UNIVERSITY OF MAINE

Summer Session

JULY 2 - AUGUST 10

*High Grade Instruction is
Maine's Educational Policy*

ALUMNI—STOP LOOK READ

Graduate Courses Leading to the Master's Degree
Undergraduate Courses in Sixteen Departments

A Wide Range of Courses Conducted by Specialists

for

Secondary and Elementary Teachers—Principals—Supervisors—Superintendents
—Athletic Coaches.

Education and Teaching Subjects—Methods Courses.

Course Combinations qualifying for Professional, Secondary, Junior High School, Elementary, Home Economics, Music, and Physical Education Certificates. Instruction in coaching Football, Basketball, and Baseball.

An increasingly large number of our summer students are candidates for a master's degree. In recent years as many as a third of the whole number have been so enrolled, and of this group more than one-third are University of Maine graduates.

The cost of attendance is moderate. For one who lives on the campus and takes a full program of work total expenses for board, room, tuition, and books need not exceed \$100.

When we say that we desire to build the best Summer Session for its size in the country, we are sincere. We appreciate the aid given us by the alumni and we ask for your continued support.

Dr. Arthur A. Hauck—President-elect

By Theodore B. Hunt

PRESIDENT-ELECT ARTHUR A. HAUCK takes over his duties at the University of Maine with certain well developed qualifications which should enable him to make his administration a notable one in the history of the University.

He is first of all a professional educator. This may seem to be an obvious characteristic, but only too frequently it is overlooked. American colleges have often suffered from the application of the theory that a good business man or journalist or clergyman makes a good president. A college president needs to be familiar with education in a practical way. This familiarity President Hauck has. He has had a varied career which has led him in turn through the Grade School, the High School, College, the Graduate School. He has integrated this experience by graduate studies in Education. His doctorate is a degree in course, an earned degree, not an honorary one.

This training permits him to see the problems of the University with scientific insight. It inevitably will lead to a real harmony between the Faculty and the Administration. This is perhaps as happy an augury as one could desire for the development of the University. President Hauck's sympathy for the academic point of view will solve many problems before they arise.

Furthermore, this means that the President can and will encourage the members of his Faculty individually to finer efforts. He recognizes service and scholarship in his co-workers and never fails to reward it, usually with a generous word of praise which is both gratifying and stimulating.

At Lafayette College President Hauck was placed, by virtue of his position as Dean, in intimate contact with the students. His services in this connection

The election of Dr. A. A. Hauck as President of the University, effective July 1 was announced April 11.—The author of this interesting article is Associate Professor of English at Lafayette College.

will not soon be forgotten, for he wholly gained the confidence and friendship of the student body. His popularity was

information, but appeals directly to the finer natures of the students. He is not only fair, but sympathetic as well. It is rumored that he has often dipped into his own pocket during these trying times in order to help some handicapped boy along a particularly rough section of the road.

These traits of sympathy and generosity in his nature do not mean that he can be easily imposed upon. His judgment

of character is too accurate to permit that. A student who comes to him with a clever or glamorous tale does not leave the office satisfied with himself. Dr. Hauck never loses his temper, never is caustic or cynical, rarely employs punishment or incites to fear, but he builds character and controls youth by example, by appealing to the finer instincts, by pointing out the course the true gentleman would take. He talks as a generous friend, not as the stern taskmaster, and so it results that his good opinion is worth more to the students than many a coveted honor in the college. They trust him sincerely, like to talk to him and try to live up to his ideals for them. He is the type of Dean who never walks across the campus alone.

It is apparent that his philosophy of education leads ultimately to the development of character. This is evident in his innovations in the management of his office at Lafayette. One of his first services was to liberalize the administration of a class and chapel cut system which was accurate but artificial. He sponsored a system which placed more responsibility in the hands of the individual students and resulted immediately in a finer co-operation between students and Faculty.

As an administrator Dr. Hauck has already had marked success. His experience in Honolulu taught him how to manage

(Continued on Page 128)

DR. ARTHUR ANDREW HAUCK

based on personal traits which are fundamental to his character and involve his philosophy of education. He is always utterly candid and above board. He never resorts to indirect methods for gaining

Planning and Landscaping The Campus

By Arthur L. Deering '12

Many of our younger alumni and most of the visitors believe that the beauty of our campus is natural. This is a logical conclusion because of the naturalness of the old campus. One needs, however, only to examine a few pictures of the University grounds as they were in the eighties, to realize that our campus of today is the result of planning and planting done forty or more years ago. In fact, history indicates and photographs substantiate that there were but very few, some say only two native trees when the Maine State College opened its doors September 21, 1868.

Credit for much of the beauty of the older section of the campus must be given to Dr. Welton M. Munson, professor of horticulture and landscape gardening at the University for a number of years, beginning in 1891. He had a very lively interest in the planting of trees on the campus. The classes during the early years of the life of the University also made it a regular event to plant their class tree.

The Trustees, even in the first days after the founding of the college, were forward looking, for according to Fernald's History, they employed Frederick Law Olmsted of New York, a distinguished landscape architect, to determine "the location, number, style and internal arrangement of the contemplated buildings and to construct a complete and exhaustive ground plan of arrangements." The history indicates, however, that the plan was not followed because the cost would have been too large.

With the development of the new campus towards the East, came new problems. Also at about this time has come the problem of replacing some of the present trees, many of which are now showing signs of their age.

Resulting from discussion at alumni association meetings, there was appointed in 1930, an alumni committee to present to the Board of Trustees the views of the General Alumni Association, expressing the belief that there was urgent need for a long time landscaping program. The Board of Trustees appointed a committee and the outcome of a series of conferences and committee meetings was the employment of Olmsted Brothers of Brookline, Mass., to prepare a plan.

Before landscaping plans could be drawn, however, there had to be some reasonably definite assurance as to the location of future buildings, otherwise plantings might be of but temporary

value and have to be removed in the course of a few years. Therefore the first step necessary in the development of this whole scheme was the adoption of a Campus Plan.

The Campus Plan

Accompanying this article is a cut which shows the plan which has been substantially approved by the Board of Trustees. In this cut are shown the new roads and the location of proposed buildings. Present buildings are in heavy lines with proposed buildings in light lines.

In the development of any campus plan as well as landscaping plan, there usually is a central unit or motif around which the plan is constructed. The new plan proposes to make three buildings the axis around which the rest of the University shall be built. These buildings are a Union, an Auditorium-Chapel, and a new Library, with a mall extending north and south on either side of the auditorium.

There have been but few important changes proposed in the new plan. The main entrance to the University has been changed and the present road passing in front of Coburn, Fernald, and Wingate Halls will be abandoned. The course of the south entrance to the University from the main highway will be modified so that instead of passing directly in front of Colvin and Merrill Halls as at present, it will swing to the north and pass in front of Balentine Hall.

The new buildings for which provision has been made are girls' dormitories, Extension building, Experiment Station, Engineering building, Infirmary, and additional dormitories for men besides those mentioned in the preceding paragraph. A rather striking fact is that only one building would have to be demolished to accomplish this entire plan. Holmes Hall, in which the Maine Agricultural Experiment Station is located, will have to be taken down, when and if a Union Building is constructed.

The new athletic layout will be of particular interest to many alumni. The main field, according to the new plan will run north and south, being moved somewhat northward from its present location. It would call for the erection of new grandstands and the demolition of the present stands eventually, since boys' dormitories are allocated to the section where the present concrete grandstand is. Baseball and tennis are to be provided for on new and separate fields.

Throughout the plan, adequate space has been allotted for parking purposes at

convenient points. There will be a direct entrance from the main highway to the parking grounds adjoining the athletic field. It is estimated this area alone will provide for approximately 1000 cars.

Landscaping

After approving in principal the campus plan, the landscape architects were then instructed to prepare a plan for beautifying especially the new sections of the campus. This plan has been prepared on a basis of units so that landscaping can proceed gradually over a period of years as funds may become available for this purpose. The plans provide for grading, drains, sidewalks, and for shrubbery and trees, accompanied by an estimated cost for carrying out the work in each unit. The units are as follows: 1—new north campus area between gymnasium and proposed auditorium; 2—The Oval Road; 3—parking area north of Alumni Hall; 4—parking area east of Hamlin Hall; 5—the Gymnasium; 6—south campus between proposed auditorium and greenhouses; 7—Stevens Hall and Crosby Laboratory; 8—Nursery.

