four minutes and 28 seconds.

600 yard run—Wakeley, (B), first; Thompson, (M), second; Adams, (B), third, time, one minute and fourteen seconds.

Two mile run—Noyes, (B), first; Wardwell, (B), second; Taylor, (M), third, time, nine minutes and 58 seconds.

1000 yard run—Wills, (B), first; Chesley, (B), second; Adams, (B), third, time, two minutes, nineteen and ⅔ seconds.

300 yard dash—Niles, (M), first; Torrey, (M), second; Wakeley, (B), third, time 33 seconds.

Putting 16 lb. shot—Thompson, (M), first; Hartman, (M), second; Rowe, (B), third, distance, 43 feet and ¼ inch (Record).

Pole vault—Hobson, (M), first; Beckler, (M) and Proctor, (M), tie for second; distance, twelve feet, eight and ½ inches (Rec.)

Running high jump—Hammond, (M), first; LaPlante, (M), Knowlton, (B), and Caldwell, (M), tie for second, distance, five feet, eight and five-eighths inches.

Running broad jump—Rowe, (B), first; Caldwell, (M), second; Paul, (B), third.

### COMMENCEMENT

June 10th to 13th

ALUMNI DAY

Saturday, June 11th

### HARRY SUTTON URGES 1912 MEMBERS TO RETURN

In a letter to the Secretary of the 1912 Class, Harry Sutton, President of the General Alumni Association, urges all members to return June 10-11-12.

He writes "Extend to your classmates my appreciation of their efforts in returning for their fifteenth reunion. I know of no way in which a class can be of more benefit to the University, or a better way the Alumni can support it, than to return for Commencement. The University needs the contact of the Alumni and the Alumni certainly need the contact with the University."

The Commencement Committee are recommending certain changes and improvements that will go a long way to help make the reunion of this and other classes a most enjoyable occasion.

There were more than 40 members of this class who returned in 1922. Already several have written their Secretary they were coming.

One member who was back in 1922 writes, "I'm going to bring along my better half so that we can both enjoy the pleasant associations that go with a 1912 reunion."

Nothing can be of more help to a class secretary or committee than to have members indicate their interest in and intention to return for their reunion. It's the bit that everyone can do that counts.

### UNIVERSITY OF MAINE STUDY WINS PRAISE

Miss Rose Davis's recent volume on the life and works of Stephen Duck, the thrasher-poet and precursor of Burns, has won much favorable comment in this country and in England. Professor Craigie of Oxford says: "Miss Davis's very thorough study is of interest as showing how certain types of poetry can be more or less successfully cultivated by unoriginal poets"; and Professor Moore Smith of Sheffield finds the book "attractive."

Many American scholars praise it. Professor Trent of Columbia University testifies to "a most favorable impression," and says that it shows a mastery of accurate scholarly method and of effective presentation. Professor Havens of Johns Hopkins finds it "a thorough and useful" piece of work. Professor Osgood of Princeton feels that the University of Maine "has good reason to be proud" of such a publication. Dean Bouton of New York University finds it "entertaining." Professor Mackenzie of Washington University declares it "an extraordinary piece of work for a Master's thesis—good enough to serve in a great many universities as a doctoral dissertation"—an opinion that is also expressed by Professor Kaye of Northwestern. Congratulations have also come from Professors Tatlock and F. N. Robinson of Harvard, Professor Nason of New York University, Professor Baum of Duke University, Professor Gott of Tufts, and others.

Miss Davis took her bachelor's degree from Columbia in 1922, came to Maine as instructor in English, worked for her M.A. under Professor Draper, and took her degree last June with the study of Stephen Duck as her thesis. The volume was issued from the press this January.

### A MESSAGE FROM THE FINANCE COMMITTEE

An open letter from three Maine alumni to alumni who have not yet paid their alumni dues.

"It costs \$200.00 to send out circular letters to Maine Alumni urging them to pay alumni dues. Are these letters and this expense necessary? Maine alumni know we have an alumni association. They know about the alumni office. They receive *The Maine Alumnus*.

Most alumni expect to keep an active membership in this association and help its cause by paying alumni dues. So many neglect or forget to however, that the association is generally hard up for money and consequently its activities are curtailed.

We believe that this reminder will be sufficient to get your check for alumni dues. Never mind the blank generally requested although a memorandum giv-

ing your address and occupation would be of value to the alumni office.

Alumni dues are \$3.00 per year. Why not mail yours to-day—now, before you forget it?

