GENERAL PROVISIONS**1.1. TITLE**

This Ordinance shall be known as the "Hope Land Use Ordinance ", and will be referred to herein as the "Ordinance".

1.2. AUTHORITY

This Ordinance is adopted pursuant to Home Rule Powers as provided for in Article VIII of the Maine Constitution, 30-A M.R.S.A. § 4352 and 38 M.R.S.A. §§435 et seq.

1.3. PURPOSES

The purposes of the Ordinance are as follows:

1.3.1. Comprehensive Plan Implementation: To implement the policies and recommendations of the Hope Comprehensive Plan;

1.3.2. Protection of the General Welfare: To assure the comfort, convenience, safety, health and welfare of the residents of the Town of Hope;

1.3.3. Protection of the Environment: To protect and enhance the natural, cultural, and historic resources of the Town from unacceptable adverse impacts and to integrate new development harmoniously into the Town's natural environment;

1.3.4. Promotion of Community Development: To promote the development of an economically sound and stable community;

1.3.5. Encourage Vehicular Safety: To minimize traffic hazards on roads, limit excessive numbers of intersections, and insure the continued usefulness of all elements of the existing transportation system for their planned functions;

1.3.6. Balancing of Property Rights: To protect property rights and values by balancing the rights of landowners to use their land with the corresponding rights of neighboring landowners to enjoy their property without undue disturbance from neighboring uses;

1.3.7. Reduction of Fiscal Impact: To provide a means of evaluating development proposals to determine their fiscal impacts on the Town's ability to provide and improve necessary public facilities and services; and

1.3.8. Establishment of Procedures/Standards: To establish procedures whereby the Town Officials may review the developments governed by this Ordinance by providing fair and reasonable standards for evaluating such developments; to provide a public hearing process through which interested persons may raise questions and receive answers regarding how such developments may affect them; and to provide procedures whereby aggrieved parties may appeal decisions made under this Ordinance.

1.4. APPLICABILITY

This Ordinance shall apply to all land areas within the Town of Hope. All buildings or structures hereafter constructed, reconstructed, altered, enlarged, or moved, and the uses of buildings and land, including the division of land, shall be in conformity with the provisions of this Ordinance. No existing building, structure, or land area shall be used for any purpose or in any manner except as provided in this Ordinance.

1.5. CONFLICT WITH OTHER ORDINANCES

Whenever the requirements of this Ordinance are in conflict with the requirements of any other lawfully adopted rule, regulation or ordinance the most restrictive or higher standards shall govern.

1.6. SEVERABILITY

In the event that any section, subsection, or any provision of this Ordinance shall be declared by any court of competent jurisdiction to be invalid for any reason, such decision shall not be deemed to affect the validity of any other section, subsection, or other portion of this Ordinance; to this end, the provisions of this Ordinance are hereby declared to be severable.

1.7. AMENDMENTS TO THE ORDINANCE OR OFFICIAL ZONING MAP**1.7.1. Initiation**

An amendment to this Ordinance or Official Zoning Map may be initiated by one of the following:

1.7.1.1. Recommendation of the Planning Board

1.7.1.2. Motion of Board of Selectmen

1.7.1.3. Written petition of 10% of the number of registered voters who voted in the most recent gubernatorial election.

1.7.2. Hearings

All proposed ordinance or map amendments shall be referred to the Planning Board for its recommendation. The Planning Board shall hold a public hearing on any proposed amendment.

1.7.3. Majority Vote

The amendment may be adopted or rejected by majority vote of the voters at a Town Meeting.

1.7.4. Shoreland Zoning Amendments

Copies of amendments to Section 6 and/or to the Shoreland Zoning Overlay Districts depicted on the Official Zoning Map shall be submitted to the Commissioner of Environmental Protection following adoption by Town Meeting and said amendments shall not become effective unless approved by the Commissioner; provided, however

that if the Commissioner fails to act upon any such amendment within forty-five (45) days after receipt of such amendment, such amendment shall be deemed approved; that notwithstanding 1 M.R.S.A. § 302, as may be amended, such amendment, upon approval or deemed approval by the Commissioner, shall have an effective date retroactive to its date of adoption by Town Meeting; and, that such amendment shall govern all applications for a shoreland zoning permit submitted to the Town within said forty-five (45) day period if such amendment is approved or deemed approved. Amendments to the Shoreland Zoning Overlay Districts depicted on the Official Zoning Map shall be shown on said map within 30 days after the approval or deemed approval by the Commissioner of said amendment.

1.8. ANNUAL ADMINISTRATIVE REVIEW

The Code Enforcement Officer, Planning Board, and Board of Appeals shall report annually in December to the Town Administrator and Board of Selectmen on their respective experience with the administration of this Ordinance during the previous year. Their reports to the Town Administrator and Board of Selectmen shall include any recommended amendments they may have that would:

1.8.1. Enhance their ability to more effectively meet their respective administrative responsibilities under this Ordinance;

1.8.2. Enhance the implementation of the purposes of this Ordinance.

1.9. EFFECTIVE DATE

The effective date of this Ordinance and Official Zoning Map and any amendments thereto, shall be the date of approval at an Annual Town Meeting or Special Town Meeting. A copy of this Ordinance and Official Zoning Map, attested by the Town Clerk, shall be on file at the Town Office.

NON-CONFORMING STRUCTURES, USES AND LOTS**2.1. NON-CONFORMING LOTS****2.1.1. Vacant Lots**

2.1.1.1. A nonconforming lot may be built upon provided that such a lot is in separate ownership and not contiguous with any other lot in the same ownership and that all provisions of this Ordinance except lot area and frontage can be met. Variance of other requirements shall be obtained only by approval of the Board of Appeals.

2.1.1.2. If two (2) or more vacant, contiguous lots are in the same ownership of record at the time of adoption or amendment of this Ordinance, and if these lots do not individually meet the dimensional standards of this Ordinance, the lots shall be combined to the extent necessary to meet the dimensional standards, except:

- a. Where the contiguous lots front onto different streets; or
- b. The lots were legally created and recorded in an approved subdivision plan. No division of any lot may be made which leaves the lot's area, lot coverage or frontage below the minimum requirements of the Ordinance, which worsens an existing nonconformance or creates a new nonconformance.

2.1.2. Lots with Structures

A structure built on a lot prior to enactment of this Ordinance, which lot does not conform to lot size or lot frontage, may be repaired, maintained or improved and may be enlarged, in conformity with the applicable space and bulk requirements other than minimum lot area or lot frontage. If the proposed enlargement of the structures(s) cannot meet the applicable space and bulk requirements, a variance shall be required from the Board of Appeals (See Section 10).

2.2. NON-CONFORMING STRUCTURES**2.2.1. Maintenance, Modification, Replacement and Reconstruction**

Except as otherwise provided herein, a structure lawfully in existence as of the effective date of this amendment, that does not meet the height or setback requirements of Section 5, may be repaired, maintained, improved, or replaced, as set forth in this section. It may be modified and/or accessory structures may be added to the site without a variance, provided that:

2.2.1.1. The resulting structure or structures do not exceed the height restrictions of the district in which the structure or structures are located.

2.2.1.2. The resulting structure or structures do not exceed the prescribed maximum lot coverage.

2.2.1.3. There shall be no increase in the nonconformity of a structure, except that a lawfully non-conforming structure may be expanded by up to 30% in volume and floor area in that portion of the structure that already exists in the front, side or rear yard setback area during the lifetime of the structure. The resulting structure shall be no closer to the front, side or rear lot line within the setbacks than the existing nonconforming structure. In addition, the resulting structure shall be no higher than the existing structure within the side and rear yard setbacks and no higher than the district height standard within the front yard setback.

2.2.1.4. No structure which is less than the required setback from the normal high water line of a water body or the upland edge of a wetland shall be expanded further toward the water body or wetland except as provided in Section 6.

2.3. NON-CONFORMING USES

2.3.1. Continuance (Grandfather Clause)

The use of land or structure, lawful at the time of adoption or amendment of this Ordinance, may continue although such use does not conform to the provisions of this Ordinance, except as provided in Subsection 2.5, below.

2.3.2. Resumption

Whenever a nonconforming use of land and/or structure is changed to a permitted use or a use permitted by special exception, the use shall not later revert to nonconforming use.

2.3.3. Discontinuance

A nonconforming use that is discontinued for a period of twenty-four (24) consecutive months may not be resumed. The uses of the land, building, or structure shall thereafter conform to the provisions of this Ordinance.

2.3.4. Expansion of Time

A nonconforming use, including a nonconforming outdoor use of land, shall not be extended or expanded in area or function.

2.4. TRANSFER OF OWNERSHIP

Ownership of nonconforming lots, structures and/or uses as defined in this Ordinance may be transferred without loss of their lawful but nonconforming status.

2.5. CHANGES IN NON-CONFORMING LOTS, STRUCTURES AND/OR USES

Projects not within the scope of Section 2.3 may be approved by the Board of Appeals. A non-conforming aspect of a lot, structure or use may be changed such that it is less non-

conforming or no more non-conforming than the existing situation. In making its determination, the Board of Appeals shall apply the standards of Section 2.3.

NOTE: Non-conforming lots, structures, and uses in the Shoreland Zone are addressed in Section 6.12 of this ordinance.

ESTABLISHMENT OF DISTRICTS

3.1. DISRICTS ESTABLISHED

For the purposes of this Ordinance, the Town is hereby divided into the following districts:

- 3.1.1. Rural Residential District**
- 3.1.2. Hope Corner Village District**
- 3.1.3. South Hope Village District**
- 3.1.4. Shoreland Zoning Overlay Districts**

3.2. STANDARDS ESTABLISHING DISTRICTS AND DISTRICT DESCRIPTIONS

3.2.1. Rural Residential District: The purpose of the Rural Residential District is to preserve the existing landscape and natural resources while allowing residential and mixed development that is complementary to the existing pattern of development. Resource based opportunities including farming, forest management, and recreation are encouraged.

3.2.2. Hope Corner Village District: The purpose of the Hope Corner Village District is to encourage business, services, and mixed residential development consistent with the existing village character.

3.2.3. South Hope Village District: The purpose of the South Hope Village District is to encourage business, services, and mixed residential uses in a pattern of development that creates a village atmosphere.

3.3. OFFICIAL ZONING MAP

Districts established by this Ordinance are bounded and defined as shown on the Official Zoning Map.

3.3.1. The official copy of the Zoning Map shall be that map which bears the certification that it is true and correct, attested by the Town Clerk and on file at the Town Office.

3.4. INTERPRETATION OF DISTRICT BOUNDARIES

Where uncertainty exists as to boundary lines of Districts as shown on the Official Zoning Map, the following rules of interpretation shall apply:

- 3.4.1.** Boundaries indicated as approximately following the center lines of streets, highways, public utilities or right of ways shall be construed as following such center lines;
- 3.4.2.** Boundaries indicated as approximately following shore lines of any lake or pond shall be construed as following the normal high water mark;
- 3.4.3.** Boundaries indicated as approximately following the center lines of streams, rivers or other continuous flowing water courses shall be construed as following the channel center line of such watercourses;

3.4.4. Where uncertainty exists as to the exact location of district boundary lines, the Board of Appeals shall be the final authority as to location.

SCHEDULE OF USES

4.1. SCHEDULE OF USES

This Section lists the Schedule of Uses in each District and the approval and permitting requirements necessary to conduct each use.

4.2. ABBREVIATIONS IN THE SCHEDULE OF USES

The following abbreviations contained in the Schedule of Uses have the following meanings:

Schedule of Uses Key	
HCV	Hope Corner Village District
RR	Rural Residential District
SHV	South Hope Village District
CEO	Use approved by the Code Enforcement Officer subject to all applicable standards in this Ordinance and other Town Ordinances
PB	Use approved by Planning Board through the Site Plan Review Process as defined in this Ordinance
BA	Use approved by the Board of Appeals through the Special Exception Review Process as defined in Section 10.3
PB/BA	Use approved first by Board of Appeals through the Special Exception Process (see Section 10.3) and then approved by Planning Board through the Site Plan Review Process
Yes	Use allowed without a permit
No	Use prohibited – not allowed

4.3. USES SUBSTANTIALLY SIMILAR TO PERMITTED USES MAY BE ALLOWED.

4.3.1. Uses Allowed Without a Permit: Uses substantially similar to those allowed without a permit, but that are not listed in the Schedule of Uses, may be allowed upon a ruling by the Code Enforcement Officer that such use is substantially similar to uses listed in the schedule.

4.3.2. Uses Requiring a Code Enforcement Officer Approval: Uses substantially similar to those requiring a Code Enforcement Officer Permit, but which are not listed in the Schedule of Uses, may be permitted by the Code Enforcement Officer.

4.3.3. Uses Requiring Planning Board Approval: Uses substantially similar to those requiring Planning Board approval, but which are not listed in the Schedule of Uses, may be approved by the Planning Board.

4.4. USES SUBSTANTIALLY SIMILAR TO PROHIBITED USES ARE PROHIBITED.

Uses substantially similar to any uses listed as a Prohibited Use in the Schedule of Uses shall be prohibited.

4.5. COMPLIANCE WITH PERFORMANCE STANDARDS REQUIRED

All uses permitted must occur and be maintained in compliance with the applicable requirements and performance standards of this Ordinance.