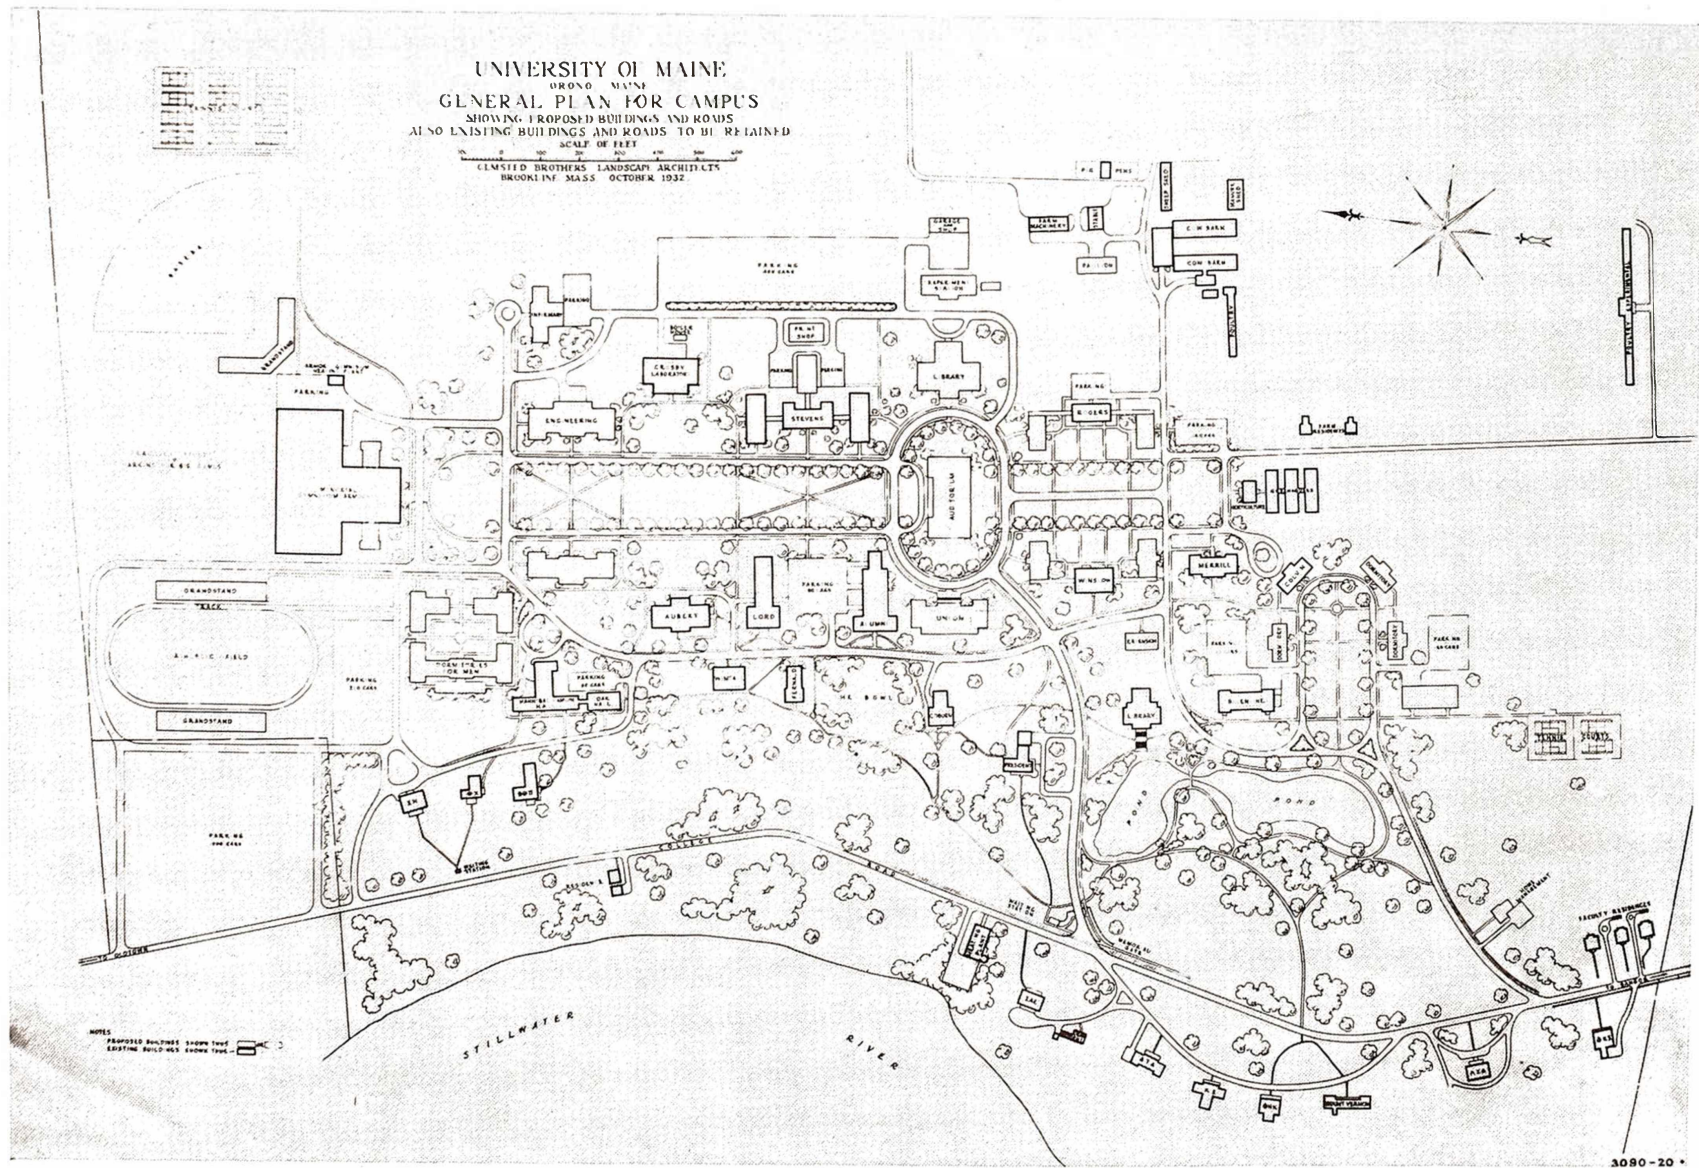

Work has already been done on some of these units, specifically around the gymnasium and around Stevens and Crosby Halls. The Nursery has been founded and some of the work on the mall between proposed auditorium and gymnasium has been done.

This entire plan both for the campus and landscaping is considered to be one covering a long time period. The changes will become a reality only as demand makes them necessary and funds are available to make them possible.

New Plan for Supervision

With the growth of the campus proper and the increasing varieties and number of shrubs and trees, has come the greater problem of properly supervising and maintaining these plantings to keep them in good health.

To cope with this problem, the Trustees have engaged Mr. Roger Clapp of the Department of Horticulture, instructor in Landscaping Gardening and Floriculture, to supervise shrubbery and trees on the campus. This appears to be a very timely move and an ideal arrangement, combining as it will, the class room and practical management of the plantings and with a trained person in charge of the work. Mr. Clapp has shown marked interest in the campus and is now serving his fifth year as member of the University faculty.

The new Campus Plan as substantially approved by the Board of Trustees. Present buildings are in heavy lines, proposed buildings are in light lines.

Commencement Plans and Program

With the many changes which have taken place on the campus, with extensive remodeling now in process, with a Commencement program of variety but yet not overcrowded, with the dedication of Stevens Hall as an important feature, with this Commencement as the last one to pay tribute to retiring "Prexy" Boardman, and with the campus grounds in their finest beauty, alumni may well travel to the University for Commencement June 8 to 11 for an enjoyable two or three days. Saturday, June 9, is Alumni Day.

It is a coincidence that this year the Dix Plan brings back for reunions the first five and the last four classes to graduate from the University. The past two years have taken a heavy toll in the roster of the earlier classes so there is all the more urgency for members of those classes to come together.

Much is being expected of the four youngest classes to reunite. They all left the University well organized and with sufficient funds to arrange a good reunion. They are expected to add new life and color to Alumni Day. It is the first time that the four youngest alumni classes have ever returned together.

And from 1909! Well those who want to see what has every mark of being the very finest reunion of any class, judged in terms of numbers, quality of program, undiluted pleasure, and interest in their University should certainly be on hand to watch this group during their three eventful days on the campus.

Competition for the two Commencement cups will be unusually keen. Heretofore, one of the older classes has always won the 1908 Cup which is open to all classes but it may be different this year. From the spirit which the youngster alumni are showing they may make it interesting for those who have been out many years longer, in competing for the Twentieth Century Cup.

Banquet and Luncheon

For the first time the Alumni Banquet will be served in the new Gymnasium. It is expected all alumni, faculty and friends who wish to attend this event will find it possible to do so. There will be ample facilities to accommodate them. However, reservations will be necessary to be assured of a place at the banquet tables. The cost will be one dollar per plate.

Likewise the class luncheons Saturday noon are to be served in the Alumni Memorial Gymnasium. This event has heretofore taken place in Hannibal Hamlin Hall.

For amusement there will be stunts by the classes of 1930-33 Saturday afternoon.

A most dignified and appropriate feature will be furnished at this time by the class of 1909. Then there will be a ball game when even some of the old timers, it is hoped, will show their ability.