If you can afford to pay the \$10.00 sustaining membership dues, we hope you will. You would help just that much more. Anyway become an active member.

Make checks payable to C. E. Crossland, Treasurer. Mail them in care of the Alumni Office, U. of M., Orono, Maine.

Sincerely yours,

Carl H. Hopkins, '15

A. K. Gardner, '10

Forrest B. Ames, '13

Finance Committee

CAPT. CARLLTON HACKETT

### BASEBALL PROSPECTS

The snow and ice on Alumni Field having retreated at double time this spring there are hopes that the baseball team will get an early outdoor start. At present Coach Brice has the squad working out daily in the Indoor Field.

Maine lost Perry, pitcher; Newhall, first base and Thompson, pitcher, by graduation last June. Gay, second base, has transferred to Boston University.

It is idle to attempt at such an early date to foretell the makeup of Maine's 1927 ball team. A review of veterans on

the squad should be opportune.

Carroll Hackett is captain. He has played center field for two years. Crozier, pitcher, fielder and hitter, last year's captain as available. Hamilton, catcher, Durrell, short stop, Cassista, third base, Lewis, and Meserve, fielders are all veterans on the job.

Nanigan, captain-elect of football and leading hitter last year will probably be brought in from the outfield to second base. Hammond, varsity high jumper, who played first base of his freshman team in 1925 is a leading candidate for first base.

No mention has been made of the material from last year's freshman team. Some of these boys are sure to make the grade.

The schedule is as follows:

April 19	Colby at Waterville (exhibition)
" 23	Bates at Orono (exhibition)
" 26	Massachusetts Aggies at Amherst
" 27	Brown at Providence
" 28	Connecticut Aggies at Storrs
" 29	Rhode Island at Kingston
May 4	Colby at Orono
" 10	Bates at Lewiston
" 11	Bowdoin at Brunswick (exhibition)
" 13	Bates at Orono
" 16	New Hampshire at Durham
" 17	Harvard at Cambridge
" 18	Bowdoin at Brunswick
" 21	Tufts at Orono
" 25	Bowdoin at Orono
" 28	Colby at Waterville

### HONOR FOR PROF. DRAPER

Dean Stevens, of the College of Arts and Sciences of the University of Maine, announces that Dr. J. W. Draper, Professor of English, has been awarded a John Simon Guggenheim Memorial Foundation Fellowship for advanced study abroad. These fellowships were founded by Senator and Mrs. Guggenheim as a memorial to their son, who died April 26, 1922. They are given for the purpose of carrying on research work abroad in any field of knowledge and for creative work in the fine arts. They are awarded to men and women of high intellectual qualifications who have demonstrated unusual capacity for productive scholarship, and who have their plans for future work definitely outlined. The work to be undertaken by Dr. Draper is the production of a bibliography of eighteenth century works on Esthetics, and for research into the origin of the "Graveyard School" of eighteenth century poetry. The work will be done chiefly at the British Museum and will occupy 12 months from August 1927. These are subjects upon which Dr. Draper has been working for a number of years.

## THE UNIVERSITY OF MAINE

RADIO TALK BY PRÉS. BOARDMAN

No. 2

In a previous talk I gave a brief outline of the development of American higher education with special reference to the University of Maine. I called attention to the dual service which this institution is called upon to furnish, inasmuch as it is a Land-Grant college and also a state university. In reality, however, this separation does not exist except in so far as we are obligated by our original charter to fulfill certain requirements. We are, in the broad sense of the word, a university with the liberal privileges which go with such an institution, the extent of our activities being limited only by the funds which are or may be available. The demands upon the institution have always been in excess of its appropriations, and its endowment has been small. I do not wish at this time, however, to speak further upon the finances of the institution as this is a subject I hope to cover in a later talk.

The early days of the Maine State College were similar to those of the development of the new type of institution in other states, altho in general the newer states received the state college idea with much more favor. It was, however, necessary to proceed cautiously and to feel out the way as no precedent was at hand for a pattern, and if the new structure to be created was to endure it must be made upon new templets and built upon a sound foundation.