LAND USE STANDARDS

5.1. LAND USE STANDARDS

The following Land Use Standards shall govern the issuance of all permits. In reviewing permit applications submitted pursuant to this Ordinance, the Code Enforcement Officer or the Planning Board shall consider the following land use performance standards and make written findings that each applicable standard has been met prior to issuing final approval and/or the permit. In all instances, the burden of proof shall be upon the applicant.

5.2. DIMENSIONAL STANDARDS

All structures and uses shall conform to the following dimensional requirements:

	Standard/District	Hope Corner Village	Rural Residential	South Hope Village
1	Minimum Lot Size for Residential Use (per Dwelling Unit)	20,000 square feet	40,000 square feet	20,000 square feet
4	Minimum Lot Size for Non-Residential Use	20,000 square feet	60,000 square feet	20,000 square feet
5	Minimum Road Frontage	75 feet	150 feet	75 feet
6	Minimum Front Setback	25 feet	50 feet	25 feet
8	Minimum Side and Rear Setback (Principal Structures and Accessory Structures more than ten (10) feet in height)	10 feet	25 feet	10 feet
9	Minimum Side Setback (Accessory Structures up to ten (10) feet in height)	5 feet	10 feet	5 feet
12	Maximum Building Height	35 feet	35 feet	35 feet
15	Maximum Lot Coverage (includes Principal Structures, Accessory Structures and Impervious Surfaces: paved or non-vegetated)	50%	30%	50%

Note: For purposes of setback calculations, Principal and Accessory Structures include attached porches, decks and any other attached structures excluding steps only if the steps do not exceed 25 square feet in size. Ramps for handicapped access are exempted from setback calculations. Side and rear setbacks are measured from property lines and front setbacks are measured from the edge of the road surface.

Note 2: Minimum Road Frontage may be decreased by 50% when Access Points are shared in accordance with Section 5.3.1.5.

Note 3: Structures within the Shoreland Overlay District must also meet standards set forth in Section 6. However when the shoreline setback requirement is met, the standard for front setback is the same as the side and rear setback standard for that district.

5.3. GENERAL STANDARDS

5.3.1. Access – Vehicular

An Access Point is the point of intersection of a driveway, private way, or private road and a public road. Any Access Point constructed after the adoption of this Ordinance shall be in accordance with the following standards:

5.3.1.1. Avoidance of Hazardous Conflicts. Access Points must be designed and constructed in such a way to avoid hazardous conflicts with existing turning movements and traffic flows on and from the public road.

5.3.1.2. Sight Distance. Access Points must be designed so as to provide the minimum sight distance required by the Maine Department of Transportation standards.

5.3.1.3. On-site Vehicle Turn-Around. An Access Point and the associated driveway or private road must be designed to allow vehicles to exit onto the public road without having to back onto the public road.

5.3.1.4. Grades. The maximum grade for a driveway or private road is 5% for the first 45 feet from the edge of the public road. Thereafter, the grade may not exceed 10% for driveways or private roads on lots where the use is non-residential.

5.3.1.5. Shared Access/Entrance Points. Owners of adjacent lots are encouraged to construct a shared Access Point. Road frontage requirements, if any, may be reduced by up to 50% when two (2) adjacent lot owners share one Access Point.

5.3.1.6. Drainage. In accordance with 23 M.R.S.A. § 705, as amended, culverts of size, length, and type as determined by the Town or the State must be installed and must adequately protect the road to control erosion and runoff with best management practices.

5.3.1.7. Approval. New access points on Town roads require prior approval by the Road Commissioner who will certify that all standards in this section are met and set the standards for which proper drainage surrounding the road would be achieved.

5.3.2. Agriculture

Agricultural activities and agricultural structures, shall be conducted, constructed and operated in such a manner as to prevent soil erosion, sedimentation, and contamination or nutrient enrichment of surface waters. Buffering may be used to meet these standards and to separate agricultural uses from non-compatible uses.

5.3.3. Air Pollution

Air pollution control and abatement shall comply with applicable minimum federal and state requirements. Detailed plans to minimize any activity emitting toxic or odoriferous substances must be submitted to the Code Enforcement Officer before a permit for construction is granted. An environmental impact study may be required.

5.3.4. Buffers

For a change of use on a lot, unless it is determined by the Code Enforcement Officer or the Planning Board that the proposed new use does not create any additional adverse impact on adjacent lots, there must be adequate buffering installed to provide a year-round visual screen in order to minimize adverse impacts on adjacent lots. At a minimum, mechanical equipment and service and storage areas including but not limited to areas used for the storage or collection of discarded automobiles, auto parts, metals or other articles of salvage or refuse, must be sufficiently set back and screened from view. The buffer should be provided by evergreen vegetation or other suitable landscaping, fencing, changes in grade, or a combination of these materials.

5.3.5. Carbon Monoxide/Smoke Detectors

Dwelling units, transient accommodations or other structures where people live or regularly sleep, must be equipped with hard-wired carbon monoxide/smoke detectors.

5.3.6. Clear cutting

5.3.6.1. There shall be no clear cutting of trees within 75 feet of any public right-of-way.

5.3.6.2. Before trees are clear cut elsewhere within the Town, a written plan endorsing the clear cut and prescribing steps and a timetable for the revegetation of the land to retard erosion and preserve natural beauty shall be obtained from a professional forester registered in the State of Maine and filed with the Code Enforcement Officer. The plan shall be carried out by the property owner according to the timetable in the plan

5.3.7. Drive-Through Facilities

Any use that provides drive-through service must be located and designed to minimize the impact on adjacent uses and lots and traffic circulation. Communication systems must not be audible on adjacent residential lots. Adequate queuing space must be provided to prevent any vehicles from having to

stop and wait on a public road.

5.3.8. Dust, Fumes, Vapors, Gases, Odors, Glare, and Explosive Materials

Emission of odors, dust, dirt, fly ash, fumes, vapors or gases which could damage human health, animals, vegetation, or property must comply with State and Federal standards.

5.3.9. Exterior Lighting

All exterior lighting shall be designed to minimize adverse impact on adjacent properties. For site plan review, factors to be considered by the Planning Board in determining whether exterior lighting has been designed to minimize impact on neighboring properties shall include the location, height, shading and intensity/wattage of the proposed exterior lighting. Where practical, the Planning Board shall require exterior lighting fixtures to have motion detectors or other security options so that illumination occurs only when necessary and is otherwise dimmed or turned off.

5.3.10. Erosion and Sedimentation Controls

Erosion of soil and sedimentation of watercourses and water bodies shall be minimized. Measures relating to conservation, erosion, and sediment control shall be included, where applicable, as part of an erosion and sedimentation control plan, prepared and submitted by an applicant, if required by the Planning Board, and shall be implemented during the site preparation, construction, and clean-up stages.

5.3.11. Flood Hazard Areas

When any lot is located in a Flood Hazard Area as identified by the Federal Emergency Management Agency, and locally adopted Floodplain Management Ordinance, all structures on the lot shall be constructed with their lowest floor, including the basement, at least one foot above the 100-year flood elevation.

5.3.12. Garage Sales

A residential lot may conduct no more than five (5) separate garage sales during a one-year period. Duration of any one sale shall not exceed three (3) days.

5.3.13. Hazardous, Special and Radioactive Materials

The handling, storage, and use of all materials identified by the standards of a federal or state agency as hazardous, special or radioactive must be done in accordance with the standards of these agencies. All materials must be stored in a manner and location which is in compliance with appropriate rules and

regulations of the Maine Department of Public Safety and other appropriate federal, state, and local regulations.

5.3.14. Home Occupations

Home occupations shall be permitted where the conduct of the proposed business is compatible with the surrounding uses and shall not create unreasonable disturbance to or interference with the quiet enjoyment of surrounding properties. Home occupations are limited to those uses which may be conducted within a principal or accessory structure without substantially changing the appearance or condition of the structure. Any home occupation or profession that is accessory to and compatible with a residential use may be permitted if:

5.3.14.1. It is conducted wholly within the dwelling unit or in a structure customarily accessory to a dwelling unit.

5.3.14.2. It is conducted only by a member or members of the family residing in the dwelling unit and there are no more than two (2) employees, other than family members residing in the dwelling unit, at any one time.

5.3.14.3. Signage meets the standards of this Ordinance.

5.3.14.4. Stored materials are not visible from a public road or adjacent properties.

5.3.14.5. There is no unreasonable amount of noise, vibration, smoke, dust, electrical disturbance, odors, heat, glare, or activity.

5.3.14.6. The traffic generated does not increase the volume of traffic so as to create a traffic hazard or disturb the residential character of the immediate neighborhood.

5.3.14.7. In addition to the off-street parking provided to meet the normal requirements of the dwelling, further adequate off-street parking must be provided for the average maximum number of vehicles which are at the property at any time during peak operating hours.

5.3.14.8. The home occupation does not utilize more than fifty percent (50%) of the total floor area of the dwelling unit and accessory buildings.

5.3.14.9. The Code Enforcement Officer shall require an applicant to submit first class postage affixed letters addressed to all abutters of the applicant's property informing them of the request for a permit. In such cases, the Code Enforcement Officer may not issue a permit until five (5) business days have elapsed since the postmark on the letter.

5.3.15. Industrial Uses

The following provisions shall apply to all permitted industrial uses:

5.3.15.1. Danger. No material which is dangerous due to potential for explosion, extreme fire hazard, chemical hazard or radioactivity may be used, stored, manufactured, processed or assembled except in accordance with applicable State and Federal codes and regulations.

5.3.15.2. Vibration. With the exception of vibration necessarily involved in the construction or demolition of buildings, no vibration may be transmitted outside the lot where it originates.

5.3.16. Itinerant Peddlers

The purpose of this section is to provide reasonable rules and guidelines for the placement, conduct, and operation of itinerant peddlers within the Town.

5.3.16.1. Permitting Process and Requirements

- a. No person shall be engaged as an itinerant peddler without first obtaining a peddler's permit from the Code Enforcement Officer.
- b. No permit shall be issued to an itinerant peddler proposing to do business in a public way or public place until the Code Enforcement Officer has determined that the proposed location is safe for the operation of a transient peddler's business from a vehicle.
- c. In addition to the application and supporting documentation, the applicant for a peddler's permit shall provide the following information to the Code Enforcement Officer:
 - i. A description of the goods or product to be sold
 - ii. A site sketch of the proposed location where the peddler intends to operate
 - iii. A copy of the registration of the vehicle from which the goods or products will be peddled
 - iv. A copy of the driver's license of the peddler or other valid identification
 - v. A copy of a letter of permission from the property owner if

the peddler is proposing to operate from a specific parcel

- vi. Payment of the appropriate fee

5.3.16.2. Performance Standards

The itinerant peddler must comply with the following performance standards to operate in the Town:

- a. **Location of Operation.** The peddler shall only occupy the location specified on the permit.
- b. **Duration of Operation.** The peddler shall only operate during the calendar dates specified on the permit.
- c. **Hours of Operation.** The peddler shall only conduct business from one hour after sunrise to one hour before sunset.
- d. **Vehicular and Pedestrian Safety.** The peddler shall ensure that the operation is conducted in a safe and responsible manner for vehicular and pedestrian safety.
- e. **Signage.** The peddler shall display all signage for goods and products on or adjacent to the peddler's vehicle. The total area of all signage shall not exceed fifty (50) square feet. All signage shall be removed at the close of business each day.
- f. **Closure at the End of the Business Day.** At the close of business each day the peddler shall remove from the selling location the peddler's vehicle, all signage, and any other indicators of the peddling operation.
- g. **Site Appearance.** The peddler shall ensure that the site is kept neat and clean and that no offensive noise, vibration, smoke, dust, glare, traffic or parking problem is created because of the peddler's operation.

5.3.17. Junkyards/Automobile Graveyard/Automobile Recycling Facilities

Junkyards, automobile graveyards, and automobile recycling businesses, whether new or existing, shall be regulated by 30-A M.R.S.A. § 3754 et seq., as amended.

5.3.18. Mineral Exploration and Extraction

All exploration/extraction activities, including test pits and holes, shall be capped, refilled, or secured by other equally effective measures so as to reasonably restore disturbed areas and to protect the public health and safety. No portion of any ground area disturbed by the extraction activity shall be closer than seventy-five (75) feet from the edge of a public road.

5.3.19. Mobile Homes (Manufactured Housing)

The following provisions shall apply to all permitted mobile homes (manufactured housing):

5.3.19.1. HUD Approval Sufficient. All manufactured housing, as defined, constructed after July 1, 1976 and bearing the seal of the Department of Housing and Urban Development which certifies the manufactured home was built pursuant to the provisions of the Manufactured Homes Construction and Safety Standards as revised shall be deemed to have fulfilled the requirements of this section.

5.3.19.2. Minimum Electrical Safety Standards. All manufactured housing shall meet the minimum safety requirements for electrical installation and maintenance as provided for by the National Electrical Code.

5.3.19.3. Minimum Fire Prevention Standards. All manufactured housing shall meet the minimum fire safety requirements as provided for by the National Electrical Code and the Manufactured Housing Construction Standards of 1976 established by the Department of Housing and Urban Development (HUD).

5.3.19.4. Minimum Plumbing Standards. All manufactured housing shall meet the minimum standards of the Maine Plumbing Code as amended.

5.3.20. Mobile Home Parks

The following provisions shall apply to all permitted mobile home parks:

5.3.20.1. Except as stipulated in this ordinance, all mobile home parks shall conform to all applicable state laws and the provisions of the Subdivision Ordinance. Where provisions of this ordinance conflict with the specific provisions of the Subdivision Ordinance; the provisions of this ordinance shall prevail.