Accommodations

With the loss of Mount Vernon House the problem of accommodating returning alumni with wives or husbands becomes this year very acute. 1909 with its fifty or more who plan to return will occupy every available space in Balentine Hall. Older men and their wives will be accom-

modated in either the Maples, just a few steps from Balentine, or in Colvin if space will permit. Alumni and wives of younger classes will have to be accommodated in Hannibal Hamlin Hall or secure private rooms off the campus.

A special circular is to be issued a few days before Commencement, copies of which will be sent to members of reuniting classes giving further details concerning Commencement program and class functions. Copies will be sent also to others who may desire to receive it.

Commencement Program

Thursday, June 7

- 5 45 P M Phi Kappa Phi Initiation—Library
- 6 30 Phi Kappa Phi Banquet

Friday, June 8

- 1 30 P M Annual Meeting of the Alumni Council—Library
- 1 30 Senior Class Picture—on Coburn Green
- 2 00 Senior Class Meeting
- 2 30 Class Day Exercises—The Oval
- 4 00 Pageant—given by All Maine Women on Coburn Green
- 6 00 Senior Skulls Initiation and Banquet—Penobscot Country Club
- 8 00 President's Reception (informal)—President's House
- 9 00 Student Hop

Saturday, June 9

- 9 00 A M Reunion Class Meetings in headquarters rooms
- 10 00 Annual Meeting of General Alumni Association—Little Theatre
- 12 15 P M Assemble in order by classes in front of Alumni Memorial
- 12 30 Alumni Luncheon—Alumni Memorial
- 1 30-2 00 Band Concert—The Oval (or Indoor Field if inclement weather)—Band composed of University students
- 2 00 Frolics—The Oval
- 3 00 Dedication of Stevens Hall—in front of Stevens Hall (or Alumni Hall if inclement weather)
- 4 10 Baseball Game—Alumni vs. Seniors—Baseball Field
- 5 45 Alumni Parade—Alumni, faculty, seniors, and friends assemble on Alumni Field
- 6 15 Alumni Banquet—Memorial Gymnasium
- 9 00 Alumni Hop—Memorial Gymnasium

Sunday, June 10

- 10 30 A M Baccalaureate Address—The Oval (Alumni Memorial if inclement weather)
- Sermon by Dr. Harry Trust, President of Bangor Theological Seminary

Monday, June 11

- 9 30 A M Commencement Exercises—The Oval (Alumni Memorial if inclement weather)
- Commencement Address by John C. Schroeder
- 8 00 P M Commencement Ball—Alumni Memorial

"Win" Robbins '32 Brings

By H. Walter Leavitt '15

Mt. Katahdin to the Campus

A Mt. Katahdin in miniature—a plaster of Paris model of Maine's noblest mountain—has been attracting much attention since last June, when it was placed on exhibition in Room 22 of Wingate Hall.

This relief map was constructed by Winston C. Robbins '32 during the college year 1932-33 as a part requirement for an advanced degree in Civil Engineering. For its construction one thousand hours of painstaking labor were necessary. Most of this work was done, because of the lack of better accommodations, in an improvised work shop in what might be termed the attic of Wingate—the "Tower Room."

This model is approximately 42 by 60 inches in size and covers an area of about 102 square miles as mapped by the U. S. Geological Survey in 1927. In looking at this map, the admirer of Katahdin feels that he has the privilege of gazing at his beloved mountain from the vantage point of a motionless airplane on a cloudless day. Although it was expedient to exaggerate the vertical scale to three times that of the horizontal scale in order to bring out the desired topographic effects, the map is so accurate in every little surface detail that Mr. Roy Dudley of Stacyville, the famous Katahdin guide, was easily able to locate on it the position of the trails and of the approximate timber line.

The horizontal scale is 1035 feet to the inch and the vertical scale 345 feet to the inch. The lakes and streams are painted blue; the wooded areas, green; the barren rocky summits above the timber line, grey; the numerous slides, orange-brown; and the trails and roads are indicated by white lines, broken for trails and footpaths, and solid for the few miles passable by autos.

The method used in its construction is known as the "built-up contour method" and is an adaptation, with modifications,

of several of the methods used in building relief maps. The map as a whole is composed of twenty-four sections, each approximately ten inches square. It was necessary to construct a separate negative form from which a plaster of Paris casting was made for each one of the sections.

The main steps in the building of the negatives were as follows: (1) The topo-

checking purposes, the other set being the negative from which, after properly treating the surface with shellac, a section of the plaster of Paris model was cast. The amount of labor incurred in the process may be appreciated in part when it is realized that the elevations range from 570 feet above sea level to 5267 feet at Baxter Peak. For each unit of twenty feet in elevation it was necessary to trace and cut many sheets of cardboard.

The photograph here given was taken by Professor W. S. Evans and shows a bird's-eye view of the model as it now looks. The highest point on the map is Baxter Peak, the point of greatest elevation in Maine, and supposedly the first point in the United States to greet the rising sun.

The lowest point on the model is near the lower, right corner at elevation 570 feet. Chimney Pond, located in the South Basin, cannot be seen in this photo as it is hidden by Pamola and the Knife Edge. The Avalanche Slide and Abol Slide are to be seen. The Three Brothers are seen in the northwest corner and North and South Turner Mountains in the northeast corner of the map.

For those who have been fortunate enough to actually climb to this highest peak in the State of Maine, some of their pleasure experienced in mastering this rugged mountain will be recreated by a study of this model. For those who have never climbed this magnificent mountain, a feeling of curiosity concerning its rugged grandeur will be satisfied in part by this miniature relief map, and everyone will be impressed by the fine workmanship of Mr. Robbins in the construction of this model. Anyone who is on the campus should surely visit Room 22 in Wingate Hall.

The Springfield Union of January 30 contained a special story which told of the fine work which Glenn Prescott '17 has been doing at The Smith School

Mt. Katahdin model made by Winston C. Robbins '32

graphic map used as a basis was first divided into twenty-four equal sections. (2) Then each section was enlarged to the required scale, first photographically, then by means of the pantograph. (3) Next, all the contour lines on the enlarged map section, which indicate on the Geological Survey quadrangles all the changes in elevation of twenty feet in the areas mapped, were individually traced on sheets of cardboard of a uniform thickness, by means of a carbon backing. (4) After the contour line was traced on the cardboard, it was carefully cut on the traced line by a jig saw. (5) Finally, the two portions of the cut were assembled and fastened together by brads, one set forming a positive relief in cardboard of the mountain area, which was used for

Name Nominee Now For Alumni Emblem

Alumni should make nominations at this time for the award of the next Alumni Service Emblem, given annually in recognition of service through the Alumni Association to the University. Any alumnus may make a nomination.

This award which has now been made four times, is beginning to be known as the "Pine Tree M" because of the nature of its design. The decision of who shall receive the award is made by a committee, although that committee has no power to consider other than those who have been nominated for this honor.

It is intended to be an expression of appreciation for unselfish and outstanding service which alumni or others have rendered to either the General Alumni Association, or the University, or both. The exact wording on the emblem reads, "In recognition of outstanding service rendered through the General Alumni Association to the University of Maine."

This service may be one or more of many forms such as, officer of local association, of class, of the General Alumni Association, a member of committees, as well as other similar expressions of interest in and support of the Association and the University.

Nominations are in order NOW.

Brice To Give Football Course

Maine alumni who are personally acquainted with Coach Fred Brice will be interested to know that he is to give an intensive course in football instruction at the University during the week of June 18. He has had many requests from football coaches to give such a course.

Schools in Smyrna

By Lee Vrooman

School and Society issue of January 20, 1934, contains an article written by Lee Vrooman '18 entitled, "Schools in Smyrna, after Ten Years of the Turkish Republic."

Mr. Vrooman, who is Dean of the International College in Smyrna, has been in close touch with educational developments in that city. He points out the vast changes which have taken place within a decade, citing the fact that while a depression has been in process part of this period the number of students has increased from 15,100 to 33,798, with a large increase in number of teachers.

He concludes by saying, "Smyrna, ten years after, has a record of educational progress, both quantitative and qualitative, which is probably more striking than that of any other area during that period."

(Continued from Page 123)

Dr. Hauck

age a large school without friction. Incidentally, he was personally responsible for raising large contributions for the school at a time when these were not easily to be had. His experience was augmented at Vassar, where he frequently directed the College in the absence of the President. He has, furthermore, had the privilege of serving under two of the ablest of college administrators, Dr. McCracken at Vassar and Dr. Lewis at Lafayette. He has learned how to gain his ends without riding roughshod over the opposition. He knows how to get results without giving offense, which is not always easy.

His studies in Oriental History have taught him the value of seeing life steadily and whole, but always through the eyes of the individual. He does not lose himself either in mass or detail, but maintains the strictly human perspective.

President Hauck makes friends readily, but more than that, he keeps them. The more intimately one works with him the more thoroughly he comes under the influence of his personality and high ideals. The University of Maine will soon number him among its best beloved Presidents.

