Scholarship Winners

Two generous and very valuable scholarship funds have been received annually by the University for four years, namely, the Charles H. Hood Fund of \$1400 and the W. H. Bowker Fund of \$600.

The Hood Fund is given by Charles H. Hood, a noted leader in the dairy industry of New England. Seven scholarships of \$200 each are awarded annually, three to seniors and two each to juniors and sophomores registered in the College of Agriculture and whose intention is to promote farming as a life opportunity.

The two Bowker scholarships having a value of \$300 each are given by the American Agricultural Chemical Company in honor of W. H. Bowker, a pioneer in research and the development of commercial fertilizers. These scholarships are awarded to boys who have made creditable records in their secondary agricultural course.

In the brief period of four years a total of 34 students have been given invaluable scholarship aid from these two funds. Such gifts are exceedingly practical and are an honor to the donor. Additional scholarship funds are needed. The President of the University will be pleased to discuss the possibility of a gift or a bequest for this or any other purpose.

Happy New Year

Trade winds, barometers, and other measuring sticks as well as many prophets appear to be well nigh unanimous in forecasting 1937 as a year full of promise, prosperity, and pleasure. May it be so and may you have a generous share of the good things. And with each passing year may there come an ever keener interest in the University.

The Honor Roll

Last June upon recommendation of the Alumni Council the General Alumni Association voted to establish an Honor Roll of dues payers. While this is perhaps the first time such a Roll has been created in our Association history, it is not without precedent. In fact, lists of contributors are published by most, if not all colleges which have the so-called alumni fund as distinguished from straight dues.

This Honor Roll is composed of the names of all alumni who have paid dues for the last three years, including, of course, 1936-37. Why the three years, some may query? Generally speaking, those who support the association three years consecutively continue to do so regularly. For example, for each of the past two years about 95 per cent of our "Regulars" group have responded. In fact, the Honor Roll may be thought of as an outgrowth of this "Regulars" group. In discussing the length of time which should be set as a qualification for the Honor Roll, five years seemed to be too long a period to require and two years too short to be accepted as indicating sustained interest.

Then, too, there is another factor which is very important. In order to plan the work of the Alumni Association year after year, regularity of income is positively necessary. While every dues payment is important to the maintenance and development of the Association program, those whose support is so regular as to be counted upon each year, are doubly meritorious. So we have the first Honor Roll. This Roll is but a preliminary one, the final list is to be published in the June issue of the *Alumnus*. Doubtless a great many names will be added to the already imposing list before June. With the return of better times some of those who found it impossible to carry through in the lean years are now "filling in the gaps" on their dues record.

And while we are on this business of dues, may we add a word or two not entirely relevant to the Honor Roll. First, is the matter of early payments. The cost of securing dues payments multiplies rapidly as the year advances. If all the costs of materials, clerical time, etc., were charged against the late dues payments, the figure would be distressingly high. Then, too, the year's activities cannot be definitely planned until adequate income is assured.

View at digging time on farm of Winfield Bagley, Caribou, Maine

GROWN ON

SUMMERS SPECIAL POTATO FERTILIZERS

Pride of accomplishment! Satisfaction at digging time! Call their facial expressions what you will—here are growers of potatoes that are POTATOES! Produced by an expert. Soil and farm conditions ideal. In short, depicted herewith is an example of Aroostook at its best.

We, ourselves, take pride in reproducing this picture. Selected from scores of others, we feel it best portrays—in language more forceful than words—what experienced farmers achieve when they USE SUMMERS FERTILIZERS.

SUMMERS is a balanced plant-food ration. In modern plants, from a wide variety of the purest ingredients, we produce—in the words of this expert grower—"Fertilizer that is a FERTILIZER."

Quality Fertilizer is your cheapest crop insurance.

Fairer Fields and Happier Homes

SHOULD you ever wonder just what the Maine Agricultural Experiment Station means and does, it would interest you to talk to a certain farmer in the town of Van Buren, Aroostook County. This farmer, whose name might have been Henry Johnson, was discouraged in 1931. Like most of his neighbors, he grew potatoes, or tried to, but he wasn't doing as well as he might.

Perhaps we can see him there in the early fall of that year, staring glumly at a rolling field thinly set with potato vines and dolefully calculating his yield—fifty barrels an acre when it should have been at least a hundred. He has faced the same situation too many times before—careful planting, good seed, plenty of expensive fertilizer, and once more an insignificant, unprofitable crop. He is ready to plow it under and to give up, perhaps for good.

That evening, however, something induces him to write to "the College"; it may be that Mrs. Johnson has read about some of the work they have done in Orono, perhaps it is in sheer desperation and against his own feeling that "them fellers don't know nothing about farming, just readin' out o' books." At any rate, for one reason or another, he writes, as a last resource, to the Agricultural Experiment Station.

And "the College" came. Out of the books they had read, plus the nearly fifty years of experience in just such problems, they analyzed the land, found it deficient in magnesium. They advised dolomitic lime, and Henry Johnson, listening, realized grudgingly that they knew what they were talking about. That fall he treated the soil as suggested, then rotated for two years with clover and oats. In 1934, Henry Johnson, of Van Buren, dug 200 barrels of potatoes to the acre on his farm. Yes, he will gladly tell you what he thinks about the Agricultural Experiment Station.

The fact is not particularly important that the story of the man whose name might have been Henry Johnson is true, but the fact that it is typical of hundreds of cases of just such baffling, discouraging farm problems solved through the co-operation and the almost unbelievably painstaking study of the members of the Station is supremely vital to the farmers and therefore to all the people of Maine.

DR. FRED GRIFFIE
Director, Maine Agricultural Experiment Station

The Fruits of Study

Potatoes, naturally, occupy a great deal of the attention of the research workers in the Maine Station, but many other lines of investigation, though perhaps less widely known, have added their share to the increasing good of Maine agriculture. Consider, for instance, the case of the apple fruit fly which threatened at one time the state's commercial apple crop. The apple fruit fly looks like an undersized household buzzer, but she likes to lay her eggs in one of Maine's valuable farm crops, apples. The children, called "railroad worms," make tracks through the apple which spoil it for market. The Station set out to solve this major problem of the apple growers. The workers began to capture apple fruit flies by the scores, the hundreds, the thousands; then the flies were hand-painted one by one in all colors of the rainbow. After that they were liberated at various measured distances from certain orchards, and then recaptured in the orchards to determine the distance travelled.

Meanwhile, other workers were carefully hatching tens of thousands of the pests and studying the flies as they emerged, to plot the "life cycle" of the insect. Finally the entire information was put together and published, so that by consulting Bulletin #377, the apple grower can find out just when the fly emerges, how long after that she lays her eggs in his apples, and from how far away she could come to do that; from this information he knows when he should spray to kill the insects before the eggs are laid and from what wild or neglected orchards he may fear contamination. The result is a very satisfactory control and a commercial apple crop worth, in good years, nearly two million dollars to the people of the state.

Blueberries too have presented their problems, and dairy pasturage, and poultry and cattle nutrition. One of the most valuable studies in recent years has been the development of a more productive hybrid of sweet corn so that Maine might hold her own in the canning industry. The cost of producing and marketing milk in local retail markets has been the subject of intensive research by the agricultural economics department since July, 1935. This study has been pushed as rapidly as possible due to the urgent need for the data by the recently established State Milk Control Board which began to fix producer and consumer prices in April, 1935. The Station makes every effort to be helpful in all such emergencies.

And in the Home

The work of the Station, however, is not by any means confined to fields, crops and cattle, in the home also problems arise to the solution of which trained and experienced workers turn their attention. The Home Economics Department of the Station contributes annually its important share toward better, healthier, and more economic living conditions in Maine.

One of the studies recently completed by this Department of the work is attracting almost nation-wide attention. *Factors Affecting the Cooking Qualities of Potatoes*, by Dr. Marion D. Sweetman, published as Bulletin 383 of the Station, studies in careful detail causes for varia-

HOLMES HALL

Introducing the New Admissions Director

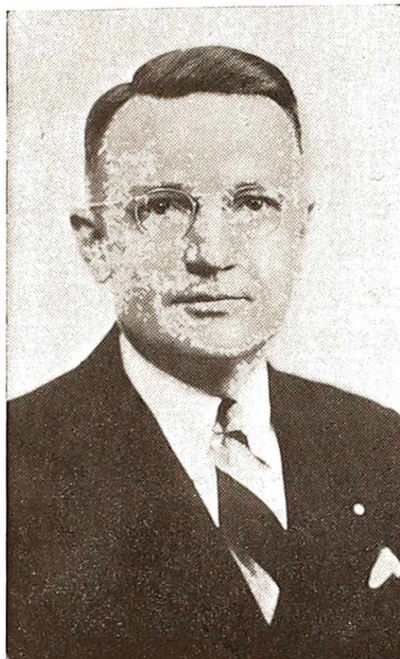

With the opening of the present college year, undergraduate admissions came under the supervision of Percy F. Crane who was appointed to succeed Dean James N. Hart '85, now on leave of absence. Mr. Crane with his background of school days in Maine, his undergraduate and graduate study at three colleges, his fifteen years of teaching experience, and especially his genial disposition and sympathetic understanding of and interest in high school boys and girls, comes to his new office of director of admissions particularly well equipped.

Mr. Crane, a native of Massachusetts, was graduated from Washington Academy in East Machias. He then entered Bowdoin from which he received his degree in 1917. While in college he was active in many phases of student life. He has also attended Massachusetts Institute of Technology and Harvard Graduate School of Education. Following graduation he entered the government air service, gaining a commission as an administrative officer. After leaving the air service he was engaged for a short time in industrial and civil engineering, which field he left to become a teacher and principal of Washington Academy, the school from which he was graduated. Just before coming to the University he had been senior master at Gould Academy in Bethel for five years. He has been much interested in track athletics and boys' YMCA activities.

When asked about his ideas on the subject of admissions, Mr. Crane was reticent in making a statement, pointing out that he has had but limited experience in the field thus far and has so much to learn. He did, however, make the following general statement which reflects in some degree his thoughts about high school admissions: "A prospective student's high school record of scholastic achievements, extra-curricular activities and community interests should be scanned with a view to the promise of the future through a college education. The search for the traditional number of units for credit for admission too often neglects to fathom the real traits of inherent ability. The increasing number of students applying for admission to the University is a consistent barometer of appreciation of cultural and economic values in higher education."

Mr. Crane is married and has two children. He is fond of outdoor life and enjoys camping and hiking, and has a summer camp on the coast. He has been active in community life, being honored by his fellow citizens by election to many offices of responsibility.

As rapidly as opportunity will permit, Mr. Crane is becoming acquainted with alumni. Any who desire information about admissions may confidently address

PERCY F. CRANE
Director of Admissions

inquiries to him with assurance of a thoughtful, courteous reply. Or better still, just drop in to his office in Alumni Hall the next time you are on campus and learn for yourself of the friendliness and earnestness of Maine's new Director of Admissions. You will receive a cordial welcome.

Faculty Members Given National Recognition

Two members of the English Department were given national recognition last month when Dr. Milton Ellis '07, Head of the Department, and Dr. George Small were both appointed to the Committee on Research of the Modern Language Association of America.

Dr. Ellis, who has for several years been a recognized authority on early American Literature and has published a number of studies concerned with various aspects of his field, will serve as a specialist on early American fiction in his position as a member of the committee. Professor Small, a graduate of the University of Tennessee and Oxford University, is an authority in the field of linguistics. He is at present engaged in compiling material for a study of the historical development of the English language.

The Committee on Research Activities of the Association is an important body concerned with the survey of scholastic researches being carried on by scholars in the field of languages and literature throughout the country.