Let us see what were some of the first problems which had to be faced. Remember that the main objects of the institution were to develop agriculture and the mechanic arts "without excluding other scientific and classical studies." Mechanic arts came to be synonymous with engineering and most of the colleges established curricula in civil and mechanical engineering. These two applied sciences, especially civil engineering were very ancient, and much technical knowledge was available. Also they had come to be recognized as a kind of profession in some institutions and a supply of teachers, altho small and not well trained, was available. Therefore it was possible to set up courses in engineering at once and to begin to train students. Contrast this situation with that which confronted agriculture. Although "old as the hills," agriculture had never been that of an applied science, susceptible of laboratory study and analysis. No technical information worthy of the name was available, neither were there any text books or trained teachers. It was necessary to commence at the beginning and gather information of a technical nature, make analyses, laboratory experiments and draw

conclusions, and in fact get a mass of information, theoretical in its nature, but of practical value. This was commenced by the colleges themselves and after the establishment of agricultural experiment stations by federal act of 1887, it was carried on and developed by them. The work which these stations have done and are doing needs no brief from me. Sufficient it is to say that without them and their discoveries, technical agriculture would probably never have lived. In due time these stations, located in each state, became the great agricultural laboratories of the nation and furnished the mass of agricultural technical information upon which the applied science is founded. It follows that the teaching of the science at first was of poor quality and in fact of small value. It is true that practical farming could be taught and was, but this was not scientific agriculture, and too often the "practical farmer" looked with scorn upon the attempt to create "book farmers." I can well remember the time when a boy, who had ambitions to study agriculture, was likely to be advised by some well meaning and prosperous farmer to come to his farm and hire out and learn the "real stuff" by the sweat of his brow.

So, although engineering and agricultural education developed side by side in the same institutions, the former developed more rapidly than the latter. Engineering, however, at first content with its mass of experimental data, largely taken from the experience of men who had previously practiced the art—for it is an art as well as a profession—did not feel it necessary to create experiment stations, and so gave its chief attention to the development of students and subsequently to improving its teachers. In the meantime the friends of agriculture developed great activity and not only created experiment stations and developed their teaching curricula, but established an extension service which is now nation wide. By this service agricultural knowledge and home economics is taken directly to the farms by a corps of extension workers. This state service receives direct federal support as well as state support and its value is great. Maine has such a service as many of you know and it is so extensive that I shall not attempt to describe it at this time.

To sum up the relative development of the agricultural and engineering educational activities as originally conceived by the friends of the Morrill Act of 1862, we may say that agriculture was developed in its three phases in the following order. Agricultural experimentation, agricultural teaching and agricultural extension. Engineering was developed chiefly along the line of teaching; a few states have developed engineering extension services; a few have developed strong engineering

experiment stations; while a considerable number have each or both of the latter activities to a greater or less degree. There is, however, not the call from the states for these activities that exists in the case of agriculture.

In developing agricultural and engineering curricula, it soon became evident that something in addition to technical information was necessary to develop resourcefulness and vision, and that a liberal education should go hand in hand with technical knowledge. For example, the engineer soon saw that a knowledge of English was nearly if not quite as necessary as drill in mathematics, and if he would take his place in the world with those about him, he must have a philosophy of life, and also be able to talk understandingly about the past as well as the present and be cognizant with much which is not directly related to engineering. Thus today both the engineer and the agriculturalist are men of vision with a training very different from that of fifty years ago. In the course of all this, the demand for teachers in the liberal arts as well as in pure sciences increased and in time some students came to the institution to study things other than engineering or agriculture, and the demand for this kind of education at the expense of the state grew.

In 1897 as mentioned in a previous talk the Maine State College became the University of Maine and very soon for purposes of administration the institution was divided so that now there are the colleges of arts and sciences, agriculture, and technology; together with the Agricultural Experiment Station. Formerly a college of law, located in Bangor, was in existence, as was also a curriculum in pharmacy, this latter located in the College of Technology. For reasons which I will not go into, the College of Law and the curriculum in Pharmacy were discontinued during the World War.

Each college has a dean at its head, and the Experiment Station, a director; all of these coming directly under the president. There is also the dean of the University, the dean of graduate study, and the dean of women; all of whom, however, are connected with one of the colleges in other capacities. Each college has its own organization, its own departments, and carries on its own work, and is a component part of the whole, and renders service wherever needed. For example, the departments of English and mathematics, altho located in the College of Arts and Sciences, give these subjects to all of the engineers from the College of Technology. History, economics, modern language, biology, physics, and other subjects are either elected or required in various curricula outside of the college in which these subjects are located.

The growth of the institution has been

steady without the spectacular features which have attended the development of many of the western institutions. In 1890, 22 years after our doors were opened, the records show 148 students and 14 faculty members. In 1900 these figures had increased to 382 students and 56 members of the faculty. The figures for the present year show a total registration of 1562 and a teaching faculty of 154, an Experiment Station staff of 20, and an agricultural extension staff of 40.