Those of us who have known him as a close friend do not hesitate to foretell for him a splendid career in his new office. The Alumni, the Faculty, the students may contribute to the success of the administration if they understand at the outset that President Hauck should not be isolated by his position. He will be happiest if the formal barriers of his office are at once removed and he is welcomed as a friend to Maine. He will suffer no loss of dignity, for his dignity is innate, he will develop more fully his fresh and spontaneous cheerfulness, resting so directly on the spirit of youth, which he has carried into his maturity.

Brief Biographical Sketch of Dr. Hauck's Life

Dr. Hauck was born February, 1893, in Springfield, Minn., being the son of a Methodist clergyman. After graduating from Gridley (California) High School he entered Reed College, Portland, Oregon, from which he was graduated in 1915. For two years he taught in secondary schools and in 1917 enlisted in the Army. In 1921 Dr. Hauck became professor of education and associate dean, which position he resigned one year later to become president of Punahou School at Honolulu. In 1928, Dr. Hauck came east to do graduate work at Teachers College, Columbia, receiving his Ph.D. in 1932. While studying at Columbia, he was also assistant to

Merchant '28 Saves And Then Is Saved

Dame Fortune remembered Ernest W. Merchant's modest and successful deed of saving a life when he was a victim of monoxide gas last February. Thanks to E. P. Noyes, director of safety, Central Maine Power Company, who has taught the prone pressure method of life saving at the University on several occasions, for this article.

In August, 1928, Merchant while boating on Damariscotta Pond saw a boy sink while swimming. He recovered the boy from the bottom of the pond, brought him ashore and by use of the prone pressure method, resuscitated him. There was no public recognition, no headlines, or no honors. He would not even make out the necessary papers which might bring him national recognition. Publicity did not appeal to him.

And here's where Dame Fortune appeared. On February 11, 1934, Merchant, while working at Comerford power station, Vermont, in tunnels under the dam, realized he was fast losing strength. He staggered to the switchboard room, and collapsed. Other employees began working on him at once. Doctors were summoned. He was rushed to the hospital. For five hours the prone pressure method was applied uninterruptedly. He appeared to be recovering when twelve hours later he suffered a relapse. More of the same methods were used. Between this and the attention of three doctors, and use of an aeroplane in midwinter to get needed supplies, he finally recovered with the odds all against him.

It is indeed almost a fanciful story of where the "Saver is Saved." Congratulations, Merchant.

Anonymous \$500 to Loan Fund

An alumnus of one of the classes in the "late nineties" has just made an anonymous gift of five hundred dollars to the general loan fund of the University.

This gift was made to assist especially seniors who might find themselves in need of small amounts to complete their work at the University. It was given without restrictions and can therefore be of greatest use to the University.

Successful class reunions demand large attendance. Make your plans now to be on the campus Alumni Day, June 9.

the president of Vassar College. He became dean of Lafayette College in 1931, which position he is leaving to come to the University. Dr. Hauck is married and has two children.

Reunion Class Notes

'09 President Writes

Dear Classmates:

Aside from death and taxes there is nothing more certain than a successful 25th reunion of the class of 1909 at Orono in June. The enthusiasm which has been shown by our members in response to the preliminary notices of our committee makes this confident statement possible.

Prophecies are dangerous and I am aware of the hard things said of and to prophets. Nevertheless, I am going to venture the forecast that we shall have the greatest turnout ever in attendance at a Naught Nine Reunion. It naturally follows that there can never be a finer opportunity for you to renew old friendships and meet the coming generation. You must not miss this great event. If you have ever returned to one of our reunions you know the unadulterated joy and satisfaction which awaits you. If you have not returned, ask any one who has and then—REPENT, REFORM and RETURN.

The little matter of expense must not stop you. It is slight anyway and the unit cost per classmate seen will be so low you can hardly find it.

The Committee has already told you of important events in which we shall participate as a class and besides there are many other unscheduled numbers filled with the elements of surprise and mystery.

The Knights are going to be in Orono June 8-11 and then and there want to see you and yours in festive mood. So don't put it off, but sign the slip now—today—and tell Harry and his committee you are coming.

Fred Knight

To 1930's

All you 1930 class members take notice! We are having a reunion this Commencement time with the classes of '31, '32, and '33. Do you realize our next roundup will not occur until 1939? How sedate and settled we'll be by then!

Start planning TODAY to be on hand Saturday, June 9th. All of you who can, come early; there will be a Friday evening pow-wow when 1079 stories will be swapped.

We're young only once. Five more years will find the hair line receding and the gray hair appearing; so let's get together while we still will recognize each other!

You all should have received a pretty picture-letter telling about our plans. And remember, 1930 people, GET the MOVING BUG—and be with us on campus June 9th. Your Committee

REAPPOINTED TRUSTEE

THOMAS E. HOUGHTON '13

of Fort Fairfield, whose term as a Trustee of the University expired May 6, 1934, has been reappointed as trustee to serve his third seven-year term.

Freshmen Win Two Track Meets

On April 21 Freshman team defeated Deering High School 79-47. Webb scored 13 points for the freshmen, taking two firsts and a second, while Hunnewell was close behind him with two first places. Hunnewell's time was 4 minutes, 46 seconds in the mile, and Gatti's time was 55 seconds in the 440, and Bell's javelin throw of 170 feet $\frac{3}{4}$ inch were among the best performances.

The following Saturday Portland was defeated 106 $\frac{1}{2}$ -19 $\frac{1}{2}$. Webb again was high scoring freshman with 15 points, while Bell tallied 12 points in four events.

Maine is to meet Dartmouth in football in 1934, Holy Cross in 1935, and Columbia in 1936.

CHEMICAL ENGINEERS' HANDBOOK

John H. Perry, '17, Editor-in-Chief

The recent publication of a "Chemical Engineers' Handbook" by the McGraw-Hill Book Co. and edited by John H. Perry, '17, as editor-in-chief, compiles in one volume a very large amount of data which, in the past, has only been available to the chemical engineer through access to a large number of reference books. It compiles this data in a comprehensive and condensed form, making it readily available.

This Chemical Engineers' Handbook covers such subjects as Physical and Chemical Data, Flow of Fluids, Evaporation, Distillation and Allied Processes, Mixing and Grinding of Materials, High Pressure Technique, Fuels, Electrochemistry, Economic Factors for Plant Location, as well as Mathematical Tables, etc. found in the more common mechanical engineers' handbooks.

The sections on Physical and Chemical Data, Flow of Fluids, Heat Transmission, Absorption and Adsorption have been found very helpful to me in the design of equipment for distillation, evaporation, and allied processes.

It is a book which fills a much needed want of the chemical engineer who is designing equipment, either for new or old processes, as well as for the plant superintendent and student. The book should be well received by the chemical engineering profession.

E. I. Clapp, '17

THE EFFECT OF HANDLING METHODS ON QUALITY OF MAINE POTATOES

Experiment Station Bulletin 365

By William E. Schrumpf

Analysis of information obtained in Aroostook County in 1931 and 1932 indicates about 14 per cent of grade injury sustained by potatoes during harvesting, storing, and grading operations. Injury from digging with shaker-elevator machines was twice that from digging with continuous-elevator machines. Padding shaker elevators reduced injury one-fourth. Digging injury increased as the amounts of stones increased. Certain storage house practices increased injury one-third. Padding grading machines reduced injury one-half.

Vermont University has just completed plans for a Women's Student Union, the construction of which is to be started this spring at a cost of approximately \$175,000. The initial gift for this was \$65,000 given by an alumna.

Evergreens in the New Landscaping Plan?

The host of alumni who have been interested in the development of campus grounds, will find the article by the chairman of the alumni committee on campus planning and landscaping of unusual interest.

Our pride in the beauty of the campus is justifiable. Visitors especially comment enthusiastically about it. One of, if not the chief reason why the older campus is so striking and different is the generous number of evergreen trees. It is especially fitting that evergreens should be so prominent because they are a natural tree in the State.

It is to be hoped that the landscaping of the so-called newer campus to the East and North will make provision for many more of these trees. Alumni who have expressed the greatest interest in this subject have been very outspoken in their belief that failure to include a substantial number of evergreens in the new development would be unfortunate and would make

the new campus strikingly different from, and not so characteristic of Maine as the older campus.

There seems to be some question whether or not the new plans as prepared by the landscape architects are going to provide for this feature. Obviously this type of tree cannot be placed in many locations since they interfere with vision for driving. There are, however, ample opportunities to use evergreens.

It is especially pleasing to learn at this particular time with the new developments underway, that the University has employed one who is trained in the field of landscaping to manage and supervise shrubs and trees on the campus.

The Association congratulates the Trustees upon the progress which has already been made. Doubtless they will carry out the landscaping plan as rapidly as funds will permit, so that in a few student generations we will find the newer developments in harmony with those which are now so delightful.

Class Reunions and Alumni Day

When the rolls are called by the several reunion classes next June 9, what is the situation going to be? Will there be a happy throng, enthusiastic because of their numbers, and special class programs, or is it going to be depressing? To put it another way as applied to a class, is it to be a Day, without alumni?