5.3.20.2. Lots served by individual subsurface wastewater disposal systems shall be approved by the Local Plumbing Inspector; lots served by central subsurface wastewater disposal systems shall use a system approved by

the Maine Department of Health and Human Services:

5.3.20.3. The overall density of any Mobile Home Park served by any subsurface wastewater disposal system(s) shall not exceed one dwelling unit per 20,000 square feet of total park area, exclusive of the area of road rights-of-way.

5.3.20.4. All structures and uses shall conform to the following dimensional requirements:

	Standard/District	Hope Corner Village	Rural Residential	South Hope Village
1	Minimum Lot Size per Dwelling Unit in a Mobile Home Park with individual subsurface wastewater disposal	20,000 square feet	20,000 square feet	20,000 square feet
2	Minimum Lot Size per Dwelling Unit in a Mobile Home Park with centralized wastewater treatment	12,000 square feet	12,000 square feet	12,000 square feet
3	Minimum Front Setback for Dwelling Units in a Mobile Home Park	30 feet	30 feet	30 feet
4	Minimum Side Setback for Dwelling Units in a Mobile Home Park	20 feet	20 feet	20 feet
5	Minimum Rear Setback for Dwelling Units in a Mobile Home Park	20 feet	20 feet	20 feet
6	Maximum Lot Coverage in a Mobile Home Park	50%	30%	50%

5.3.21. Noise

5.3.21.1. Noise shall not exceed 75 decibels between the hours of 8 a.m. and 9 p.m. or 50 decibels between the hours of 9 p.m. and 8 a.m., as measured at lot lines at a height of at least four (4) feet above the ground surface in accordance with the “American Standard Method for the Physical Measurement of Sound” (ASTM E1014-12).

5.3.21.2. The following noises are exempted from section 5.3.21.1 above:

- a. Church bells,
- b. Permissible construction or agricultural activities occurring between the hours of 8 a.m. and 9 p.m.,
- c. Vehicles lawfully travelling on public roads, and
- d. Sirens, whistles or bells lawfully used by emergency vehicles or any other alarm systems used in any emergency situation.

5.3.21.3. A person or business making a noise complaint must provide the Code Enforcement Officer with adequate evidence of a violation to allow the Code Enforcement Officer to properly issue notice of the alleged violation to the person or business against whom the complaint is made. Any person or business receiving notice of an alleged violation shall be entitled to submit evidence which rebuts the allegation. The Code Enforcement Officer shall ultimately have the authority to determine whether a violation has occurred.

5.3.22. Off-Street Parking

5.3.22.1. In all new construction, alterations and changes of use, there shall be provided off-street parking and loading space adequate for their use. The following minimum number of spaces shall be provided and maintained in case of new construction, alterations and changes in use:

Use	Parking Space Requirements
Residential dwellings	Two (2) parking spaces for each dwelling unit
Transient Accommodations	Bed and Breakfast accommodations, motels, hotels, boarding houses, and inns with ten (10) rooms or less: two (2) parking spaces plus one space for each guest room. Motels, hotels, boarding houses, and inns with more than ten (10) rooms: one parking space for each guest room plus one space for each three (3) employees
Schools	Five (5) parking spaces for each classroom plus one space for each four (4) employees
Theaters, churches, other public assembly places	One parking space for every four (4) seats or one parking space for every one hundred (100) square feet.
Retail Stores	One parking space for every two hundred (200) square feet of retail area, plus one parking space for every two (2) employees, unless public parking is provided
Restaurants, eating or drinking establishments	One parking space for every four (4) seats, plus one parking space for every two (2) employees, unless public parking is provided
Professional Offices and Public Buildings	One parking space for every two hundred (200) square feet of gross leasable area, exclusive of cellar and bulk storage areas, unless public parking is provided
Industrial	One parking space for each 1.5 employees, based on the highest expected average employee occupancy, plus visitor and customer parking to meet the needs of specific operations

5.3.22.2. No off-street parking shall be located within 10 feet of any side or rear lot line.

5.3.22.3. The Planning Board may approve the joint use of a parking facility by 2

or more principal buildings or uses where it is clearly demonstrated that the parking facility will substantially meet the intent of the requirements by reasons of variation in the time of use by patrons or employees among such establishments.

- 5.3.22.4.** Required off-street parking shall be located on the same lot as the principal building or use, except that where off-street parking cannot be provided on the same lot, the Planning Board may permit such off-street parking to be located a reasonable distance from the principal building or use, measured along the line of public access. If serving a non-residential use, such parking area shall be in a non-residential district. Such parking areas shall be held under the same ownership or lease.
- 5.3.22.5.** Parking areas shall be designed to prevent stormwater runoff from flowing directly into a water body or wetland, and where feasible, to retain all runoff on-site.
- 5.3.22.6.** Where a parking area abuts a public right-of-way, a continuous strip of landscaping of a minimum of six (6) feet in width along the public right-of-way within the parking area shall be provided and properly maintained, provided, however, that the landscaping shall not interfere with sight distance and traffic safety.
- 5.3.22.7.** Parking areas shall be divided into small areas of no more than fifty (50) parking spaces each, by landscaping such as shade trees, shrubs, and park benches.
- 5.3.22.8.** The Planning Board may, at its sole discretion, increase or decrease the above parking requirements depending upon individual applicant circumstances. An applicant requesting a deviation from the above standards must demonstrate to the satisfaction of the Planning Board that the request is appropriate to the planned use.

5.3.23. Private Ways

The Code Enforcement Officer may approve the use of a private way to provide frontage and access to individual lots of land in accordance with the following provisions:

- 5.3.23.1.** A plan showing the private way shall be prepared by a registered land surveyor. The plan shall be labeled "Plan of a Private Way" and shall provide an approval block for the signature of the Code Enforcement Officer. The plan shall delineate the proposed way and each of the lots to be served by the private way.

5.3.23.2. Private ways shall be designed so as not to be subject to seasonal flooding or washout and not to disturb wetlands. Drainage ditches and culverts shall be provided wherever appropriate. A street plan, cross section and drainage plan shall be submitted for each private way serving three (3) or more lots and approved by the Road Commissioner.

5.3.23.3. The plan shall bear notes that the Town will not be responsible for the maintenance, repair or plowing of the private way, and that further lot divisions utilizing the private way are prohibited without prior approval of the Code Enforcement Officer.

5.3.23.4. If the private way or private road is to provide access to two (2) or more lots, a maintenance agreement shall be required by the Code Enforcement Officer and recorded in the Knox County Registry of Deeds. The maintenance agreement shall specify the rights and responsibilities of each lot owner with respect to the maintenance, repair and plowing of the private way.

5.3.23.5. The construction of private ways shall comply with the following minimum standards. If the private way is to provide access to 3 or more lots, the construction of the private way shall comply with the standards for a private road as defined under Section 1400 of the Subdivision Ordinance.

	Number of Units or Lots Served			
	1	2	3-4	5 or More
Right-of-way width	30'		Same as street design standards for Private Roads in Subdivision Ordinance	Same as street design standards for Public Roads in Subdivision Ordinance
Minimum roadway width	12'	16'	" "	" "
Minimum sub-base (heavy road gravel with min. stone size 4")	12"	15"	" "	" "
Minimum wearing surface (fine gravel)	2"		" "	" "
Maximum grade	10%	8%	" "	" "
Minimum grade	0.5%	0.5%	" "	" "
Turnaround at dead end	Circle or "T"		" "	" "
Storm water drainage	Approval of Road Commissioner		" "	" "

5.3.23.6. If the Code Enforcement Officer determines the need, a turnout to provide space for 2 vehicles to pass shall be provided for every 500 feet of the private way.

5.3.23.7. The driveway shall not cause a hazard to pedestrian or vehicular traffic. The Site Plan Review criteria for vehicular access (minimum sight distance in each direction based on allowable speed) shall be used where necessary.

5.3.23.8. Not more than 1 driveway is to be allowed over any given front lot to serve back lots.

5.3.23.9. Any waiver requires Planning Board approval.

5.3.23.10. The plan and/or deed description of the private way shall be recorded in the Knox County Registry of Deeds within 90 days of the date of approval by the Code Enforcement Officer. If it is not recorded within this time period, the approval shall be null and void.

5.3.23.11. Any change, such as the creation of another lot, shall require prior approval by the Code Enforcement Officer under this subsection.

5.3.23.12. Private ways approved by the Code Enforcement Officer must be constructed and utilized at the time the lot is developed.

5.3.24. Refuse Disposal

All solid and liquid wastes shall be disposed of in a timely basis and in an environmentally safe manner. Solid and liquid wastes shall not be accumulated so as to be a safety hazard.

5.3.25. Road System Adequacy

For developments that generate one hundred (100) or more peak hour trips based on the latest edition of the Trip Generation Manual of the Institute of Traffic Engineers, intersections on major access routes to the development site within one (1) mile of any entrance road which are functioning at a Level of Service of D or better prior to the development must function at a minimum at Level of Service D after development. This requirement may be waived by the Planning Board if the project is located within a growth area designated in the Town's adopted Comprehensive Plan and the Board determines that the project will not have an

unnecessary adverse impact on traffic flow or safety.

5.3.26. Signs

5.3.26.1. Signs Prohibited. Any sign, whether new or existing, which poses a traffic hazard or a nuisance to adjacent lots due to illumination, placement, display, or obstruction of existing signs, shall not be permitted.

5.3.26.2. Temporary Signs. Signs of a temporary nature, such as, advertisements or notices of charitable functions or community meetings, lost pets, and other non-commercial signs of a similar nature, are permitted for a period not to exceed sixty (60) days, provided that the persons who posted the signs shall be responsible for their removal. This section does not apply to signs posted by the Town.

5.3.26.3 Sign Requirements. All signs, other than temporary signs, shall meet the following requirements:

- a. The maximum total display area of all signs, including attached and detached, on each premises shall not exceed fifty (50) square feet. In addition, one row of letters identifying the name or owner of the business is permitted on the front of the building, provided the letters are not illuminated and do not exceed twelve (12) inches in height.
- b. Signs may be externally illuminated only by downward, shielded, non-flashing lights so as to effectively prevent beams of light from being directed at neighboring residential properties or at oncoming traffic on a public road unless the light is of such low intensity or brilliance so as not to cause glare or impair the vision of the driver of any motor vehicle.

5.3.26.4. Exempt Signs. The following signs are exempt from the provisions of this section except as otherwise provided for herein: Traffic control signs, signals, and/or other devices regulating or enhancing public safety, erected by a governmental body.

5.3.27. Site Conditions

During construction, the site shall be maintained and left each day in a safe and sanitary manner and any condition which could lead to personal injury or property damage shall be immediately corrected by the developer upon order of the Code Enforcement Officer or other authorized personnel.

5.3.28. Soils

All land uses shall be located on soils in or upon which the proposed uses or structures can be established or maintained without causing undue adverse environmental impacts, including severe erosion, mass soil movement, and water pollution, whether during or after construction.

5.3.29. Stormwater Management

Adequate provisions must be made for the collection and disposal of all stormwater that runs off proposed streets, parking areas, roofs, and other surfaces, through a stormwater drainage system and maintenance plan, which must not have adverse impacts on abutting or downstream properties. To the extent possible, the plan must retain stormwater on the site using the natural features of the site.

5.3.30. Subsurface Wastewater Disposal and Sewers

On-site subsurface wastewater disposal shall comply with applicable provisions of the State of Maine Subsurface Wastewater Disposal Rules, Chapter 241 (Maine State Plumbing Code, Part II), as amended.

5.3.31. Temporary Storage

Portable or mobile trailers, vans, similar vehicles, shipping containers, or railroad cars may be used for storage only upon approval of the Code Enforcement Officer and only for a temporary period not to exceed one (1) year. Such approval may be extended by the Code Enforcement Officer for successive periods of up to six (6) months each if a finding can be made that: 1) there is a valid temporary need which cannot be met with the principal structure, 2) adequate economic hardship can be shown, 3) the initial approval, or any renewal, of the use will not in any way be detrimental to the neighboring properties, and 4) the use is not intended as a permanent or long term use.

5.3.32. Transient Accommodations, Bed and Breakfast Accommodations

Bed and Breakfast accommodations shall be permitted in the private, year round residence of the host family who live on the premises provided that the maximum number of guests at any time is eight (8) persons; the maximum number of guestrooms is three (3); and breakfast is the only meal provided by the host family.

5.3.33. Utility Installation

The installation of utilities such as electrical service, transmission lines and associated cables shall be installed so as to be consistent with the abutting

properties.

5.3.34. Wastewater Discharge

No building, structure, activity, or use shall discharge untreated wastewater directly to a water body. There shall be no storage of materials which by their volume, toxicity, temperature or obnoxiousness or by their location, will run off from or percolate into the soils and pollute subsurface or ground waters.

5.3.35. Water Quality Protection

An existing or proposed use on a lot must not adversely impact either the quality or quantity of groundwater available to adjacent lots.

5.3.36. Wind Turbines

The intent of the Section is to regulate the placement, construction, and modification of wind turbines while allowing the safe, effective, and efficient use of this technology.

5.3.36.1. Siting Requirements for Wind Turbines

- a. Wind turbines shall be a permitted use in all Districts.
- b. Each parcel shall be limited to one wind turbine.
- c. Wind turbine towers shall not exceed a maximum height of one hundred (100) feet above existing grade, except school parcels which shall not exceed a maximum height of one hundred forty (140) feet above existing grade.
- d. Wind turbine towers shall not be lighted unless required by the Federal Aviation Administration (FAA).