The number of living former students including non-graduates is nearly 6400. It is of interest to note their distribution. At the present time 49% are residents of Maine, 25% are located in New England, outside of Maine, and 26% are outside of New England. The largest group to be found in Maine is from the College of Agriculture and amounts to 60% of those formerly registered in that college. The Arts and Sciences group comes next with nearly half of their number residents of Maine, and, as might be expected, only about 30% of the engineers remain in the State. I feel sure that this record will compare favorably with that of other states, and it certainly shows that of those who attended this institution nearly half are actively engaged in some occupation in the State of Maine, and are interested in her welfare.

### NEW YORK

Box 159, Tenafl, N.J.  
Feb. 26, 1927

Mr. R. P. Clark  
Orono, Maine

Dear Mr. Clark:

The University of Maine Alumni Association of New York held its Thirty-seventh Annual Dinner, Feb. 11, 1927 at the Sherman Square Hotel, Broadway at 71st St, New York City. This meeting, like the Fall Meeting when reports of the Maine-Bowdoin game were received, was one of the largest and most enthusiastic in the history of the organization. Con-

way Brothers Quintet furnished high class entertainment, both instrumental and vocal, during the excellent dinner.

"Bub" Fogler '15 President of the Association, opened the meeting by reading a letter from former President A. W. Harris, in which the latter expressed his love for Maine and his regret at being unable to attend as a guest of the association.

A. M. Knowles '04, Chairman of the Election Committee, then reported the following slate of officers for the ensuing year, effective May 1, 1927:

President, I. E. Treworgy, '03, 1st Vice Pres., G. L. Freeman '03; 2nd Vice Pres., A. R. Small '04, Secretary, R. M. Boynton '20, Asst. Sec., S. M. Currier '20, Treasurer, L. C. Swicker '19, Asst. Treas., C. W. Weeks '05, Member Exec. Com., A. D. T. Libby '98, R. L. Mitchell '08, G. O. Hamlin '00, R. H. Fogler '15.

Mr. Treworgy described by Fogler as a tireless worker, a capable executive and a loyal Maine man, declined to speak, giving his time to those who were to follow.

"Bob" Clark, Alumni Secretary at Orono, gave his usual interesting talk on activities at the University in which the Alumni are particularly interested. His resume of athletic and student activities in which he brought out incidents and details not published in the *Alumnus*, interspersed with his own good humour, held the interest of all. He closed with a strong appeal to the subscribers to the Gymnasium Armory Memorial who have become delinquent in their payments, urging them to make a special effort to bring them up to date, in order that this great structure can be completed.

"Dan" Chase '08, having humourously remarked that we ought to have at least one good speaker besides Pres. Boardman, was called upon and responded with a forceful talk on the Sportsmanship Brotherhood Inc., of which he is executive secretary. He stated that this organization was dedicated to the promotion of good sportsmanship throughout the world, and encouragement to play the game of

life fairly and generously. That this influence, when felt in all the nations of the world, will play a strong part in the promotion of world peace, is the opinion of Mr. Chase.

Pres. Fogler called on A. D. T. Libby '98 to introduce President Boardman. Mr. Libby recalling many pleasant incidents which took place when he and "Boardy" were at the University, stated that he had long thought and hoped that Maine might have one of her sons as a leader, and it therefore gave him great pleasure to introduce President Boardman, the first to be so honored.

President Boardman spoke informally on conditions at Maine, his relationships with the students, alumni and faculty, expressing the opinion that his position was very unique in that he was well acquainted with all three groups.

He then spoke more formally, presenting a thorough analysis of the problems of selection and instruction which confront our modern educators.

"Dutch" Bernheisel led the cheering during the evening.

The meeting closed with the Stein Song.

A partial list of those present is appended.