Canners Association Gives Graduate Fellowship

The Maine Canners Association is giving this year for the first time a graduate fellowship having value of \$800 for the purpose of encouraging research especially in the field of sweet corn. The fellowship is administered through the Agricultural Experiment Station and the agreement specifies that tuition for the graduate student under this fellowship shall be provided by the University.

For several years the Experiment Station has been working on the development of hybrid strains of sweet corn which are of better quality and yield than the strains which have been used for canning purposes in the state. Some very real progress has been made in these investigations. A hybrid strain has been developed which has met with much favor among the Maine sweet corn canners. Desiring to continue these studies, always seeking to make further improvements, the Canners Association has offered this valuable fellowship. The chief conditions of the gift which is to be awarded annually are that the recipient shall devote his entire summer to the work and at least one half his time during the college year. The award will generally be good for two years, during which time the student may complete his graduate work.

The investigations on this subject to date have been done largely by Russell M. Bailey '28 under the supervision of Dr. Fred Griffie, head of the Experiment Station. Dean M. Bailey who graduated last June and majored in botany is the first appointee to receive this fellowship. The appointment is made by the head of the station and the president of the Canners Association. Peculiarly enough the first recipient is brother to Russell M. Bailey who has been doing such fine work in this field. This is the only graduate fellowship of its kind being offered at the University.

Edward B. Winslow Former Trustee Dies

Edward B. Winslow, of Portland, for thirteen years a trustee of the University and President of the Board from 1907 to 1911, died November 6 at his home. The great interest which he showed in the University during his term of service as trustee and all through his life is commemorated in the Agricultural Building on the campus which carries his name.

He was born in Westbrook in 1846 and had lived in Portland all his life, being identified with many commercial and financial activities in the city. He had been an officer and director of many companies, one time. In 1932 the University conferred the Honorary Degree of Master of Arts on Mr. Winslow.

Banks '06 Builds Big Dams

"It started back in September, 1902. The scene was one dark night on the bank of the old 'Frog Pond.' I had been requested by a brother sophomore to assist in disposing of a freshman who had just come on to the campus. By the light of the bonfire, we found our man. He was shutless as a result of the struggle, but he was happy and ready to go places. He didn't mind going into the 'Pond,' provided he was accompanied by one or two sophs. He was the freshest but grandest looking kid on the campus. He made a hit with me. The next day the freshman class organized and this man was elected president. Under his leadership the class of 1906 made it tough for the sophomores."

This is the first college picture we have of our now prominent alumnus engineer, Frank A. Banks '06, under whose watchful eye the massive and record making Grand Coulee dam and power house is being constructed. This word picture comes to us from another noted engineer and friend, Francis Crowe '05, whose fame as builder of Boulder Dam is known the world over.

And from another friend and high school classmate, Benjamin Cowan '05, construction manager for Stone and Webster, Inc., comes the statement, "As a boy, Frank was exceptionally bright and always busy. In college he was liked universally and continued to apply himself to his work with the result that he stood well in all of his classes." It is something of a coincidence that Dame Fortune should have brought together in college three men who were destined to become nationally known construction engineers.

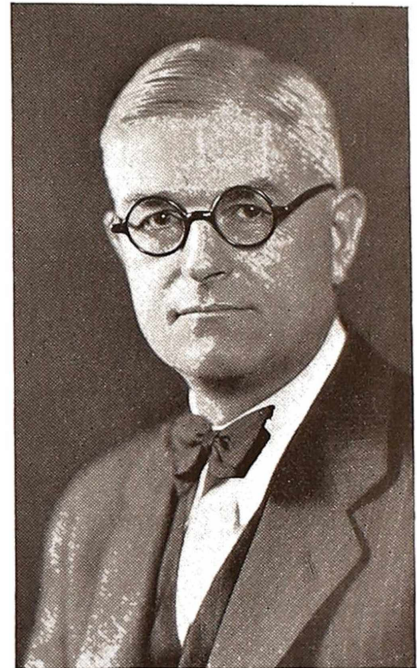

That Mr. Banks was a leader throughout his college career is evident from his

record. Athletics, class offices, declamations, Prism, and president of the Athletic Association, all had a place in his program. It is said he studied little outside of the classroom, but his election to Phi Kappa Phi speaks for his scholastic ability. As busy as he was, he had the reputation of never hurrying nor yet was he ever late.

Thirty Years with Reclamation Service

In September, 1906, following graduation in June, Mr. Banks was appointed an engineering aide in the United States Reclamation Service. His first work was on the Lower Yellowstone irrigation project, starting as rodman, but soon was advanced to chief of field party. One year later he was advanced to office engineer where he prepared further detailed plans and materials for this same job. In 1909 he was transferred to Boise as designing engineer for the Idaho division. Here he worked under another noted Maine engineer, Frank E. Weymouth '96. It was while serving in this office that Mr. Banks began to have his name attached to things which were "biggest." Among other things he drew the preliminary plans and prepared estimates for the Arrow Rock dam which was built largely according to his plans. At the time of its construction, this dam, 349 feet high and with a crest of 1,100 feet, was the highest in the United States.

Mr. Banks' first assignment as a construction engineer came in 1913 when he was given charge of the Jackson Lake dam and Jackson Lake enlargement, projects for which he had prepared plans during

FRANK A. BANKS '06

Construction Engineer on Grand Coulee Dam and Columbia River Development, a \$400,000,000 project

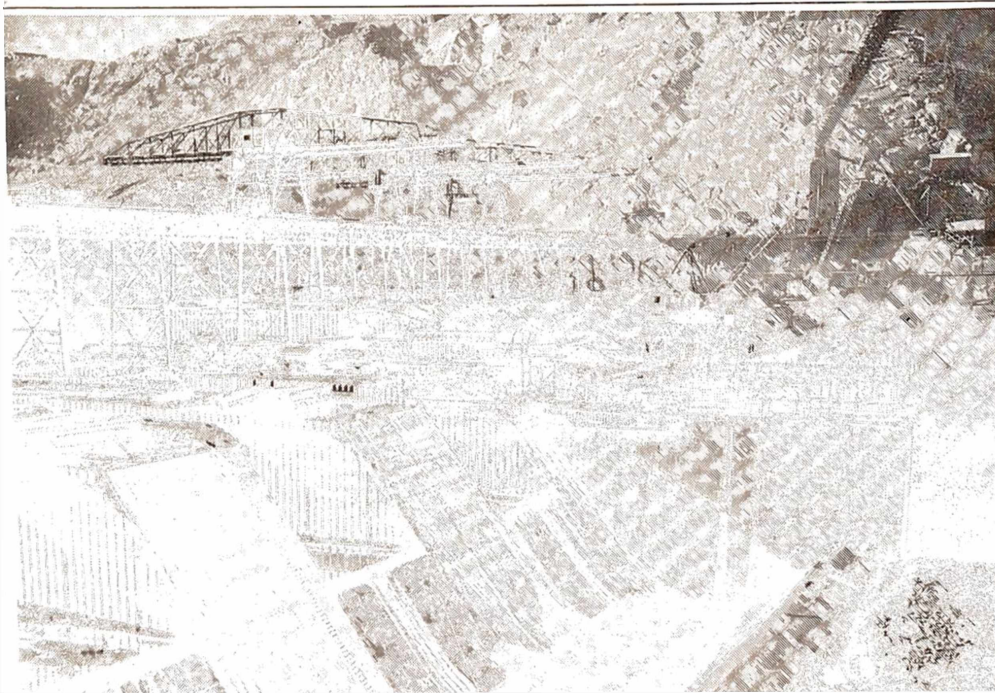

his term as designing engineer of Boise. The dam though not very high was a massive structure nearly one mile long; it contained 11,000 cubic yards of concrete and 300,000 cubic yards of earth. These figures are given only in contrast to later ones. The reservoir created under this project was fourth largest in the United States and fifth in size in the world. According to Mr. Banks, one of the most interesting things about this job was the fact that it was located seventy miles from the nearest railroad with a mountain range intervening.

The next three years were devoted to making investigations and surveys of prospective irrigation projects which culminated in his appointment as construction engineer on the American Falls dam and reservoir on the Snake River. While the engineering features of this piece of construction were large, resulting in a reservoir for the storage of 1,700,000 acre feet, one of the largest in the world, the human engineering phases presented new problems and demanded new techniques. Here, the moving of nearly an entire town of some 1,200 people required the building of streets, water system, parks and all, and involved the purchase of and settlement for all types of property from a \$5 chicken coop to a \$60,000 flour mill.

This project successfully accomplished, Mr. Banks was given another and bigger job as construction engineer on the Owyhee dam and tunnels. This dam, 525 feet high and containing 550,000 cubic yards of concrete, was the highest in the world until the completion of Boulder Dam.

(Continued on Page 8)

view of Grand Coulee Dam from downstream side, with some 1,700,000 cubic yards of concrete in place

Banks '06 Builds Big Dams

Two unusual problems faced Engineer Banks, first, it was necessary to excavate to a depth of about 250 feet below the low water level of the river for a section of the foundation, second, was the use of refrigerating apparatus to cool the concrete. These and other interesting facts contained in this article came from Lester H. Mitchell '05, Field Supervisor for the Bureau of Reclamation.

Before Owyhee was completed, Mr. Banks was transferred to take charge of the Columbia River Basin project, better known as Grand Coulee dam. Here again the word "biggest" stands conspicuously in the foreground. At present, Mr. Banks is concerned with the construction of the dam and power houses, ultimately, however, there is a vast irrigation development to follow. The figures of this project are impressive. The dam and power plant will cost about \$175,000,000. The dam will require 11,000,000 cubic yards of concrete, about two and one-half times as much as Boulder Dam and will be the largest in the world. Some of the chief features of this project include the raising of the level of the Columbia River 355 feet, creating a storage over 5,000,000 acre feet, a power plant with sufficient water supply to generate 1,890,000 KW, and construction of distributing system to irrigate 1,200,000 acres of land. The total estimated cost of the whole project approaches \$400,000,000.

Mr. Banks of Today

Lester Mitchell '05 says that Mr. Banks should have been nicknamed "Speed." It was he who brought the first motorcycle into Montana, finding the bronchos much too slow. His flying two wheeler traveling at some forty miles an hour, without a muffler, scared animals and people alike throughout the countryside. And today he is a motorboat fan. He has the best on the river and drives his own boat in races with plenty of skill. He expects his engineering work to be done with speed and precision. Off the job he is one of the boys and enjoys joking and reminiscing. He is admired and respected by all his associates.

Having opened this article by quoting "Frank" Crowe it seems appropriate to close it similarly. "Frank Banks is now getting gray and is as dignified looking as a Supreme Court Judge. Had he never gone to college he would no doubt have been a great engineer, because he is a natural engineer. But having gone to Maine and absorbed all the engineering science handed out by Jimmie Stevens, Harold Boardman, Janie Hart, and Charles Weston, and other members of the grand old faculty, with this background he has gone far in the engineering profession and today is rightfully on top of the biggest engineering job in the United States."

Fairer Fields and Happier Homes

(Continued from Page 5)

tion in potatoes affecting their value for use in the home. This includes the bases of consumer's choice of potatoes, causes of waste, complete survey of the food value, and careful analysis of the physical and chemical properties and changes of the vegetable.

Another study of the Station being carried on at the present time, is a detailed study of the nutrition of children in Maine. This work, of potentially immeasurable value, will consist of a long-time survey of children's diets in various sections of the state and the results of suggested corrective measures. An extensive program of education and testing of certain groups of parents and children is underway to overcome dietary deficiencies. Closely related to such a study is the discovery recently made by the Station that Vitamin D, gravely deficient in Maine under normal conditions during the winter, can be transferred into eggs by the feeding of fish meal to poultry.

