View at digging time on farm of Winfield Bagley, Caribou, Maine

GROWN ON SUMMERS SPECIAL POTATO FERTILIZERS

Pride of accomplishment! Satisfaction at digging time! Call their facial expressions what you will—here are growers of potatoes that are POTATOES! Produced by an expert. Soil and farm conditions ideal. In short, depicted herewith is an example of Aroostook at its best.

We, ourselves, take pride in reproducing this picture. Selected from scores of others, we feel it best portrays—in language more forceful than words—what experienced farmers achieve when they USE SUMMERS FERTILIZERS.

SUMMERS is a balanced plant-food ration. In modern plants, from a wide variety of the purest ingredients, we produce—in the words of this expert grower—"Fertilizer that is a FERTILIZER."

Quality Fertilizer is your cheapest crop insurance.

Thanks to Youth

She is young—vibrant with energy—radiant with health—throbbing with vitality.

She seeks expression for the fullness of her charms. She radiates the glorious adventure of life!

Where would we be without her? Her influence keeps us up and coming. She allures us to new horizons.

Her intolerance of the commonplace, her shunning of the mediocre, and her seeking for the new and swank things of life, keep us young.

She deserves a Cord! Its distinctive design, its inherent safety, its difference from ordinary cars, and its amazingly smooth, fleet performance, are a fit setting for her—and for those who think in her terms.

Auburn Automobile Company, Connersville, Indiana

PLAY SAFE!

NO OTHER TIRE GIVES YOU GOLDEN PLY BLOW-OUT PROTECTION

Driver: "It was a blow-out! I couldn't steer—I couldn't stop!"

Policeman: "There ought to be a law against gambling on tires."

* * *

If you could see a blow-out in the making—if you could only realize the damage to limb, life and car that one blow-out might cause, you'd never take chances—you'd start right in to ride on Goodrich Silvertowns.

Amazing New Invention

Why? Because Silvertowns have something that no other tire in the world has—the Life-Saver Golden Ply—a special, scientific invention developed by Goodrich engineers to meet today's hectic driving conditions.

By resisting the heat generated inside the tire by today's breakneck speeds the Life-Saver Golden Ply keeps rubber from losing its grip on the tread—

it keeps dangerous heat blisters from forming. Thus, the dangerous high-speed blow-out that might have caused serious trouble never gets a start.

Remember these two facts:

1. Only Goodrich Silvertowns are built with the Golden Ply to protect you against these high-speed blow-outs.
2. Silvertowns have a "road drying" tread that acts like the windshield wiper on your car and makes you extra safe on wet, slippery roads.

If you're looking for tires that will give you months of extra mileage and greater riding comfort, then Silvertowns with their huskier shoulders are the tires for your motoring dollars.

Equip your car with the safest, toughest, longest-lasting tire that money can buy. See your Goodrich dealer about a set of Goodrich Safety Silvertowns. Remember they cost not a penny more than other standard tires!

HEAT CAUSES BLOW-OUTS.
PREVENT THOSE
BLOW-OUTS WITH THIS
HEAT-RESISTING
GOLDEN PLY

FREE! Prove that you want to prevent accidents. Go to your Goodrich dealer. Join the Silvertown Safety League. Sign the Goodrich Safe Driving Pledge. As a mark of distinction your Goodrich dealer will get for you absolutely free a Safety Emblem with red crystal reflector to protect you if your tail light goes out.

Goodrich SAFETY Silvertown

With Life-Saver Golden Ply Blow-Out Protection

TODAY A RICHER LIFE BEGINS

in Kelvin Home

IT was almost unbelievable one short year ago—this home with luxuries such as only the man of large means could hope for. And yet today it has become a reality for the family of modest income—for millions.

This is Kelvin Home. Within its walls the air is always clean, fresh, invigorating—properly humidified—for Kelvin Home is completely air conditioned. It is warm in winter, pleasantly cool in summer. An amazing new electric or gas range makes cooking almost magical. Water is heated automatically, and washing and ironing are done electrically. Modern refrigeration is provided by the new plus-powered Kelvinator. And this home, designed and constructed by your own architect and builder, can be built complete for less than \$7,500.

Kelvin Home was created by Kelvinator Corporation as a demonstration of the progress that has been made by science and invention to provide luxurious living to people of modest means.

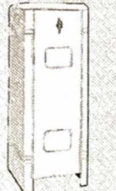

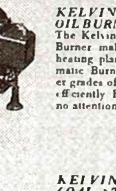

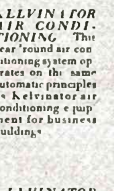

Kelvin Homes have been built in many sections of the country. They have cost no more than an ordinary six-room house. Happy families are living in them today. They are finding that, with all these luxuries, the cost of living in such a home is no greater than that in the ordinary house.

Each of the appliances of Kelvin Home contributes its rich part to the new and better way of living. Each can be purchased separately, to give

its automatic service with savings that make these luxuries real economies in any home.

A FREE booklet completely describing Kelvin Home, showing exteriors, floor plans, and equipment, may be secured without cost at the Kelvinator Department of leading department stores, furniture stores, utility companies, specialty dealers—wherever Kelvinator products are sold.

Assistant Secretary—Philip J. Brockway, 1931, Orono

Hosea B. Buck

With the death of Hosea Buck, the University has lost one of its most ardent and tireless workers. His record of devotion to the University extending over three decades is most impressive.

For many years he served as a member and chairman of the Athletic Board; he had been a member of the Alumni Council since its organization in 1920; he was a prime mover in organizing the University Store Company; he was one of the men who organized and financed the Grandstand Corporation; he commemorated the name of "Bill Parker" by establishing a scholarship in his honor; he had been one of the pillars of his fraternity and he was serving his sixth term as alumni representative on the Board of Trustees.

All these activities do not fully reflect his interest in his University of which he was so proud and for which he has done so much. How many students he has helped individually will never be known. Very many graduates and former students have a debt of gratitude which they could not repay, nor which he ever wanted repaid. These things he did quietly, happily and without thought of credit or ostentation.

He was not one to recount what he had done for the University or for others. His satisfaction was in the joy of doing. While always ready to answer a call which he felt was for the best interest of the University, he never tried to force his opinions upon others. His counsel was constantly sought on University affairs. He was able, he was constructive, he was generous, and gave of his time, his ability and his means without stint to the University which became one of the major interests of his life.

"Hosea" has answered the last call, but his spirit and name have become so much a part of the University that they are bound to live on for countless years.

Hart Scholarship Fund

Alumni, present and former faculty associates, trustees and friends, are invited to join in creating a scholarship fund in

honor of Dean James N. Hart who has just completed fifty years as a member of the teaching faculty of the University.

While this fund is to be used for scholarship purposes, it is in fact, first and foremost a tribute to our esteemed fellow alumnus and teacher. The committee which has been appointed to raise the fund naturally hopes and expects to reach the goal of \$5,000, but it hopes even more to have hundreds and hundreds of contributors who will take this method of expressing their appreciation to Dean Hart for a lifetime of truly unselfish service.

In making our gifts to this Fund, we will then first be honoring the "Dean" and second, we will be of real assistance to students without number as the years pass. So when the call comes to you, as it will in a few days, respond as generously as your situation will permit. While the names of donors will appear in the "Book of Tribute" to be presented to the "Dean," amounts will be nowhere mentioned. While the amount counts, 'tis the spirit that counts more.

❖ ❖
Oak Hall

Out of the ashes of the old Oak Hall has risen a fine, new boys' residence hall of the same name. This structure is a real credit to the University, vastly improving the housing situation on the campus.

In this hall one finds many small things which mark the difference between just an ordinary dormitory and an atmosphere of a place of residence. There is no trace of the least extravagance, but the design and equipment furnish evidence of thoughtful planning. Simplicity, convenience, comfort, low upkeep cost and absolute safety against fire characterize the building.

The layout providing for two students to a study room, rather than four as in Hannibal Hamlin, is a feature which may save many a boy from academic shipwreck. And all this has been accomplished at an expense of but a few thousand dollars more than it would have cost to reconstruct the old Oak Hall.

Then, too, there will be general approval of the Trustee action in giving this hall the same name as its predecessor. That name has come to mean much to countless hundreds of our alumni. "Brick Hall" was the original name of the old structure. It is said that some, maybe most or all of the brick used in constructing it was manufactured from clay found right on the campus. If this be true, then the new Oak Hall contains some of the old campus bricks, for thousands of the brick salvaged from the former structure were used in this new building.

University officials are to be highly commended for the improvement which this Hall makes to our physical plant. Maybe, too, with this addition, will come a new sense of responsibility by the students to help keep this hall attractive and therefore more enjoyable.

Alumni who return to the campus at Commencement or earlier will surely desire to look into this Oak Hall.

"How Smart Is a College Graduate?"

The Alumnus is co-operating in this issue with its national advertising representatives, The Graduate Group. An interesting general questionnaire on page II is part of their program for increasing the advertising income of *The Alumnus* as is the coupon on pages 21 and 22. Any co-operation which the alumni find it possible to give to this program will assist *The Alumnus*.

Through These Doors

Front Cover: Main entrance to Colvin Hall, dormitory for women students. Constructed in 1930, this dormitory is the most modern residence for women on the campus. It was named in honor of Dean Caroline Colvin, who served the University for years in the history department, being the first woman on the University faculty and later becoming the first Dean of Women.

Trees, Education, Road Materials

Native Trees and Shrubs, A Survey of Higher Education in Maine, The Structural Geology of Maine, A Mental Hygiene Study of Maine, A Study of Road Materials in Maine. These are the titles of some of the interesting and valuable studies which have been made possible by the Coe Fund.

This fund of \$100,000 was bequeathed to the University by Dr. Thomas U. Coe, of Bangor, who stipulated that the income could be used for such purpose or purposes as the University officials should deem best. Desiring to encourage research by faculty members, the Board of Trustees voted that the income from the Coe Fund be used for research. Special consideration has been given to subjects relating to the State of Maine.

Although the University has had the fund less than ten years, the total income of nearly \$40,000 has made possible thirty studies in education, art, history, science, and in other fields. Many of these projects have dealt with state-wide problems and have therefore been of value to the State as well as to the University. There are scores of studies and investigations which members of the University faculty might well undertake if funds were available.

The University would like to encourage more research on a modest scale because of its value to faculty members and to the State. The President of the University would welcome an invitation from any alumnus or friend to discuss the possibility of a gift or a bequest for this purpose.

New Oak Hall Completed

OAK HALL, the new men's dormitory, constructed on the site of the historic building of the same name destroyed by fire in 1936, has been completed and is now being occupied by students who have long anticipated this event. From the brown glazed tile basement to the sound proofed maple furnished fourth floor, the building is a beautiful, efficient, and permanent specimen of modern architecture, yet in no way lavish or extravagant.

Although constructed primarily for use, and as all college students admit, hard use, the building nevertheless achieves beauty. Externally, with its red brick construction and granite facings, it adds conspicuously to the campus scene. Within, the most modern methods of finish on floors, walls, ceilings, combined with excellent furniture and the latest conveniences, provide a splendid harmony.

The new building is designed to house a total of 96 students in its three sections and four floors. On each floor, four suites to a section accommodate two students each providing them with a bedroom, study room and separate closets.

The outside dimensions are 168 feet in length by 28 feet in depth. The location is well chosen to include the old site of Oak Hall but with the new building facing south toward Wingate. By a corridor from the basement the new hall connects with the dining room in Hannibal Hamlin Hall in the same way as the former Oak Hall. The slate roof, three square projecting entrances with green and tan color scheme at the doorways, small iron balconies and simple brick trim gives a quiet, yet attractive external appearance.