Mrs. Estabrooke, '83, F. E. Emery; '95, H. S. Boardman, W. W. Chase, C. D. Thomas, Mrs. Thomas, '98, A. D. T. Libby, Mrs. Libby, '02, A. E. Silver; '03, G. L. Freeman, Mrs. Freeman, I. E. Treworgy, R. H. White; '04, A. M. Knowles; '05, C. W. Weeks; '08, Daniel Chase, Mrs. Chase; '10, W. S. Merrill; '12, E. F. Carleton; '15, Miss Ava H. Chadbourne, G. H. Bernheisel, R. P. Clark, R. H. Fogler, Mrs. Fogler, H. P. Sleeper, M. J. Creighton, S. C. Clement; '16, Mrs. Sleeper; '17, Miss Rosalind Jewett, B. H. Gribben, H. W. Maxfield, Mrs. Maxfield; '18, E. R. Ring, L. E. Lambert; '19, Miss Marjorie Gooch, W. C. Ellsworth, C. P. Gould, L. C. Swicker, K. T. Young; '20, Miss Rhandena Armstrong, Mrs. Elva Gilman Boynton, Miss Kathryn Gordon, Miss Helen Johnson, R. M. Boynton, S. M. Currier; '21, Col. F. R. Lang, Mrs. F. R. Lang; '22, Miss Mary Coughlin, Miss Lucy Chamberlain; '23, E. L. Kneeland, O. E. Stewart; '24, L. Caplan, B. I. Davenport, J. L. Townsend; '25, C. W. Cambell, O. A. Hardy; '26, W. M. Barrows, L. B. Blethen, Allen Burnham, H. B. Eaton, S. S. Ginsberg, G. L. Thompson, J. C. Stein.

## EASTERN NEW YORK

Robert P. Clark  
Orono, Maine  
Dear Mr. Clark:

Following is the report of our annual meeting, which you may modify and correct as you see fit.

The Eastern New York Alumni Association had the pleasure of entertaining Alumni Secretary "Bob" Clark and Prexy "Dean" Boardman at their annual meeting which was held Feb. 14th at the Hotel Van Curler, Schenectady, N. Y. Immediately after the dinner the regular business meeting was held at which the following officers were elected for the ensuing year.

President W. C. Plumer (elected unanimously for the 4th successive term)

Vice President H. P. Mayo

Secretary-Treasurer H. R. Butler (sentenced to one year hard labor)

Concerning the Alumni Hotel movement, whose progress was reported by Bob Clark, the following resolution was passed:

"Resolved: That the Eastern New York Alumni Association believes thoroughly in the Alumni Hotel movement. They hope that the Hotel Van Curler will seriously consider participating in the movement."

At the close of the business meeting, affairs were turned over to the toastmaster, Bill Merrill, who appropriately introduced the speakers of the evening, Bob Clark and Boardy, whose accounts of recent happenings and reminiscences of ancient happenings were very interesting to the group. Our guests were then entertained by our expert licensed (?) movie operator, Win Bearce, who displayed a few educational films entitled "Seeing America First" or "A Trip Along the Maine Coast" by noted General Electric explorers.

Very truly yours,

HENRY R. BUTLER

Secretary-Treasurer

109 Sixth St., Scotia, N.Y.

## MUEHLEBACH HOTEL ADDED TO INTERCOLLEGIATE CHAIN

The Muehlebach Hotel in Kansas City is the latest addition to the chain of Intercollegiate Alumni Hotels which now numbers forty-six, situated in nearly every important city in the country.

## Alumni Personals

## Corrections and Apologies

In the personals columns of the December Alumnus we were rather thoughtless in our reference to some of our alumni who are educators. We called professors teachers and vice versa. Our attention having been called to these errors we are eager to correct the mistakes.

W. A. Barrows '02 is professor of Electrical Engineering, Dr. F. L. Russell '85 is professor of Bacteriology and Veterinary Science, A. P. Lyon '02 is associate professor of Civil Engineering and E. L. Roberts '20 is assistant professor of Electrical Engineering, all on the faculty of the University of Maine.

## MARRIAGES

'24—The marriage of Howard C. Reiche and Miss Laura C. Knudsen took place February 18, 1927 at Portland. They are residing at 11 Moody St., Portland, where Mr. Reiche is now a member of the Portland High School Faculty.

'24—Charles A. Whitten and Miss Muriel R. Binker were married October 9, 1926 at West Sullivan. Mr. Whitten is working for the Maine State Highway Commission, Bridge Division and is temporarily located at Kittery, on bridge work.

## BIRTHS

'08—A daughter, Marie Loretta, born February 16, 1927 to Mr. and Mrs. Claude P. Meserve at Bridgton. Weight 8½ pounds.

'17—A daughter, Thelma Elaine, born February 6, 1927 to Mr. and Mrs. Charles E. Crossland at Orono.

'18—A son, Winburn Albert, Jr. born February 5, 1927 to Mr. and Mrs. Winburn A.

Dennett at Hopedale, Mass. Weight 8 pounds, 12 ounces.

'21-'21—A son, J. Linwood, Jr. born to Mr. and Mrs. J. Linwood Kelley (nee Florence Morrill) February 6, 1927 at Lewiston.