Other work of this sort includes the economic use of electricity in the home, problems of family financing and other valuable types of research intimately connected with the household.

Inspection Service

One phase of the work of the Station of infinite value to the entire state is that of Inspection Analysis. The early history of the Station was largely founded on this work, and during the first years, the entire work of collection of samples, testing, and administration of the law against fraudulent claims was done by the Station. Later, however, the responsibility of administering the law was taken over by the Commissioner of Agriculture. The testing, however, still goes on, with manifold increase over the original work. Now not only fertilizers, but feeds, seeds, fungicides, insecticides, gasoline, oil, foods, and drugs are included in the items the Station chemists are requested to pass upon.

The Purpose Behind It All

The basic aim of the Station is well expressed in the words of Dr. Fred Griffie, the present Director. "It is our purpose to seek ways of making agricultural enterprises profitable, of improving our land resources and the general management of our farms, of studying our native crops with the broad viewpoint of their use in feeding both animals and human beings, and of improving generally the living conditions of the agricultural people of Maine."

Toward the fulfillment of this broad program, the Maine Agricultural Experiment Station has looked for fifty-two years. Starting from a small beginning in April, 1885, primarily as a fertilizer inspection and control station, with a per-

sonnel of three men and small quarters supplied by the college, the Station has grown through the effort and vision of its leaders and workers, and through the great need for it among the agricultural elements of the state.

Parallel with the growth of its influence have been its advances in equipment and personnel. In 1888 the central portion of Holmes Hall, the headquarters of the Station, was built to house the growing infant; in 1890 and 1904, the wings were added. The purchase of Highmoor Farm in 1909 in the town of Monmouth added about 250 acres for experimental use, and in 1913 Aroostook Farm near Presque Isle was purchased, giving the Station a total of over 500 acres for experimental work in different farm sections of the state.

As for the workers, the original three have increased to over thirty today, covering six different departments of investigation. Much of the value and prestige of the Maine Station is due directly to the vision, knowledge, and ability of its leaders. Dr. Whitman H. Jordan '75, the first Director, who served in that capacity from 1885 until 1896, and Dr. Charles D. Woods '05H, his successor, who served for nearly twenty-five years, were pioneers in the field of research in agriculture. The third Director, Dr. Warner J. Morse, had served in the Maine Station under Dr. Woods for fifteen years before assuming the duties of Director himself in 1921. He served until illness forced him to leave and the present Director, Dr. Fred Griffie, took over the responsibilities of the position in April, 1931.

Vision and Cooperation

Today, with six departments—Agricultural Economics, Biology, Chemistry, Entomology, Home Economics, and Plant Pathology—and a corps of over thirty workers both on the campus and in the field, carrying on cooperatively nearly seventy-five distinct research projects, the Station touches directly and indirectly the life of every individual in Maine and of many who have never resided within the borders of the state. Maine's potato researches have gone to all parts of the country where potatoes are grown, the studies in the feeding and increased egg production of poultry are authoritative among poultry growers everywhere. Studies on improved marketing methods, planting, spraying, weed eradication, and hundreds of plant diseases and insects have been published by the Station in its 385 bulletins.

Year after year the work goes on. Two, three, five, seven years are not too long for the thorough study of one problem.

Such a program takes, above all things, vision and cooperation—a vision of fairer fields and happier homes and cooperation with the people of Maine through whom and for whom these things will be

ON THE CAMPUS

Five sororities completed the year's rushing program with twenty-nine freshmen, six sophomores, and six juniors as pledges.

Delta Delta Delta led the sororities with twelve pledges and Alpha Omicron Pi followed closely with eleven. Phi Mu has eight pledges, while Chi Omega and Pi Beta Phi have five each.

Fraternity rushing officially closed Monday, December 14, 279 freshmen, 55 more than at the close of rushing last year, pledged to 15 fraternities. Phi Eta Kappa shattered the fraternity pledging record by pledging a total of 37 men. The previous record held by Alpha Tau Omega for two years was 33 on the pledging date. A few more names were added later.

The following is the official Interfraternity Council pledge report issued on Tuesday, December 15: Phi Eta Kappa 37, Delta Tau Delta 25, Phi Mu Delta 24, Sigma Alpha Epsilon 24, Kappa Sigma 22, Sigma Chi 20, Phi Gamma Delta 19, Alpha Tau Omega 19, Phi Kappa Sigma 16, Sigma Nu 16, Beta Theta Pi 13, Tau Epsilon Phi 13, Theta Chi 12, Alpha Gamma Rho 10, Lambda Chi Alpha 9.

Dwight Lord and John Whitney have been awarded alumni scholarships, and George Hitchings a loan scholarship, according to recent announcements by the scholarship committee of the University.

Hitchings was named recipient of a loan scholarship given by the American Bankers' Association Foundation for Education in Economics. Hitchings is a senior and is majoring in economics and minoring in history and government. He was recently named one of the three Rhodes Scholarship candidates from the University.

Lord, recipient of the Knox County Alumni Scholarship of \$75, is a junior in the College of Technology. His home is in Camden.

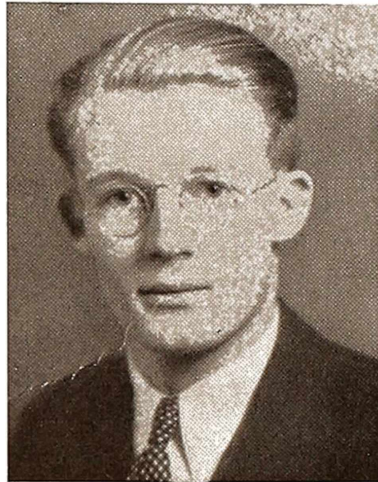

Whitney, a sophomore in the College of Technology, received the Northern Aroostook Alumni Association Scholarship of \$50. He is a graduate of Presque Isle High School.

Artemus Weatherbee '39, of Bangor, who placed second in the Maine preliminaries for the intercollegiate peace speaking contest held last spring, won first place and \$25 in the finals of the John M. Oak speaking contest held December 16 in the Little Theatre. The subject of Weatherbee's address was "Peace by Education."

Second place went to Sargent Russell

STUDENT LEADER

LESLIE "PAT" HUTCHINS '37, of Portland, President of Senior Class, Varsity Football Center, Head Proctor, Honor Student, and leader in many activities

'37, of Leeds, who spoke on "Public Ownership of Electric Utilities." Oliver Eldridge, '37, of North Adams, Mass., was third with a talk on "Teachers' Oaths." The second and third place winners received \$10 and \$5 respectively.

This is the first contest held since the bequest of John M. Oak, '73, came to the University. It was given for the purpose of encouraging the art of public speaking.

On December 9 and 10 the Maine Masque presented the "Bill of Divorcement" in the Little Theatre to a large and appreciative audience. The play was directed by Mark Bailey and assisted by Professor Donald Friedly, scenic designer. Bernice Hamilton, '38, of North Uxbridge, Mass., Marion Hatch, '38, of Melrose, Mass., and Clark Kuney, '39, of Boston, Mass., all experienced Masque performers, filled their lead parts very creditably.

Honorary Lieutenant Colonel, one of the most coveted honors to be bestowed upon a woman student of the Junior class, was given to Miss Ethelmae Currier, of Caribou, on December 11, during intermission at the annual Military Ball.

The ceremony during intermission first consisted of the initiation of 21 members into Scabbard and Blade, honorary military fraternity. Following the initiation, James Dow, chairman of the Military Ball Committee, escorted the newly elect-

ed Lieutenant Colonel to the center of the auditorium. At the same time, Seth Williams, Lieutenant in the battalion, escorted Elizabeth Story, former honorary Lieutenant Colonel, who presented her successor with the certificate of office.

What is believed to be the most pretentious Christmas service ever held on the campus took place in the Memorial Gymnasium the last Sunday prior to the Christmas vacation. Being held late in the afternoon at the usual vesper service hour, it was possible to gain impressive lighting effects. The program, which was arranged jointly by the Maine Christian Association and a University Committee, included selections by the University orchestra, the University chorus, and a pageant, together with singing of carols. About 1000 students, faculty, and friends attended.

The fourth in a series of subscription lectures sponsored by the Contributors' Club featured Newton Phelps Stallknecht, assistant professor of philosophy at Bowdoin College, on December 3. The title of his address was "Wordsworth's Conception of Imagination."

The University is sponsoring a program of six radio broadcasts each week over station WLBZ in Bangor during the winter months. These programs originate in the University studio in Lord Hall.

On Sundays a program of music, dramatics, an address, or a combination of these features is broadcast at two o'clock for one half hour. Student talent is being used extensively on these programs.

"The Home" is the general theme of an extended series of fifteen-minute talks every Monday and Wednesday afternoon at 1.45.

A series of talks by Technology faculty members is being put on the air on Tuesday nights at 7.15, while on Thursday evenings at the same hour a series of papers is being read on "The Potato Industry." A series of addresses on one central theme consists usually of five or six broadcasts. A series on Early Maine History and another on Wildlife Conservation will begin shortly.

Each Friday evening at seven o'clock the editor of the *Campus* broadcasts the news of the week. There is no broadcast on Saturday.

A Christmas play was presented by Der Deutsche Verein, honorary German society, Tuesday evening, December 8, at the University.

ATHLETICS

Varsity Basketball

With a schedule of eight games, Maine, a member of the newly formed New England College Conference, will re-enter the field of varsity basketball this winter in thorough style. Playing against the other members of the Conference, Connecticut State, New Hampshire, Northeastern, and Rhode Island, Maine will have some fast and experienced rivals, and plenty of action is forecast for the season.

Coach Bill Kenyon has been working with the squad since the close of the football season and feels that it is rounding into a promising group of basketeers. A number of good men are available from last year's group that battled Northeastern in the only varsity game of the season, including Hal Woodbury, last year's captain who is eligible to play until he completes his college course in February. Other men from last year's group are the forwards, Clarence Keegan and Frank Burke; the guards, Raoul Bourgoim, Dana Thompson and Dwight Lord. Phil Rogers, of Mats Hill, one of the most outstanding of last year's team, will be a very probable choice for the team. A battle for the center position is going on at present with Win Smith and Bill Webber somewhat in the lead.

In addition to Webber, two other Bar Harbor aspirants are looking good. All-Maine end Smoky Joe Hamlin brings a lot of basketball experience from Bar Harbor and from Hebron and promises to be a threat to any opponents. Gerard Ingalls, likewise from Bar Harbor, has played with Hamlin and Webber, and was captain at Farmington Normal before transferring to Maine.

DEWING PROCTOR '37

elected honorary football captain, as a climax to a season of brilliant play and frequently mentioned in selections for "All Maine, All New England, or All America Small College Teams."

SCHEDULE

Varsity Basketball

- Jan 9 Northeastern Univ. at Orono
- 14 Rhode Island at Kingston
- 15 Connecticut at Storrs
- 16 Northeastern Univ. at Boston
- Feb 13 New Hampshire at Orono
- 20 Connecticut at Orono
- 22 Rhode Island at Orono
- 27 New Hampshire at Durham

Varsity Indoor Track

- Feb 13 B A A —Boston
- 20 Intramurals at Orono
- 27 Colby at Waterville
- Mar 6 Bates at Orono
- 13 Northeastern Univ. at Orono

Freshman Indoor Track

- Jan 16 So. Portland H.S. at Orono
- Feb 20 Intramurals at Orono
- 27 Colby Frosh at Waterville
- Mar 6 Bates Frosh at Orono
- 13 Bridgton at Orono

Freshman Basketball

- Jan 9 Old Town at Orono
- 12 John Baptist at Orono
- 16 Hebron at Orono
- 20 Madawaska Training School at Orono
- 23 Bridgton at Orono
- Feb 10 Coburn at Orono
- 13 Bates Frosh at Orono
- 15 M.C.I. at Orono
- 20 Higgins at Orono
- 22 Kents Hill at Orono
- 26 Bates Frosh at Lewiston
- Mar 2 Ricker
- 3 Patten Academy
- 4 Presque Isle
- 5 A C I.