Interior Arrangements

The 60 students who are already occupying the newly finished dormitory find themselves pleasantly housed in quiet rooms, in which old ideas of dormitory

equipment and furnishings have been replaced by more modern, attractive, and useful equipment. Upon entering the front door, the visitor finds himself, first of all, in the vestibule of the all-steel stairwell. Here, the floors are finished in terrazzo and a completely fireproofed section with steel stairs leads up to the first floor. Four suites of two rooms each constitute each one of the three separate sections on a floor, and are arranged so as to open on the main corridor. The rooms are completely soundproofed with acoustical ceiling tiles of insulating material and gypsum block partitions in all walls overlaid with plaster and finished with canvas, painted cream. Over the concrete floors, green linoleum has been laid in every room. Each study room, 10 feet by 12 feet, has two windows providing well-lighted quarters for the students. Two separate closets with hooks and chrome hanging rods provide ample closet facilities.

Each room is furnished with modern maple furniture, consisting of two desks and desk chairs, a chest of drawers with hanging mirror, and a large easy chair. Light is provided from an overhead fixture with two bulbs totaling 100 watts, housed in a frosted, flat, circular globe with chrome finished holder and trimming. In addition, two double wall plugs provide additional electric connections.

The second room of the suite, the bedroom, has in place of the old "two-decker" bunks formerly in use in the dormitory, two separate steel cots, as well as a small lamp table. Each bedroom has one window and also a ventilator connection into the main hall. Room arrangements in each section on each floor will be uniform with the exception that the center section will contain smoking and lounging rooms and a conference room.

A detailed floor plan will be found on pages 12 and 13 of this issue.

Additional fireproofing is attained by having each section of the building a completely separate unit except for a connecting corridor in the basement. By this corridor students also enter the dining room in Hannibal Hamlin Hall where all dormitory residents will eat. On each floor of each section a large lavatory room is centrally located containing showers and washing facilities. These bathrooms are finished with glazed tile in a tan color scheme. A particularly desirable feature of the new building is a chute in each bathroom connecting with an incinerator in the basement, through which waste paper and other materials may be discarded from each floor and each section to eliminate the possible accumulation of inflammable material. A drinking fountain also is installed on each floor of each section.

Many Conveniences

In the basement, every available bit of space is used. In the west end beside the corridor to Hannibal Hamlin Hall is a large recreation room fitted out with radio and other furnishings for lounging, smoking, and games. Each section has a trunk room with racks for storing trunks and baggage in such a way as to make all of them accessible. A small but complete laundry is provided also for each section, consisting of set tubs, and three folding ironing boards with electrical connections nearby. In the basement also are janitor's rooms, storage space, and particularly, three 200-gallon hot water tanks to supply the occupants continually with ample hot water.

The heating arrangement of the building is automatically controlled throughout, with a separate radiator in each room. The entire building is constructed of fireproof materials with the exception of doors and window frames of wood. Metal baseboards, steel door frames, and

Exterior View of Completed Building

Dean Hart Scholarship to be Established

As an appropriate tribute to Dean James N. Hart '85, who this year completed a period of fifty years in the service of the University, the Alumni Council has voted to raise a Scholarship Fund which will perpetuate the name of Dean Hart to future generations of Maine students. A goal of \$5,000 has been set, with the hope that it may be exceeded through the interest and affection of alumni and former associates.

Dean Hart's long, impressive, and devoted service to Maine as teacher and administrative officer is practically a unique record, not only at Maine but in the entire educational world. Starting his career in 1887 as an instructor in mathematics and drawing, two years after his graduation from the University, he has through the years advanced to Head of the Department of Mathematics and Astronomy, Chairman of the Committee on Admissions, Dean of the University, and Director of Admissions. He has never failed to answer any call made upon his time and energy. He has been conspicuously active in the work of the Alumni Association, serving for years as Secretary of his class, and is at present Secretary of the Senior-Alumni group. As a continual and active supporter of the religious work of the University, as well as by his friendly, sympathetic, and understanding attitude with students, he has always been a powerful influence on student ideals. Twice the University has honored him with honorary degrees, one the Sc.D. and the other the Ph.D.

His work as Dean and Director of Admissions necessarily brought him in contact with several hundred students annually, and as these have passed through and graduated from the University year after year, Dean Hart has become more and more of an affectionate symbol in their minds.

This year, therefore, looking forward to the completion of his 50 years of service, the Alumni Council voted to consider plans for perpetuating his name in a scholarship fund. A committee has been appointed for this purpose with Fred D. Knight '09, of Boston, as chairman, and plans are under way at the present time to raise funds for this scholarship to bear the Deans' name from his innumerable friends among the alumni and former faculty associates. The committee is composed of the following members: Fred D. Knight '09, Boston, Chairman; Dana S. Williams '00L, Lewiston; Robert R. Drummond '05, Orono; Walter H. Burke '06, New York; Everett P. Ingalls '15, Portland; Harry Butler '20, Bangor; Myron E. Watson '22, Boston; James A. Gannett '08, Orono, Treasurer. Ex-officio members are President Arthur A.

Hauck and George S. Williams '05, president of the General Alumni Association. The committee believes that many hundreds of former students and associates of Dean Hart will desire to be represented, even in a small way, in this commemoration of one who has given fully and deeply of his ability and energy during fifty years.

Plans for the fund include printing of a special book of tribute to be presented to Dean Hart this commencement. This book will contain the signature of every contributor to the scholarship fund, and will be presented to the Dean as a token of the respect, affection, and esteem of the contributors. A goal of \$5,000 was set by the Alumni Council for this fund with the hope that the interest it arouses will surpass this amount. The spirit of these gifts will be a personal desire to honor and pay tribute to Dean Hart, and to perpetuate the name of one whose life and services have for so many years been an integral part of the University's being.

FRED D. KNIGHT, '09
Vice President of General Alumni Association and Chairman of Committee to Raise Dean Hart Scholarship

The Student Senate took action in a meeting held on January 26 to create a Thanksgiving recess to extend from Wednesday of the Thanksgiving week through to the following Monday morning. The Senate also voted in return for the granting of this extended holiday to sanction the holding of classes on May 30, Memorial Day, and the advancement of the spring vacation to Saturday noon. This legislation will go before the board of administration.

Cole Marine Library Given to University

In accordance with the request of Clinton L. Cole '00 previous to his death in July, 1936, the University Library has received about 600 volumes on marine subjects collected by Mr. Cole during many years. This extensive collection includes a wide variety of books on subjects concerned with sailing vessels, marine life, navigation, yachting, sea travel, and almost every phase of marine information. Books old and new, rare and common, ranging from juvenile fiction through classical fiction, technical treatises, limited editions of historical research, and even a scrap book of mounted photographs prepared by the owner himself make up the "Clinton Cole Marine Library" as the collection is described in his book plates. The addition of this library is of particular interest in connection with the course in maritime history being offered by the University. The new collection nearly doubles the available material in this field. Several valuable items already in the library are duplicated and many others are added by its gift. The collection, furthermore, is quite up to date, containing publications of the year 1935.

The collection, which is to be kept intact in a special section of the library, is of unique interest in many ways. In addition to containing a number of old books now out of print or rare, it has also the merit of including a specimen of almost every type of information concerned with marine subjects. Mr. Cole's idea apparently was not to bring together an exhaustive collection of some limited phases of his subject, but rather to procure everything which came to his attention in any way relating to the sea. As a result, the collection is a delight to the book lover, inviting him as it does, to browse through its volumes with continually renewed interest, finding always something new and different.

Mr. Cole himself has been described as a proud and enthusiastic alumnus of Maine. He graduated in the class of 1900 with a degree in Civil Engineering. Following his graduation, he was employed at the University for three years as instructor in Civil Engineering and Mechanical Drawing. In 1903, he went to Hartford, Connecticut, to engage in engineering work, later establishing his own business as a consulting engineer, specializing in appraising and insurance evaluation in which business he achieved a leading position in the state.

During his residence in Hartford, he was always interested and active in University and alumni affairs. The gift of his marine library is in agreement with a wish expressed by him often before his death.

Hosea Buck '93 Dies Suddenly

NEWs of the sudden death of Hosea B. Buck, class of 1893, of Bangor, on the evening of February 22, will come as a personal shock to hundreds of his alumni friends. Long known as one of the most active and enthusiastic friends of the University, the value and influence of Mr. Buck's services through his connection with the Board of Trustees, his active participation in alumni affairs, and his leadership in many plans of the association can scarcely be estimated. Not only will his death be a great and irretrievable loss to the University and his fellow alumni but to undergraduates as well whom he has time and again assisted anonymously and silently with money, summer work, and in other ways. His passing will be that of a friend.

Mr. Buck graduated from the University in 1893 with a degree in Civil Engineering. During his undergraduate days, he was a member of Phi Gamma Delta fraternity and active in this group. Following his graduation he began work almost at once in the timberland business, being connected with the office of Coe and Pingree, timberland owners. He became manager of timberlands for the David Pingree estate and was still connected with that work at the time of his death. This work brought him in contact with a wide variety of problems and people; his good nature and his business ability alike created a larger and larger circle of friends and acquaintances. He has been active in social and civic affairs in Bangor, for three years being a member of the City Council, and a member of the Bangor Water Board for 10 years.

Active Alumnus

Throughout his entire life Mr. Buck has been closely identified with the interests, the progress, and the well-being of the University of Maine. His first contacts with the University affairs following his graduation were through his enthusiasm for athletics, an interest which remained with him throughout his life. Because of this enthusiasm he was, in 1909, elected one of the three alumni members of the athletic board by the General Alumni Association. He served on this board for 10 years, from 1909 until 1919, being four times elected chairman of the board.

He is perhaps best known by his fellow alumni for his work as alumni representative on the Board of Trustees of the University. He became one of the trustees in 1921 and has held this position through reelection ever since that time. To this work he brought a broad business experience and a sympathetic understanding of the University's problems. He has been

Hosea Ballou Buck

1871-1937

Active Alumnus, Trustee, and
Friend of Maine

credited with presenting to the board the alumni point of view so forcefully and yet so tactfully as to bring about a most desirable co-operation between the trustees and alumni. During his service on the board he has been a member of a number of the Trustees' committees, such as the Executive, Honorary Degrees, Campus Planning and Conference. For a number of years he was chairman of the Executive Committee.

In the work of arousing interest and stimulating contributions for the construction of the Alumni Memorial Gymnasium, Mr. Buck was particularly active. He was a member of the Memorial Fund Committee and Memorial Building Committee.

His building activities, however, go back much farther than this, as he is credited with being one of the active leaders in soliciting funds which made possible the building of Alumni Hall.

In a great many other ways he has placed his name firmly in the annals of the University. He was one of the prime movers in the organization of the University Store Company and served as director of that organization from the beginning in 1911 to 1924. He was one of the original members of the Grandstand Corporation, concerned with building the present structure on the athletic field. He established the William Emery Park-

er scholarship of \$1,000 in memory of W. E. Parker, class of 1912, awarded annually to a sophomore or junior student.

Recipient of Service Emblem

It was most fitting and appropriate that the alumni service emblem should be awarded to Mr. Buck in 1932, the second time that this was awarded in the history of the University. In recognition of his services to the Alumni Association and to the University, this Pine Tree "M" was presented to Mr. Buck at the first Homecoming Luncheon ever held at the University. His choice for receiving this award was approved in no uncertain manner by the hundreds of alumni present. It has been said that few of the honors that have come to Mr. Buck during his life meant so much to him as did the receipt of this emblem in recognition of his tireless and unselfish service to Maine.