'22—A daughter, Cathleen Annie, born February 14, 1927 to Mr. and Mrs. Foster B. Blake at Brooklyn, New York. Weight 8 pounds.

'24—A daughter, Constance Eileen, born February 9, 1927 to Mr. and Mrs. Conrad E. Kenison at Winthrop, Mass.

## DEATHS

Ex-'18—Donald A. Mayo, died July 7, 1924.

Ex-'19—Frank W. Murphy, died July 2, 1923 of tuberculosis.

## BY CLASSES

'87—Charles T. Vose is Assistant Engineer with the Maine Central Railroad Company at Portland.

'88—Charles D. Blanchard may be addressed 100 East 42nd St., New York City.

'91—Edmund Clark is a chemist with the New England Confectionary Company of Boston, Mass. Mr. Clark resides at 37 Warren St., West Medford, Mass.

'92—Roscoe C. Clark is a machinist at 127 Winter St., Auburn.

'93—Harris P. Gould is a Pomologist in the United States Department of Agriculture at Washington, D. C. Mr. Gould resides at 3909 13th Street, Washington, D. C.

'94—Edward B. Wood is supervising engineer with the Riverside Dan River Cotton Mills of Danville, Virginia. Mr. Wood resides at 150 Virginia Ave., Danville, Virginia.

Ex-'95—Ralph E. Horne is located at 8 18th Street, Buffalo, N. Y.

'96—Gardiner B. Wilkins is a civil engineer in the Navy Department at the United States Naval Station at Pearl Harbor, Hawaii.

'98—Llewellyn N. Edwards is a Bridge Engineer with the State Highway Commission at Augusta.

'99—Pearl C. Swain is a teacher in the Portland High School and is located at 8 Salem Street, Portland.

Ex-'99—Frederick W. Armes is engineer with the Pejepscot Paper Company at Brunswick. Mr. Armes is temporarily located at Topsham. His permanent address is 29 Cherry St., Bath.

'01—Ernest A. Butler is a Lawyer with Butler & Butler at Skowhegan.

'01—Mowry Ross is located at 2967 Tuckahoe Road, Camden, New Jersey.

'02—Charles A. Stilphen is with the B. F. Sturtevant Company as a heating and ventilating engineer and is located at 314 Tramway Building, Denver, Colorado.

## MAIN FEATURES OF THE INTERCOLLEGIATE ALUMNI HOTEL MOVEMENT

Interested alumni can secure from a clerk at the desk of each Intercollegiate Alumni Hotel an information leaflet which describes in detail the Intercollegiate Alumni Hotel movement.

At each Intercollegiate Alumni Hotel there will be maintained a card index of the names of all the resident alumni of all the participating institutions. This will be of especial benefit to traveling alumni in locating classmates and friends.

The current issues of the alumni publications of all the participating institutions will be on file at each Intercollegiate Alumni Hotel.

Reservation cards will be available at the clerk's desk in each designated hotel and at the alumni office in each college or university. These reservation cards will serve as a great convenience to travelers in securing advance accommodations.

The managers of all Intercollegiate Alumni Hotels are prepared to cooperate with individual alumni to the fullest extent and are also prepared to assist in the creation of new local alumni associations and in the development and extension of the activities of those already formed.

CHICAGO is jubilant over a lot of things this year. It is jubilant over the fact that the Illinois Central has electrified its tracks along the shore, between the towering skyline of Michigan Boulevard and the brilliant lake.

This is significant. For Chicago, the city made by the railroads, is now being made beautiful by the railroads. Last September, the power was turned on, and the first electric trains sped over 37 miles of Illinois Central railroad. Now commuters ride more comfortably, and in 15 to 40 per cent less time.

**"I WILL"**

*says Chicago's motto*

**"WE DID"**

*said the Illinois Central*

General Electric supplied all of the control equipment and the air compressors as well as 260 of the powerful driving motors used in the new electric cars of the Illinois Central. Further evidence of Chicago's improvement is shown in the G-E lights on the famous State Street "White Way" and in the thousands of G-E street lights all over the city that are giving Chicago better illumination. Wherever G-E products go, their accomplishment arouses a just pride.

The electrification marks an epoch in the evolution of Chicago, for the city's improved area will be enlarged and property values increased all along the electrified line. It will have a far-reaching effect on residential and industrial developments, and on the ultimate beautification of the entire lake front.

Such stories of civic improvement are becoming more numerous. Public spirit and co-operation plus electricity can accomplish marvelous changes in any community.

# GENERAL ELECTRIC