Winter Sports

- Feb 5-6 Dartmouth Carnival—Hanover, N. H.
- 19-20 Middlebury Carnival—Middlebury, Vt.
- 22 Intramurals and Open Intercollegiate—Orono
- 26-27 I S U —St. Margarets, Canada—tentative

President Arthur A. Hauck, of the University, was elected president of the New England College Conference at its annual business meeting held at the University Club in Boston on December 12. President Hauck succeeds President Alfred N. Jorgensen, of Conn. State. T. S. "Ted" Curtis was named secretary.

Indoor Track

Prospects for a successful indoor track season look good this year with only four men of last year's varsity squad lost by graduation. With a sprinkling of experienced performers in nearly every track and field event, and a good nucleus of state and national stars, Coach Chester Jenkins is looking forward to the winter season with considerable hope.

Outstanding among the experienced men are Alton Bell, of Dennysville, IC4A champion in the javelin, a senior this year, distance runner William Hunnewell, of Madison, whose cross country running this fall placed him in fourth position in the Nationals; Johnny Murray, of Bath, undisputed state dash champion, who has shown steady progress every year; Johnny Gowell, a junior, from South Portland, who is probably the best hurdler in the state now that Bowdoin's Phil Good has graduated; John leads the team also in broadjumping; Harold Webb, of Augusta, in the high jump, and Sid Hurwitz, of Roxbury, Mass., state champion quarter-miler.

One of the biggest problems facing the Maine coach this year is the loss of George Frame, nationally-famous hammer thrower. The best bet in this event will probably be Harold Dyer, of Portland, a sophomore, who proved to be exceptional last year in the freshman hammer, discus, and shot-put events. Dick Ireland, of Biddeford, who last year won his letter in the state meet, will be a point-winner in the shot-put.

A number of promising pole-vault men are working out, including Waldo Hardison, of Caribou, who tied for first place in last year's state meet, Herbert Leonard, of Thorndike, Beverly Nason, of Old Town, and Albie Friedman, of Bangor. A new high jumper from the freshman team will be William McCarthy, of Rumford, who last year was good for 5 ft. 11 inches. Sawyer, of Old Town, last year's undefeated miler, will bid for points in the middle distance event. Several other promising men are being developed by Coach Jenkins.

Sophomores Vanquish Frosh

In a closely contested and exciting track meet between the sophomores and freshmen, the second-year men scored the first victory of the 1936-7 track season, 79% to 59%. High scorer of the meet was William McCarthy, of Rumford, sophomore hurdle and jumping star who scored a first in the high hurdles and high jump,

tied for first in the low hurdles, and placed second in the broad jump.

Close behind him was Harold Dyer, of Portland, second-year weight star with a first in the hammer and discus and second in the shot and javelin.

Two freshmen broke freshman records at the meet, Edwin Mitchell, of Old Town, put a new mark for the frosh of 55 feet 1½ inches in the 12 pound shot; and Donald Smith, of Easton, New England frosh cross country champion this year, set a new mark in the one and one-half mile run.

Juniors Win Class Track Meet

Portland, set two college records and tied

Johnny Gowell '38, of South Portland, set two college indoor records and tied a third as he led the junior class to a win ber 12. The final score showed the juniors with 48 points, freshmen 37, seniors 29, and sophomores 21.

The mile, won by Don Smith, New England Freshman Cross Country Champion, was probably the most exciting. Other fine showings were made by Harold Webb, of Augusta, who topped the bar at six feet one-half inch in the high jump, and by Eddie Mitchell, the Old Town freshman, who came within three inches of a new record in the shot put.

The first indication that Gowell was in for a good day came when he stepped away from the field to win the 45-yard high hurdles in six seconds flat to tie the college record. Later in the afternoon he leaped 22 feet 5¾ inches to establish a new mark in the broad jump, and concluded with a victory and a record in the 100 yard low hurdles, winning in 11 seconds flat. The old record was set by W. F. Floring, and has withstood all onslaughts for more than five years.

Johnny Murray, state title holder in the 100 and 220, copped both of these races to give the seniors 10 points, but he was closely pressed by Sid Hurwitz in the 220.

Bill Hunnewell, who was honored this week by being captain of the cross country team for the past season, showed his class by stepping away from the field in the two mile race. John Dequine, a freshman from Long Branch, N. J., furnished a thrill in this race by sprinting the last lap to overtake Al Hersey and beat out the latter for second place.

Honorary Captains Elected

Dewing Proctor, of Portland, William Hunnewell, of Madison, and Don Smith, of Easton, were elected honorary captains of University of Maine varsity football, varsity cross country, and freshman cross country, respectively, at the annual Athletic Banquet December 9 in Memorial Gymnasium.

Proctor was a "block of granite" in the Maine line. He was deadly as a place-

kicker and acted as quarter-back during games. His all-round work earned him all-Maine honors; honorable mention on the All-East team; and a regular guard position on Bill Cunningham's All-New England team. He is a senior.

Hunnewell, a senior, was also honorary cross country captain last year. During his freshman year at the University, the Madison harrier was National champion and last fall he was New England Intercollegiate cross country champ. He climaxed his brilliant career just about a month ago when he gained fourth place in the National run at New York against the best college cross country performers in the country.

Don Smith, the Easton freshman, is the present New England cross country champion and he finished sixth in the national freshman race and recently broke the freshman one mile and a half record.

More than 100 letter and numeral winners in varsity and freshman cross country and football gathered in the gymnasium where the athletic department of the University served a turkey dinner. "Ted" Curtis, faculty manager of athletics, was the toastmaster. Fred Brice, coach of varsity football, paid tribute to his 1936 football team as follows:

"This year's edition was one of the best teams I've ever had. I can safely say that the eleven will go down in history as one of the finest teams that we have ever had here."

Track Coach Chester Jenkins presented the varsity harriers with gold track shoes and also awarded the I.C.4A.'s medals.

Frosh Give Team Footballs

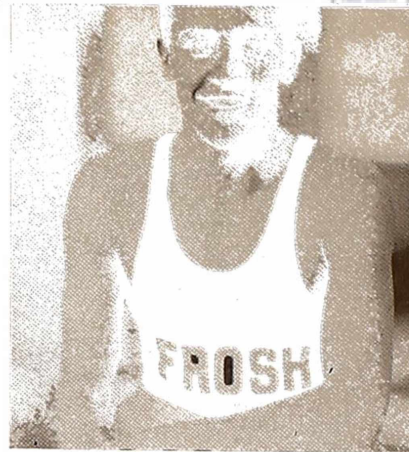

Representing the freshman class, Herbert Peabody presented the varsity football team and coaches with silver footballs. Other speakers on the evening program were Prof. Stanley M. Wallace of the physical education department, Dean L. S. Corbett, Bill Kenyon, and Dr. Eugene B. Sanger, of Bangor, who extended the greetings of the Board of Trustees.

Girls' All-Maine Field Hockey Team

Eleven women at the University have been selected on the All-Maine hockey team chosen from the leading hockey players in the college, it was announced.

They are: Elizabeth Story '37, of Pigeon Cove, Mass., center-forward; Lorna Robbins '40, of Lincoln, left inner; Mary Helen Raye '38, of Eastport, right inner; Ruby Black '37, of Portland, right wing; Lucy Cobb '38, of Belfast, left wing; Elizabeth Ashby '37, of Caribou, right half; Mary Deering '38, of Orono, left half; Laura Chute '39, of Brewer, center; Betty Littlefield '38, of Portland, left full; Henrietta Cliff '37, of Lincoln, right full; and Jane Holmes '40, of Farmington, goalie.

JOHN GOWELL '38

had a gala day during the Interclass Track Meet, breaking two records and tying a third.

Kanally Speaks at Assembly

Athletes should not acquire a swell head, for the public will soon forget them when a new man breaks the tape, Frank Kanaly, former Maine track coach, now head coach of track, relay, and cross country at Yale University, told the University of Maine students in addressing them at Athletic Recognition Assembly.

"An athlete must prepare himself for the future. Many athletes have had great success in the outer world because they have prepared for the future. The athlete must lose all notions of being superior just because he is an athlete.

"Over indulgence in athletics is bad," Kanaly warned his audience of students and faculty members. "One should try to strike a happy medium between athletics and studies. Studies also should not be overemphasized, for too much studying and no exercise is equally bad," said the Yale track mentor.

"One of the biggest weaknesses among some college athletes is their manner of speech and faulty pronunciation. More interest in English should be taken by athletes. I believe that every athlete should take a course in public speaking.

"And in conclusion," said Kanaly, "let me quote the sentence that is engraved on the cup of M.I.T. that is awarded to the winner of the annual Sophomore-Freshman track meet there. 'He who shuns the dust of the arena shall not enjoy the coolness and shade of the palm of victory.'"

Joel Marsh '35, while pacing an 880 yard runner in the Inter Class Meet December 13, covered the distance in just over two minutes. Who said Joe was slipping?

The General Electric Company employs about 4,500 college graduates, representing 237 institutions. The University of Maine is one of 15 colleges and universities which have from 50 to 100 graduates with the company.

THE HONOR ROLL

The Alumni Council voted at its last annual meeting to create an Honor Roll of dues payers and to publish the list in the *Alumnus*. This action was subsequently approved by the General Alumni Association at its annual business session. The Honor Roll includes all alumni who have paid dues for the last three years including 1936-37. Obviously, the classes of 1935 and 1936 are automatically excluded. The list which follows is a preliminary one. The final Honor Roll is scheduled to appear in the June number of the *Alumnus*. Doubtless many more names will be included in the final official list.

There are 984 names on the Honor Roll to Date. The class of 1910 leads all classes with 43 names. Other high standing classes are as follows: 1911 with 38, class of 1917 with 37, class of 1914 with 36, and 1916 with 34.

1875

Mitchell, Albert E.

1876

Vocations Week To Be Held Jan. 12-15

Plans are rapidly being completed for "Vocations Week" beginning January 12 and concluding four days later. It will feature first a series of talks on vocations by men engaged in representative industries, and second, it aims to give pointers by lecture and demonstration on "the how" of getting a job. Prof. F. Alexander Magoun of Massachusetts Institute of Technology has been secured to handle this part of the program which is being arranged by the Placement Bureau in co-

operation with a faculty committee.

During the first three days of the week a score or more of men including several alumni who have achieved success in their respective vocations are coming to the campus to discuss the opportunities for college graduates in their business or profession, and the qualifications or demands which those contemplating this field should possess. It is hoped, too, that each talk will be followed by a round table discussion when students who desire more detailed information may ask questions. Plans also provide for personal conferences so far as this can be arranged.

A faculty member of each of the colleges is arranging for talks to be given upon those subjects on which information is most needed as applied to their own division. A few speakers will give talks of more general interest.

The "Week" will close by lectures and practical application of methods by Prof. Magoun who has achieved much success in this field. Talks of how to get a job, some actual interviews followed by comments, discussion and criticism of application letters which have been written by seniors, and a general inspirational talk will constitute this phase of the program.