His fraternity, too, knew him as one devoted to the interests of the students and willing to demonstrate that devotion by continual, enthusiastic work.

Mr. Buck was born in 1871 in Stillwater and received his education in the Old Town schools previous to attending the University. At Maine he was prominent in undergraduate activities. His business career was a successful and distinguished one, his expert knowledge being recognized in the lumber business throughout Maine. His death was the result of heart disease, apparently aggravated by the loss of his wife who died in January. He leaves two daughters, both alumnae of Maine, Mary Catherine (Mrs. James Booker) '29 and Margaret Anna '31.

A mere summary of the positions held and services rendered by Hosea Buck over the period of 44 years since his graduation, although indicative of the place which the University held in his life, is by no means a sufficient appraisal of his total contribution to the institution. No one can accurately state the number of students to whom he has given aid of one sort or another, or the number of alumni who found in him a friend and helper. There is no one method which could accurately evaluate the usefulness and importance of such a man as Mr. Buck. His cheerful good nature and his keen insight into the problems of the University endeared him to his associates among the trustees and the alumni. His complete belief in the institution, its aims, ideals, and progress, has been an inspiration to those working for it. His sudden and unexpected death leaves not only in the life of the University, but in the hearts of alumni and students, a place which will long be unfilled.

Christian Associations Sponsor Many Activities

Alumni looking for the Maine Christian Association this year have discovered the old landmark at the end of the walk gone. Not only was the M.C.A. building moved to make room for the new Oak Hall, but it was temporarily pressed into service as a dormitory. The M.C.A., however, is still actively doing business, under Mr. Fielder and Miss Ring, in quarters generously provided in South Stevens, including offices for men and women and a rest room for off-campus women.

While it has been necessary to discontinue temporarily some of the activities of the old building, the most essential features have been continued. The vesper services have been conducted as usual throughout the fall and winter, considerable interest being shown in a series of addresses by faculty members on the general subject, "Values I See in Religion." Other speakers have been Professor Fred Eastman, of the Chicago Theological Seminary, and Mr. Moni Sen, of Delhi, India. Mr. Sen stayed two or three days for group discussions of religion. Another outside visitor will be Rev. Powell Davies, of Summit, New Jersey, who will soon speak at a week-day meeting under joint auspices.

The deputations, which have always been an appreciated service and which are again under the advisorship of Rev. Herman D. Berlew of the Orono Methodist Church, will establish a record for numbers, at least for many years. High praise has come to the University for the work of these groups.

In November five fraternities co-operated in welcoming an "embassy" of five ministers from various parts of New England, under a plan whereby one man remained for three days in each of the houses, making a brief talk and leading a discussion of practical problems of religion each evening. In some of the houses these discussions lasted for five hours on two nights, and they all lasted a considerable time, seeming to indicate that many of the members were getting what they wanted in the way they wanted.

At present there is going on a series of fraternity discussions of personal and social problems which will continue until late in the spring. Twelve members of the Administration and Faculty and Dr. Carl J. Hedin of the Bangor State Hospital are giving weekly talks and leading discussions on subjects for which they are especially qualified, such as "The College Man and Sex," "Alcohol and the Human System," "The Problems of Courtship and Marriage," and a variety of social and economic topics of vital importance. All the fraternities except one are co-operating.

ANDREW J. BECK, '13

The women also are having a series on "You and Your Boy Friend," led by Mrs. Lillian H. Brush of the Psychology Department. Their program for the spring also includes a series of teas, held in the homes of faculty members, at which there will be lectures on art and travel and musical recitals.

An excellent piece of social service is being done by the women through weekly meetings for underprivileged children and clubs for older girls, in Orono.

The women recently had a helpful visit from Miss Rose Terlin, of the National Staff of the Y.W.C.A., recently appointed to the staff of the World's Student Christian Federation, at Geneva, Switzerland.

A recent development of interest to many alumni is the formation of the Student Christian Movement in Maine, under which the normal schools and junior colleges have joined with the college Christian organizations in a program of state conferences and local meetings with strong outside speakers. Howard Goodwin, president of the Maine Christian Association, is the first president of this new organization, which is going forward energetically.

Former delegates to the Northfield and Maqua Conferences will be interested to know that this year for the first time the men and women will meet together, and that the conference will be held in Maine.

Mention should also be made of the large number of individual discussions of religion and allied subjects and the personal counselling, with both men and women, which this year have reached a new high.

This highspots most of the chief points of interest in this year's work of the M.C.A., which, in an inconspicuous way, is seeking to render a service both useful and lasting to the students at Maine.

Two Law School Alumni On Governor's Council

Two new members of Governor Barrows' Council, elected this year, are Andrew J. Beck '13, of Washburn, and Percy T. Clarke '12, of Ellsworth, both graduates from the Law School. Representing their respective sections on this executive body, these graduates add to the impressive list of Maine alumni who are sharing in the responsibilities of the state government.

The appointment of Andrew J. Beck, long recognized both within and outside of Maine for his interest and work in connection with problems of Aroostook County, follows a successful career in a variety of fields. Starting in his chosen fields of law in 1913 in Washburn, he followed this work until 1920. At that time he became president and director of the Washburn Trust Company. Four years later, in 1924, he added to his duties the responsibilities of the position of Manager of the American Fruit Growers, Inc. His career has been chiefly one of business and of public leadership. As Chairman of the Potato Committee of New England Shippers Advisory Board, President of the Aroostook County Council since its organization, President of Maine Potato Growers and Shippers Association, and Chairman of the Maine Committee on Agricultural Conservation, his name has become increasingly well known through his own section and through Maine. It has been said of him that he has developed an exceptionally sound popularity among the many who know him in Aroostook.

Although a native of Stonington, he has for years been completely identified with the problems and plans of Aroostook County, and now, as Councillor from the Seventh District, he will carry on his work. He is a member of several fraternal organizations, including the Rotary. He has one son, Fred, now a junior at Maine.

Alumnus Percy T. Clarke, of Ellsworth, likewise a graduate of the Law School, has elected to follow that profession closely. As Selectman and Superintendent of Schools for the town of Franklin and tax collector for Stonington, he began a career of public service which has brought him to the Governor's Council.

Successive steps in that career have included two terms in the House of Representatives from the Stonington District in 1921 and 1923, and a term in the Senate from Hancock County in 1925.

In the pursuit of his chosen profession he has risen to the position of County Attorney for Hancock County for three terms, 1931 to 1937. From there he has gone to the Governor's Council.

From Maine to South America

WHEN the twenty seniors of the class of 1887 of the Maine State College of Agriculture and the Mechanic Arts stood to receive their diplomas of graduation that year, probably none of them were much concerned with their fiftieth Commencement Reunion. Yet that reunion year has arrived, and this June alumni young and old will pay tribute to another fifty-year class, that of 1887.

It is of interest to all to know what the eleven living graduates of that class have been and have done since that great day in '87. Here are some of the facts.

Distribution

As might be expected of a class having ten Civil Engineering graduates out of the total twenty, many members are widely scattered, from California to South America the addresses range, the most distant of all being that of Luis V. P. Cilley, C.E., at Alsina 147, San Isidro, Argentina. Out of the eleven living graduates, the addresses of two have been lost

through the passing of fifty years—Fenton Merrill, C.E., who registered as a student from Orono and Charles F. Sturtevant, C.E., from Bowdoinham. Of the remaining nine, four are residents of Maine, three of Massachusetts, one of New Hampshire, and one of Los Angeles, California.

Mrs. Alice A. Black (Alice A. Hicks), of Portland, the one woman graduate of the class, after obtaining the degree of B.S. in Science and Literature with a major in chemistry, has resided for forty-seven years in Portland. As officer and active worker in numerous church, civic, and social groups, she has always taken a prominent part in the life of Portland. In 1889 she married George F. Black of the class of 1886, who was employed by the Maine Central Railroad two weeks after his graduation and was still in the employ of the railroad at the time of his death in 1928. Mrs. Black's interests have included such diverse fields as nature study, literary societies, and the Maine Historical Society.

As a surveyor and assistant engineer for the Northern Pacific and other railroads, Irving M. Clark, one of the civil engineers of the class, has seen much of the growth of the far west. After working for the railroads and for the city of Seattle and the Niles and Lenfest Company of Snohomish, Washington, from 1888 to 1893, Mr. Clark returned to New England as assistant engineer in the City Engineer's office of Medford, Mass., from which position in 1896 he went to New

York City as assistant engineer in the Topographical Bureau for nine years. From 1905 to his retirement in 1930 he was a land surveyor in Bethel, Maine. He lives now in Rockport, Massachusetts.

Edwin V. Coffin, also a graduate in civil engineering, now lives in Harrington, Maine, where he has been a merchant for many years. David W. Colby, of Lexington, Mass., who majored in chemistry, is now retired. He was employed for years by the William M. Bailey Company of Boston and was a resident of Malden.

Charles A. Mason, a civil engineer, was formerly employed in Tucson, Arizona, but has now also retired and lives at Durham, New Hampshire.

James M. Nowland, another of the civil engineering graduates, was for years identified with the teaching profession in Massachusetts. He served as principal of a school in Irving, Mass., for nineteen years, taking up this work a few years

non-inflammable, soundproof ceiling and wall materials make the building among the most modern, comfortable, and yet practical that could be constructed.

Like the earlier building destroyed last year, the new dormitory will bear the name Oak Hall in recognition of the Honorable Lyndon Oak.

The new Oak Hall is most worthy to bear the name of one of the unforgettable landmarks of the campus. Dignified, beautiful, complete, but in no sense lavish, it should go far toward solving part of the housing problems of the University. Designed by Crowell and Lancaster, Bangor architects, and built under the direction of J. Albert Ross, superintendent of buildings and grounds, the new hall has been constructed as far as possible of native Maine materials, which include the cement, plaster, lime, brick, granite, slate, concrete, and steel. A number of the firms supplying materials will be found listed on pages 12 and 13 of this issue and a complete plan of the first floor also will be found on these pages.

Alumni will find the new Oak Hall of interest to them and a source of pride in the University. As for the students, they have already given the new hall a nickname. They call it "Buckingham Palace."

Insignia Contest

The Athletic Board has recently voted to award three prizes of ten dollars each to the graduate or undergraduate who prepares and submits insignia which is considered worthy of adoption for football men winning their Junior Varsity letter, for cheer leaders, and for Band members winning recognition, if such insignia is accepted by the Athletic Board. Alumni are eligible to compete for the prizes.

Following are the rules governing the contest:

1 JUNIOR VARSITY INSIGNIA.
This insignia involves the utilization of the official major M (block M, 5" in height, 6" in width, with stems of letter $\frac{7}{8}$ " wide), and the letters J and V. The J and V letters may not be more than $\frac{1}{2}$ the height of the major letter.

2 CHEER LEADER INSIGNIA.
The only condition is that a block M be utilized in the design. The M shall not be larger than $\frac{2}{3}$ of the size of the official major M.

3 BAND MEMBER INSIGNIA.
The only condition is that a block M be utilized in the design. The M shall not be larger than $\frac{2}{3}$ of the size of the official major M.

All designs must be submitted to the Faculty Manager of Athletics, T. S. Curtis, not later than noon April 6th.