5.3.36.2. Setback Requirements

Wind turbines shall be set back a distance equal to one hundred ten percent (110%) of the height of the tower and blade length from adjoining property lines.

5.3.36.3. Sound Requirements

- a. An automatic braking, governing or feathering system shall be required to prevent uncontrolled rotation.

- b. Prior to approval, the applicant shall provide documentation from the manufacturer that the wind turbine will not produce noise levels in excess of the standards in subsection c, as measured at the closest property line.
- c. After approval and installation of the wind turbine, the Code Enforcement Officer shall perform sound measurements at the closest property line to determine ambient and operating decibel levels utilizing the table below.

Ambient Reading Without Wind Tower (dBA)	Maximum Permitted Reading With Wind Tower (dBA)
45	55
50	56
55	61
60	62
65	66

- d. Upon complaint of an abutter, ambient and maximum permitted decibel measurements shall be performed by an agent designated by the Code Enforcement Officer. The report shall be submitted to the Code Enforcement Officer for review. The fee for this service shall be paid by the complainant unless the maximum permitted decibel level has been exceeded in which case the owner of the wind turbine shall pay the fee.
- e. If the maximum decibel readings are exceeded, the installation shall be considered in violation of the provisions of Section 5.3.21 and this Section.
- f. The nuisance violation must be corrected within 90 days from notification of the violation and if the violation cannot be corrected, the wind turbine shall be removed or relocated.

5.3.36.4. Permitting Requirements

In addition to the application and supporting documentation required by Section 8, the applicant for a wind turbine shall provide the following information to the Code Enforcement Officer;

- a. A site plan of the property showing the location of the proposed wind turbine, existing and proposed structures, and any other significant features on the property,

- b. Structural drawings of the tower, base pad, footings, and guy wires prepared by the manufacturer or a professional engineer,
- c. Drawings and specifications of the generator, hub, and blades, prepared by the manufacturer or a professional engineer,
- d. Photographs of the proposed site and the specific wind turbine to be installed.

5.3.37. Wireless Telecommunications Facilities

5.3.37.1. Applicability

This section applies to all construction and expansion of wireless telecommunications facilities, including communication facilities and towers.

5.3.37.2. Exemptions

The following are exempt from the provisions of this Ordinance:

- a. Wireless communication facilities for telecommunications by public officials
- b. Amateur (ham) radio stations licensed by the Federal Telecommunications Commission (FCC)
- c. Parabolic antennas less than seven (7) feet in diameter, that are an accessory use of the property
- d. Maintenance, repair or reconstruction of a wireless telecommunications facility and related equipment, provided that there is no change in the height or any other dimension of the facility
- e. A temporary wireless telecommunications facility, in operation for a maximum period of one hundred eighty (180) days
- f. An antenna that is an accessory use to a residential dwelling unit

5.3.37.3. Site Plan Review Application

Wireless telecommunications facilities, including expansions of existing facilities, shall comply with the application requirements of Section 9, Site Plan Review, and shall also include the following additional information:

- a. A copy of the FCC license for the facility, or a signed statement from the owner or operator of the facility attesting that the facility will comply with FCC regulations.

- b.** A USGS 7.5 minute topographic map showing the current location of all structures and wireless telecommunications facilities above one hundred fifty (150) feet in height above ground level, except antennas located on roof tops, within a five (5) mile radius of the proposed facility. This requirement shall be deemed to have been met if the applicant submits current information (i.e. within thirty (30) days of the date the application is filed) from the FCC Tower Registration Database. Include documentation of longitude and latitude.
- c.** A site plan prepared and certified by a professional engineer registered in Maine indicating the location, type and height of the proposed facility, antenna capacity, on-site and abutting off-site land uses, means of access and setbacks from property lines. The site plan must include certification by a professional engineer registered in Maine that the proposed facility complies with all American National Standards Institute (ANSI) standards and other applicable technical codes.
- d.** Elevation drawings of the proposed facility, and any other proposed structures, showing height above ground level.
- e.** A landscaping plan indicating the proposed placement of the facility on the site; location of existing structures, trees, and other significant site features; the type and location of plants proposed to screen the facility; the method of fencing, the color of the structure, and the proposed lighting method.
- f.** Photo simulations of the proposed facility taken from perspectives determined by the Planning Board, or their designee, during the pre-application review. Each photo must be labeled with the line of sight, elevation, and with the date taken imprinted on the photograph. The photos must show the color of the facility and method of screening.
- g.** A written description of how the proposed facility fits into the applicant's telecommunications network. This submission requirement does not require disclosure of confidential business information.
- h.** Evidence demonstrating that no existing building, site, or structure can accommodate the applicant's proposed facility, which may consist of any one or more of the following:

 - i.** Evidence that no existing facilities are located within the

targeted market coverage area as required to meet applicant's engineering requirements.

- ii.** Evidence that existing facilities do not have sufficient height or cannot be increased in height at a reasonable cost to meet the applicant's engineering requirements.
- iii.** Evidence that existing facilities do not have sufficient structural strength to support applicant's proposed antenna and related equipment. Specifically:
 - (1)** Planned, necessary equipment would exceed the structural capacity of the existing facility, considering the existing and planned use of those facilities, and these existing facilities cannot be reinforced to accommodate the new equipment.
 - (2)** The applicant's proposed antenna or equipment would cause electromagnetic interference with the antenna on the existing towers or structures, or the antenna or equipment on the existing facility would cause interference with the applicant's proposed antenna.
 - (3)** Existing or approved facilities do not have space on which planned equipment can be placed so it can function effectively.
- iv.** For facilities existing prior to the effective date of this Ordinance, the fees, costs, or contractual provisions required by the owner in order to share or adapt an existing facility are unreasonable. Costs exceeding the pro rata share of a new facility development are presumed to be unreasonable. This evidence shall also be satisfactory for a tower built after the passage of this Ordinance or amendment thereto.
- i.** A signed statement stating that the owner of the wireless telecommunications facility and his or her successors and assigns agree to:
 - i.** Respond in a timely, comprehensive manner to a request for information from a potential collocation applicant, in exchange for a reasonable fee not in excess of the actual cost of preparing a response;

- ii. Negotiate in good faith for shared use of the wireless telecommunications facility by third parties;
 - iii. Allow shared use of the wireless telecommunications facility if an applicant agrees in writing to pay reasonable charges for collocation;
 - iv. Require no more than a reasonable charge for shared use. This charge may include but is not limited to a pro rata share of the cost of site selection, planning project administration, land costs, site design, construction, financing, return on equity, depreciation, and all of the costs of adapting the tower or equipment to accommodate a shared user without causing electromagnetic interference. The amortization of the above costs by the facility owner shall be accomplished at a reasonable rate, over the useful life span of the facility.
- j. A form of surety approved by the Planning Board to pay for the costs of removing the facility if it is abandoned.

5.3.37.4. Standards

- a. **Location.** A wireless telecommunications facility may be permitted only in the following locations:
 - i. Within 1,000 feet of the top of Hatchet Mountain;
 - ii. Collocated on an existing facility;
 - iii. Placed onto an existing structure when it is designed to blend harmoniously into the existing architecture and appearance of the original structure. Examples include, but are not limited to, a facility using a steeple which has the appearance of being part of the existing steeple or a facility atop a building which has the appearance of a chimney, vent, or other traditional appurtenance to the existing building; or
 - iv. On Town Property
- b. **Siting on Town Property.** If an applicant proposes to locate a new wireless telecommunications facility on municipal property, or expand an existing facility on Town property, the applicant must show the following:
 - i. The proposed location complies with applicable municipal

policies and ordinances.

- ii. The proposed facility will not interfere with the intended purpose of the property.
- iii. The applicant has adequate liability insurance and a lease agreement with the Town that includes reasonable compensation for the use of the property and other provisions to safeguard the public rights and interests in the property.
- c. **Design for Collocation.** A new or expanded wireless telecommunications facility and related equipment must be designed and constructed to accommodate future collocation of at least three (3) additional wireless telecommunications facilities or providers. Collocation shall not be considered an expansion.
- d. **Height.** The maximum height of new or expanded wireless telecommunications facilities shall be two hundred (200) feet. The facility shall be designed to collapse in a manner that does not harm other property.
- e. **Setbacks.** A new or expanded wireless telecommunications facility must comply with the setback requirements set forth in this Ordinance, or be set back one hundred ten percent (110%) of its height from all property lines, whichever is greater. The setback may be satisfied by including adjacent areas outside the property boundaries if secured by an easement. An antenna is exempt from the setback requirement if it extends no more than five (5) feet horizontally from the edge of the structure to which it is attached, and it does not encroach upon an abutting property.
- f. **Landscaping.** The base of a new or expanded wireless telecommunications facility must be screened, with plants, from view by abutting properties, to the maximum extent practicable. Existing plants and natural land forms on the site shall also be preserved to the maximum extent practicable.
- g. **Fencing.** A new or expanded wireless telecommunications facility must be fenced with a secured perimeter fence of a height of eight (8) feet to discourage trespassing on the facility and to discourage climbing on any structure by trespassers.
- h. **Lighting.** A new or expanded wireless telecommunications facility must be illuminated as necessary to comply with FAA or other applicable state, federal and local requirements or Site Plan

Review conditions. Security lighting may be used as long as it is shielded to be down-directional to retain light within the boundaries of the site, to the maximum extent practicable.

- i. Color and Materials.** A new or expanded wireless telecommunications facility must be constructed with materials and colors that match or blend with the surrounding natural or built environment, to the maximum extent practicable. Unless otherwise required, muted colors, earth tones, and subdued hues shall be used.
- j. Structural Standards.** A new or expanded wireless telecommunications facility must comply with the current Electronic Industries Association/Telecommunications Industries Association (EIA/TIA) 222 Revision Standard entitled "Structural Standards for Steel Antenna Towers and Antenna Supporting Structures."
- k. Noise.** Except during construction, repair, or replacement, operation of a back-up power generator at any time during a power failure and testing of a back-up generator between 8 a.m. and 9 p.m. are exempt from the noise standards set forth in this Ordinance.

5.3.37.5. Standard Conditions of Approval

The following standard conditions of approval shall be a part of any approval issued by the Planning Board. Reference to the conditions of approval shall be clearly noted on the final approved site plan, and shall include:

- a.** The owner of the wireless telecommunications facility and his or her successors and assigns agree to:

 - i.** Respond in a timely, comprehensive manner to a request for information from a potential collocation applicant, in exchange for a reasonable fee not in excess of the actual cost of preparing a response;
 - ii.** Negotiate in good faith for shared use of the wireless telecommunications facility by third parties;
 - iii.** Allow shared use of the wireless telecommunications facility if an applicant agrees in writing to pay reasonable charges for collocation.

- iv. Require no more than a reasonable charge for shared use of the wireless telecommunications facility. This charge may include, but is not limited to, a pro rata share of the cost of site selection, planning project administration, land costs, site design, construction and maintenance, financing, return on equity, depreciation, and all of the costs of adapting the tower or equipment to accommodate a shared user without causing electromagnetic interference. The amortization of the above costs by the facility owner shall be accomplished at a reasonable rate, over the life span of the useful life of the wireless telecommunications facility.

5.3.37.6. Abandonment

A wireless telecommunications facility that is not operated for a continuous period of twelve (12) months shall be considered abandoned. The Code Enforcement Officer shall notify the owner of an abandoned facility in writing and order the removal of the facility within ninety (90) days of receipt of a written notice. The owner of the facility shall have thirty (30) days from the receipt of the notice to demonstrate to the Code Enforcement Officer that the facility has not been abandoned. If the Owner fails to show that the facility has not been abandoned, the owner shall have sixty (60) days to remove the facility. If the facility is not removed within this time period, the Town may utilize the surety to remove the facility at the owner's expense. The owner of the facility shall pay all site reclamation costs deemed necessary and reasonable to return the site to its pre-construction condition, including the removal of roads, and reestablishment of vegetation, to the extent that such costs are not covered by the surety. The owner of the facility may apply to the Planning Board for release of the surety when the facility and related equipment are removed to the satisfaction of the Planning Board.

SHORELAND ZONING**6.1. PURPOSES**

The purposes of this Shoreland Overlay Zoning District are to further the maintenance of safe and healthful conditions; to prevent and control water pollution; to protect fish spawning grounds, aquatic life, bird and other wildlife habitat; to protect buildings and lands from flooding and accelerated erosion; to protect archaeological and historic resources; to protect freshwater wetlands; to control building sites, placement of structures and land uses; to conserve shore cover, and visual as well as actual points of access to inland waters; to conserve natural beauty and open space; and to anticipate and respond to the impact of development in shoreland areas.

6.2. AUTHORITY

This Section has been prepared in accordance with the provisions of 38 M.R.S.A. §§ 435-449.

6.3. APPLICABILITY

This Section applies to all land areas within two-hundred and fifty (250) feet, horizontal distance, of the normal high-water line of any great pond or river, or upland edge of a freshwater wetland, and all land areas within seventy-five (75) feet, horizontal distance, of the normal high-water line of a stream.