Somerset County Association Establishes Scholarship

A check for fifty dollars has come to the University for the first Somerset County Alumni Association scholarship, which is to be awarded to an upperclass student from that section of Maine. It is to be given annually as a second semester award, the selection to be made by the University Committee on Honors. Mr. Ernest C. Butler '01L, of Skowhegan, is chairman of the association scholarship committee.

This raises the total of alumni scholarships given by local associations to 23. Three other organizations, Cumberland, So. Kennebec, and Piscataquis Counties, are raising funds for a similar purpose.

Cumberland County Association

held its usual fall athletic meeting December 17 at Portland with an attendance of 68. The genial Stanley Wallace, professor of physical education and trainer of Maine's athletics teams for fifteen seasons, was the guest of honor and chief speaker. Other speakers were Lee Vrooman '18, Edward E. Chase '13, Chairman of the Board of Trustees, and Alumni Secretary Crossland. Report of the treasurer showed that substantial progress had been made on the scholarship fund. Moving pictures of three of the football games played last fall concluded the program.

Lehigh Valley Association

alumni met at the home of E. M. Woodsum '15 on December 14 for a social evening including a discussion of University news. Plans are being considered for a joint meeting of the alumni of the four Maine colleges. The next meeting is to be held Monday, January 25.

It is expected the new boys' dormitory will be ready for occupancy early in the second semester.

The High Ten

Lehigh Valley alumni jumped four places to take the lead in the select "high ten" dues paying areas during the past month. Philadelphians displaced Michigan alumni by a smart spurt. Three associations barely missed edging Northern Ohioans out of the list. Following is the standing:

Lehigh Valley	36.3%
Central New York	35.7%
Illinois	34.9%
Northeastern New York	32.1%
Missouri	31.5%
White Mountain	29.7%
Philadelphia	27.5%
Minnesota	26.0%
Androscoggin Alumnae	25.6%
Northern Ohio	25.0%

WITH THE LOCAL ASSOCIATIONS

Schedule of Alumni Meetings

January

- 2—Philadelphia, Pa., Alumni Luncheon, Architect's Bldg., Electrical Bureau Restaurant, 6th Floor, 17 and Sansom Sts., 12 15 p.m.
- 5—White Mountain Alumni, Hotel Costello, Berlin, 6 p.m.
- Worcester County, Mass. 8 p.m.
- 6—Western New York—Buffalo Consistory, 1180 Delaware Ave., Buffalo Samuel P. Capen, Chancellor of the University of Buffalo, guest of honor.
- Western Massachusetts Alumni, University Club, Springfield, Mass. 12 15 p.m.
- 13—York County—Chadbourn Inn, Storer St., Saco, evening Coach Brice guest of honor.
- 16—New York Alumnae—1:30 at Wanamaker's Club Room
- 25—Lehigh Valley Association, 530 W. Union Blvd., Bethlehem.

February

- 2—White Mountain Alumni, Hotel Costello, Berlin, 6 p.m.
- Worcester County, Mass., Worcester, 8 p.m.
- 3—Western Mass Alumni (same as above)
- 6—Philadelphia, Pa. (same as above)

New York Alumnae

will hold their next meeting on January 16th at Wanamaker's Club Room. A luncheon will be served at 1:30 at the price of \$75. All those not wishing to attend the luncheon may meet later for a social hour and for the election of new officers. If you live around New York City and have not yet attended one of the meetings of this rapidly growing and enthusiastic group of Maine Women, be sure to start the New Year off right by coming to Wanamaker's and seeing the old friends again.

Teachers Alumni Association

held its annual dinner meeting during the State Teachers Convention in Lewiston, October 29. The attendance of 134 was the largest at any meeting of this association outside of Bangor. Report showed that progress was being made on the Loan Fund and plans were made to continue solicitation. Officers were elected as follows: president, Willis Rollins, '26, of Milo; treasurer, K. Jean Keirstead, '20, of Old Town; and secretary, Charles E. Crossland, '17, of Orono.

Northern Aroostook Alumni

held their annual meeting on November 18 at the Northeastland Hotel, Presque Isle. Forty alumni attended to hear Dean Allen of the College of Arts and Sciences and Alumni Secretary Charles Crossland present news and information about the University. Moving pictures of the football games completed the entertainment. At the business meeting it was voted to raise the fifty dollar scholarship presented by the Association by means of dues. The following officers were elected: Clifford McIntire, '30, president; Elmer Webster, '15, vice president; Delia Houghton, '28, secretary; Dr. B. F. Porter, '97, treasurer.

Southern Aroostook Alumni

formed a new association at Houlton on November 17, starting off with an attendance of 60 alumni and friends. Dean Edward Allen of the College of Arts and Sciences was the guest speaker, giving his impressions of Maine. Alumni Secretary Charles Crossland brought news of campus activities and moving pictures of football games were shown. Officers for the new association are Roy F. Thomas, '17, president; Charles W. Wood, '22, vice president; Alice R. Lincoln, '29, secretary-treasurer.

Hancock County Alumni

gathered for a dinner meeting and dance in Ellsworth, November 19. Fifty alumni and friends attended. Officers were elected as follows: Richard McKown, '17, president; George D. Bearce, '11, vice president; Gardner Tibbetts, '22, secretary; and Maurice Burr, '26, treasurer. Guest speakers were Dean Arthur L. Deering, '12, Frank Fellows, '12, of Bangor, and Alumni Secretary Charles Crossland.

Washington County Alumni

met in Dennysville December 2 at which time they organized a county alumni association. Fifty-six alumni and friends were present in spite of hazardous traveling conditions. The officers were constituted as a committee on constitution to bring in a report at the next meeting which is to be held in the spring. Dean Arthur L. Deering, '12, was the chief speaker. Officers were elected as follows: president, Horace Bell, '28, of Machias; vice president, Oscar Whalen, '19, of Eastport; secretary, Ernest K. Gattcomb, '31, of East Machias; and treasurer, Mrs. Percy E. Jackman, '14, of Calais.

ALUMNI PERSONALS

DEATHS

1887

Addison R. Saunders, of Hanover, Maine, died at the age of 74 on September 19, 1936, at the Rumford Community Hospital. Mr. Saunders had for many years acted as Treasurer of the Hanover Dowel Co., an industry built up by him and his brother. After graduation from the College of Technology Mr. Saunders taught in the State of Washington and later in South Dakota. He received the degree of M.E. from Maine in 1893.

Mr. Saunders was active in the Masons and was a life member of the Aleppo Temple, Boston. He was interested in the work of the Alumni Association and identified himself with many of its activities.

1896

The death of Hermann S. Martin in an automobile accident near Ely, Nevada, occurred on November 11, 1936. The accident took place while Mr. Martin was engaged in supervisory work on PWA Projects in Northern California and Nevada.

Mr. Martin, a Civil Engineering graduate, was a native of Dover-Foxcroft, but went to Colorado shortly after his graduation to engage in survey work for the Denver and Rio Grande Railroad and was continually employed in that part of the country. He was employed on numerous railroad, irrigation, and other engineering projects in nearly every state in the Rocky Mountains and on the Pacific Coast. For his work in connection with the Twin Falls Irrigation development on the Snake River in south Idaho, on which he pre-

pared a thesis, he was awarded, in 1910, the degree of C.E. from Maine.

He was highly regarded in his profession and several times received national recognition for his engineering accomplishments.

1902

Harry R. Pipes, of Presque Isle, died suddenly of pneumonia at the age of 57, on November 30, 1936. Mr. Pipes, a member of the firm of W. R. Pipes & Son, engaged in the dry goods business. He was a highly respected citizen of Presque Isle and very prominent in civic affairs. He was an active member of the Masons and the Merchants' Association. He had served for several years as a trustee of the Northern Maine Sanatorium and was actively interested in politics.

1912

The sudden death of George H. Jennings, manager of the Hotel Littleton, Lewiston, occurred on December 3, 1936. Mr. Jennings, 49 years of age, succumbed to a heart attack.

Mr. Jennings, a native of Charlestown, Mass., had been manager of the Hotel Littleton for the past seven years. Previous to that time he had been manager of the dormitories of the New England Conservatory of Music in Boston. He attended the University in 1908 and 1909, being affiliated with the class of 1912.

1917

Mrs. S. Stanley Reynolds (Maria A. Mooney) died at her home in Waterville on July 6, 1936. She was a graduate of the two-year course in Home Economics.

The death of John H. Kiernan, of Wareham, Mass., on January 31, 1936, has been reported to the Alumni office. He graduated with a degree in mathematics. No details of his passing are known at this time.

BY CLASSES

1885

Next Reunion, June, 1941

Dean and Mrs. James N. Hart are spending the winter in Florida. Dean Hart is on leave of absence from the University. Their address is 544 Fairfax Ave., Winter Park.

1887

Next Reunion, June, 1937

Charles T. Vose has retired from his position as Assistant Engineer of the Maine Central Railroad Co. at Portland. He is living at 94 Park Ave., Portland.

1892

Next Reunion, June, 1939

Mr. and Mrs. Wm. C. Holden of Hartford, Conn., will spend the winter in Florida, probably at Sarasota. Mr. Holden, who was for many years principal of the Weaver High School in that city, retired at the close of the school year in 1935 because of impaired health which resulted from an automobile accident.

1894

Next Reunion, June, 1939

George H. Hall, whose residence address is 44-41 Douglaston Parkway,

Douglaston, N. Y., is retired from active business and devotes his time now to technical writing.

1898

Next Reunion, June, 1938

Harrison P. Merrill is a member of the City Council of Pensacola, Florida. Mr. Merrill is a retired U. S. Engineer.

1899

Next Reunion, June, 1937

Wallace Belcher, construction engineer for United Engineers and Constructors, is now in Mexico City building several new lines of railway for the National Lines of Mexico.

1902

Next Reunion, June, 1937

Ralph Whittier, of Bangor, is a trustee and treasurer of the recently organized Penobscot Marine Museum of Searsport.

1903

Next Reunion, June, 1941

William B. Burns is Town Manager at Fort Fairfield, Maine.

1905

Next Reunion, June, 1941

Lincoln Colcord, of Searsport, is a trustee and also secretary of the recently incorporated Penobscot Marine Museum of Searsport.

Deputy Sheriff Robert A. Webster, of Rockland, was married to Miss Ada L. Pettingill, also of Rockland, on November 29 in Warren. Mr. Webster was city marshal in Rockland for four years and is now serving his third year as deputy sheriff and turnkey of Knox County jail. Mrs. Webster has been exceptionally successful as a trained nurse. They are to be at home on 354 Broadway after February 1.

Orman L. Keyes was elected first vice-president of the Caribou Lions Club at its meeting held in Caribou the latter part of November.

Clarence E. Reed is sales engineer for Hyde Windlass Co. of 91 Chambers St., New York City. His residence address is 133-33 Sanford Ave., Flushing, L. I., N. Y.

Mrs. Mabel Powell McGinley is house superintendent of North Hall, a cooperative dormitory for girls at the University of Maine.

Lucian A. Thomas is a resident engineer inspector of PWA and is residing and receiving mail at 610 Wood St., The Boynton Vineland, N. J.

Residing at 50-31 213 St., Bayside, L. I., New York, is George O. Armstrong who is assistant mechanical engineer in the engineering department of the New York Central Railroad.

1906

Next Reunion, June, 1940

Leon H. Marr, of Farmington, was chosen secretary of the Maine Commission of Pharmacy. Mr. Marr is retiring president.

Henry W. Bearce of the U. S. Bureau of Standards, Washington, D. C., has an article on "Weights and Measures in the United States and Great Britain" in a recent issue of Scientific Monthly.