ATHLETICS

Varsity Basketball

Maine 50—New Hampshire 40

Maine's sharp-shooting basketball men served ample warning to Connecticut State and Rhode Island February 13 when they submerged a capable New Hampshire Wildcat five, 50-40, before 2,000 yelling spectators in Memorial Gymnasium.

For one half both teams battled on even terms with the Bears, having a 23-18 margin at the intermission period. However, it was a furious last-half drive that gave the Black Bears the ball game. Held in check during the first part of the contest by a rugged Wildcat defense, Bar Harbor's "Bill" Webber, portly center, and blond Elmer Lord, a fast dribbling guard, broke loose the second half to run wild through the Granite State forces.

Maine 44—Connecticut 41

The Varsity-Conn. Aggies game was a thriller all the way. The 2,000 fans were kept in a state of frenzy until the gun barked the close of the game with Maine ahead 44-41.

Maine, off to a fast start, saw its lead erased by a rally late in the first half when Janiga of Connecticut State scored several baskets to put his team in the lead 24-23.

With less than five minutes to play of the game Connecticut State was leading 41-35. At this time the Pale Blue men put on the pressure and with Lord and Webber in leading roles cut the margin to 41-38. Then co-captains Rogers and Webber put on a scoring act with less than two minutes to go. Webber scored two fouls and Rogers took a pass near the Aggie goal, and although closely covered, went into the air and punched home the goal that put Maine ahead. Again Webber deployed the Nutmeggers out of position, took a perfect pass from Lord, and dumped in the basket which ended the game.

Rhode Island 64—Maine 36

Unable for the second time to stem a lightning attack by the Rams basketball team, Maine went down to defeat 64 to 36 on February 22. The Rhode Island team, acknowledged one of the best in the country, put on a dazzling display of fast, long passes and accurate shooting which the Maine men were unable to check.

Although fighting back gamely and

forcing Coach Kearney of Rhode Island to rush his first team back on the floor when the Pale Blue shooters began to outshoot the second team in the last half, the home team could not overcome the lead of the visitors who averaged a point and a half per minute. Maine was trailing 48 to 17 at the end of the first half, but came back rapidly with Frankie Burke of Bangor leading the scoring and Webber of Bar Harbor and Lord of Camden following, to cut the lead of the visitors to 52-32. With the first team in again, however, the Maine men were simply outclassed by one of the cleverest teams in the game.

High scorers for Maine were Phil Rogers of Mars Hill, Franklin Burke of Bangor, and Dwight Lord of Camden.

Winter Sports

Confronted with the toughest opposition in years, the Curtis-coached Pale Blue snowmen placed fifth in the Dartmouth Winter Carnival held in Hanover February 5 and 6. Competing with such stellar aggregations as Dartmouth, Harvard, Yale, McGill, Montreal, and a crack team of Swiss picked from four colleges in Switzerland, the Black Bears deserved and earned a world of credit. If any star could be chosen from the well-balanced Maine crew, it would be Rod Elliott, the Canadian Comet, who scored fourth in the ski jump with a distance of 125 feet.

The cross country event, skied over a ten-mile course, once more found the Maine brothers, Phil and William Bower, of Auburn, placing well up in the finishers, with Charley Huntoon chasing them in, for number three spot for Maine.

Roddie Elliott, of Montreal, continued his outstanding ski performances when, before 15,000 people at the Caribou winter carnival on Feb. 20, he captured first place in the Class B ski jumping event. Elliott's teammate, Phil Bower, of Auburn, brought honors to the University when he captured first place in the ski slalom race. Elliott scored second in the same event.

Varsity Track

Competing in the Charles Rice trophy meet Saturday, Feb. 20, Johnny Gowell of Phi Kappa Sigma shattered the old broad jump mark when he jumped 23 feet, 2½ inches. Gowell also tied the 45-yard high hurdle record. Bill McCarthy, Kappa Sigma, set a new record in the high jump, by reaching the height of 6 feet 2½ inches.

Phi Kappa Sigma retained its title as a team by more than tripling the score of its nearest opponent, scoring 47½ points.

The intramural meet which was run along with the Charles Rice competition was won by Oak Hall with 30½ points.

The mile relay team lost a heart-breaking opener to Williams College in the B.A.A. games in the Boston Garden Saturday night, Feb. 13.

Gowell ran second to Sam Allen of the University of Oklahoma in the hurdles in the heat in which Allan broke the world's record. Gowell was so close that it is entirely possible that he equaled the former record. In the finals of the event Gowell was third.

WITH THE LOCAL ASSOCIATIONS

Worcester County Alumni

met at the house of William W. Buckley, '03, on January 5. Eight alumni from a number of different classes were present for the special entertainment in the form of a bridge tournament. Plans are being made for a Saint Patrick's party in March.

New York Alumnae

held a luncheon meeting at Wanamaker's Club Room on January 16, with a total attendance of 22. The program consisted of election of officers for the coming year and appointment of a committee to help with the men's dinner on March 19. After the business was concluded, a social hour with games, stunts, and prizes was enjoyed.

The officers for the year are as follows: President, Emile K. Josselyn, '21; vice president, Fay Merrow, '21; secretary, Sarah Thompson, '29; treasurer, Evelyn McGlauffin, '22. Other business included plans for the annual Maine picnic at Shadow Lake and a motion to forward scholarship money at once.

White Mountain Alumni,

on February 4, spent a social hour with the Gorham, New Hampshire, alumni at the Mt. Madison House. Twelve alumni attended and helped plan a University Night for March 4.

Worcester County Alumni

were guests of Mr. and Mrs. F. D. (Cannon) Gibbs, '18, on February 2. Fourteen alumni and friends played bridge and, in the way of business, discussed plans to raise scholarship money. The decision was to have a large bridge party at the Sillcrest Dairy Rooms, 496 Park Avenue, Worcester, on Tuesday, March 16. The secretary requests that all those planning to attend this bridge party should make reservations with Mrs. George E. Hansen, 98 Heard Street, before March 2. The proceeds of this bridge will go toward the scholarship fund.

Boston Alumni

held a smoker at the University Club on Wednesday, February 3, with a total attendance of 67. After a buffet supper, Ernest Lamb, '10, president, called the business meeting to order and outlined some of the plans of the association for the coming year. Harry E. Sutton, '09, served as toastmaster for the evening and introduced as speakers Dr. Elmer D. Mer-

ill, '98, head of the Botanical Gardens at Harvard University, Mr. George Stobie, '14, Fish and Game Commissioner of Maine, and Alumni Secretary Charles E. Crossland, '17. Very fine talks were presented by the speakers and enjoyed by the members present.

1887—From Maine to South America

(Continued from Page 9)

after his graduation. Then for ten years he was engaged in the real estate and lumber business in living, Mass., and Ashland, Maine. From 1920 until his retirement in 1934, he was teacher and principal of the Interstate Commercial School at Milford, Mass. He is now retired and lives in Franklin, Mass., where he engages in farming.

One of the outstanding engineering graduates of the fifty years class is Frank E. Trask, a consulting engineer, writer, and lecturer, and an authority on water conservation and flood control. Although a native of Maine, Mr. Trask has spent nearly all of his long, busy, and successful professional career in California. He has served as an engineering expert in a large number of court cases and designed, constructed, and supervised innumerable water developments, irrigation systems, and municipal water supply projects, including part of the Los Angeles water supply and the Little Bear Valley Reservoir and Hydro-Electric project, a \$2,000,000 construction job, in 1915.

In 1933 Mr. Trask was California State Engineer for the P.W.A., and in 1934 was a member of the Technical Board of Review, P.W.A., Washington, D. C. Since 1935 he has been retained by the Los Angeles County Flood Control District Board as permanent consulting engineer for the County Flood Control District. He resides now in Los Angeles and indulges in his hobbies of fishing and golf.

Another of the civil engineers is Charles T. Vose, now retired and living quietly in Portland. His career was found nearer home, on the Maine Central Railroad where for nearly fifty years he was assistant engineer and roadmaster. He has been a member of many church, civic, and fraternal organizations, and for twenty-one years has been a Justice of the Peace.

And last in the list alphabetically but at the moment in the spotlight because of his position as secretary of the class is attorney John S. Williams, of Guilford. Although Mr. Williams majored in chemistry at the Maine State College, the law beckoned him and after graduating from Boston University Law School in 1890 he became an attorney. He served also as Superintendent of Schools from 1891 to 1893, Deputy Collector of Internal Revenue, from 1893 to 1899, and Postmaster from 1914 to 1922.

It is to be regretted that the editors have not had sufficient information about some members of the Fifty Year Class to be able to write of them as extensively as they deserve, but unfortunately biographical information from certain ones has not reached us in time for this issue.

ON THE CAMPUS

"Arms and the Man," a three act comedy by George Bernard Shaw that provided the basis for the popular light opera, "The Chocolate Soldier," will be presented by the Maine Masque in the Little Theatre March 3 and 4

Faith Shesong, Portland, who played in "The Bishop Misbehaves," has the leading female role—that of romantic young Raina Petkoff, daughter of Katherine Petkoff, an imperious, energetic woman, whose part is taken by Virginia McGuire, Portland. Eva Chase, Limestone, will play the role of Louka, a proud Bulgarian servant girl

Robert Hussey, Bangor, who appeared last year in "Abraham Lincoln," will play the part of the Man; Robert Laverly, Newton Centre, Mass., active in several Masque productions last year, will become the cheerful, excitable, socially important Major Petkoff. Others in the cast include: Elwood Bryant, Bangor; Reginald McDonald, Lynn, Mass.; Robert Cameron, Old Town

Dexter P. Cooper, the engineer who originated the idea of the Passamaquoddy Bay tidal project, speaking at the University on Feb. 10, expressed the firm belief that eventually the potential electrical energy of the Atlantic Ocean would be harnessed at Eastport. Mr. Cooper's talk was the final one in a series sponsored by the Contributors' Club

Cooper pointed out that one of the biggest problems confronting most people concerned in the project was the selling of the power, but stated that he had practically all of the power sold by December, 1935. Millions that might have come to Maine are now being spent in such regions as T.V.A. and Boulder Dam.

Maine manufacturers might make use of the St. Lawrence waterway for cheap transportation and also ship to the East Indies and to Liverpool on favorable terms. There was a tentative bill which would keep taxes from going too high and thus driving the industries out of the state. "This project when completed will have a great scientific significance," stated Cooper. In other words, he said, all factors considered, Quoddy is a thoroughly sound undertaking, and therefore, is likely to be completed eventually.

A total of 239 students makes up the Dean's list for the spring semester, 1937, it was announced by Registrar James A. Gannett. Those from the state of Maine total 85 per cent of the total number, only 28 students being from out of state.

STUDENT LEADER

Alton Bell '37, of Dennysville, best known as State, New England, and National javelin champion for 1936, is also president of the Intramural A.A., Senior Skull, member of the Athletic Board, captain of the 1936 Rifle Team, chairman of the Senior Class Executive Committee, and star baseball player, as well as holding numerous other offices and honors.

Four students received all A's. They were: Alice Stewart, of Brunswick, a senior in the College of Arts and Sciences; Robert Bonney, of Portland, a freshman in the College of Technology; Randolph West, of North Berwick, a junior in the College of Agriculture, and Marjorie MacKinnon, of Topsham, a senior in the College of Arts and Sciences.

Monday noon, March third, the debate team will meet Washington Jefferson University in a debate before the Kiwanis and Lions Clubs of Bangor. The question is: Resolved: "That Congress should have power to regulate minimum wages and maximum hours in industry." Washington will take the negative; and Artemus Weatherbee, Bangor, and Sargent Russell, North Leeds, for Maine will uphold the affirmative.