6.4. RESERVED**6.5. RESERVED****6.6. RESERVED****6.7. RESERVED****6.8. RESERVED****6.9. DISTRICTS AND ZONING MAP****6.9.1. Official Shoreland Zoning Map**

The Official Zoning Map, as it may be amended from time to time, shall also be the Official Shoreland Zoning Map. This map identifies all areas required to be zoned under the Mandatory Shoreland Zoning Act. These include areas within 250 feet, horizontal distance, of the normal high water line of great ponds and tidal waters; within 250 feet of the upland edge of coastal wetlands and non-forested freshwater wetlands greater than 10 acres in size; and within 75 feet of the normal high water line of streams. The areas to which this Section is applicable are hereby divided into the following districts as shown on the Official Zoning Map which is made a part of this

Ordinance: Resource Protection; Limited Residential; Limited Commercial and Stream Protection.

6.10. INTERPRETATION OF DISTRICT BOUNDARIES

Unless otherwise set forth on the Official Zoning Map, district boundary lines are property lines, the centerlines of streets, roads and rights of way, and the boundaries of the shoreland area as defined herein. Where uncertainty exists as to the exact location of district boundary lines, the Zoning Board of Appeals shall be the final authority as to location.

6.11. LAND USE REQUIREMENTS

Except as hereinafter specified, no building, structure or land shall hereafter be used or occupied, and no building or structure or part thereof shall hereafter be erected, constructed, expanded, moved, or altered and no new lot shall be created except in conformity with all of the regulations herein specified for the district in which it is located, unless a variance is granted.

6.12. NON-CONFORMANCE

6.12.1. Purpose.

It is the intent of this Section to promote land use conformities, except that non-conforming conditions that existed before the effective date of this Ordinance or amendments thereto shall be allowed to continue, subject to the requirements set forth in Section 6.12. Except as otherwise provided in this Ordinance, a non-conforming condition shall not be permitted to become more non-conforming.

6.12.2. General

6.12.2.1. Transfer of Ownership. Non-conforming structures, lots, and uses may be transferred, and the new owner may continue the non-conforming use or continue to use the non-conforming structure or lot, subject to the provisions of this Section.

6.12.2.2. Repair and Maintenance. This Section allows, without a permit, the normal upkeep and maintenance of non-conforming uses and structures including repairs or renovations that do not involve expansion of the non-conforming use or structure, and such other changes in a non-conforming use or structure as federal, state, or local building and safety codes may require.

6.12.3. Non-conforming Structures

6.12.3.1. Expansions. A non-conforming structure may be added to or expanded after obtaining a permit from the same permitting authority as that for a new

structure, if such addition or expansion does not increase the non-conformity of the structure with the water setback, and is in accordance with subparagraphs (a), and (b) below.

- a.** Legally existing non-conforming principal and accessory structures that do not meet the water body, tributary stream, or wetland setback requirements may be expanded or altered as follows, as long as all other applicable standards contained in this Ordinance are met.
 - i.** Expansion of any portion of a structure within 25 feet, horizontal distance, of the normal high-water line of a water body, tributary stream, or upland edge of a wetland is prohibited, even if the expansion will not increase nonconformity with the water body, tributary stream or wetland setback requirement.
 - ii.** Expansion of an accessory structure that is located closer to the normal high-water line of a water body, tributary stream, or upland edge of a wetland than the principal structure is prohibited, even if the expansion will not increase nonconformity with the water body or wetland setback requirement.
 - iii.** For structures located less than 75 feet, horizontal distance, from the normal high-water line of a water body, tributary stream, or upland edge of a wetland, the maximum combined total floor area for all portions of those structures within that 75-foot distance is 1,000 square feet, and the maximum height of any portion of a structure that is within 75 feet, horizontal distance, of a water body, tributary stream or upland edge of a wetland is 20 feet or the height of the existing structure, whichever is greater, provided that no expansion shall occur that does not comply with subsections i and ii.
 - iv.** For structures located less than 100 feet, horizontal distance, from the normal high-water line of a great pond or a river flowing to a great pond, the maximum combined total floor area for all portions of those structures within that 100-foot distance is 1,500 square feet, and the maximum height of any portion of a structure that is within 100 feet, horizontal distance, of a great pond is 25 feet or the height of the existing structure, whichever is greater, except that any portion of those structures located less than 75 feet, horizontal distance from the normal high-water line of a water body, tributary stream, or the upland edge of a wetland must meet the floor area and

height limits of division (iii). No expansion shall occur that does not comply with subsections i and ii.

For the purposes of Section 6.12.3.1 (a) (iv), a basement is not counted toward floor area.

- b. Whenever a new, enlarged, or replacement foundation is constructed under a non-conforming structure, the structure and new foundation must be placed such that the setback requirement is met to the greatest practical extent as determined by the Planning Board or its designee, basing its decision on the criteria specified in Section **6.12.3.2**, below. If the completed foundation does not extend beyond the exterior dimensions of the structure and the foundation does not cause the structure to be elevated by more than three (3) additional feet, as measured from the uphill side of the structure, it shall not be considered to be an expansion of the structure.

6.12.3.2. Relocation. A non-conforming structure may be relocated within the boundaries of the parcel on which the structure is located provided that the site of relocation conforms to all setback requirements to the greatest practical extent as determined by the Planning Board or its designee, and provided that the applicant demonstrates that the present subsurface wastewater disposal system meets the requirements of State law and the State of Maine Subsurface Wastewater Disposal Rules (Rules), or that a new system can be installed in compliance with the law and said Rules. In no case shall a structure be relocated in a manner that causes the structure to be more non-conforming.

In determining whether the building relocation meets the setback to the greatest practical extent, the Planning Board or its designee shall consider the size of the lot, the slope of the land, the potential for soil erosion, the location of other structures on the property and on adjacent properties, the location of the septic system and other on-site soils suitable for septic systems, and the type and amount of vegetation to be removed to accomplish the relocation. When it is necessary to remove vegetation within the water or wetland setback area in order to relocate a structure, the Planning Board shall require replanting of native vegetation to compensate for the destroyed vegetation. In addition, the area from which the relocated structure was removed must be replanted with vegetation. Replanting shall be required as follows:

- a. Trees removed in order to relocate a structure must be replanted with at least one native tree, three (3) feet in height, for every tree removed. If more than five trees are planted, no one species of tree shall make up more than 50% of the number of trees planted. Replaced trees must be planted no further from the water or wetland than the trees that were removed.

Other woody and herbaceous vegetation, and ground cover, that are removed or destroyed in order to relocate a structure must be re-established. An area at least the same size as the area where vegetation and/or ground cover was disturbed, damaged, or removed must be reestablished within the setback area. The vegetation and/or ground cover must consist of similar native vegetation and/or ground cover that was disturbed, destroyed or removed.

- b. Where feasible, when a structure is relocated on a parcel the original location of the structure shall be replanted with vegetation which may consist of grasses, shrubs, trees, or a combination thereof.

6.12.3.3. Reconstruction or Replacement. Any non-conforming structure which is located less than the required setback from a water body, tributary stream, or wetland and which is removed, or damaged or destroyed, regardless of the cause, by more than 50% of the market value of the structure before such damage, destruction or removal, may be reconstructed or replaced provided that a permit is obtained within eighteen (18) months of the date of said damage, destruction, or removal, and provided that such reconstruction or replacement is in compliance with the water body, tributary stream or wetland setback requirement to the greatest practical extent as determined by the Planning Board or its designee in accordance with the purposes of this Ordinance. In no case shall a structure be reconstructed or replaced so as to increase its non-conformity. If the reconstructed or replacement structure is less than the required setback it shall not be any larger than the original structure, except as allowed pursuant to Section 6.12.3.1 above, as determined by the non-conforming floor area and volume of the reconstructed or replaced structure at its new location. If the total amount of floor area and volume of the original structure can be relocated or reconstructed beyond the required setback area, no portion of the relocated or reconstructed structure shall be replaced or constructed at less than the setback requirement for a new structure. When it is necessary to remove vegetation in order to replace or reconstruct a structure, vegetation shall be replanted in accordance with Section 6.12.3.2 (a) above.

Any non-conforming structure which is located less than the required setback from a water body, tributary stream, or wetland and which is removed by 50% or less of the market value, or damaged or destroyed by 50% or less of the market value of the structure, excluding normal maintenance and repair, may be reconstructed in place if a permit is obtained from the Code Enforcement Officer within one year of such damage, destruction, or removal.

In determining whether the building reconstruction or replacement meets the setback to the greatest practical extent the Planning Board or its designee shall consider, in addition to the criteria in Section 6.12.3.2 above, the physical condition and type of foundation present, if any.

6.12.3.4. Change of Use of a Non-conforming Structure. The use of a non-conforming structure may not be changed to another use unless the Planning Board, after receiving a written application, determines that the new use will have no greater adverse impact on the water body, tributary stream, or wetland, or on the subject or adjacent properties and resources than the existing use.

In determining that no greater adverse impact will occur, the Planning Board shall require written documentation from the applicant, regarding the probable effects on public health and safety, erosion and sedimentation, water quality, fish and wildlife habitat, vegetative cover, visual and actual points of public access to waters, natural beauty, floodplain management, archaeological and historic resources, and functionally water-dependent uses.

6.12.4. Non-conforming Uses

6.12.4.1. Expansions. Expansions of non-conforming uses are prohibited, except that non-conforming residential uses may, after obtaining a permit from the Planning Board, be expanded within existing residential structures or within expansions of such structures as allowed in Section 6.12.3.1 above.

6.12.4.2. Resumption Prohibited. A lot, building or structure in or on which a non-conforming use is discontinued for a period exceeding one year, or which is superseded by a conforming use, may not again be devoted to a non-conforming use except that the Planning Board may, for good cause shown by the applicant, grant up to a one year extension to that time period. This provision shall not apply to the resumption of a use of a residential structure provided that the structure has been used or maintained for residential purposes during the preceding five (5) year period.

6.12.4.3. Change of Use. An existing non-conforming use may be changed to another non-conforming use provided that the proposed use has no greater adverse impact on the subject and adjacent properties and resources than the former use, as determined by the Planning Board. The determination of no greater adverse impact shall be made according to criteria listed in Section 6.12.3.4 above.

6.12.5. Non-conforming Lots

6.12.5.1. Non-conforming Lots. A non-conforming lot of record as of the effective date of this Ordinance or amendment thereto may be built upon, without the need for a variance, provided that such lot is in separate ownership and not contiguous with any other lot in the same ownership, and that all provisions of this Ordinance except lot area, lot width and shore frontage can be met.

Variations relating to setback or other requirements not involving lot area, lot width or shore frontage shall be obtained by action of the Board of Appeals.

6.12.5.2. Contiguous Built Lots. If two or more contiguous lots or parcels are in a single or joint ownership of record at the time of adoption of this Ordinance, if all or part of the lots do not meet the dimensional requirements of this Ordinance, and if a principal use or structure exists on each lot, the non-conforming lots may be conveyed separately or together, provided that the State Minimum Lot Size Law (12 M.R.S.A. §§ 4807-A through 4807-D) and the State of Maine Subsurface Wastewater Disposal Rules are complied with.

If two or more principal uses or structures existed on a single lot of record on the effective date of this Ordinance, each may be sold on a separate lot provided that the above referenced law and rules are complied with. When such lots are divided each lot thus created must be as conforming as possible to the dimensional requirements of this Ordinance.

6.12.5.3. Contiguous Lots - Vacant or Partially Built. If two or more contiguous lots or parcels are in single or joint ownership of record at the time of or since adoption or amendment of this Ordinance, if any of these lots do not individually meet the dimensional requirements of this Ordinance or subsequent amendments, and if one or more of the lots are vacant or contain no principal structure the lots shall be combined to the extent necessary to meet the dimensional requirements.

This provision shall not apply to 2 or more contiguous lots, at least one of which is non-conforming, owned by the same person or persons on the effective date of this Ordinance and recorded in the registry of deeds if the lot is served by a public sewer or can accommodate a subsurface wastewater disposal system in conformance with the State of Maine Subsurface Wastewater Disposal Rules; and

- a. Each lot contains at least 100 feet of shore frontage and at least 20,000 square feet of lot area; or
- b. Any lots that do not meet the frontage and lot size requirements of Section 6.12.5.3(a) are reconfigured or combined so that each new lot contains at least 100 feet of shore frontage and 20,000 square feet of lot area.

6.13. ESTABLISHMENT OF SHORELAND OVERLAY DISTRICTS

Shoreland Districts intentionally overlay and embrace underlying land use districts and where the provisions of the overlay districts conflict with those of the underlying districts, the stricter provisions shall prevail.

6.13.1. Resource Protection District

The Resource Protection District includes areas in which development would adversely affect water quality, productive habitat, biological ecosystems, or scenic and natural values. This district shall include the following areas when they occur within the limits of the shoreland zone, exclusive of the Stream Protection District, except that areas which are currently developed and areas which meet the criteria for Limited Commercial need not be included within the Resource Protection District.

6.13.1.1. Areas within 250 feet, horizontal distance, of the upland edge of freshwater wetlands, and wetlands associated with great ponds and rivers, which are rated “moderate” or “high” value waterfowl and wading bird habitat, including nesting and feeding areas, by the Maine Department of Inland Fisheries and Wildlife (MDIF&W) that are depicted on a Geographic Information System (GIS) data layer maintained by either MDIF&W or the Department as of May 1, 2006. For the purposes of this paragraph “wetlands associated with great ponds and rivers” shall mean areas characterized by non-forested wetland vegetation and hydric soils that are contiguous with a great pond or river, and have a surface elevation at or below the water level of the great pond or river during the period of normal high water. “Wetlands associated with great ponds or rivers” are considered to be part of that great pond or river.