1907

Next Reunion, June, 1940

Lowell J. Reed, professor of biometry and vital statistics at the School of Hygiene and Public Health at Johns Hopkins University, had an article in The Annals of the American Academy of

1908

Next Reunion, June, 1940

W. H. Ormsby is president of the Maine Pharmaceutical Association

1909

Next Reunion, June, 1940

Howard L. Farwell, formerly of New York City, is now located at Poland Spring Hotels where he is assistant to General Manager. His home address is Riccar Inn, South Poland, Maine.

Dr. Mary Ellen Chase, professor of English at Smith College and well-known author, spoke at the first meeting of the Boston Smith College Club, on December 4.

Dexter S. Smith, of Bangor, is president of the All Souls Congregational Church Men's Club. The University of Maine trio played incidental music and community singing was enjoyed. Mr. Smith is also a director of the European & North American Railway.

George R. Sweetser is trustee and office counsel for United States Spruce Production Corp., at 1401 Public Service Bldg., Portland.

1911

Next Reunion, June, 1939

Jacob K. Tertzag is now located in Los Angeles where he is a practicing attorney. His residence address is 1917 South Mariposa Ave., Los Angeles.

Raymond W. Davis, of Guilford, recently discussed the subject of "Public and Customers Relations" at a meeting of the Maine Bankers' Association held in Augusta in November.

1912

Next Reunion, June, 1937

Col. William R. Ballou, of Bangor, was elected president of the Maine Retail Lumber Dealers' Association which was held at the Bangor House on November 20.

Herbert C. Norburg is Quality Engineer at the Champion Lamp Works, 600 Broad St., Lynn, Mass. His residence is 485 Elliott St., Beverly, Mass.

1913

Next Reunion, June, 1938

Dr. Forrest B. Ames was elected vice president of the Harvard Club at its meeting recently held in the Bangor Chamber of Commerce.

Leon E. Seekins is vice president and manager of the Lowell Electric Light Corp., 29 Market St., Lowell, Mass.

Andrew J. Beck, of Washburn, who is one of the leaders in promoting the interests of Aroostook County, was named a member of a committee of citizens of that county to take steps to advertise and publicize the county for the vacationing public.

1914

Next Reunion, June, 1939

Harold J. Shaw, of Sanford, was elected a member of the executive committee of the Maine Dairymen's Association at the annual meeting held in Lewiston in November.

The New England Dairyman for November contained an article by H. P. Adams concerning the New England milk situation in the major markets. Mr. Adams is district manager of the New England Milk Producers Association.

William C. Monahan, of Framingham, Mass., is now a trustee of the Massachusetts State College, Amherst, Mass.

1915

Next Reunion, June, 1938

Harold H. Beverage, Chief Communications Engineer with Radio Corporation of America in New York City, has been elected President of the Institute of Radio Engineers.

Joseph H. Bodwell is Rural Sales Supervisor for Public Service Co. of N. H., with headquarters at 1087 Elm St., Manchester.

Russell M. Crispin is owner of a retail store at 34 West Main St., Shelby, Ohio.

1916

Next Reunion, June, 1938

W. H. Edminster, of Norway, superintendent of schools of the Norway, Oxford and Waterford Districts, had charge of the general session opening the meeting of the Androscoggin Valley Teachers Institute on November 16.

A. L. Hamblen is receiving mail at Army War College at Fort Humphreys, D. C. He is a major in the infantry division of the U. S. Army.

1917

Next Reunion, June, 1938

John H. Magee has been named State Director for Maine of the F.H.A.

William C. Webster is sales representative for the Scott-Foresman & Co., of New York City, with residence at 44 Bancroft Hotel, Portland.

Dr. Henry Lathrop Dyer is practicing in Berlin, N. H., with his office on Main St.

1918

Next Reunion, June, 1937

Everett E. Emmons is a contact representative U. S. Veterans Administration and receiving mail at Box 276, Togus, Maine.

Albert L. Shaw is with the Standard Vacuum Oil Co. at Nanking, China.

Donald Foster is manager of the Mt. Madison House in Gorham, N. H.

1919

Next Reunion, June, 1937

Harold M. Pierce, of Bangor, was elected a director of the European and North American Railway Co., at a meeting held during November.

Samuel W. Collins, of Caribou, is a member of the Board of Directors of Maine Retail Lumber Dealers' Association.

1920

Next Reunion, June, 1937

Frank C. Worcester is principal of Islesboro High School, Islesboro.

Ruel W. Whitcomb is Assistant District Claims Manager of Liberty Mutual Ins. Co., Park Square Bldg., Boston, Mass. He is living at 12 Appleby Road, Wellesley, Mass.

Fred T. Jordan who has been in Philadelphia since the fall of 1934 has gone to Buffalo, N. Y., as manager of the branch office of the Conn. General Life Ins. Co.

1921

Next Reunion, June, 1937

Paul D. Tapley, of Ellsworth, who was inspired to collect ship pictures by exploits of his seagoing ancestors, has scoured 38 states and parts of Canada to assemble a fine collection of ship pictures and Currier & Ives prints.

1922

Next Reunion, June, 1941

J. Frederick Burns, of Houlton, was admitted to practice before the United States Supreme Court at a session of the

court held Tuesday, December 9.

Friends and classmates of Mary Bunker Simpson will be sorry to learn that she has been in the Palmer Memorial Hospital in Boston for over 12 weeks. She is much better now and plans to spend Christmas with the family at home in Falmouth. She says their house is on the way to Woods Hole, Mass., and if any Mainiacs go towards Woods Hole, that they will see Dr. Simpson's sign and stop in to say hello.

Arthur M. Bowker is an associate marine engineer with the Navy Dept. as inspector of machinery. He is residing at 378 Middle St., Bath, Maine.

Coleman J. Costell is chief chemist with the Sek Chemical Corp. of Covington, Kentucky, with residence at 341 Terrace Ave., Cincinnati, Ohio.

1923

Next Reunion, June, 1941

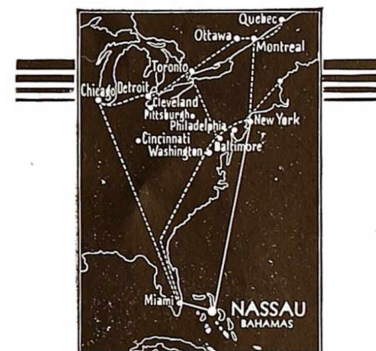

Tony Gould Torrey, with her two children, Norman, aged eleven, and Anita, aged nine, is spending her third winter in Florida. At luncheon in Bangor just recently, Tony explained that it was really just as cheap to live in Florida winters and the climate was much more to her liking. Imagine that! It's a little hard to keep track of Tony when she is in Florida, but in Bangor we happen to know that she is a member of the American

Association of University Women, the Junior Welfare League, League of Women Voters, P. T. A. and at present is Production Chairman of the Red Cross. Perhaps you knew that Tony is one of our most traveled classmates. She has been to Europe twice, visited most of the European countries, and toured Egypt and the Holy Lands.

Speaking of travel and southern climes, Cecil R. Jones, Balboa Heights, Canal Zone, Official Engineer for Section of Surveys in the Panama Canal Zone, can't appreciate it when in listening to football broadcasts from the U. S. A. on Thanksgiving Day, mention is made of freezing spectators. That shows how far he is removed in time from his four years in Orono, Maine. But why bring that up?

And now to mention California, Everett B. Mansur, 169 South Milton Drive, Los Angeles, single, a licensed real estate broker and registered civil engineer, has taken an active part in the civic life of Los Angeles. Since his residence there he has served as Director of the Los Angeles Junior City Club, Director of the Southwest Investment Corporation, Chairman of the Better Citizens Committee of the Los Angeles Junior Chamber of Commerce, Secretary of the Traffic and Transportation Section of the Los Angeles City Club and the Open Forum of the same organization. He is a member of the Association of City Planners of Los Angeles County, Los Angeles City Planning Association, Los Angeles Junior Chamber, City Club, Jonathan Club and the Hollywood Shrine Club.

Ervin Stuart completed his Master's degree in Education at Bates this summer and is now principal of Greeley Institute, Cumberland Center, Maine.

Harriet Weatherbee, one of the original Phi Beta Kappa's at Maine, we knew was a first class mathematician, but her thoroughly developed hobby of genealogical research has been something of a surprise to us and a pleasant one at that. Harriet is a member of the Connecticut Historical Society, Lincoln Historical Society, D. A. R., and the National Genealogical Society, and now between class preparations and papers at East Hartford High School is writing a history of the Weatherbee family.

Last but not least, Margaret Manchester McIlhavy is living with her family in Washington Depot, Conn.; she has one son, Andrew Fuller, aged nine. Margaret son, Andrew Fuller, aged nine. Margaret, mothers is active in P.T.A. and the Women's Club.

1926

Next Reunion, June, 1940

Francess H. Brewer writes me the following news of the '26 class in and about New York. Fran, as you may know, is a practical instructor of student nurses at St. Luke's Hospital, New York City.

Dr. Wilhelmina Dunning, associate in Cancer Research at Columbia University, attended the International Cancer Con-

gress in Brussels, Belgium, at which she delivered a paper on the "Etiology of Cancer."

Marion Eaton is instructor of Latin in Ridgewood High School, Ridgewood, N. Y.

Margery E. Johnson is teaching English in Deering High School, Portland. For the past two years she has been at the Raniajio Valley Day School, Munsey, N. Y.

Mr. and Mrs. Lloyd Nunan (Edith Andrews) announced the birth of their second daughter, Mindel Edith, September 23, 1936.

Kenneth MacGregor who was mentioned in the December issue as being with Benton and Bowles of New York City is engaged in producing and directing such radio programs as "Showboat," "Capt. Diamond Stories," etc.

Myles H. Standish is with the U. S. Forest Service at Plymouth, N. H.

Dr. Edward F. Stanton is connected with the Methodist Episcopal Hospital in Brooklyn, N. Y.

Robert A. Tate is sales manager of the Higgins Fertilizer Co. in Presque Isle.

A Happy New Year to you all, and may you all resolve to send in one news letter this year.

Dear Classmates

Due to the Christmas rush I had so few personals that I decided to "play possum"—but along comes a note from "Dear Editor" so I hastened to send along what I have.

Elmer Kelso and Mrs. Kelso (Dorothy Bradford '29) are located in Plymouth, N. H., where Mr. Kelso is with the U. S. Forest Service.

From Durham, N. C., comes word of the arrival of Anne Webster Davis on November 10th. The parents are Mr. and Mrs. Gifford Davis (Helen Peabody).

Philip Arnold is principal of the high school at Petersham, Mass. He was married last June to Miss Elizabeth Hamlin, also a teacher there.

Did you know that Amy Adams has had some poems published? The name of the book is "Maine and Vermont Poets."

Marion Farrington Giro and her two children were in Brewer for a visit this month. They have returned to Cohoes, N. Y.

Annette Matthews is Medical Technologist at the Eastern Maine General Hospital in Bangor.

I'm hoping for lots of Christmas notes.

Dear Classmates

Just as I was feeling quite discouraged about this month's column I received items from several of our classmates—won't more of you please write me, too?

Received a fine letter from Hope Craig Wixson with several items for our personals column. Thank you, Hope. "Wix" was in Bangor at that time attending the sessions of the Maine State Grange, of which he is Gate Keeper. He is also President of the Kennebec County Farm Bureau, re-elected last month. Hope and Wix have two children, Edwin Jr., just five, and Faith, who is a little past two.

When Wix isn't attending to all his official duties he is farming and at present he has the highest testing herd in the state—averaging 518 pounds of butter fat per cow for last year. The Wixson's address is Oaknole R. #4, Winslow, Maine.