On March sixteenth the Debating team of the University of Florida will come here to uphold the negative and Maine will have the affirmative of the same question.

Future plans of the debating team include a meeting with the American International College team at Springfield, Mass. Maine is to take the negative of the question, Resolved: "That all electrical utilities should be government owned and operated." Two tentative dates are

with Boston University on April 21, when the problem of wages will be discussed; and a journey to New York City March 19 to meet Seth Low Junior College

The University of Maine Women's Athletic Association has been invited to Play Day at Durham, N. H. Following a supper banquet, there will be discussions and demonstrations of modern dance by professional instructors from Boston. Four students will be selected as delegates.

Miss Eleanor Crockett, sophomore, of Hopedale, Mass., was chosen Queen of the Winter Carnival at the Annual Intramural Ball on Friday evening, Feb. 19. She was presented with a huge loving cup.

The Y.W.C.A. is sponsoring a series of teas and lectures which will be given at the homes of several of the faculty wives. These teas have been scheduled for Saturday afternoons from now until March 20, and there will be an opportunity for all of the women students to attend at least one.

The following program, embracing subjects on art, travel, and music, has been arranged.

Art: "Prints and Printmaking," Mrs. Morton Turner; "Modern Art," Dean Edith Wilson; "Chinese Drama," Mrs. Herbert Lamson; "Modern America," Mrs. Huddilston.

Travelogues: "England by Car," Mrs. Hitchner; "Hungary and Central Europe," Miss Lengyel; "Some of the European Galleries," Miss Faye Wilson; "On Vacation in Southern Waters," Mrs. Mark Bailey; "India as Seen During Five Years' Residence There," Mrs. Cecil Fielder.

Music: "A Few Sonatas of Beethoven and Chopin," Mrs. Charles Brautlecht; "Musical Germany," Mrs. John Klein; and "Some Modern Music," Mrs. Bradt.

The opening of the eleventh "Intercollegiate Competition in Writing" for the Universities of Maine, New Hampshire, and Vermont, has been announced by Prof. Milton Ellis, head of the English Department. This contest includes short story, essay, and verse writing. The prizes offered include first, \$25; second, \$15; and third, \$10.

Maine students who placed last year are: Edwin Costrell, Bangor; Edwin Rand, Unity; George Weatherbee, Hampden Highlands; Carolyn Brown, Skowhegan; and Ruth Goodwin, Alfred.

ALUMNI PERSONALS

DEATHS

1901

Dr. Frank Y. Gilbert, a native of Orono, and prominent physician of Portland, died in Augusta on January 18 at the age of 58. Entering Maine with the class of 1901, he attended two years, later graduating from the Bowdoin Medical School.

During the World War he served with the Army Medical Corps at Camp Devens, holding the rank of Lieutenant Colonel in the Officers' Reserve Corps to the time of his death. He was well known in Orono, and attained high recognition as founder and editor of the Maine Medical Journal. He was consulting officer of the U. S. Marine Hospital and on the Examining Board of the U. S. Veteran's Board.

Dr. Gilbert was very active in many associations in the state, being president at one time of the Maine Medical Association and of the Cumberland County Medical Association, a member of the Portland Club, the Isaac Walton League, and the Cumberland County Fish and Game Association.

1906

George A. Cowan, of Damariscotta, former State Senator from Lincoln County, died suddenly at his home on February 10 at the age of 67. He was a native of Hampden and a graduate of the Law School. He had been active in public life for many years. Taking up his residence in Damariscotta shortly after leaving the Law School, Mr. Cowan served a number of years as chairman of the Board of Selectmen. He was County Attorney for Lincoln County for several terms and State Senator from the county in the Legislature of 1935. He was widely known as an attorney throughout his section of the state.

1922

Mrs. Mary Bunker Simpson, wife of Dr. Oscar Simpson, of Falmouth, Mass., an alumnus of the class of 1923, and herself a graduate of the class of 1922, died at the Palmer Memorial Hospital in Boston on January 20, 1937. Mrs. Simpson had been ill about six months.

BY CLASSES

1876

Next Reunion, June, 1938

Edward M. Blanding was elected Secretary Emeritus of the Bangor Historical Society at its annual meeting on January 6, 1937. Mr. Blanding had been secretary for twenty-seven years.

1880

Next Reunion, June, 1937

Charles Fernald, of Levant, is the oldest member of the House of Representatives in Maine. Mr. Fernald feels that "the last forty years have changed the appearance and working procedure of the Maine Legislature 'very little'." Mr. Fernald served his first term in 1897 and has returned for his second as a member of the present Legislature.

1882

Next Reunion, June, 1937

Col. Alfred J. Keith, who has been confined to his home as the result of an accident, was chief speaker at a meeting

of the Old Town Phintheas lodge, Knights of Pythias Jan. 20, 1937. Col. Keith is one of the oldest members of the lodge and is a prime favorite with all Pythians who have come to know him.

1887

Next Reunion, June, 1937

Mrs. Alice A. Black (Hicks) lives at 68 Deering Street in Portland.

Luis V. P. Cilley is now located at Alsina 147, San Isidro, Argentina, South America.

Mr. F. E. Trask is a consulting engineer in Los Angeles, California. Mr. Trask is maintaining residence at 1279 Ridgeley Drive in that city.

1890

Next Reunion, June, 1940

George P. Gould was elected one of the five members of the board of managers for the Penobscot Valley Country Club at a meeting held January 18 at the club house.

1895

Next Reunion, June, 1938

Dr. Harold S. Boardman, who since his retirement as president of the University has resided in Orono, was recently named chairman of the state Liquor Commission by the Governor, Lewis O. Barrows.

1896

Next Reunion, June, 1938

Fred B. Gooch, of Portland, Maine, is in the real estate business, building and construction.

1897

Next Reunion, June, 1938

George W. Bass, who is a clerk in the freight audit office of the Boston and Maine Railroad, is living in Waltham, Mass. The street address is 63 Crescent Street.

1898

Next Reunion, June, 1938

Homer H. Marks is a physician with business located at 11 Main St., Berlin, N. H. He is receiving mail at Box 383 in Berlin.

1899

Next Reunion, June, 1937

Hall F. Hoxie is an electrical engineer with residence at 22 Cedar St., Belfast. At present and temporarily he is located in Ashbury Park, N. J., with the Jersey Central Power & Light Co.

Charles S. Beckwith is farming and lives at Fort Fairfield, Maine.

Charles E. Crosby who is retired gives as his address 35 Pleasant St., Waterville, Maine.

George H. Cummings, of North Gosham, Maine, is a hydro-electric operator.

1900

Next Reunion, June, 1937

Elmer J. Noyes is living at 254 High St., Berlin, N. H. He gives as his occupation, real estate.

Dana S. Williams, of Lewiston, presided at the biennial business meeting of the Maine State Bar Association held in Augusta, January 13.

Dana L. Theriault is an attorney at law with headquarters at Fort Kent.

F. H. Vose is a professor of mechanical engineering at the Case School of Applied Science in Cleveland, Ohio.

Frank E. Webster resides at 133 Sinclair Ave., Providence, Rhode Island.

1901

Next Reunion, June, 1937

The Somerset Bar and Library Association elected Ernest C. Butler, of Skowhegan, chairman of the field day committee and a member of the standing committee.

Mr. Jerry Watson, of Paoli, Penn., is busy with the rebuilding of his home which was almost entirely destroyed by fire on November 17th. The fire occurred during the night and both Mr. and Mrs. Watson were overcome by smoke before the fire department arrived. Mrs. Watson was under the care of her physician for over a month. They have both recovered and are living temporarily at the Wind Mill Tea Room, Paoli on the Lancaster Pike.

George H. Davis is an electrical engineer with the Middle West Service Co., with residence at 416 Keeney St., Evanston, Illinois.

1902

Next Reunion, June, 1937

Genevieve Boland is residing at 21 Hollywood St., Worcester, Mass.

C. N. Rackliffe is manager of the Industrial Sales Dept. of the Carolina Power & Light Co. of Raleigh, North Carolina. He is maintaining a residence at 203 Woodburn Road, Raleigh.

Roy E. Russell is a salesman in Detroit, Michigan, with business address at 6197 Hamilton, and residence at 19227 Havana of that city.

A. S. Webb is with the Clark Equipment Co. and resides at 106 Lake St., Buchanan, Michigan.

1905

Next Reunion, June, 1941

Prentiss E. French is now living at 389 Highland Ave., Wollaston, Mass.

Lester H. Mitchell is field supervisor of operation and maintenance for the Bureau of Reclamation, Washington, D. C. His residence address is given as 833 Gist Ave., Silver Spring, Md.

George S. Williams, of Augusta, was elected for two years' membership to the executive committee of the Maine Publicity Bureau.

1907

Next Reunion, June, 1940

On January 12, 1937 Governor George D. Aiken reappointed Wm. H. Saunders, of Lyndonville, Vermont, to the State Board of Pharmacy for a term of five years. This is Mr. Saunders' third appointment to this board by three different governors.

1909

Next Reunion, June, 1940

George T. Carlisle was elected a member of the board of directors and vice president, at a recent meeting of the Bangor Chamber of Commerce.

Guy E. Torrey, of Bar Harbor, was elected a member of the executive committee of the Maine Publicity Bureau for a two years' term.

Howard I. Goss, of Portland, native of Kennebunk, is now Deputy Secretary of the State of Maine, being appointed by Secretary of State Robie.

1911

Next Reunion, June, 1939

Ellwyn M. Fulton, of Mars Hill, is Aroostook District Manager of the Fed-

eral Life & Casualty Co. of Portland, Maine

Sidney H. Winchester, of St Petersburg, Florida, is receiving mail at 112-18th Ave. N. of that city. He is the owner of "The Normandie" hotel which is located at 414-4th Ave.

Charles B. Hosmer, American Foreign Service Officer, is at present assigned to duty in Dept. of State at Washington, D. C. He gives as his residence 5628 Western Ave., Chevy Chase, Md.

1912

Next Reunion, June, 1937

Walter E. Perkins is now living at 23 Pearl St, Berea, Kentucky. He was formerly located at 1 Second St., Weehawken, New Jersey.

Arthur L. Deering, Dean of Agriculture at the University, has been named a member of the seven-man Maine Dairy Advisory Board by Governor Barrows. The Dean has been seriously ill, but is now making a satisfactory recovery.

Robert I. Gordon is Chief Engineer for the Walter Baker Co., Inc., of 1197 Washington St., Dorchester, Mass. His residence is 373 Central Ave., Milton, Mass.

Walter H. Lilly is District Director of Federal Housing Administration located at 19th Floor, Milam Bldg., San Antonio, Texas. Residence—5 Circle St., of that city.

1913

Next Reunion, June, 1938

Mary E. Russell is secretary to Mrs. Frederick A. Sterling with residence at the present time at 1622 18th St., N.W., Washington, D. C.

J. Larcom Ober, formerly with the Scott Paper Co at Chester, Pa., is now vice president and general manager of the Brunswick Pulp and Paper Co., of Brunswick, Georgia.

Charles B. Adams, of Waterbury, Vermont, was unanimously elected a superior judge at a joint session of the Vermont Legislature in January. In congratulating him, press reports read as follows: "It is a pleasure to congratulate 'Charlie' Adams on this election that brings to fulfillment an ambition he has long held." Speeches that nominated him were unstinted in their praise of him and in expressing confidence in his ability to be a just and able judge.