Some few of the classes face exactly that situation. Only a spontaneous outbreak of enthusiasm can save them at this late hour.

In sharp contrast to this somewhat doleful note, those who return for Commencement are likely to see two or three classes stage the most colorful and successful reunions ever held by any class of the University. They will be an inspiration and worth coming back to watch.

Perhaps one point should be made clear. It is up to the class officers to get their members back for reunions. The Alumni Association has and will help in every possible way but the responsibility for attendance rests squarely and entirely upon the classes.

Then the matter of program sometimes is bothersome. While the Commencement Committee composed entirely of alumni endeavors to arrange a program which, it is believed, will be of interest, yet it is much too impersonal to satisfy those reunioners who meet but once in five years more or less. They want something special apart from the general program. This again is up to the class officers.

Selection of class officers is a highly important matter not alone to the future success of the class but also to the University. Those who function effectively are doing the University a big service in getting large delegations to return for memorable reunions. In so doing they are making the University mean more in the future life and thought of their respective groups.

With The Local Associations

Record Number at Philadelphia

The annual banquet of the Philadelphia Chapter of the University of Maine Alumni was held on March 16 with 59 present, the largest attendance in the history of our local organization. President Boardman and Charlie Crossland gave us the latest campus news, while our toastmaster, Dean Robert Fernald, '92, of the University of Pennsylvania Engineering School, who, incidentally, has been intimately acquainted with the University over a longer period than most living alumni being the son of our first president, gave us the lowdown on the University as "She used to be," including the "carryings on" of "Hal" Boardman as an undergraduate.

Shy Hayes, '00, also dug up a bit of the past with President Boardman checking him on several items including what happened to Aunt Hat's waiting room. Ed Stanford, '06, brought us up to date with an account of the worries of the chairman of the Milk Control Board of Pennsylvania. Much admiration for President Boardman was voiced and at the same time regrets that he was not to continue as President of the University.

George Ladner, Secretary

Lappin '23 Heads West Massachusetts Association

The annual spring meeting and dinner was held by the Western Massachusetts Alumni Association Wednesday, April 18, 1934, at the Nayasset Club in Springfield, Mass. Myson C. Peabody '16, retiring president, presided at the business meeting and William Monohan '14 of Amherst was toastmaster. Forty-three alumni and guests were present.

Arthur L. Deering, President of the General Alumni Association, gave a talk on his activities as President of the Alumni and more recently as Dean of the College of Agriculture. Charles Crossland, Executive Secretary, showed some movies of campus activities. Dinner music was furnished by the son of Hermon R. Clark '14 and his friends. Singing of Maine songs and cheers were enjoyed by all.

New officers were elected to serve during the ensuing year: President—C. Roger Lappin '23; vice-president—Harold E. Ellis '29; secretary and treasurer—Miss Ethelyn M. Percival '24; Executive Committee—Arthur L. Davis '16, H. P. Adams '14, and E. M. Carville '24.

Harold E. Ellis '29, Secretary

Worcester County Association

Over thirty alumni and friends of Worcester County were on hand to pay final tribute to Dr. Harold S. Boardman '95, retiring president at the University, at a meeting held in Worcester April 10. Dr. Boardman was the chief speaker. Alumni Secretary Crossland also discussed campus and alumni activities. Officers were elected as follows: James E. Masterson '16 of Worcester, president; George E. Hansen '17 of Worcester, vice-president; Mrs. E. R. Fuller '28 of Worcester, secretary-treasurer; and R. H. Alton '05 of Uxbridge, Harry Davis '00 of Hopedale, and Harold Ballou '26 of Sterling, executive committee.

Southern New Hampshire

Forty-five alumni and friends residing in southern New Hampshire gathered for the annual dinner and meeting April 9 in Manchester at which time Alumni Secretary Crossland spoke. The alumni movies were shown. Harold W. Howe '24 of Concord, was elected president with the other officers as follows: A. R. Coggins '29 of Manchester, vice-president; Harold W. Ingham '11 of Concord, secretary-treasurer; Ina Jordan '24 of Manchester, alumnae secretary; and H. L. Grinnell '10 of Derry, Mrs. C. M. Wallace '19 of Wolfeboro, E. E. Libby '18 of Manchester, O. W. Mountfort '12 of Nashua, and H. S. Bridges '18 of Concord, executive committee.

Michigan Alumni Meeting in Detroit

An informal meeting of alumni residing in and near Detroit was held April 14 when Alumni Secretary Crossland visited the group. Fifteen alumni and wives were present. An unusual pleasant social evening was enjoyed following the talk by Mr. Crossland. The alumni movies were also shown.

Ham '22 Named President at Schenectady

Flurries of snow on April 12 did not prevent 23 Alumni and friends from gathering at the Edison Country Club in Schenectady for the annual dinner of the Northeastern New York Alumni Association.

After dinner President H. P. Mayo '99 who merits congratulation on the manner in which he has conducted the affairs of the association, acted as Chairman of the

meeting. Sec.-treas. P. W. Ham '22 reported that the Association's finances balanced on the right side of the ledger. Nominating Committee Chairman H. W. Chadbourne '02 presented the nominations for officers. The following were unanimously elected to serve during the coming year: President, Philip W. Ham '22; vice-presidents (Schenectady), B. R. Connell '07, (Albany), R. C. Castle '21, (Troy), E. G. Ham '16; secretary-treasurer, S. O. McCart '29.

President Mayo then introduced Alumni Secretary Crossland, a most welcome guest, who gave a concise resumé of the University's past year, and described projects now under way. His descriptions of the campus of today were made more vivid through the assistance of movies.

Afterwards the old songs were sung by all, followed by a social period.

S. O. McCart '29, Sec.

Northern Ohio Association

About 40 alumni and friends gathered for the annual dinner and meeting of the Northern Ohio Association April 13 in the Cleveland Athletic Club. Officers were elected as follows:

Philip Dorticos '04 of Cleveland, president; H. G. Kenniston '02 of Cleveland, vice-president; and A. C. Goodnow '11 of Cleveland, secretary-treasurer.

At the conclusion of the business, Alumni Secretary Crossland spoke of the University and alumni affairs, and a local newspaper columnist discussed interestingly the new deal.

Rhode Island Association

Thirty alumni met at the Gloucester Country Club to hear final message from Dr. Harold S. Boardman on the occasion of his visit of April 11. The occasion was a most enjoyable one. Alumni Secretary Crossland spoke and showed the alumni movies. Officers were elected as follows:

J. Raymond Dubee '16 of Providence, president; Carleton E. Merritt '24 of Eden Park, vice-president; L. Addison Curran '26 of Cranston, secretary-treasurer; and N. H. Mayo '09 of Providence, W. S. Maddocks '05 of Georgiaville, Walter A. Cooke '10 of East Greenwich, A. E. Wilson '23, and Helen Taylor '18 of Providence, executive committee.

Western New York Association

On March 22 fifteen alumni of Western New York gathered for a social evening at the home of Mr. Stephen P. Clement '15 in Buffalo. Another meeting is planned in May when the alumni movies will be shown.

C. Knox '29, Sec.

ATHLETICS

Baseball Team Wins 1 Loses 3

After opening auspiciously with Colby in an exhibition game April 19 with a victory, Maine lost the next three games as reported below. In these games, however, the players have received valuable experience and show promise for development. Several are inexperienced in varsity competition.

Maine 6—Colby 5

By scoring two runs in the ninth inning Maine defeated Colby 6-5 at Waterville April 19. Three pitchers were used, S. Osgood showing good form especially considering lack of previous experience. Woodbury, a sophomore, formerly an outfielder, converted into a first baseman, gave much promise and was Maine's heaviest hitter. Walton, left field Maine, prevented Colby from tying the score in the last inning by a spectacular catch.

Northeastern University 5—Maine 4

Maine and Northeastern matched each other score for score until the ninth when Northeastern gained a victory with one run. Maine boys made nine hits to Northeastern's eight, with MacBride counting for three and Aldrich and S. Osgood two apiece. Maine's sophomore pitcher Golobski held Northeastern to five hits during the 5½ innings he worked. Northeastern is considered to have one of the strong teams in New England this year.

Rhode Island 7—Maine 5

Again the last inning proved the fatal one for Maine when Rhode Island tallied twice to win the game. Although Rhode Island made fourteen hits to Maine's six they were well scattered. S. Osgood pitched this game. Walton in left field contributed three of Maine's six hits.

New Baseball Field

This season the Varsity is to use a new baseball diamond which has been built northwest of the Indoor field. It is one of the largest fields in this section, having a distance of 420 feet clear playing surface to right field limit, 470 feet to left field, and 600 feet to deep center. Careful attention has been given to drainage of this area with the hope that a very satisfactory playing field may result, thus eliminating the necessity of using the football field for baseball.

No State Track Meet This Year

Once more the Maine Intercollegiate Track and Field Association is in difficulty, this time so deep that the annual state track meet, generally regarded as a classic and one of the best meets in the East, is not to be held. With the exception of the war period this will be the first time since 1895 that such a meet has not been held.