Buck (Russell) Foster lives in Augusta where he farms with his father. He has two sons. He has been on the city council and I believe he is again this year. He is also Master of Cushnoc Grange for his second year.

Fran (Fuller) and Spot Giddings have recently moved into Winslow. How about sending us your address, Fran?

Betty Collins was recently elected president of the Bangor alliance of the Tri Delta sorority.

"Kelley" (H. Everett) Elliott now has his home address at Seal Harbor, Maine. His employment is as safety engineer for the WPA and his headquarters for business purposes is Cherryfield.

Harry R. Hartman is construction engineer with Witco Carbon Co., Sunray, Texas.

Dr. Carroll Johnson, of Jersey City, N. J., and Miss Gertrude Rick, of Rochester, N. Y., were married November 28. Carroll has been on the staff of the Jersey City Hospital for the past few years, but on Jan. 1, he will leave for Worcester, Mass., where he is to engage in private practice. Mrs. Johnson was superintendent of nurses in the Highland Hospital, Rochester.

Aldron B. Lewis has returned to the U. S. after teaching for several years at Nanking University, Nanking, China. He is now Senior Agricultural Economist, Farm Credit Administration, Washington, D. C.

Francis H. Masselink is now sales manager of the New England division for the Kalamazoo Vegetable Parchment Co. of 10 High St., Boston, Mass. His residence address is 33 Orlando Ave., Winthrop, Mass.

Frederick C. Murphy is studying at Harvard this year. He is receiving mail at 75 Perkins Hall, Oxford St., Cambridge, Mass.

Mose Nanigian is head of the Math and Science Dept. at Madison High School. He is also coach of football and baseball.

Laura G. Pedder is submaster and teacher of English at Patten Academy, Patten.

Fred Scribner is teaching in Stamford, Conn. Fred's literary ability is coming to the fore; he has recently had stories published in "Esquire," one in "Liberty," and one in the "Pictorial Review."

"Ginna" Smith Lamb has been appointed chairman of the Junior Audubon work for Cumberland County.

Wishing you all a happy and most prosperous New Year.

Next Reunion, June, 1939

Dear Classmates:

Whitney Baston has been with the National Broadcasting Co. for several years as radio engineer. He is living at 189-35-44th Ave., Flushing, L. I., N. Y.

Paul Bunker is junior engineer State Highway Commission. He is residing at 28A Lincoln St., Augusta, Maine.

"Lanky" and Evelyn Lancaster and son, "Jimmy" are located in Rutland, Vt., where Lanky is employed by the U. S. Forest Service, having recently been transferred from Kentucky.

Merton Morse is employed as switch-

man by the N. Y. Telephone Co. He is living at 7022 Ridge Blvd., Apt. A 10, Brooklyn, N. Y.

Gordon Hammond is now located at 41 Oak St., Augusta. He is still employed by the Mutual New York Insurance Co.

The engagement of Mary Robinson to James McClure, of Bangor, was announced at a tea given by Mary's aunt, Mrs. Louis Larsen, on December 6th.

I was pleased to receive a letter from Mary Weimer Ryerson, a few days ago. Mary is now Mrs. Erlon Ryerson, and lives at 12 Gilman St., Portland; Erlon Ryerson is a member of the class of '28 and is one of the organizers of the newly formed Goodall Tree Expert Co., Inc. The Ryersons now have two little girls—Patricia Dawn was born March 16, 1935, and Nancy Christine arrived May 18, 1936. From Mary I learned that Myrtle Walker Dow is in Ithaca this year while George is working on his Ph.D. Do send us your address, Myrtle.

Alice W. Sinclair

While "Hen" Plummer was visiting with his folks in South Paris the first of December, he and Bill Daley got their heads together and decided that it would be the thing to get out another class mimeo-letter of a general informative nature soon after the first of the new year, so it will probably be reaching you before many days. Hen is married and living in Boonville, N. Y., at 43 Erwin St. In his note to me, he gave only brief news of himself, so I'm not sure just what his work is now. Maybe I'll be able to follow through with more later.

To add to the very brief item about Alice Bagley in last month's *Alumnus*, she is living at 800 No. Main St., in Wheeling, W. Va. In writing about the city (in a note to Mr. Crossland) she states that "Everything will be dated from the 1936 flood. The havoc which was done is still apparent in many places." She's brushing up on her German, anticipating a possible bicycle tour through some countries of Europe next summer.

Next Reunion, June, 1939

Hello 31-ers:

I seem to spend most of my time keeping up with Dick Page. Well, Dick, at least you keep us informed of your whereabouts. His new address, tellers, is 4801 North Lane, Apt. 103, Edgemoor, Maryland.

George Thurston is living at 20 East Pine St., Lowell, Mass., where he is employed as an elevator mechanic for F. S. Payne Co.

Ed Strecker, assistant superintendent of the Esleek Mfg. Co., Turner Falls, Mass., is back at the University for six weeks' special work in pulp and paper chemistry and technology study.

Bill E. Smith and Kathleen Fifield were married in Bangor, November 14. Mrs. Smith is a graduate of Stonington High School and Gorham Normal. Bill is working in the Maine Testing Laboratory in Orono.

Frankie Barrows has been transferred from the Grant Store in Portland to the one in Sanford. He has been promoted to store manager. Miss seeing you, Frank.

Louis Scheffer is in New York City. He is assistant to electrical engineer in the department of transmission for the Phoenix Engineering Corporation. He's living at 500 Washington Ave., New York City.

More news about Sam Sezak. I'm going to quote from an editorial in the Bangor News. You remember I told you of a previous editorial? This time they say: "We were particularly interested in Sam and his progress because of his football background. Briefly, it was four years of bench sitting. Sam never complained, although naturally disappointed. At the time we suggested Sam had apparently packed away a lot of valuable information as he watched his mates campaign against gridiron rivals. Flashes of that knowledge came to the surface in his coaching work at Milbridge and Rockland high schools in Maine."

"His football teachings were particularly effective at Rockland where he enjoyed splendid success. And it was only typical of Sam to accept another offer, which he felt gave him more opportunity."

"And it is about that offer which brings us into print today."

FAIRHAVEN'S HERO

Not only did Sam find the opportunity he sought at Fairhaven, but he has become the fair-haired boy in that Bay State

town. Generally speaking, it was his season's record which catapulted his team into second place in the Class C ratings in Massachusetts. And don't let the Class C business fool you.

"They virtually gave Sezak the key to the city, however, when his Fairhaven team rose to superb heights recently to defeat New Bedford (Mass.) high school 8-7. It was the first time in five years such a feat had been accomplished by a Fairhaven team. The celebration lasted far into the night."

"Behind the victory was typical Sezak guile and thoroughness. His team apparently played a planned game from first whistle to curfew. Sezak admitted as much in an after-game statement."

And now a Happy New Year to you all and twice happier if you'll only make a resolution to send me a postal telling your whereabouts, your marriages, and your children—110 Revere St., Portland, Maine, will reach me—and the name is Mary C. Stiles. So long.

1932

Next Reunion, June, 1939

George Andrews is living in Norway, Maine.

David H. Hanaburgh is a forester at Camp F 22T, San Augustine, Texas.

Wallace (Bud) and Virginia (Berry) Humphrey are living at 44 Slater Ave., Providence, R. I. Bud is employed as salesman for the J. C. Hall Co., Lithographers.

Peter J. Kuntz of Treichler, Pa., called at the Alumni Office in Orono recently.

The marriage of Miss Dora Anderson, of Mars Hill, and Smith McIntire was solemnized November 4, in Mars Hill. Mrs. McIntire is a graduate of Aroostook Central Institute, Aroostook State Normal School, and Boston University. She taught several years in Mars Hill and this last year at Plymouth, Mass. Smith is employed by the Maine Extension Service, Orono.

James L. Robertson is production manager for Dehydrated Foods. His address is 34-33 90th St., Jackson Heights, Long Island, N. Y.

1933

Next Reunion, June, 1938

Hello Everybody:

I've been jotting down things to tell you all this month and, if anyone has appeared on the scene from the U. of M., I've taken down his conversation verbatim. However, I have warned them beforehand that anything they say is liable to appear in print.

Several weeks ago on a Sunday evening the telephone rang and a voice asked if I knew who the owner was—well, it was Marg Moulton. And then I discovered I was wrong and that it was Marg Moulton Murphy and guess who was with her? None other but Billy Murphy. They were on their honeymoon. They soon found our apartment and we prevailed upon them to stay for the night. You don't know what a relief this is to me to have this matter of Billy and Marg finally settled. We somehow managed to get our breath during the evening in between conversations but you can realize a little bit what it must have been like when I tell you that Billy drank six glasses of water at breakfast the next morning. I hope

that the city of Bangor has an abundant water supply, for Billy and Marg plan to make their home there, on Mountain View Ave. Billy is associated with Finnegan Bros., Undertakers. Of course I couldn't find out many of the particulars of the wedding from Marg and Bill. They told me they didn't know whether it was fair or cloudy. However, the Bangor Daily News had some representative who seemed to know what it was all about and from a clipping I learned that Marg and Bill were married on November 21st at 8 a.m. at St. Mary's Catholic Church in Bangor. Immediately after the ceremony a wedding breakfast was served at the Penobscot Exchange Hotel to about 50 guests. From Norwich the newlyweds were going to New York and then to Philadelphia and on to Washington. They were to be in their new home after the 15th of December. Marg said that when we came to see them in Bangor we would be able to see Chick Hill from her home—a favorite hike of ours.

From Marg I gathered these bits of news. Dorothy Hutchinson has completed her training course at the Mass. General Hospital and graduated as one of the highest ranking students last June. She was also president of her class. This year she is doing graduate work there.

Merita Dunn is teaching English and Civics in Stockholm. Inez Howe is teaching at Caribou High School and yes, Edith Bolan is teaching biology there. Winona Harrison is employed by the Montgomery Ward Co. in Portland, Maine. Marg said that she met Mel Means in Portland and asked him what he was doing and he passed it off as being Supt. of Schools. Now, Mel, we don't quite believe that though we'd like to—so send me a line and tell us the truth—unless it's so bad that you don't want it printed! Steve Barry is with the Seaboard Paper Co. in Bucksport, Maine. This leads me to another volume of news. Vol. II.

Ted Prescott called up from New London last week and planned to come up two days later. I asked him to see if he could trace Jane Barry in that city as I heard that she had been there, and also Henry Conklin. Well, Ted did a sequel to the G-men for he came with not them in person but with their whereabouts. Jane Barry is employed as an assistant to a doctor in New London. Her address is 328 Montauk Ave., New London, Conn. As for Henry Conklin, he has secured recently a position as instructor in the Choate School in Wallingford, Conn. He has been living with his sister in New London at 252 Jefferson St. and I think that mail would reach him at either place. Well, now to tell you some of Ted Prescott himself. Ted is, at present, sales manager in Connecticut for the Scott Tissue Co. When he came up the stairs I kept looking up and up and finally at the top of six feet and two and one-half inches, I saw Ted himself. I guess that some of the training in our freshman class of persuasive speech with Mr. Bricker influenced Ted perhaps more than even Mr. Bricker realized for he has certainly become an enthusiastic salesman. He ranked highest of the salesmen in total sales for the months of June and July. Ted spent a couple of years at the Harvard School of Business Administration after graduating from Maine.