6.13.1.2. Floodplains along rivers and floodplains along artificially formed great ponds along rivers, defined by the 100-year floodplain as designated on the Federal Emergency Management Agency’s (FEMA) Flood Insurance Rate Maps or Flood Hazard Boundary Maps, or the flood of record, or in the absence of these, by soil types identified as recent floodplain soils.

6.13.1.3. Areas of two (2) or more contiguous acres with sustained slopes of 20% or greater.

6.13.1.4. Areas of two (2) or more contiguous acres supporting wetland vegetation and hydric soils, which are not part of a freshwater wetland as defined, and which are not surficially connected to a water body during the period of normal high water.

NOTE: These areas usually consist of forested wetlands abutting water bodies and non-forested wetlands.

6.13.1.5. Land areas along rivers subject to severe bank erosion, undercutting, or river bed movement.

6.13.2. Limited Residential District

The Limited Residential District includes those areas suitable for residential and recreational development. It includes areas other than those in the Resource

Protection District, or Stream Protection District, and areas which are used less intensively than those in the Limited Commercial District.

6.13.3. Limited Commercial District

The Limited Commercial District includes areas of mixed, light commercial and residential uses, exclusive of the Stream Protection District. This district includes areas devoted to a mix of residential and low intensity business and commercial uses. Industrial uses are prohibited.

6.13.4. Stream Protection District

The Stream Protection District includes all land areas within seventy-five (75) feet, horizontal distance, of the normal high-water line of a stream, exclusive of those areas within two-hundred and fifty (250) feet, horizontal distance, of the normal high-water line of a great pond, or river, or within two hundred and fifty (250) feet, horizontal distance, of the upland edge of a freshwater wetland. Where a stream and its associated shoreland area are located within two-hundred and fifty (250) feet, horizontal distance, of the above water bodies or wetlands, that land area shall be regulated under the terms of the shoreland district associated with that water body or wetland.

6.14. TABLE OF LAND USES

All land use activities in the Shoreland Zoning Overlay District shall conform to all of the applicable land use standards in Section 6.15. The district designation for a particular site shall be determined from the Hope Zoning Map.

Land Uses Table Key	
Yes	Allowed (no permit required but use must comply with all applicable land use standards)
No	Prohibited
PB	Allowed with permit issued by the Planning Board.
CEO	Allowed with permit issued by the Code Enforcement Officer
LPI	Allowed with permit issued by the Local Plumbing Inspector
LR	Limited Residential
LC	Limited Commercial
SP	Stream Protection
RP	Resource Protection

¹ In RP not allowed within 75 feet horizontal distance of the normal high-water line of great ponds except to remove safety hazards.

² Requires permit from CEO if more than 100 square feet of surface area in total is disturbed.

³ In RP not allowed in areas so designated because of wildlife value.

⁴ Provided that a variance from the setback requirement is obtained from the Board of Appeals.

⁵ See further restrictions in Section 6.15.12.

⁶ Unless area is zoned RP due to floodplain criteria and a permit is obtained from PB.

⁷ Except as provided in Section 6.15.8.

⁸ Single-family residential structures may be allowed by special exception only according to the provisions of Section 6.16.4, Special Exceptions. Two-family residential structures are prohibited.

⁹ Except for commercial uses otherwise listed in this Table, such as marinas and campgrounds, that are allowed in the respective district.

¹⁰ Permit not required but must file a written “notice of intent to construct” with CEO.

NOTE: Where more than one authority controls a land use, that use may require approval from more than one authority depending on the site, the size of the projected structure(s), or other factors. The following activities shall require a permit from the Maine Department of Environmental Protection pursuant to 38 M.R.S.A., § 480-C, if the activity occurs in, on, over or adjacent to any freshwater or coastal wetland, great pond, stream or brook and operates in such a manner that material or soil may be washed into them:

- A. Dredging, bulldozing, removing or displacing soil, sand, vegetation or other materials;*
- B. Draining or otherwise dewatering;*
- C. Filling, including adding sand or other material to a sand dune; or*
- D. Any construction or alteration of any permanent structure.*

6.15. LAND USE STANDARDS

All land use activities within the Shoreland Overlay Zoning District, which includes Stream Protection, Resource Protection, Limited Residential, and Limited Commercial Districts, shall conform to the standards of the underlying zone where the land is located.

6.15.1. Minimum Lot Standards

6.15.1.1 Minimum Lot Standards Table

	Minimum Lot Area (sq. ft.)	Minimum Shore Frontage (ft.)
Residential per dwelling unit	40,000	200

Governmental and Institutional per principal structure	60,000	300
Public and Private Recreational Facilities	40,000	200

6.15.1.2. Land below the normal high-water line of a water body or upland edge of a wetland and land beneath roads serving more than two (2) lots shall not be included toward calculating minimum lot area.

6.15.1.3. Lots located on opposite sides of a public or private road shall be considered each a separate tract or parcel of land unless such road was established by the owner of land on both sides thereof after September 22, 1971.

6.15.1.4. The minimum width of any portion of any lot within one hundred (100) feet, horizontal distance, of the normal high-water line of a water body or upland edge of a wetland shall be equal to or greater than the shore frontage requirement for a lot with the proposed use.

6.15.1.5. If more than one residential dwelling unit, principal governmental, institutional, commercial or industrial structure or use, or combination thereof, is constructed or established on a single parcel, all dimensional requirements shall be met for each additional dwelling unit, principal structure, or use.

6.15.2 Principal and Accessory Structures

6.15.2.1. All new principal and accessory structures shall be set back at least one hundred (100) feet, horizontal distance, from the normal high-water line of great ponds and rivers that flow to great ponds, and seventy-five (75) feet, horizontal distance, from the normal high-water line of other water bodies, tributary streams, or the upland edge of a wetland. In the Resource Protection District the setback requirement shall be 250 feet, horizontal distance, except for structures, roads, parking spaces or other regulated objects specifically allowed in that district in which case the setback requirements specified above shall apply.

In addition:

- a.** The water body, tributary stream, or wetland setback provision shall neither apply to structures which require direct access to the water body or wetland as an operational necessity, such as piers, docks and retaining walls, nor to other functionally water-dependent uses.
- b.** On a non-conforming lot of record on which only a residential structure exists, and it is not possible to place an accessory structure meeting the required water body, tributary stream or wetland setbacks, the code enforcement officer may issue a permit to place a single accessory

structure, with no utilities, for the storage of yard tools and similar equipment. Such accessory structure shall not exceed one hundred (100) square feet in area or eight (8) feet in height, and shall be located as far from the shoreline or tributary stream as practical and shall meet all other applicable standards, including lot coverage and vegetation clearing limitations. In no case shall the structure be located closer to the shoreline or tributary stream than the principal structure.

6.15.2.2. Principal or accessory structures and expansions of existing structures which are permitted in the Resource Protection, Limited Residential, Limited Commercial, and Stream Protection Districts, shall not exceed thirty-five (35) feet in height, except as otherwise required by Section 6.12.2.a.. This provision shall not apply to structures such as transmission towers, windmills, antennas, and similar structures having no floor area.

6.15.2.3. The lowest floor elevation or openings of all buildings and structures, including basements, shall be elevated at least one foot above the elevation of the 100-year flood, the flood of record, or in the absence of these, the flood as defined by soil types identified as recent flood-plain soils. Accessory structures may be placed in accordance with the standards of the April 2005 Floodplain Management Ordinance and need not meet the elevation requirements of this paragraph.

6.15.2.4. The total footprint area of all structures, parking lots and other impervious surfaces, within the shoreland zone shall not exceed twenty (20) percent of the lot or a portion thereof, located within the shoreland zone, including land area previously developed.

6.15.2.5. Notwithstanding the requirements stated above, stairways or similar structures may be allowed with a permit from the Code Enforcement Officer, to provide shoreline access in areas of steep slopes or unstable soils provided that the structure is limited to a maximum of four (4) feet in width; that the structure does not extend below or over the normal high-water line of a water body or upland edge of a wetland, (unless permitted by the Department of Environmental Protection pursuant to the Natural Resources Protection Act, 38 M.R.S.A. § 480-C); and that the applicant demonstrates that no reasonable access alternative exists on the property.

6.15.3. Structures In or Over the Water

6.15.3.1. Temporary. Any structure which remains in or over the water of a great pond for less than seven (7) months in any period of twelve (12) consecutive months, including docks and floats, is a temporary structure. Temporary structures do not require a permit from the Town but must be removed no later than the 1st of November of each year.

6.15.3.2. Permanent. Any structure which remains in or over the water of a great pond for seven (7) months or more in any period of twelve (12) consecutive months is a permanent structure. Any structure, including docks and floats, not removed by the 1st of November shall be considered a permanent structure. Permanent structures are not allowed without a permit from the Code Enforcement Officer or the Planning Board. Permanent structures shall also require a permit from the Department of Environmental Protection pursuant to the Natural Resources Protection Act, 38 M.R.S.A. § 480-C. Permits may also be required from the Army Corps of Engineers if located in navigable waters.

6.15.4. Campgrounds

Campgrounds shall conform to the minimum requirements imposed under State licensing procedures and the following:

6.15.4.1. Campgrounds shall contain a minimum of five thousand (5,000) square feet of land, not including roads and driveways, for each site. Land supporting wetland vegetation, and land below the normal high-water line of a water body shall not be included in calculating land area per site.

6.15.4.2. The areas intended for placement of a recreational vehicle, tent or shelter, and utility and service buildings shall be set back a minimum of one hundred (100) feet, horizontal distance, from the normal high-water line of a great pond or a river flowing to a great pond, and seventy-five (75) feet, horizontal distance, from the normal high-water line of other water bodies, tributary streams, or the upland edge of a wetland.

6.15.5. Commercial and Industrial Uses.

The list of commercial and industrial uses prohibited in the Shoreland Zone includes, but is not limited to, the following:

6.15.5.1. Auto washing facilities

6.15.5.2. Auto or other vehicle service and/or repair operations, including body shops

6.15.5.3. Chemical and bacteriological laboratories

6.15.5.4. Storage of chemicals, including herbicides, pesticides or fertilizers, other than amounts normally associated with individual households or farms

6.15.5.5. Commercial painting, wood preserving, and furniture stripping

6.15.5.6. Dry cleaning establishments

6.15.5.7. Electronic circuit assembly

6.15.5.8. Laundromats, unless connected to a sanitary sewer

6.15.5.9. Metal plating, finishing, or polishing

6.15.5.10. Petroleum or petroleum product storage and/or sale except storage on same property as use occurs and except for storage and sales associated with marinas

6.15.5.11. Photographic processing

6.15.5.12. Printing

6.15.6. Individual Private Campsites

Individual private campsites not associated with campgrounds are allowed provided the following conditions are met:

6.15.6.1. One campsite per lot existing on the effective date of this Ordinance, or thirty thousand (30,000) square feet of lot area within the shoreland zone, whichever is less, may be permitted.

6.15.6.2. Campsite placement on any lot, including the area intended for a recreational vehicle or tent platform, shall be set back one hundred (100) feet, horizontal distance, from the normal high-water line of a great pond or river flowing to a great pond and seventy-five (75) feet, horizontal distance, from the normal high-water line of other water bodies, tributary streams, or the upland edge of a wetland.

6.15.6.3. Only one recreational vehicle shall be allowed on a campsite. The recreational vehicle shall not be located on any type of permanent foundation except for a gravel pad, and no structure except a canopy shall be attached to the recreational vehicle.

6.15.6.4. The clearing of vegetation for the siting of the recreational vehicle, tent or similar shelter in a Resource Protection District shall be limited to one thousand (1000) square feet.

6.15.6.5. A written sewage disposal plan describing the proposed method and location of sewage disposal shall be required for each campsite and shall be approved by the Local Plumbing Inspector. Where disposal is off-site, written authorization from the receiving facility or land owner is required.

6.15.6.6. When a recreational vehicle, tent or similar shelter is placed on-site for more than one hundred and twenty (120) days per year, all requirements for residential structures shall be met, including the installation of a subsurface wastewater disposal system in compliance with the State of Maine Subsurface Wastewater Disposal Rules unless served by public sewage facilities.

6.15.7. Parking Areas

6.15.7.1. Parking areas shall meet the shoreline and tributary stream setback requirements for structures for the district in which such areas are located. The setback requirement for parking areas serving public boat launching facilities shall be no less than fifty (50) feet, horizontal distance, from the shoreline or tributary stream if the Planning Board finds that no other reasonable alternative exists further from the shoreline or tributary stream.

6.15.7.2. Parking areas shall be adequately sized for the proposed use and shall be designed to prevent storm water runoff from flowing directly into a water body, tributary stream or wetland and where feasible, to retain all runoff on-site.

6.15.7.3. In determining the appropriate size of proposed parking facilities, the following shall apply:

- a. Typical parking space: Approximately ten (10) feet wide and twenty (20) feet long, except that parking spaces for a vehicle and boat trailer shall be forty (40) feet long.
- b. Internal travel aisles: Approximately twenty (20) feet wide.

6.15.8. Roads and Driveways.

The Planning Board or Code Enforcement Officer may approve the use of a private way to provide frontage and access to individual lots of land as provided in Section 5.3.25. The following standards shall apply to the construction of roads and/or driveways and drainage systems, culverts and other related features within the shoreland overlay district.