The story is a long one and if completely told would date back several years. For the present, suffice it to say that the first break came when Colby announced that they had withdrawn from competition for this year. They did not, however, withdraw from the Association.

Bates Withdraws

Early in April there developed a sharp difference in interpretation of a certain rule which barred two Bates men from competition this year. It appeared to be a wrong application of the rule. Subsequently the IGAAA generally regarded as the authority on the subject, ruled that the men should be allowed to compete. Some rather unpleasant and indiscreet statements were made and published which, together with other factors, caused the Bates Athletic authorities to vote not to compete in the State Meet in 1934, thus having only Bowdoin and Maine.

Maine Withdraws

Two days following Bates' action, the Maine Athletic Board went into a long session to consider the whole situation. While much has been said outside, those present at this session coolly deliberated upon the whole problem. At least twice before, Maine has threatened withdrawal because of certain unfortunate and wholly unnecessary incidents. Each time the situation was adjusted only to meet again similar experiences within a relatively short period.

Out of this meeting came the following statement: "In striking contrast to the harmonious and cordial relations which have generally existed between the University of Maine and its competitors in all branches of sport, are the long-standing and continued unsatisfactory conditions in track athletics as conducted under the auspices of the Maine Intercollegiate Track and Field Association."

Several times in recent years the pending withdrawal of the University of Maine from this competition has been

postponed by temporary or partial adjustment of unsatisfactory conditions.

"Because of this continued and long-standing lack of harmony among the members of the Maine Intercollegiate Track and Field Association the University of Maine will not compete in the State Track Meet in 1934."

It should be clearly understood that the question of the eligibility of the two men is by no means the cause of the present difficulty. It merely served to bring to a head what has been a nearly intolerable situation. It is of more than passing significance that all sports other than track are managed very satisfactorily through the Maine Athletic Association, but for track there has been this special association. Harmony and good relationships have existed in all other sports both within and outside of the State so far as Maine is concerned.

As things stand now all four of the colleges still retain their standing in the MITFA. The future of state track meets is entirely unknown at present.

Bates-Maine in Dual

After Bates withdrew from competition in the State Meet, they extended an invitation to Maine to have a dual meet. Maine, after taking similar action, accepted Bates invitation and a meet will be held in Orono, May 12. It is expected this will be a very close meet, Bates having defeated Maine by a narrow margin in the winter indoor meet.

Maine won a close track meet over Springfield May 5 at Orono 69½-65½. Details will be reported in the next *Alumnus*.

Two Mile Relay Team

Maine entered the two-mile relay race at the Penn. Indoor Meet April 27 and 28. Although there was reported to have been twenty entries, there were only four actually started. Indiana won first place, Columbia second, Maine third, and Manhattan College fourth.

The Maine team, composed of Kenneth and Ernest Black, Joel Marsh, and Bill Cole, is unquestionably the fastest two-mile relay team to ever represent Maine. Their time in the race was 7 min. 51½ sec. for the two-mile distance. Indiana turned in a time of 7 min. 46¾ sec., which at that time was the second fastest race ever run. Kenneth Black did the half mile in 1-54¾. Maine finished only about three yards behind Columbia.

Left to right—Marsh, Black, Coach Jenkins, Black, Cole.

Intramural Wrestling Champions

Winners in the Intramural wrestling tournament are as follows: Clayton Totman '35 of Greenfield, Mass., Preston Whitaker '35 of Bangor, Eldredge Woods '36 of Kittery, Glendon Soule '35 of Freeport, and Edward Spalding '35 of Newburyport, Mass., and William Smith '36 in the several weight divisions varying from heavyweight to the lightweight class.

Boxing Champions

Jack Thompson '36 of Bangor won the heavyweight boxing title at the tournament sponsored by the Intramural Athletic Association. Charlie Towle '35 of Fort Fairfield and George Osgood '34 of Easton were winners in other classes.

Tennis

Tennis takes on new life and significance this year with its recognition as a minor sport at the University. Professor George Small of the department of English is the coach of this sport and has been training his men as much as possible in the new Memorial Gym. The schedule is shown in another column.

Golf

Under the coaching of Earl Dunham '24, member of the University faculty, the golf team is rounding into shape. Jack Leddy '34 of South Portland, is president of the club and one of the most outstanding golf players, both in the University and in the State.

Masque Production

The title of the last major production for the year was "The Late Christopher Bean." The comedy was presented two nights as was each of the preceding plays during the current year. The high standard of performance by the players gained enthusiastic applause.

New Campus Officers

Burton E. Mullen '36 of White Valley, Mass., has been elected editor-in-chief of the *Maine Campus* with Philip P. Snow '36 of Biddeford Pool, as business manager, George A. Clarke '36 of South Portland as circulation manager, Cynthia Wasgatt '35 of Rockland, associate editor; and Elston Ingalls '35 of Buxton, managing editor.

Panhellenic Establishes New Scholarship

The Panhellenic Council, composed of representatives of sororities on the campus, has established a new scholarship for a value of \$50. It is to be awarded to a woman student who is a member of a sorority who has attained an average rank of 2.5 or better and whose character and need recommend her for financial assistance.

The four colleges of the State joined in a combined concert given at Colby College April 27. The University Musical department presented the University Orchestra in several numbers, also the University string quartet, and violin soloist Alfred B. Schriver '37 of Bangor.

On The Campus

Ranks

The average ranks for the Fall semester are given below. For those who may not be familiar with the present system of ranking, it should be said that 4 is the highest rank.

First a few general averages:

All Women	2 338
All Sorority Women	2 44
All Non-Sorority Women	2 28
All Men	2 19
All Fraternity Men	2 215
All Non-Fraternity Men	2 171
Entire University	2 229

Following are the ranks of fraternities and sororities arranged alphabetically.

Alpha Gamma Rho	2 80
Alpha Tau Omega	2 37
Beta Kappa	2 05
Beta Theta Pi	1 98
Delta Chi Alpha	2 02
Delta Tau Delta	2 308
Kappa Sigma	2 24
Lambda Chi Alpha	2 111
Phi Eta Kappa	2 468
Phi Gamma Delta	1 898
Phi Kappa	2 150
Phi Kappa Sigma	2 460
Phi Mu Delta	2 266
Sigma Alpha Epsilon	2 155
Sigma Chi	1 885
Sigma Nu	2 25
Sigma Phi Sigma	2 38
Tau Epsilon Phi	2 279
Theta Chi	2 173

Sororities

Alpha Omicron Pi	2 547
Chi Omega	2 33
Delta Delta Delta	2 45
Delta Zeta	2 467
Phi Mu	2 436
Pi Beta Phi	2 434
Sigma Tau	2 30

Ten New Senior Skulls

Immediately following Junior Week Assembly ten Juniors were tapped for membership in Senior Skull society. They are as follows:

Milton MacBride of Easton, William Cole of Prospect Harbor, James Sanborn of Gorham, Maurice Goddard of Portland, Carl Honer of Hartford, Conn., Kenneth Black of Portland, Winston Hoyt of Easton, George Cobb of Auburn, Donald Anderson of Caribou, and Samuel Reese of Wilmington, Delaware.

"Don" FAVOR

Outstanding Student Leader

In Don Favor from South Gray, the University has one of, if not the most versatile athlete of many years. His achievements in football are widely known; many have rated him as the best punter since the days of Tom Shepherd '13; other than in distance runs he can "be up in front" in most track and field events. Only his exceptionally fine form enables him to throw weights to near or new records. He weighs but 170 pounds. He has served his class as vice-president two years, is president of the Athletic Association, a director of the University Store, member of Pale Blue Key, vice-president of the Forestry Club (he is a forestry major), and a member of Phi Sigma, honorary biological fraternity. He was a Sophomore Owl and is a Senior Skull.

1935 Prism

With the opening of the Junior Week program on May 4, the 1935 *Prism* made its debut. Modern in treatment, artistic in arrangement, well edited and apparently complete in its coverage of the past year's activities, dedicated to "Prexy" Boardman. It contains more fine views of the campus than any *Prism* of recent years. Editor, Philip Pendell, of Caribou, and business manager, Stuart Mosher of Orono. Edition 800 copies. A limited number of copies are available for purchase to those who may be interested.

"The Late Christopher Bean" was the Junior Week play put on by the Masque. It was exceptionally well done.

All Maine Women Pledges

At a banquet held at the Penobscot Valley Country Club May 1 the names of thirteen new members-elect of All Maine Women and four alumnae faculty members were announced. The two alumnae are Mary R. Chandler '04 of Columbia Falls, and Elizabeth Ring '23 of Orono. The two faculty members are Acting Dean of Women Edith Wilson and Addie Weed, recorder in the Registrar's office. Undergraduates are as follows: Seniors—Wimfred Cushing of Freeport, Dorothy Moynihan of Madison, Doris Newman of Prospect Harbor, Ruth Walenta of South China, and June Wheeler of Millinocket. Juniors—Agnes Crowley of Biddeford, Miriam Linscott of Milton, Mass., Lucinda Ripley of South Paris, Ella Rowe of Bar Harbor, Jean Walker of Millinocket, Cynthia Wasgatt of Rockland, and Elizabeth Wilhelm of New Haven, Conn. Sophomore—Marie Archer of Milbridge.