1914

Next Reunion, June, 1939

Harold J. Shaw, of Sanford, was named by Governor Barrows a member of the seven-man dairy advisory board for Maine. This board will confer with boards in other New England States in an effort to relieve the milk situation, which has been described as in a "chaotic condition."

Fred D. Walker is now with the Edison Electric Illuminating Company at 39 Boylston Street, Boston.

W. R. Thompson, field supervisor for Production Credit Corporation of Springfield, Mass., is living temporarily at 2209 Mass. Ave., Lexington, Mass.

Mrs. Perry Jackman (Hodgins), of Calais, recently acted as substitute teacher at Calais Academy during the absence of one of the teachers

1915

Next Reunion, June, 1938

John A. Cyr who is a law member of the class is located at 21 Hancock St., Boston, Mass.

William B. Hill is a member of the Board of Directors of the Bangor Chamber of Commerce.

J. Stuart Crandall is with the Crandall Dry Dock Engineering Co., of 238 Main St., Cambridge, Mass. His residence is 100 Hancock St., Lexington, Mass.

1916

Next Reunion, June, 1938

Marlborough Packard who is manager of the accounting department of the Brown Company at Berlin, N. H., receives his mail at B.M.S. #63, Berlin.

1917

Next Reunion, June, 1938

Harold W. Hurley, of Boothbay Harbor, was named judge of the Lincoln Municipal Court at Wiscasset by Governor Lewis O. Barrows recently.

W. G. Wahlenberg is doing research in forestry and is located at the Southern Forest Experiment Station, Forest Service, U. S. Dept. of Agriculture. He has his headquarters and mail address at 400 Union Bldg., 837 Gravier St., New Orleans, La.

Carl E. Robinson is sales manager with the Jenney Mfg. Co., with residence and mail at 191 West St., Leominster, Mass.

Mrs. Harold W. Coffin, corresponding secretary of the Y.W.C.A. in Bangor, was chairman of the program for the Norumbega Club meeting which was held at the Y.W. during January. Mrs. Coffin was also author of a short play which was presented in conjunction with the program which had to do with "The Pioneer Home: Its Life and Equipment."

1918

Next Reunion, June, 1937

Lee Vrooman requests that his mail be sent to 11 Charles Road, Cape Elizabeth, Maine.

R. B. Parmenter is now at 1 Mount Pleasant St., Amherst, Mass. He gives as his occupation "extension forester" with headquarters at French Hall, M.S. C., Amherst.

Clayton A. Storer, located at North Anson, Maine, is field manager for the New England Milk Producers Association.

The Penobscot Valley Country Club members voted Dr. Edward L. Herlihy of Bangor a member of the board of managers of that club. Dr. Herlihy practices in Bangor with offices at 159 State St.

1919

Next Reunion, June, 1937

Charles F. Niles, assistant civil engineer for the U. S. Forest Service at the Cherokee National Forest, is living at 2300 Brown Ave., Cleveland, Tennessee. His mail is being sent in care of the Federal Building in Cleveland.

Reginald H. MacDonnell is employed as chemist for the A & P Tea Co., at 420 Lexington Ave., New York City. His residence is given as 9014-215th St., Queens Village, N. Y.

Mrs. Arthur J. Stevens was author of the play, the Orono Ladies Literary Society, which was given in connection with

the 50th anniversary celebration of the Orono Woman's Club, Friday, February 19.

1920

Next Reunion, June, 1937

Lester F. Barbour is the general manager of Strout's Inc., carnation growers, located in Biddetord, Maine. This company was given the first prize of \$100 at the Boston flower show in 1935, and is believed to be the largest grower of carnations in the east if not in the country.

Minerva French Anderson is a teacher of science in Stephens High School in Rumford. She is living at 209 York St., Rumford, Maine.

N. F. True, chief chemist with the Mead Johnson & Co., of Evansville, Indiana, is residing at Cambridge Arms Apts., Apt. 207 of that city.

Dorothy Holbrook is a dietitian at the Palmerston Hospital, Palmerston, Pennsylvania.

Henry R. Butler is a radio engineer in New Jersey. He gives as his residence, 56 Chestnut Rd., Verona, N. J.

1921

Next Reunion, June, 1937

Horace C. Crandall is president and manager of The Crandall Engineering Co., Consulting and Constructing Engineers at 261 Franklin St. Boston. He lives at 48 Garfield Road in Melrose, Mass.

Emilie K. Josselyn, president of the New York Alumnae Association of the University of Maine, organized and planned a new high school course, "Social English and Personality Development." This course which is in line with the new modern educational views with regard to development of personality, character, etc., has met with great success.

Elmer A. LeBlanc is a Junior Clerk with the U. S. Engineers and is located at the Cape Cod Canal, Buzzards Bay, Mass.

1922

Next Reunion, June, 1941

Stanley F. Hanson is a fire adjuster for the Fire Companies Adjustment Bureau and located at 430 Masonic Bldg., Portland.

1923

Next Reunion, June, 1941

The promise in the matter of the class baby is about to be fulfilled. There is only one, of course, and that is Miss Carol Stevens, born April 5, 1924, now five feet tall, who lives at 22 Codman St., Portland, and is the daughter of Beatrice Cleaves Stevens and Carl Stevens. Carol has one sister, Martha, and two brothers, David and Robert. Carl teaches in Deering High and Bee has time to belong to the Portland College Club and the Portland Club of University of Maine Women.

There may be only one class baby but there seems to have been a bumper crop of infants born about the same time and here are some of them. Norman Torrey, son of Tony Gould and Norman Torrey (deceased), born July 24, 1925. Willard C. Sawyer, son of Wilbur C. Sawyer (also deceased, January, 1935), and Mrs. Sawyer, born April 5, 1925. Mrs. Sawyer writes that Willard, like his father and uncle, John C. Winslow '23, plans to attend Maine Reade Cony, son of Roland F. Cony, was born August 13, 1925; Marion Louise Littlefield, daughter of Polly Hawthorne and Alton Littlefield, was born August 27, 1925, Mary Helen Wilson, daughter of Mabel Peabody and Pete Wilson, was born December 26, 1926; Norman Curtis, son of Marie and "Curt" Curtis, was born May 1, 1925; Richard Irving Lord, son of Leonard Lord, was born September 20, 1926; Elizabeth White, daughter of Martha Sanborn White, was born February 21, 1926, and if Arabelle Hamilton and Pat Patten had sent in their questionnaire there would have been another to record.

For those who prefer to read "briefs" short and to the point, here are some:

George W. Mellon is inspector for the Hartford Steam Boiler, Inspection and Insurance Co. of 90 St. John St., New York City. His residence is 116 Ft. Greene Place, Brooklyn, N. Y.

Arthur E. Rogers is inspector of the Eastern Division for the U. S. Tel. & Tel. Co. with headquarters in Bangor. He is living at 145 Pine St. of that city.

Richard B. Stuart is cost engineer for the Tennessee Valley Authority located at Pickwick Dam, Tenn.

Stuart M. Johnson is with the Federal Communication Commission as telephone engineer, New York city, whose temporary address is Apt. 505, 310 West 93rd St., N. Y. C.

C. Roger Lappin is now Springfield District Plant Engineer with the New England Tel. & Tel. Co., residing at 37 Rosemore St. Longmeadow. We have it from the Phi Mu Delta news that he and Mrs. Lappin "have a nice little home here in Longmeadow. No children."

And a long letter from Virginia Averill Castle tells of a most interesting motor trip she and Roger had to Florida in the early fall. Wish there were more time and space to tell you about it. They are living at 1307 Garner Ave., Schenectady, N. Y. Roger commutes to Albany where he is employed.

Elizabeth Ring

1924

Next Reunion, June, 1941

Roland G. Dolley is a railway mail clerk and gives as his home address 92 Dan-

forth St., Portland. By the way, Roland was married during the summer to Miss Ruth O. Drummond, younger daughter of Mr. and Mrs. Henry F. Drummond '00 of Bangor.

Dr. David Jacobs who is a pediatrician and specialist in diseases of infants and children lives at 6771 Germantown Ave., Philadelphia, Pa.

1925

Next Reunion, June, 1940

The postman is really guilty this time for the absence of the personals for your class. Your secretary is on her way to Florida for two weeks and since the personals had been missent to New Hampshire, they arrived too late for her to write them. We'll have some next month.

1926

Next Reunion, June, 1940

John Thomas Chippendale, Jr., is now living at 45 Sheffield St., Jersey City, New Jersey.

Frederick H. Deraney has retired and is at 31 Weymouth Ave., West Roxbury, Mass.

Henry B. Eaton II is president of the Eaton Lumber Mfg. Co., Inc., Calais,

Maine. He is at home at 329 Main St., Calais.

Clyde P. Jones, of Wheelden Heights, Bangor, has been appointed sub-master at Hampden Academy, Hampden, Maine. He began his duties January 18, 1937. He is married and has three children.

Beulah O. Wells,
Orono, Maine

1927

Next Reunion, June, 1940

Seems to me I find this news letter confronting me more often than the monthly bills—but I guess it's just that I have to hunt for the news and the bills know right where to find me. My usual pre-issue phone calling didn't take place this month due to an unexpected run of substituting at the High School, supplemented by my son's run of mumps at home. Which all brings back that old and ever reliable North Hall debate over "A Home vs. A Career." The only conclusion I've reached is that it can't be both over a very long period of time, if the career takes all day and the baby all night.

But one of our class seems to manage and maybe I can get some pointers from her. Last month Mrs. Ralph H. Allee

(Ruth Hitchings) sailed on the S. S. Rex for Italy en route to the Near East Foundation Schools at Kavaje, Albania. "Hitch" contracted malaria while on a trip to Denmark and was forced to leave Albania with her husband last summer, and return to the United States. She remained in Caribou this winter after the birth of her daughter, Ruth Ann, and with David, age five, is now returning to assist her husband as a teacher in the girls' school at Kavaje.

And coming back nearer home, Raymond Berry is a salesman for Mack Baking Co. and living at 166 Parker Street, Brewer. He is married and has four youngsters, Mary Lou, Connie, John, and Sandra.

If you ever stop at Beecher Falls, Vermont, look up John Anderson. He is with the U. S. Immigration Service.

John Foster is manager of the W. T. Grant Co. store in Fitchburg, Mass. His address is Norcross Terrace, Fitchburg.

The first selectman of Palermo, Maine, is Harold E. ("Mack") Sennett.

Henry Waldo is in the U. S. Forest Service at Gorham, N. H., as District Forest Ranger of the White Mountain National Forest.

Dear Classmates:

I almost decided there wouldn't be any column this time but I did receive a few items from the "Editor."

Our congratulations to Mr. and Mrs. Carroll DeCoster (Dora Callomy '30), of Sanford, on the birth of a daughter, Martha Celia, born December 29, 1936, and weighing 8 lbs. 6 ozs.

Last month, I wrote of Lucian French's promotion and I have just heard that his residence address is 763 President Ave., Trenton, N. J.

Prof. and Mrs. Allan ("Grizz") Goodspeed have recently returned from a cruise to Bermuda and Havana. Quite a change from the rigors of the senior forestry camp, for you know "Grizz" was one of the professors accompanying the senior foresters to camp this winter.

Edward S. Mack is with the Continen-

tal Baking Co. of Springfield, Mass. His address is 80 Upland Road, Cambridge, Mass.

Samuel Modes is a chemist with Lever Bros. in Cambridge and his home address is 6 Washington Ave., Cambridge, Mass.

Cornelius J. Russell, Jr., is a member of the Bangor Chamber of Commerce, Board of Directors.