Helen and Al Dells (nee Helen Beasley) came up that same evening and we did have a good time. Ted took the Prism and looked through the entire class roll and gave me some bits of news, now and

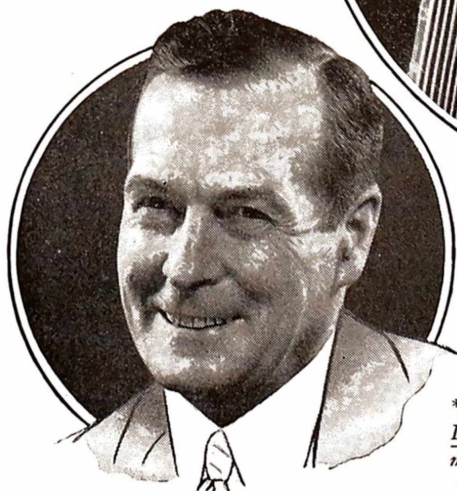

Mother, Father, Sister, Brother,
all have their own reasons for preferring
THE NEW 1937 CHEVROLET
The Complete Car—Completely New

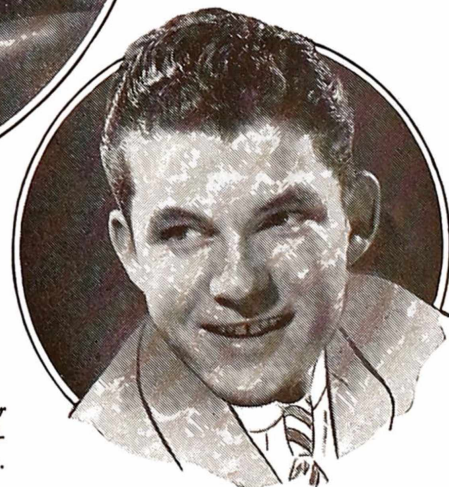

"It's much more comfortable . . . I just wouldn't be without Chevrolet's Knee-Action Gliding Ride* . . . and Genuine Fisher No Draft Ventilation."

"All my friends compliment me on its Diamond Crown Speedline Styling. They say it's the smartest car on the street. And it's such a comfort to have Safety Plate Glass All Around."

"I'm all for its High-Compression Valve-in-Head Engine . . . Saves me a lot of money on gas and oil . . . And the whole family feels a lot safer in its new All-Silent, All-Steel Body with Solid Steel Turret Top and Unisteel Construction."

"I like its greater pep and power . . . and its Shockproof Steering* . . . And boy, those Perfected Hydraulic Brakes of Chevrolet's are certainly 'tops' for stops!"

FOR ECONOMICAL TRANSPORTATION

CHEVROLET MOTOR DIVISION
General Motors Sales Corporation
DETROIT, MICHIGAN

*Knee-Action and Shockproof Steering on Master De Luxe models only. General Motors Installment Plan—monthly payments to suit your purse.

then, of different ones. Joe Senute '32 is with a printing firm at Hyde Park, Boston, Mass. Peg Lovely is home demonstration agent in Amherst, Mass. Clarence Berry is bank cashier at the Katahdin Trust Co. in Island Falls. Don Coggin was doing graduate work at the Harvard School of Engineering and I don't know whether or not he has completed his course. George Solomon is a student at Harvard Law School. Bob Feeley graduated from the Boston University Medical School last June. Jean Kennedy is living at home in East Boston and "it is said" that she is seen frequently with "Emmie" Beers. Hope this is correct, Jean. James Kidder is with the Studebaker Co. in Flint, Michigan, as an engineer. Tyler Whitmore graduated from Harvard School of Business Administration and is now associated with H. P. Hood & Son in Boston. I guess that this ends Ted's contribution.

Dr. Kenneth E. Smith is an interne at the Maine General Hospital in Portland and is living at 51 Read St. in that city.

"Jo" Stoddard is assistant in mechanical engineering at M. I. T., Cambridge.

Dussilla Roderick is in her second year as teacher of Home Economics at Greenville High School, Greenville.

Alton Alley is employed by the U. S. Army Engineers as Junior Engineering Aide in Springfield, Mass. His residence is 310 Park St., West Springfield.

Leif Sorncuson certainly believes in "going West Young Man" for now we find him at 509-2nd Ave., So. Minneapolis, Minn. Leif is an adjuster with the Liberty Mutual Ins. Co.

Ethne Worcester—now Mrs. Farnham—is living at 38 Congress St., Belfast, and gives her occupation as that of housewife. It's fun, isn't it, Ethne?

Helen Gilman is teaching English at the Port Chester High School, Port Chester, N. Y.

Johnnie Bankus is a 2nd Lieut. in the 5th Infantry, located at Fort McKinley, Portland Harbor. Johnnie resigned from the CCC to accept a year's duty with the regular troops. In his wandering, he says that he has seen Tom Desmond in Newark, N. J., and Bob Ingraham in Stoughton, Mass. In answer to your question about Gerald Duplisea, Johnnie—I believe he was killed in an accident at a grade crossing.

Received a letter from Dixie this last week and she is teaching at M. C. I. in Pittsfield, though very much devoted to a certain boy—Roger Heffer, whose ring she is wearing. Roger has been employed by the Kellogg Co. but may possibly be employed in Hartford soon, or Boston. Hope that it may be Hartford, for then I might see Dixie. You know, Dixie, that Hartford is only 40 miles from Norwich.

Only one thing more—does anyone know the whereabouts of Bert Follett? In looking in the *Prism* I noticed that his home address is given as Norwichtown and since this is very close to Norwich, have wondered if his family lives here still. His family is not listed in the directory.

As another year approaches, Tom and I are wishing you all the best of luck, health, wealth and happiness. Wish us in return just two—luck and wealth—for we are amply supplied with the other two. May we hear from you or see you anytime at 275 Broadway, Norwich, Conn.

Next Reunion, June, 1938

Uncle Sam and Santa Claus must have

got their signals crossed, for the 1934 personals have not reached the office. Sorry. More to look forward to next month. Happy New Year—Editors

1935

Next Reunion, June, 1938

Greetings, Everyone

How did Santa treat you all? I'm sure it was just as you wanted, if not, we'll send a delegation of '35ers to him to demand an explanation. But all joking aside, I do hope this new year will bring you all what you want most.

You know the adage, "In like a lion and out like a lamb"—well, our notes are going to reverse the order as you will all see from this issue, but it all depends on you!

So Ken Black has gone and done it! Ken was married on October 19th to Marge Murch. As you know Marge was at Maine while we were there and Ken is now connected with the General Motors Acceptance Corp. in Portland. Our most sincere congratulations, Ken.

On November 1st John Small was married in Orono to Genesta Soule, of Smyrna Mills. John is a member of the Ashland High School faculty and the Mr. and Mrs. are now living in Ashland. I know I can say for all the '35ers, very best wishes.

How our members are increasing! On October 19th Mr. and Mrs. Paige Rand announced the arrival of Gard Paige. Rand and Paige Sr. must want to display his paternal tact—so soon—because he has very kindly invited any one of us to stop in and see him in Augusta. 'Roudy' is with the Augusta Lumber Co.

The engagement of Hugh Ryan was announced in Stamford, Conn., to Miss Roseann Tompkins, of Bangor. Miss Tompkins is a graduate of Gilman Commercial School and has been employed by the Bangor Gas and Light Co. as credit manager. Hugh is teaching math and science in the Burdick Junior High School in Stamford. Congratulations, Hugh!

Bobby Lane has changed his address from So. Portland to Cape Cottage. Me I didn't hear though Bobby, what you are doing, so fess up.

And Carl Whitman is now field service representative of the Travelers Ins. Co. at 175 W. Jackson Blvd. at Chicago, Ill. 'Lolly' Anderson is secretary to the principal of Westbrook High School and is living in Cumberland Mills. Jim Conway is employed as Electrical Equipment District Manager for the G. E. Co. and is living in Bridgeport, Conn.

Don Murphy is teaching Senior Sociology and Economics in the Berlin High School. Don put it very modestly that he was getting along nicely because the students furnished a good audience—and you know how Don likes to talk!

Well, I'm "Off with the Wind" (apologies to Margaret Mitchell) until next month, and I hope I'll hear from you all meanwhile.

Next Reunion, June, 1938

Hello, Everybody

Christmas snuck up on me before I realized it but I can wish for a happy and prosperous New Year for you all anyway! I trust you all had fun and got loads of nice things for Christmas.

This seems to be getting a habit, but a nice one, to start the column off with news of a marriage. Ginny Palmer and Ken Parsons '34 were married this month.

They have built a home in Old Town. I'm expecting an invitation to look it over, Ginny!

Porter Hennings announced his marriage to Solveig Heistad which took place April 22. No fair trying to put things over on us!

Don't go way, folks—there's still another. Burt Mullen took the big step in June. His wife is Mary Smith, of Orono. They are making their home in Boothbay Harbor where Burt is working on the Boothbay Register.

Bet you thought that was all, but no! Bill Hinckley "middle aisled" it in November with Gertrude Ede, of Bluehill, and Alice Coffin was married November 22 to Kenneth McFarland, of Bar Harbor. Best wishes to each and every one of you!

Myron (Porky) Collette has done the next best and become engaged to Alice Cotter, of Orono. You may know Alice as she is connected with the University as secretary to "Wally." Congratulations to you too, Porky.

New England Tel. and Tel. is fortunate in having at least one member of the class of '36 with them. Adrian Downey is the one and is located in Arlington, Mass.

Charlotte Fuller is working at the State House in the Bureau of Taxation. Do you still make signs to hang up on the walls or was it only exam time that affected you that way, Charlotte?

Another Arlington, only this time it's New Jersey, where Dick Lunt is employed by the Du Pont Co. He is in the Chemical Control Plastics Dept.

Phil Snow announces a change of address to 33 Revere St., Beacon Hill, Boston. He didn't say whether that meant a change of occupation or not. Maybe after reading this you'll let me know, Phil.

George Northrup is with Co. 2363 Soil Conservation Camp at Berea, Va.

Max Fitch has accepted a position in the advertising department of the Ronald Press Co., New York City. His address is Sloane House, 356 W. 34th St.

Robert W. Simpson is in the Quality Control Dept. of the Dunlap Tire and Rubber Corp. at Buffalo, N. Y. His residence is 263 Brickenridge St., of that city.

We've had lots of teachers from our class but '36's first principal is Ralph Foster who is principal of Madawaska High School, Madawaska, Maine.

Robert L. Clunie is a student at Temple University Dental College, Philadelphia, Pa.

Heish O'Connell is in the employ of the Great Northern Paper Co. in the Bureau of Economy located at Millinocket. Those long hours of struggling in the libe are proving to have been worth while haven't they, Heish?

Beulah Beal is teaching in the West Springfield School, Jacksonville, Florida.

And that, my friends, is the end of the news for this month, and why? Because I still have no letters. Can't you please start the New Year right and help me to make this the best column ever?

Northeast Harbor, Maine

According to a recent press announcement by WPA officials road and beautification projects calling for \$42,000 and the employment of 105 men is under consideration. If approved the work is scheduled to begin at or shortly after New Year's.

A Happy New Year

for

Kathryn

*Dear Warner: You can toss away
the memorandum of that other
phone number now as we have
one of our own! And if you
don't think I feel swell about
it, you're not the smart brother
I think you are. I get a
kick every time I pass that
telephone in the living room.*

Kathryn

The number is Exchange 2371.

THAT's a real letter—written by a real Kathryn—to her brother. You can read her happiness in every line. She's mighty glad to have the telephone back.

And so are a great many other men and women these days. About 850,000 new telephones have been installed in the past year.

That means more than just having a telephone within reach. It means keeping the family circle unbroken—contacts with people—gaiety, solace, friendship. It means greater comfort, security; quick aid in emergency.

Whether it be the grand house on the hill or the cottage in the valley, there's more happiness for everybody when there's a telephone in the home.

The Bell System employs more men and women than any other business organization in the United States. The total is now close to 300,000. Good business for the telephone company is a sign of good business throughout the country.