Mary Ellen Chase Speaks at Scholarship Day

The annual Scholarship Day on which occasion the winners of scholarships for the year is announced was held May 1.

The speaker on this occasion was Dr. Mary Ellen Chase '09, professor of English literature at Smith College. The subject of her address was "The Larger Life in Books." The audience of well over a thousand persons received Dr. Chase's address enthusiastically.

President Boardman awarded scholarships. Those of particular interest to alumni are:

The Pittsburgh Alumni Association Scholarship to Earle O. Collins '35 of Anson.

New York Alumni Scholarship for excellence in debating to Stanwood R. Searles '34 of Cumberland Center.

New York Alumni Scholarship for proficiency in English to Robert P. Wilard '35 of Malden, Mass.

Class of 1905 Scholarship to the freshman having highest rank in fall semester to William E. Crowell '37 of South Portland.

Central District Alumni Scholarship (Chicago) to the sophomore attaining highest rank during the freshman year to Arlene Merrill '36 of Bangor.

Simmons Resigns As Agronomy Dept. Head

Prof. George E. Simmons, head of the Agronomy Department since 1911, has tendered his resignation to become effective at the close of the school year. He plans to retire upon the conclusion of his 25 years' service as a member of the University faculty.

Dr. Simmons attended Ohio Wesleyan and Ohio Northern Universities, graduating from the latter in 1902. He was immediately appointed a member of the Ohio Northern faculty where he taught for six years. In 1905 he received his M.S. degree from that institution. In 1908 he went to Ohio State University and received an additional degree the following year.

In 1909 he came to Maine as assistant professor of agronomy. A year later he was made head of the Farm Management and Agricultural Engineering Department, and the following year was advanced to full professorship and head of the Agronomy Department. In this capacity, he also was in charge of the University farms until the farm management was allocated to another newly organized department a few years ago.

During his long service with the University, Prof. Simmons has taken a lively interest in many activities and has gained a wide acquaintance with the rural population of the State as a result of his frequent addresses before Granges and other organizations. He is a member of many societies, local and national, having served as an officer in several of them. In recognition of his professional attainment, his Alma Mater, Ohio Northern University, conferred upon him the honorary degree of Doctor of Science in 1922.

Dr. Simmons plans to continue to reside in Orono during the immediate future.

Warfare

Very many and lively friendly class combats took place for two or three days immediately preceding the Freshman Banquet and Sophomore Hop. Even the co-eds were reported to have been active in this two or three days' warfare. Ample evidence of haircutting operations was to be seen on every hand. The barber shops prospered. Some faculty members grew concerned because of the large number of class cuts which were taken. The *Campus*, student weekly, has taken up the matter editorially and together with the Student Senate is asking the Senior Skulls for some more rational means of directing and controlling class struggles.

Have you paid your alumni dues?

DEATHS

'76 Frank P. Gurney of 302 Sunnyside Drive, Chattanooga, Tenn., died September 23, 1933.

'81 Edward H. Farrington, 73, professor of dairy husbandry at the University of Wisconsin, died at his home in Madison, Wisconsin, on March 22. Before going to Wisconsin in 1894, he was chemist of the Connecticut Agricultural Experiment Station, dairy chemist with the U. S. Department of Agriculture and chemist and associate professor of dairy husbandry at the University of Illinois. Professor Farrington was one of four brothers, all of whom were graduates of the University. Two others, Oliver C. and Wallace R., have died within the past year. He is survived by his wife, a daughter, and one brother, Horace P.

'88 The death of Abram Woodard Sargent, formerly of Bangor, occurred in New York City on March 30, 1934. He had been ill since last October when he suffered a shock. At the time of his death he was superintendent of dining cars on the Boston and New York line of the New York, New Haven & Hartford Railroad Co., having been with that company for 41 years. Mr. Sargent is survived by his wife, his mother and a sister. Burial was in Mt. Hope Cemetery, Bangor.

'98 Dr. Russell D. Walton, 58, died at his home in Frankfort on April 2. After receiving his degree from Maine, he graduated from the College of Physicians and Surgeons in Baltimore, Md., in 1902. He was a member of the Masons and the American Legion.

'99 Paul D. Higgins, 59, of Bangor, died Thursday afternoon March 15, at the Augusta General Hospital, where he had been rushed after being stricken with a shock. For the past year he had been employed as a clerk in the office of the State Director of Federal Re-employment Bureaus at Augusta. At the time of his death he was a representative of Penobscot County on the State Democratic Committee. He is survived by two nephews and two nieces.

'02 Burchard Kelley, 54, who had been ill about eight months, passed away on March 19, at the Ellis Hospital in Schenectady, N. Y. Prior to his illness, he had been a draftsman with the General Electric Company. He is survived by a sister who had been with him since last November. Burial was in the family lot in Centerville.

'10 Colby Curtis was drowned during the summer of 1933 at Moosehead Lake. His body was never recovered.

'12 John T. Parsons died in Paris, Maine, on January 7, after an illness lasting a year. He was 65 years old. Burial was in Riverside Cemetery, South Paris.

'14 Clarence E. Swift died recently in Gainsborough, Georgia, where he was employed by the government as chief engineer in charge of federal bridge construction. Funeral services were held in Auburn.

'16 Rev. Thomas Everett Fairchild, 40, died April 19 at his home in West Somerville, Mass. He was for a number of years active in the ministry of the Methodist Episcopal Church in this state before accepting appointment in 1928 as assistant to President of Boston University and director of the Boston University Summer School. He was a member of the Masonic fraternity, the Order of the Eastern Star, and the Grange. He is survived by his wife, who was Ruth Evelyn March (1917), also a son and a daughter. Funeral services were conducted April 23 at the Methodist Episcopal Church in Livermore Falls.

'22 The death of Herbert W. Fifield, Jr., of Vinalhaven, occurred in the Deaconess Hospital, Boston, April 17, after a serious illness. Mr. Fifield had been associate general agent of the State Mutual Life Assurance Company, with offices in Portland to which he was promoted from the Bangor office in 1929. He was an active alumnus, being representative of the College of Arts and Sciences on the Alumni Council of the General Alumni Association, and vice-president of the Western Maine Alumni Association. He was a member of the Masonic bodies of Rockland. He is survived by his wife, Mrs. Charlotte Osgood Fifield (1926), his mother and a sister.

G. R. Sweetser is an attorney. He is

trustee and general counsel for United States Spruce Production Corp., 1401 Public Service Bldg., Portland, Oregon. His residence address is 5166 N.E. Wisteria Drive, Portland, Oregon.

James W. Tripp is Rector of Epiphany Church, Ozone Park, N. Y. He is residing at 103-10 104th St., Ozone Park.

Harry M. Woods, of Bar Harbor, has been elected treasurer of the Maine Jersey Cattle Club.

And here's a letter Fred Knight received from M. E. Merriman, located in Detroit:

"My dear Fred: I received your letter of March 21st this morning. It had evidently made a trip to Italy and back since you posted it. Needless to say, I was tickled to death to hear from you although I have been hearing from you off and on indirectly, through the various publications of the University.

I have had my mind set for some time on showing up in Orono for this 25th reunion of ours and I surely hope to make the grade. This much is certain, however, that if anything stops me, it will have to be unusually important.

Well, Fred, it has been a good many years since you and I hobnobbed together, a great many more than I ever thought it would be when we last saw each other and as you say, all together too long a time for old friends to be separated.

It surely will be the treat of a life time to get back to the old stamping grounds and see the gang which made life so well worth living when we were going over the jumps, preparatory to the well-known sheepskin. So, you can count on me, Fred, if there is the least sign of a reasonable chance to be with you.

Sorry I didn't get your letter a little sooner so that I could invite Mussolini over and show him how to run a University. The Italian universities at least, and I think it also holds pretty well for the average continental school, really offer very little in the way of college life to a student. You do plenty of plugging and listen to a lot of lectures but the social and human side of undergraduate life does not exist as we know it."

'10 William S. Cole is a lawyer at 15 Cross St., Bangor. His residence address is 338 Ohio St.

Philip M. Israelson is an automobile dealer in Rumford. He is residing on Essex Avenue, Rumford.

Fred E. R. Piper is assistant manager, Casualty Claim Division, The Travelers Insurance Co., 700 Main St., Hartford, Conn. His residence address is 75 Westland Avenue, West Hartford, Conn.

Bertram E. Packard, State Commissioner of Education, spoke at Farm & Home Week, held on the campus March 26-29. His subject was, "Funds for Pub-

'11 Class Reunion, June 9, 1934.