Next Reunion, June, 1939

Dear Classmates:

Raymond Fernald is clerk for the Great Northern Paper Co. and is located at Millinocket, Maine.

"Nick" Hodgman is now employed by the New England Power Co. as forecaster in the Load Dispatching Dept. His residence is 30 Miles St., Millbury, Mass.

Abram Libby is supervisor in the production department, Cellophane Division, of E. I. Dupont de Nemours & Co. and lives at 20 W. Girard Boulevard, Kenmore, New York.

Mr. and Mrs. Wendall E. Mosher are receiving congratulations on the arrival of a son, Henry Lewis, born November 5th in Orono.

George Rose is propagator for Barnes Bros. Nursery Co. He is receiving mail at 21 Hill Ave., Yalesville, Conn.

Last month we told you about Merton Parsons. We have more news of him. He and Mrs. Parsons are living at 114 Highland Place, Ithaca, N. Y. He is having his mail go to Agricultural Economics Bldg., Cornell University, Ithaca. Alice Webster Sinclair
Pittsfield, Maine

1930

Next Reunion, June, 1939

John Crowell and Miss Iris M. Williams of Brewer were married on January 8th at high noon at the Methodist Episcopal parsonage in Brewer. Mrs. Crowell was formerly assistant in the department of agricultural economics at the University. John is manager of the Eastern Maine Grain Company in Belfast, and is a member of the Belfast Lions Club.

Roland Cyr is assistant engineer with the Water Bureau of the Metropolitan District Commission of Hartford County, Connecticut, and is residing at 17 Sycamore St., Windsor, Conn.

Helen Denton, ex-'30, a graduate nurse of Presque Isle General Hospital in 1931, sailed January 16 from New York on the S. S. Rex for Italy. From Italy she crosses the Adriatic Sea to Kavaje, Albania, where she will assist in the development of Village Clinical Service, a branch of the extension work of the Near East Foundation. For the past few years she has been superintendent of nurses at Caledonia Hospital, Brooklyn, N. Y., followed by a similar position at Jamaica Hospital, Richmond Hill, L. I., N. Y.

Hector Hebert recently resigned his position as history teacher and athletic coach at Guilford High School to accept a place on the faculty of Wassookeag School, a private boys' school, in Dexter, Maine. He had taught at Guilford High since September, 1930.

Harley Knight is with the Union Mutual Life Insurance Co. as cashier of their Boston office, and is living at 17 Brimmer St., Boston.

Saul Lait is assistant superintendent of the Old Town office of the Prudential Insurance Co. of America at 46 North Main St.

Andrew Smith is superintendent of the

Colonel William N. Campbell Estate at Lower Village, Kennebunk, but the post office address is Kennebunkport, Box 92.

Pauline Hall

Kennebunk, Maine

1931

Next Reunion, June, 1939

Hello,

News this month is still slim—where are you all?

Don Lovely is Inspector for the U. S. Engineers in the Flood Control Division at Concord, N. H.

George Packard is back again as assistant buyer with W. T. Grant at 1441 Broadway, N. Y. City. He's living at Apt. 2-B, 8310 35th Ave., Jackson Heights, N. Y.

Kay Lang Wilkie (Mrs. Walter Wilkie) is living at 130 West 16th Street, N. Y. City.

Gilbert Weeks is an engineer with the Western Electric Company in Chicago. He's been a busy man since graduation—first, his M.S. in 1933 on the Dr. Henry Morton Graduate Scholarship from Stevens Institute of Technology—then radio engineer at Springfield, Mass., for the United American Bosch Corporation, and now Chicago. Good work! Gil's address is 501 North Central Avenue, Chicago.

Harry Matluck, an ex-'31er, is proprietor of the Lancaster Upholstery Company here in Portland. He's living at 72 Parris Street.

Lyndell Smith Arsenault is teaching in Brewer. Address? Oh! 106 So. Maine Street.

Last news from Ellen Wareham was that she still at Robinson Seminary, Exeter, N. H. How about some news from you and your pals, Ellen?

Margaret Bither is now Mrs. Dwight E. Webber, of 30 Highland Avenue, Houlton, Maine. Her husband is a Bowdoin man, class of '30, and is employed by the Maine State Liquor Commission.

Not a very long column this month. Do help me better it this coming month.

Mary C. Stiles

1932

Next Reunion, June, 1939

John Barry is with WLW, the National Broadcasting System, in Cincinnati, Ohio, as an announcer.

The marriage of Gladys Stinson of Conway to Edward W. Buzzell took place last April.

Paul L. Danforth accepted a new position with the Manufacturers Trust Co. of New York in January. For the past three years Paul has been associated with Lions International. His address is Central Y.M.C.A., Hanson Place, Brooklyn, New York.

Merton Flanders received his M.D. at the University of Vermont, College of Medicine in June, 1936. He is interning at the Maine General Hospital. Address 25 Ellsworth St., Portland, Maine.

William Foley, of Bar Harbor, was married to Miss Constance Cunha, of Providence, R. I., on Jan. 15, 1937. William is educational director of the CCC camp at Bellows Falls, Mass.

Harland F. Leathers heads the committee on criminal law of the Duke University Bar Association. Harland is a senior this year and is on the staff of the Duke Legal Aid Clinic.

Priscilla Noddin is teaching all the English classes in Goffstown High School. Pris' address is 22 High St., Goffstown, N. H.

Lindsay Patchell is doing forestry work in Wytopitlock, Maine.

Next Reunion, June, 1938

Dear Classmates:

This is to be a very hurried letter as the date for sending the "News" is past—goodness, how the time flies.

"Sven" Hallgren is Assistant Superintendent at the Burnham & Morrill Co., Portland, Maine. His residence is 187 Congress St., Portland, Maine.

Charlie Moody is with the W. T. Grant Co. in Jersey City, N. J.—361 Central Avenue.

Tom Desmond is a chemist with E. I. DuPont, Grasselli, N. J. His residence is 201 W. 5th Ave., Roselle, N. J.

Bert Follette dropped in the other Sunday evening and told us about himself as well as several other classmates. Bert is Lubrication Expert with the Atlantic Refining Co. and is, at present, located in Fall River, Mass. He is living at the Y M C A. Bert had been to see Bill Bratton and Mary Scott Bratton in Adams, Mass., not long ago and said that Bill made a very efficient manager of the A&P Tea Co. there. "Scottie" and Bill live at 4 Crandall St. Remember, Bert, we are expecting you to stop the next time that you come down to Norwichtown to see your folks.

Paul Snow is Sales Manager with the Fort Fairfield Light & Power Co., Fort Fairfield, Maine.

Enoch Williamson is assistant manager with the W. T. Grant Co. at 215 5th Ave. North, Nashville, Tenn. He is living at 1906 19th Ave. South. Heavens—what an address. I'm not very sure of the figures on the typewriter and this has been a struggle.

William F. Milliken, Jr., is employed with the Chance Vought Aircraft Co. as Aero Eng. in the Aerodynamics Section, Hartford, Conn. His residence is 12 Marshall Street, Hartford, Conn.

Helen Osgood is with the Traveler Insurance Co., Hartford, Conn., as a secretary. Her address is 218 So. Marshall Street, Hartford, Conn.

Guy Booker is employed as an Analyzer for the Western Electric Co., Kearney, N. J. He is living at 126 Fairview, Jersey City, N. J.

S'long until next month

Marnie Smith Baldwin

1934

Next Reunion, June, 1938

The Alumni office deeply regrets that through some unfortunate delay the personals for 1934 have not been received. That will make more next month, however.

1935

Next Reunion, June, 1938

Dear Classmates

Whether or not an addition is made to our Supreme Court occupies the headlines in the newspapers but occupying my

headlines without any controversy or pros and cons is the addition you all should make to our column! Such censure heading off the news!

"Ginny" Trundy heads the list. "Ginny's" engagement to Ralph Stone has been announced. She has been studying at the Metropolitan State Hospital in Waltham, Mass., and now she is employed in Augusta for the State Bureau of Social Welfare. Ralph is now a civil engineer in Hornell, New York. Our very best, Ginny and Ralph.

And Cupid has been busy all along but we're a little late hearing about it. On January first, Preston Whitaker was married to Madeline Crandall, of Oakfield, Maine. Mrs. Whitaker was graduated from Merrill High School and from the Massachusetts State Infirmary. Preston is teaching Agriculture in Oakfield High School. Congratulations, Preston, and no less hearty to Bill Farwell who was married on October 29 to Avis Ethel, of Conway, New Hampshire. Mrs. Farwell was graduated from Farmington Normal School and has been teaching at Unity Plantation and in South Harrison. Bill is in charge of the agricultural course at Buckfield High School and Mr. and Mrs. Farwell will reside in Buckfield.

There's going to be an excellent chance for a Maine '35 reunion in Boston just as there seems to be in New York. Bill Butler is in New Bedford, Mass., as traveling salesman for the Salem China

Company. Robert Lord is employed as a leather worker for Tanning Process Company, of Ipswich, Mass. Lillian Coffin is attending the Student Nurses' Training School at the Massachusetts Memorial Hospital.

Every month we find our classmates scattering, but there's always a report from several who seem to like Maine. Sumner Hancock is teaching in Livermore Falls and Nathan White is supervising principal in the Fort Fairfield Grammar School. "Si" Bates is employed as machinist with Thomas Laughlin Company in Portland, and James Hamilton is assistant operator of the Cumberland County Power and Light Company Power Station. Clifford Moir is president of the C. C. Moir Company Commercial Enterprises in Hampton, N. H. Velma and Vi Colson are both teaching in Maine. Velma is in Oxford and Vi is in LaGrange.

Sam Favor is employed as junior engineer with the Scott Paper Company in Chester, Pa., and Curtis Plummer is busy

1936

Next Reunion, June, 1938

My first letter this month was from Don Huff. Don is working in the State Street Trust Company in Boston, in the Check Tellers Dept. He is living at home, the address—217 Summer St., Lynnfield Center, Mass.

Don said he had seen Arbie Dougherty in Boston. That Dougherty had certainly does travel around. At present he is employed by the Consolidated Gas Co. in Boston. I also heard (not from Don) that Phil Snow is working with that same company.

Now to quote Mr. Huff, "I've heard from an authentic source that Gene Wakely is married. Gee, the list of benedicts from '36 is growing fast." If that is so, Gene, don't keep us in the dark any longer. We crave particulars.

Darrell Currie is another '36er whom Don met in Boston. He said that it was in the fall when he saw him and at that time Darrell was working for the Liberty Mutual Insurance Co.

Just one more item from this source, Dave White is selling insurance (I don't know for what company) and is living at home in Augusta. I saw Dave myself last week in Lewiston but he wouldn't talk. You see, Dave, you can't escape a snoop.

May I take just a moment to express my appreciation of that letter. It was grand to hear from you, Don.

The next letter was from Ken Alley.

Addresses Wanted!!

The Alumni Association would like to secure the addresses of the following alumni.