6.15.8.1. Roads and driveways shall be set back at least one-hundred (100) feet, horizontal distance, from the normal high-water line of a great pond or a river that flows to a great pond, and seventy-five (75) feet, horizontal distance from the normal high-water line of other water bodies, tributary streams, or the upland edge of a wetland unless no reasonable alternative exists as determined by the Planning Board. If no other reasonable alternative exists, the road and/or driveway setback requirement shall be no less than fifty (50) feet, horizontal distance, upon clear showing by the applicant that appropriate techniques will be used to prevent sedimentation of the water body, tributary stream, or wetland.

Such techniques may include, but are not limited to, the installation of settling basins, and/or the effective use of additional ditch relief culverts and turnouts placed so as to avoid sedimentation of the water body, tributary stream, or wetland.

On slopes of greater than twenty (20) percent the road and/or driveway setback shall be increased by ten (10) feet, horizontal distance, for each five (5) percent increase in slope above twenty (20) percent.

Section 6.15.8.1 does not apply to approaches to water crossings or to roads or driveways that provide access to permitted structures and facilities located nearer to the shoreline or tributary stream due to an operational necessity, excluding temporary docks for recreational uses. Roads and driveways providing access to permitted structures within the setback area shall comply fully with the requirements of Section 6.15.8.1 except for that portion of the road or driveway necessary for direct access to the structure.

6.15.8.2. Existing public roads may be expanded within the legal road right of way regardless of their setback from a water body, tributary stream or wetland.

6.15.8.3. New roads and driveways are prohibited in a Resource Protection District except that the Planning Board may grant a permit to construct a road or driveway to provide access to permitted uses within the district. A road or driveway may also be approved by the Planning Board in a Resource Protection District, upon a finding that no reasonable alternative route or location is available outside the district. When a road or driveway is permitted in a Resource Protection District the road and/or driveway shall be set back as far as practicable from the normal high-water line of a water body, tributary stream, or upland edge of a wetland.

6.15.8.4. Road and driveway banks shall be no steeper than a slope of two (2) horizontal to one (1) vertical, and shall be graded and stabilized in accordance with the provisions for erosion and sedimentation control contained in Section 6.15.17.

6.15.8.5. Road and driveway grades shall be no greater than ten (10) percent except for segments of less than two hundred (200) feet.

6.15.8.6. In order to prevent road and driveway surface drainage from directly entering water bodies, tributary streams or wetlands, roads and driveways shall be designed, constructed, and maintained to empty onto an unscarified buffer strip at least (50) feet plus two times the average slope, in width, between the outflow point of the ditch or culvert and the normal high-water line of a water body, tributary stream, or upland edge of a wetland. Surface drainage which is directed to an unscarified buffer strip shall be diffused or

spread out to promote infiltration of the runoff and to minimize channelized flow of the drainage through the buffer strip.

6.15.8.7. Ditch relief (cross drainage) culverts, drainage dips and water turnouts shall be installed in a manner effective in directing drainage onto unscarified buffer strips before the flow gains sufficient volume or head to erode the road, driveway, or ditch. To accomplish this, the following shall apply:

- a.** Ditch relief culverts, drainage dips and associated water turnouts shall be spaced along the road or driveway at intervals no greater than indicated in the following table:

Grade (Percent)	Spacing (Feet)
0-2	250
3-5	200-135
6-10	100-80
11-15	80-60
16-20	60-45
21 +	40

- b.** Drainage dips may be used in place of ditch relief culverts only where the grade is ten (10) percent or less.
- c.** On sections having slopes greater than ten (10) percent, ditch relief culverts shall be placed at approximately a thirty (30) degree angle downslope from a line perpendicular to the centerline of the road or driveway.
- d.** Ditch relief culverts shall be sufficiently sized and properly installed in order to allow for effective functioning and their inlet and outlet ends shall be stabilized with appropriate materials.

6.15.8.8. Ditches, culverts, bridges, dips, water turnouts and other storm water runoff control installations associated with roads and driveways shall be maintained on a regular basis to assure effective functioning.

6.15.9. Signs

The following provisions shall govern the use of signs in the Resource Protection, Stream Protection, Limited Residential and Limited Commercial Districts:

6.15.9.1. Signs relating to goods and services sold on the premises shall be allowed, provided that such signs shall not exceed six (6) square feet in area and shall not exceed two (2) signs per premises. In the Limited Commercial District,

however, such signs shall not exceed sixteen (16) square feet in area. Signs relating to goods or services not sold or rendered on the premises shall be prohibited.

6.15.9.2. Name signs are allowed, provided such signs shall not exceed two (2) signs per premises, and shall not exceed twelve (12) square feet in the aggregate.

6.15.9.3. Residential users may display a single sign not over three (3) square feet in area relating to the sale, rental, or lease of the premises.

6.15.9.4. Signs relating to trespassing and hunting shall be allowed without restriction as to number provided that no such sign shall exceed two (2) square feet in area.

6.15.9.5. Signs relating to public safety shall be allowed without restriction.

6.15.9.6. No sign shall extend higher than twenty (20) feet above the ground.

6.15.9.7. Signs may be illuminated only by shielded, non-flashing lights.

6.15.10. Storm Water Runoff

6.15.10.1. All new construction and development shall be designed to minimize storm water runoff from the site in excess of the natural predevelopment conditions. Where possible, existing natural runoff control features, such as berms, swales, terraces and wooded areas, shall be retained in order to reduce runoff and encourage infiltration of stormwaters.

6.15.10.2. Storm water runoff control systems shall be maintained as necessary to ensure proper functioning.

NOTE: The Stormwater Management Law 38 M.R.S.A. § 420-D or Maine Construction Management Law may require a permit to be obtained from the DEP.

6.15.11. Subsurface Wastewater Disposal

All subsurface wastewater disposal systems shall be installed in conformance with the State of Maine Subsurface Wastewater Disposal Rules, and the following:

6.15.11.1. Clearing or removal of woody vegetation necessary to site a new system and any associated fill extensions, shall not extend closer than seventy-five (75) feet, horizontal distance, from the normal high-water line of a water body or the upland edge of a wetland

6.15.11.2. A holding tank is not allowed for a first-time residential use in the shoreland zone.

6.15.12. Essential Services

6.15.12.1. Where feasible, the installation of essential services shall be limited to existing public ways and existing service corridors.

6.15.12.2. The installation of essential services, other than road-side distribution lines, is not allowed in a Resource Protection or Stream Protection District, except to provide services to a permitted use within said district, or except where the applicant demonstrates that no reasonable alternative exists. Where allowed, such structures and facilities shall be located so as to minimize any adverse impacts on surrounding uses and resources, including visual impacts.

6.15.12.3. Damaged or destroyed public utility transmission and distribution lines, towers and related equipment may be replaced or reconstructed without a permit.

6.15.13. Mineral Exploration and Extraction

Mineral exploration to determine the nature or extent of mineral resources shall be accomplished by hand sampling, test boring, or other methods which create minimal disturbance of less than one hundred (100) square feet of ground surface. A permit from the Code Enforcement Officer shall be required for mineral exploration which exceeds the above limitation. All excavations, including test pits and holes, shall be immediately capped, filled or secured by other equally effective measures to restore disturbed areas and to protect the public health and safety.

Mineral extraction may be permitted under the following conditions:

6.15.13.1. A reclamation plan shall be filed with, and approved, by the Planning Board before a permit is granted. Such plan shall describe in detail procedures to be undertaken to fulfill the requirements of Section 6.15.13.4 below.

6.15.13.2. No part of any extraction operation, including drainage and runoff control features, shall be permitted within one hundred (100) feet, horizontal distance, of the normal high-water line of a great pond or a river flowing to a great pond, and within seventy-five (75) feet, horizontal distance, of the normal high-water line of any other water body, tributary stream, or the upland edge of a wetland. Extraction operations shall not be permitted within fifty (50) feet, horizontal distance, of any property line without written permission of the owner of such adjacent property.

6.15.13.3. Within twelve (12) months following the completion of extraction operations at any extraction site, which operations shall be deemed complete when less than one hundred (100) cubic yards of materials are removed in any

consecutive twelve (12) month period, ground levels and grades shall be established in accordance with the following:

- a. All debris, stumps, and similar material shall be removed for disposal in an approved location, or shall be buried on-site. Only materials generated on-site may be buried or covered on-site.
- b. The final graded slope shall be two and one-half to one (2 1/2:1) slope or flatter.
- c. Top soil or loam shall be retained to cover all disturbed land areas, which shall be reseeded and stabilized with vegetation native to the area. Additional topsoil or loam shall be obtained from off-site sources if necessary to complete the stabilization project.

6.15.13.4. In keeping with the purposes of this Section, the Planning Board may impose such conditions as are necessary to minimize the adverse impacts associated with mineral extraction operations on surrounding uses and resources.

6.15.14. Agriculture

6.15.14.1. All spreading of manure shall be accomplished in conformance with the *Manure Utilization Guidelines* published by the Maine Department of Agriculture on November 1, 2001, and the Nutrient Management Law (7 M.R.S.A. §§ 4201-4209).

6.15.14.2. Manure shall not be stored or stockpiled within one hundred (100) feet, horizontal distance, of a great pond or a river flowing to a great pond, or within seventy-five (75) feet horizontal distance, of other water bodies, tributary streams, or wetlands. All manure storage areas within the shoreland zone must be constructed or modified such that the facility produces no discharge of effluent or contaminated storm water.

6.15.14.3. Agricultural activities involving tillage of soil greater than forty thousand (40,000) square feet in surface area, within the shoreland zone shall require a Conservation Plan to be filed with the Planning Board. Non-conformance with the provisions of said plan shall be considered to be a violation of this Ordinance.

6.15.14.4. There shall be no new tilling of soil within one-hundred (100) feet, horizontal distance, of the normal high-water line of a great pond; within seventy-five (75) feet, horizontal distance, from other water bodies; nor within twenty-five (25) feet, horizontal distance, of tributary streams and freshwater wetlands. Operations in existence on the effective date of this Ordinance and not in conformance with this provision may be maintained.

6.15.14.5. Newly established livestock grazing areas shall not be permitted within one hundred (100) feet, horizontal distance, of the normal high-water line of a great pond; within seventy-five (75) feet, horizontal distance, of other water bodies; nor within twenty-five (25) feet, horizontal distance, of tributary streams and freshwater wetlands. Livestock grazing associated with ongoing farm activities, and which are not in conformance with the above setback provisions may continue, provided that such grazing is conducted in accordance with a Conservation Plan.

6.15.15. Timber Harvesting

6.15.15.1. In a shoreland area zoned for protection abutting a great pond, timber harvesting shall be limited to the following:

- a.** Within strip of land extending 75 feet inland from the normal high-water line, timber harvesting may be conducted when the following conditions are met:
 - i.** The ground is frozen;
 - ii.** There is no resultant soil disturbance;
 - iii.** The removal of trees is accomplished using cable or boom and there is no entry of tracked or wheeled vehicles into the 75-foot strip of land;
 - iv.** There is no cutting of trees less than 6 inches in diameter; no more than 30% of the trees 6 inches or more in diameter, measured 4 1/2 feet above ground level, are cut in any 10 year period; and a well-distributed stand of trees and other vegetation remains; and
 - v.** A licensed professional forester has marked the trees to be harvested prior to a permit being issued by the Town.
- b.** Beyond the 75 foot "no-harvest" strip referred to in paragraph (a) above, timber harvesting is permitted in accordance with paragraph 2 below except that in no case shall the average residual basal area of trees 4 1/2 inches in diameter at 4 1/2 feet above the ground be reduced to less than 30 square feet per acre.

6.15.15.2. Except in areas as described in paragraph 1 above, timber harvesting shall conform with the following provisions:

- a.** Selective cutting of no more than 40 percent of the total volume of trees 4 inches or more in diameter measured at 4 1/2 feet above ground level on any lot in any 10 year period is permitted. In addition:
- (i)** Within 100 feet, horizontal distance of the normal high-water line of a great pond and within 75 feet, horizontal distance, of the normal high-water line of other water bodies, tributary streams, or upland edge of a wetland, there shall be no clearcut openings and a well-distributed stand of trees and other vegetation, including existing ground cover, shall be maintained.
 - (ii)** At distances greater than 100 feet, horizontal distance of a great pond, and greater than 75 feet, horizontal distance, of the normal high-water line of other water bodies or the upland edge of a wetland, harvesting operations shall not create single clearcut openings greater than 10,000 square feet in the forest canopy. Where such openings exceed 5,000 square feet they shall be at least 100 feet apart. Such clearcut openings shall be included in the calculation of total volume removal. For the purposes of these standards, volume may be considered to be equivalent to basal area.
- b.** Timber harvesting operations exceeding the 40% limitation in paragraph (a) above may be allowed by the planning board upon a clear showing, including a forest management plan signed by a Maine licensed professional forester, that such an exception is necessary for good forest management and will be carried out in accordance with the purposes of this Ordinance. The Planning Board shall notify the Commissioner of the Department of Environmental Protection of each exception allowed within 14 days of the Planning Board's decision.
- c.** No accumulation of slash shall be left within fifty (50) feet of the normal high-water line of a water body. In all other areas slash shall either be removed or disposed of in such a manner that it lies on the ground and no part thereof extends more than 4 feet above the ground. Any debris that falls below the normal high-water line of a water body shall be removed.
- d.** Timber harvesting equipment shall not use stream channels as travel routes except when:
- (i)** Surface waters are frozen; and
 - (ii)** The activity will not result in any ground disturbance.