J. LEWIS YORK—GERALD YORK '30

The engagement of Miss Clara W. Peabody and Harold D. Hersum, both of Waterville, has been announced. Miss Peabody is connected with the New England Home for Little Wanderers, doing social work in Waterville. Mr. Hersum is a captain in the Infantry Reserve on CCC duty. The wedding will take place in June.

Eugene Staples is an engineer with the

Erie Railroad Company. His residence address is 1828 E. Jarvis St., Milwaukee, Wisconsin.

'28 F. H. Masselink is now representing the Kalamazoo Vegetable Parchment Company in New England. His address is 83 Federal St., Springfield, Mass.

Gordon MacKay Walker and Miss Anne E. Ewing were married in New York on April 7. John D. Walker, Jr. (1930) was best man. Forrest W. Meader and Elwood H. Gartley were ushers. They are residing at 2215 Newkirk Avenue, Brooklyn, N. Y.

'29 Rutillus H. Allen is research assistant in Agricultural Economics at the University of California, Berkeley, Calif. He is residing at International House, Berkeley.

Robert Parks is managing one of Wal-

worth's biggest restaurants, located at Harvard Square.

Archibald V. Smith is an engineer with Gibbs & Hill. His address is 10 Adrian Avenue, New York City.

'30 Class Reunion, June 9, 1934.

Class Secretary, Pauline Hall, 59 Fletcher St., Kennebunk.

The committee for organizing class reunion in June met this past week-end at Bill Daley's home at 202 Dartmouth St., Portland. So we'll probably be hearing from them soon.

Lymie Abbott has been appointed acting postmaster of Old Orchard Beach, according to an official announcement by Postmaster General Farley from Washington, April 2.

Lloyd McCollum and Max Murphy passed a recent examination for admission to the Bar in Washington, D. C. It is known that only 50% of those taking the examination passed. Their special field of study was Electrical Engineering. News of Albert Reed comes from way out in Appleton, Wisconsin, where he is assistant manager of a branch office of Household Finance Corp. He is residing in Reedsburg, Wisconsin, at 501 N. Park Street.

C. Raymond Ward is cashier with National Biscuit Company, Presque Isle.

'31 Class Reunion, June 9, 1934.

Class Secretary, Elizabeth Livingstone, 18 Sanborn St., Winchester, Mass.

'32 Class Reunion, June 9, 1934.

Class Secretary, Mrs. Helen Stearns Hucks, Myrtle St., Orono.

Norman "Bud" French is assistant to the manager of Travelers Insurance Company, Mortgage and Loan Department, in Kansas City.

Edmund T. Hawes is a forester for the U. S. Forest Service, Ouachita National Forest. His home address is 7 Doane St., Fairhaven, Mass.

Olive Perkins is living at Kennebunk Beach.

Marjorie D. Stevens, of Bangor, whose father, Clinton Stevens, is a candidate for Congressman, was pictured, sketched and reported as being one of the real busy persons at the recent State Democratic Convention.

Lowell Stewart is foreman in charge of the Finishing Department of the Keyes Fibre Company, Inc. His residence is 43 Elm St., Waterville.

Kenneth B. Stone is Forestry foreman at Hamblen Camp P-51, Morristown, Tenn.

The marriage of Elna A. Whitney and Robert B. Lunt was solemnized on March

25, 1934, at her parent's home in Milford, Mass. Mr. Lunt, of Old Town, received his B. S. at Colby in 1930 and his M. A. at the U. of M. in 1933. He was a member of Phi Delta Theta fraternity at Colby. Mr. and Mrs. Lunt will reside at Northeast Harbor, where Mr. Lunt is teacher of English and History.

'33 Class Reunion, June 9, 1934.

Class Secretary, Martha Smith, Spring St., Saco.

Howdy, Folks—My, but doesn't this weather create a longing to be on the campus! I guess none of us will ever forget the perfect setting for the activities of those spring days of 1930-33. But we don't have to be content with memories, because this next June we are going to have our reunion, you know. Honestly, I can hardly wait to get there to see what our committee with Jack Farnsworth as General Chairman has "in store" for us. I'm going to be a regular pest—yes, just as persistent as those U. of M. library cards would be until you returned the books—in urging you to come for June 9th. You know that the fun doesn't come from having a few there, but everybody.

By the way, I received a letter from Jack Farnsworth last week and he said that many who had written to him stating whether or not they would be at Reunion included information about the activities of the sender, and he passed the information forward, and I'll give it another push off here. Many '33ers have already assumed positions of responsibility and leadership in various fields.

Edward Linscott is Supt. of Schools in Bluehill. That is "Beautiful country" to be in, Ed, especially with the coming of warm spring days.

"Chesty" Leland is now a chemist for the Leominster branch of the Dupont Company. Oh yes, Tom Desmond is located in Biddeford for a couple months with the New England Tel. & Tel. Company and he told me that Bob Ingraham has recently received a very fine position as chemist in the Tye Co. of Framingham, Mass. (Is that the correct location, Bob?)

Joe Sampson is working for his Dad at his Ford Service Station in St. Stephens, N. B.

Hello, Carl Hurd! Wondered where you had "meandered." Tom will be interested to know, as well that you are employed in the Imperial Color and Wallpaper Company, Inc. in Glens Falls, N. Y. Carl's address is 63 Notre Dame St., Glens Falls, N. Y.

And Lucia Umphrey—I had you placed in Boston studying Dietetics at the Children's Hospital and suddenly, word arrives that you are practicing Dietetics, on a much smaller scale, as Mrs. Maurice Churchill in Crouseville. Never mind, Lucia, we don't blame you a bit, and best wishes from us all.

On November 27, 1933, Grace Adams became the bride of James A. Purdy. Her address is 19 Grove St., Bangor. Grace, I guess even though you were with us only a short time, that we will never forget those "rollicking" good games of volley ball with you during Freshman Week. Didn't we have fun?

Two weeks ago, on March 31, the U. of M. Alumnae Club of Portland held a luncheon at the Eastland Hotel for undergraduates and alumnae. I met Betty

STEEL EQUIPMENT—BUILDERS' SUPPLIES

Tryon, Dolly Dunphy, Tillie Bell, Ginna Humphrey, Dot and Helen Findlay, and Grace Quarrington from our class. I should think your ears would have burned because instead of playing bridge, we devoted the entire time to discussion or rather current events. Then, true to our old habits of never doing ahead of time what we could do in the last few minutes, Betty Tryon, Dolly, and I, with only 15 min before my bus left, dashed half the length of Congress St., up three floors in J. R. Libby Co. to see Dot Blair. Dot is working there as a substitute, and hopes to have the position for the summer. But, we all did enjoy being together—all classes, all alumnae of U. of M.

Thanks for your card, Abe. Abe Hoffman says that '33 was well represented at the Alumni Banquet on March 16 at the Vendome Hotel in Boston. Jean Kennedy, "Ev" Gleason, George Solomon, Johnnie Bankus, "Wad" Raye, and Abe were all there. Let's all try to attend alumni meetings whenever there is one being held within reasonable distance as these folks have done.

Martha Hartshorn wrote to me this week. She is studying nursing at the Springfield Hospital, 759 Chestnut St., Springfield, Mass. This is her second year and she is planning to graduate next January. I think most of us remember, Martha, how you survived the struggles of chemical engineering, the only girl in the College of Technology at that time. You mentioned Reunion, hope you will be able to make arrangements to come. I'm glad you spoke of Bill Milliken. We haven't heard from him as yet, directly. Hello, Bill, since you are a full-fledged aviator—there'll be no excuse for not appearing in Orono on June 9. Jack Farnsworth says you've been busy at MIT with courses in Aeronautical Engineering. Most forgot—Bill's address is 879 Marlboro St., Boston.

Florentine Long's address now is Wenhams, Mass. I believe she is teaching in Wilmington, Mass.

There is one department store in Portland—F. W. Woolworth Co.—which seems to harbor Maine folks, for never, I believe, have I been in there but what I meet someone whom I know. Rose Snider is the most recent victim. Rose is studying for her Master's Degree at Maine, and listen ye—is Assistant Matron at the Home Economics Practice House, North Hall, for the remainder of the year. I confess, Rose, I thought you'd be the last convert to the cause of Home Economics. However, I'm glad your remaining days can be in "sublime happiness." Wish we were with you—we had some great times over there.

Well, classmates, I've included everything that's been published, all that I've heard discussed, more than I've seen and whatever I could imagine, so I'll have to say S'long until you all send me some more bits of news.

See you soon, anyway—Marnie Smith.
P.S.—Ed Giddings sent some news along with his "destination," which I meant to include. His address is 30 Parkwood Avenue, Charleston, S. C. Ed has been doing graduate work in the Yale Forestry School up to the time when he received his appointment. He says Dick Elliott is a foreman in Wild River CCC Camp in the White Mountain National Forest. "Nip" Pimeo is with the Scott Paper Co. in Chester, Pa., and has had several promotions since June. Thanks, Ed, best of luck!

A second S'long to all—M. L. S.