1936

Blades, Charles W. (ex)
Homonoff, Louis (ex)
Miller, Sydney R. (ex)

1935

Booker, Ivan R. (ex)
Carver, Philip P. (ex)
Dodge, Wmfred S. (ex)
Flagg, Warren W. (ex)
Hume, Corris H. (ex)
Long, Frederick L. (ex)
Potter, Alvah L. (ex)
Reed, John P. (ex)
Sherman, Waldo (ex)
Wass, Grace E. (ex)
Wilson, Margaret E. (ex)

1934

Caswell, Benson E.
Keyser, Ambrose M.
Aldrich, Adelbert (ex)
Briggs, Florence G. (ex)
Crane, Lois R. (ex)
Crowley, Harry A. (ex)
Foss, Phyllis C. (ex)
Iverson, Andrew P. (ex)
Pennell, Robert A. (ex)
Perry, Gertrude (Mrs Gertrude Humphrey) (ex)
Swett, Alyce I. (ex)

Ken was with us two years then went into the General Electric Company Plant at Lynn. At present he is a designer in the motor department. He has also been studying concert singing since leaving us.

Bill Barker writes that he is employed by the Ingersoll-Rand Company as an engineer, located in Easton, Pa. His address is 600 Ferry St. in that city. Bill spoke of having seen Ed Hanson who is working for the Fairbanks-Morse Co. and is located in Boston.

I have the information you wanted about Actor Abbott and John Coombs, Bill Actor is an inspector in the Bridge Division, Maine State Highway Commission on Morse Bridge. His address is 36 Urghart St., Rumford, Maine. John is doing graduate work at Maine.

Thanks loads for your letters, too.

The column wouldn't be complete without an engagement, so we have one. Al Crowley's engagement to Harold Lord 35 was announced this month. Since the editors put one over on me last month I can say, "Isn't it nice, Al?" Congratulations, "Fat."

Last week end I happened to be in Auburn and learned that Helen Buker was home. It seems that Helen was bowling and couldn't take it. Anyway, she is in bed trying to recuperate. I don't know just what is the matter but to quote again, Helen says, "It's mostly the sciatic nerve." I know she'd appreciate mail, but don't expect an answer because she's not much of a correspondent.

Maybe the girls can't write letters but they can talk. Helen was full of information but not very full information. Our conversation ran something like this:

Helen: "I saw Don Brown a little while ago. He's working for some steel company in Boston."

"Which one?"

Helen: "I don't know, but he's living in Brookline. Oh yes, I saw Len Shaw. He's working for the Telichron—"

"How do you spell it?"

Helen: "I don't know, it doesn't matter, anyway, it's a clock company in Boston."

"What does he do?"

Helen: "Why do you have to be so specific? Charlotte Fuller is going to a secretarial school in Gardner, let's see, what's the name of it. Oh well, that is enough anyway."

She did know that John Porter is working for the S. S. Pierce Co. in, well, either Dorchester or some other place.

Now do you see what difficulties I encounter? I did appreciate the effort, though.

Back to definite facts again.

John Morrow is inventory assistant in the N. Y. and Queen's Electric Light & Power Co.

Sam Kadish is working for the H. C. H. Plant Co. located in Boston.

Ralph Corrigan is employed by the N. E. Tel. and Tel. as a salesman in the business office. He is located in Portland. George Harrison is a medical student in the University of Pennsylvania.

Bob Littlehale is in Bangor working for the T. R. Savage Co.

Rutledge Morton is a Junior Engineer in the C. H. Babb Co., Portland.

And last, but by no means least, Gordon Heath has recently been appointed Junior Forester on the Chippewa National Forest in northern Minnesota. I hope you won't have any trouble in getting *The Alumnus* from now on, Gordon.

Phyl Hamilton
Box 215
Northeast Harbor, Me.

HOW SMART IS A COLLEGE GRADUATE?

(Answers to the quiz on Page II. of front advertising section)

1. Napoleon Bonaparte.
2. As a liability.
3. Antonio Stradivari (1644-1737).
4. Wyoming, in 1869.
5. Checkers.
6. 1,748,000,000.
7. Benvenuto Cellini.
8. A London insurance underwriters' association.
9. The Barber of Seville.
10. That of Thomas Jefferson.
11. In Athens, in 1896
12. Lhasa.
13. Six.
14. The Gemini (the twins).
15. \$7,200,000. Purchased from Russia in 1869.

Please write your quiz score in space provided in coupon on facing page, and mail today.

16. Theodore Roosevelt, who was 42 when inaugurated.
17. Henry Ford, on the witness stand in a lawsuit with the Chicago Tribune, in 1919.
18. William Harvey (1578-1657).
19. A unit of speed equal to one nautical mile (6080 feet) per hour.
20. Detroit.
21. John Masfield.
22. The soldiers of Achilles in the Trojan War.
23. Off the coast of South America, 730 miles west of Ecuador.
24. Silver (Copper is used commercially because it is comparatively cheap)
25. Yes — South Carolina.

Let NEWS-WEEK Give You

The Answers Before You Are Asked The Questions

NEWS-WEEK, the illustrated news magazine, is two publications in one. In 90 minutes reading and seeing time a week it brings you the significant news of all the world in picture and word.

And NEWS-WEEK does not merely report what happened, but accurately and without bias it gives you a real understanding of how things happened and why they happened.

If you don't already know NEWS-WEEK, don't fail to take advantage of the special introductory offer on the opposite page — 20 weeks for \$1, a saving of \$1 over the single issue price of 10c a copy.

You'll learn the answers to questions that rise in your own mind as well as the answers to the questions others ask you.

FOR PEOPLE WITH

Educated Palates

AND DELICATELY BALANCED BUDGETS

FOR THOSE of us who like to keep our budgets in equilibrium, without giving up the little niceties of life, French Line ships offer the ideal ocean-crossing.

Every detail of existence is worked out to perfection . . . for the French add that ultimate touch, that final flourish which transforms excellence into distinction. And at no extra cost.

On French Line ships, you find a menu so varied that it could be matched only in five or six of the greatest restaurants of the world. An epicure . . . and who of us is not a student of that enchanting science, gastronomy? . . . may well devote the four to six days of a French Line crossing to advanced research. And with each meal we offer

you, with our compliments, a bottle of sound table wine.

The discipline and tradition of a thousand years of Breton and Norman seafaring make a firm foundation for the suave service and civilized comfort of our modern fleet.

Your Travel Agent will be glad to arrange reservations on any of our five crack liners (averaging less than eight years in service) running weekly from New York to England and France. His services cost you nothing. It is advisable to make early reservations this year.

French Line

610 Fifth Avenue (Rockefeller Center), New York City

To England and France, and thus to all Europe: NORMANDIE, March 17, April 14, 28 • ILE DE FRANCE, March 12, April 1 • PARIS, May 4, 28

"TURRET TOP, NO DRAFT VENTILATION,
KNEE-ACTION, HYDRAULIC BRAKES AND THAT GAL!
WHAT MORE COULD YOU WANT IN A CAR?"

You may be satisfied, but General Motors is going to keep right on trying to beat its share of this combination. That's the fortunate advantage of having the vast resources to keep on pioneering—and a demand for its cars vast enough to enable the production of new things at a price that fits the average pocketbook.

GENERAL MOTORS

A Public-Minded Institution

CHEVROLET • PONTIAC • OLDSMOBILE • BUICK • LA SALLE • CADILLAC

NEW CAR ANNOUNCEMENTS

BUICK FOR 1937 — 'It's Buick Again' A choice of brilliantly designed bodies to meet your heart's desire. Roomier interior of tailored smartness. Increased power — silent, silky, rugged power that makes you master of time and distance.

CADILLAC V-8 \$1445 and up — the lowest Cadillac price in 26 years. V-8 engine stepped up to 135 horsepower — the most exhilarating performance on the highway. Traditional Cadillac luxury, beauty and excellence advanced to a new high degree.

The 1937 CHEVROLET — Truly the Complete Car — Completely New with new 85 horsepower six cylinder engine. All Silent. All Steel Bodies, perfected hydraulic brakes, gliding Knee Action ride. Super-safe Shockproof Steering and Safety Glass all around at no extra cost.

CORD — In contrast to the commonplace — a totally new interpretation of the function of a motor car. 125 inch wheelbase. Also new Supercharged Cord with 170 h.p. engine and 132 inch wheelbase. Berline Cord.

DODGE — New Windstream Styling. Stronger, safer, all steel body securely mounted on cushions of live rubber. Bigger, roomier, and more comfortable — ample room for six passengers. And economical — owners report Dodge gives 18 to 24 miles per gallon of gas. Switch to Dodge and Save Money.

LA SALLE V-8 Now only \$995 and up — the lowest priced yet the finest La Salle of all time. Completely Cadillac built. Smooth, powerful 125 horsepower performance. Hydraulic brakes. Unisteel Turret Top. Fisher Bodies. Knee Action Ride.

OLDSMOBILE — Newest cars of them all — a distinctive Six and a distinguished Eight — each with a style distinctly its own. Bigger and finer and safer than ever — at prices that set the pace in value.

PACKARD WITH FOUR GREAT CARS — the Six, 120, Super Eight and Twelve — now covers four price fields with four complete lines, with each model in every line a truly fine car of luxurious comfort, brilliant performance and smart appearance. Ask The Man Who Owns One.

PONTIAC — For 1937 America's finest low priced car has five inches more wheelbase and is 10% more economical. Features include Unisteel Bodies by Fisher, triple-sealed hydraulic brakes, knee action, 50% more trunk-space. Priced near the lowest.

TRAVEL ANNOUNCEMENTS

SOUTHERN PACIFIC — Four Scenic Routes to the West through four widely different scenic regions. Go on one, return on another — see twice as much for little or no extra rail fare. Between Los Angeles and San Francisco, ride the streamlined *Daylight*, newest and most beautiful train in the West. Check coupon facing Page V. for booklet.

IMPROVES YOUR APPEARANCE 100%

Have That Healthy

...TAN...

That Men and Women Admire!

Don't have that pale, indoor, "pasty" look — when you can have the natural ruddy glow of vigorous health. The same kind of Tan you get on a Florida beach! Your personal appearance is either a distinct social and business asset — or a handicap.

PROOF 5
GREATER SAVE-ABILITY
ONLY FRIGIDAIRE HAS THE *Meter-Miser*
CUTS CURRENT COST TO THE BONE

See its lower operating cost proved by an electric meter before you buy! The Meter-Miser does Super-Duty at amazing saving because it's the simplest refrigerating mechanism ever built... Only 3 moving parts, including the motor... permanently oiled, completely sealed against moisture and dirt.

FRIGIDAIRE... MADE ONLY BY GENERAL MOTORS

The Test of an Investment

- ✓ *Security Offered*
- ✓ *Financial Returns*
- ✓ *Future Possibilities*

You consider all these points in making a money investment. It's even more important to consider them when investing years of effort to build a career.

Because of the way life underwriting "checks" on all three counts, increasing numbers of college graduates are entering this business. Those selected by The Penn Mutual Life Insurance Company can start their careers on a fixed compensation basis, instead of a commission basis, if they wish.

Send for booklet: "Insurance Careers for College Graduates."

*"Did you ever see **THIS** before?"*

INCONSPICUOUS but important is the name "Western Electric" on your telephone.

You may never have noticed it, yet it has been there for years. And it has a great deal to do with the quality and low cost of telephone service.

Western Electric has been making Bell System equipment for over half a century. Its specialized production and purchasing have enabled the operating companies in the Bell System to buy equipment and supplies of the highest quality at reasonable prices.

Western Electric serves further by maintaining a nation-wide system for the rapid delivery of material and apparatus. This is an important factor in providing good telephone service from day to day and speeding its restoration in time of fire, flood or other emergency.

Western Electric is an integral part of the Bell System and has the same objectives as the rest of the organization. It plays its part in making telephone service dependable, efficient and inexpensive.

BELL TELEPHONE SYSTEM

*My compliments on your
very good taste, sir*

*for the good things
smoking can give you*