- e. All crossings of flowing water shall require a bridge or culvert, except in areas with low banks and channel beds which are composed of gravel, rock or similar hard surface which would not be eroded or otherwise damaged.
- f. Skid trail approaches to water crossings shall be located and designed so as to prevent water runoff from directly entering the water body or tributary stream. Upon completion of timber harvesting, temporary bridges and culverts shall be removed and areas of exposed soil revegetated.
- g. Except for water crossings, skid trails and other sites where the operation of machinery used in timber harvesting results in the exposure of mineral soil shall be located such that an unscarified strip of vegetation of at least 75 feet in width for slopes up to ten percent shall be retained between the exposed mineral soil and the normal high-water line of a water body or upland edge of a wetland. For each 10 percent increase in slope, the unscarified strip shall be increased by 20 feet. The provisions of this paragraph apply only to a face sloping toward the water body or wetland, provided, however, that no portion of such exposed mineral soil on a back face shall be closer than 25 feet from the normal high-water line of a water body or upland edge of a wetland.

6.15.16. Clearing or Removal of Vegetation for Activities Other Than Timber Harvesting

6.15.16.1. In a Resource Protection District abutting a great pond, there shall be no cutting of vegetation within the strip of land extending 75 feet, horizontal distance, inland from the normal high-water line, except to remove safety hazards.

Elsewhere, in any Resource Protection District the cutting or removal of vegetation shall be limited to that which is necessary for uses expressly authorized in that district.

6.15.16.2. Except in areas as described in Section 6.15.16.1, above, and except to allow for the development of permitted uses, within a strip of land extending one-hundred (100) feet, horizontal distance, inland from the normal high-water line of a great pond or a river flowing to a great pond, and seventy-five (75) feet, horizontal distance, from any other water body, tributary stream, or the upland edge of a wetland, a buffer strip of vegetation shall be preserved as follows:

- a. There shall be no cleared opening greater than 250 square feet in the forest canopy (or other existing woody vegetation if a forested canopy

is not present) as measured from the outer limits of the tree or shrub crown. However, a footpath not to exceed six (6) feet in width as measured between tree trunks and/or shrub stems is allowed provided that a cleared line of sight to the water through the buffer strip is not created.

- b. Selective cutting of trees within the buffer strip is allowed provided that a well-distributed stand of trees and other natural vegetation is maintained. For the purposes of this Section a “well-distributed stand of trees” adjacent to a great pond or a river or stream flowing to a great pond, shall be defined as maintaining a rating score of 24 or more in each 25-foot by 50-foot rectangular (1250 square feet) area as determined by the following rating system.

Diameter of Tree at 4-1/2 feet Above Ground Level (inches)	Points
2 – < 4 in.	1
4 – < 8 in.	2
8 – < 12 in	4
12 in. or greater	8

Adjacent to other water bodies, tributary streams, and wetlands, a “well-distributed stand of trees” is defined as maintaining a minimum rating score of 16 per 25-foot by 50-foot rectangular area.

As an example, adjacent to a great pond, if a 25-foot x 50-foot plot contains four (4) trees between 2 and 4 inches in diameter, two (2) trees between 4 and 8 inches in diameter, three (3) trees between 8 and 12 inches in diameter, and two (2) trees over 12 inches in diameter, the rating score is:

$$(4 \times 1) + (2 \times 2) + (3 \times 4) + (2 \times 8) = 36 \text{ points}$$

Thus, the 25-foot by 50-foot plot contains trees worth 36 points. Trees totaling 12 points (36-24 = 12) may be removed from the plot provided that no cleared openings are created.

The following shall govern in applying this point system:

- (i) The 25-foot by 50-foot rectangular plots must be established where the landowner proposes clearing within the required buffer;

- (ii) Each successive plot must be adjacent to, but not overlap a previous plot;
- (iii) Any plot not containing the required points must have no vegetation removed except as otherwise allowed by this Ordinance;
- (iv) Any plot containing the required points may have vegetation removed down to the minimum points required or as otherwise allowed by this Ordinance;
- (v) Where conditions permit, no more than 50% of the points on any 25-foot by 50-foot rectangular area may consist of trees greater than 12 inches in diameter.

For the purposes of the above provisions, “other natural vegetation” is defined as retaining existing vegetation under three (3) feet in height and other ground cover and retaining at least three (3) saplings less than two (2) inches in diameter at four and one-half (4 ½) feet above ground level for each 25-foot by 25-foot rectangular area. If three (3) saplings do not exist, no woody stems less than two (2) inches in diameter can be removed until 3 saplings have been recruited into the plot.

Notwithstanding the above provisions, no more than 40% of the total volume of trees four (4) inches or more in diameter, measured at 4 1/2 feet above ground level may be removed in any ten (10) year period.

- c. In order to protect water quality and wildlife habitat, existing vegetation under three (3) feet in height and other ground cover, including leaf litter and the forest duff layer, shall not be cut, covered, or removed, except to provide for a footpath or other permitted uses as described in Section 6.15.16.2 above.
- d. Pruning of tree branches, on the bottom 1/3 of the tree is allowed.
- e. In order to maintain a buffer strip of vegetation, when the removal of storm-damaged, diseased, unsafe, or dead trees results in the creation of cleared openings, these openings shall be replanted with native tree species unless existing new tree growth is present.

Section 6.15.16.2 does not apply to those portions of public recreational facilities adjacent to public swimming areas as long as cleared areas are limited to the minimum area necessary.

6.15.16.3. At distances greater than one hundred (100) feet, horizontal distance, from a great pond or a river flowing to a great pond , and seventy-five (75) feet, horizontal distance, from the normal high-water line of any other water body, tributary stream, or the upland edge of a wetland, there shall be allowed on any lot, in any ten (10) year period, selective cutting of not more than forty (40) percent of the volume of trees four (4) inches or more in diameter, measured 4 1/2 feet above ground level. Tree removal in conjunction with the development of permitted uses shall be included in the forty (40) percent calculation. For the purposes of these standards volume may be considered to be equivalent to basal area.

In no event shall cleared openings for any purpose, including but not limited to, principal and accessory structures, driveways, lawns and sewage disposal areas, exceed in the aggregate, 25% of the lot area within the shoreland zone or ten thousand (10,000) square feet, whichever is greater, including land previously cleared.

6.15.16.4. Legally existing nonconforming cleared openings may be maintained, but shall not be enlarged, except as allowed by this Ordinance.

6.15.16.5. Fields and other cleared openings which have reverted to primarily shrubs, trees, or other woody vegetation shall be regulated under the provisions of Section 6.15.16.

6.15.17. Erosion and Sedimentation Control

6.15.17.1. All activities which involve filling, grading, excavation or other similar activities which result in unstabilized soil conditions and which require a permit shall also require a written soil erosion and sedimentation control plan. The plan shall be submitted to the permitting authority for approval and shall include, where applicable, provisions for:

- a. Mulching and revegetation of disturbed soil
- b. Temporary runoff control features such as hay bales, silt fencing or diversion ditches
- c. Permanent stabilization structures such as retaining walls or rip-rap

6.15.17.2. In order to create the least potential for erosion, development shall be designed to fit with the topography and soils of the site. Areas of steep slopes where high cuts and fills may be required shall be avoided wherever possible, and natural contours shall be followed as closely as possible.

6.15.17.3. Erosion and sedimentation control measures shall apply to all aspects of the proposed project involving land disturbance, and shall be in operation

during all stages of the activity. The amount of exposed soil at every phase of construction shall be minimized to reduce the potential for erosion.

6.15.17.4. Any exposed ground area shall be temporarily or permanently stabilized within one (1) week from the time it was last actively worked, by use of riprap, sod, seed, and mulch, or other effective measures. In all cases permanent stabilization shall occur within nine (9) months of the initial date of exposure. In addition:

- a. Where mulch is used, it shall be applied at a rate of at least one (1) bale per five hundred (500) square feet and shall be maintained until a catch of vegetation is established.
- b. Anchoring the mulch with netting, peg and twine or other suitable method may be required to maintain the mulch cover.
- c. Additional measures shall be taken where necessary in order to avoid siltation into the water. Such measures may include the use of staked hay bales and/or silt fences.

6.15.17.5. Natural and man-made drainage ways and drainage outlets shall be protected from erosion from water flowing through them. Drainage ways shall be designed and constructed in order to carry water from a twenty five (25) year storm or greater, and shall be stabilized with vegetation or lined with riprap.

6.15.18. Soils

All land uses shall be located on soils in or upon which the proposed uses or structures can be established or maintained without causing adverse environmental impacts, including severe erosion, mass soil movement, improper drainage, and water pollution, whether during or after construction. Proposed uses requiring subsurface wastewater disposal, and commercial or industrial development and other similar intensive land uses shall require a soils report based on an on-site investigation and be prepared by a state-certified professional. Certified persons may include Maine Certified Soil Scientists, Maine Registered Professional Engineers, Maine State Certified Geologists and other persons who have training and experience in the recognition and evaluation of soil properties. The report shall be based upon the analysis of the characteristics of the soil and surrounding land and water areas, maximum ground water elevation, presence of ledge, drainage conditions, and other pertinent data which the evaluator deems appropriate. The soils report shall include recommendations for a proposed remedy to counteract soil limitations where they exist.

6.15.19. Water Quality

No activity shall deposit on or into the ground or discharge to the waters of the State any pollutant that, by itself or in combination with other activities or substances, will impair designated uses or the water classification of the water body, tributary stream or wetland.

6.15.20. Archaeological Sites

Any proposed land use activity involving structural development or soil disturbance on or adjacent to sites listed on, or eligible to be listed on the National Register of Historic Places, as determined by the permitting authority, shall be submitted by the applicant to the Maine Historic Preservation Commission for review and comment at least twenty (20) days prior to action being taken by the permitting authority. The permitting authority shall consider comments received from the Commission prior to rendering a decision on the application.

6.16. ADMINISTRATION

6.16.1. Permits Required

After the effective date of this Ordinance no person shall, without first obtaining a permit in accordance with Section 8 of this Ordinance, engage in any activity or use of land or structure requiring a permit in the district in which such activity or use would occur; or expand, change, or replace an existing use or structure; or renew a discontinued nonconforming use. Any permit required by this Section shall be in addition to any other permit required by other law or ordinance.

6.16.2. Permits Not Required

6.16.1.2. Replacement Road Culvert. A permit is not required for the replacement of an existing road culvert as long as:

- a. The replacement culvert is not more than 25% longer than the culvert being replaced (maximum 75 feet); and
- b. Adequate erosion control measures are taken to prevent sedimentation of the water, and the crossing does not block fish passage in the watercourse.

6.16.2.2. A permit is not required for an archaeological excavation as long as the excavation is conducted by an archaeologist listed on the State Historic Preservation Officer's level 1 or level 2 approved list, and unreasonable erosion and sedimentation is prevented by means of adequate and timely temporary and permanent stabilization measures.

6.16.3. Installation of Public Utility Service

A public utility, water district, sanitary district or any utility company of any kind may not install services to any new structure located in the Shoreland Zone unless written authorization attesting to the validity and currency of all local permits required under this or any previous ordinance has been issued by the appropriate Town officials or other written arrangements have been made between the Town officials and the utility.

6.16.4. Appeals

All appeals of activities within the Shoreland Zone shall be heard in accordance with Section 10 of this Ordinance.

6.16.5. Enforcement

Violations of this Section shall be handled in accordance with Section 8.11 of this Ordinance.

ADMINISTRATION AND ENFORCEMENT**8.1. CREATION OF ADMINISTERING BODIES**

8.1.1. Code Enforcement Officer: The Code Enforcement Officer shall approve or deny those applications on which he/she is authorized to act as provided in this Ordinance. Approval shall be granted only if the proposed use is in conformance with the provisions of this Ordinance.

8.1.2. Planning Board: The Planning Board is established in accordance with Article VIII, Pt. 2, §1, of the Maine Constitution, 30-A M.R.S.A. § 3001, and the Planning Board Ordinance. The Planning Board shall be appointed by the Board of Selectmen. The Planning Board shall approve, approve with conditions, or deny those applications on which it is empowered to act as provided in this Ordinance. Approval shall be granted only if the proposed use is in conformance with the provisions of this Ordinance (Sections 6 and 9).

8.1.3. Board of Appeals: The Board of Appeals is established in accordance with Article VIII, Pt 2, Section 1 of the Maine Constitution, 30-A M.R.S.A. § 2691, and the Board of Appeals Ordinance. The Board of Appeals shall be appointed by the Board of Selectmen. The Board of Appeals shall approve, approve with conditions, or deny applications and appeals on which it is empowered to act as provided in this Ordinance. (Section 10)

8.2. APPROVAL REQUIRED

After the effective date of this Ordinance, no person shall engage in any activity requiring a permit or approval under this Ordinance without first obtaining the approval of the Code Enforcement Officer, Planning Board or Board of Appeals as provided herein.

8.3. APPLICATION REQUIRED

Applications for approval shall be submitted in writing, on forms provided, to the Code Enforcement Officer who shall oversee the permitting process and record keeping. The Code Enforcement Officer may require the submission of additional information deemed necessary to determine conformance with the provisions of this Ordinance.

8.4. CODE ENFORCEMENT OFFICER

The Code Enforcement Officer shall review all applicable applications pursuant to this Ordinance. A permit issued by the Code Enforcement Officer shall be required before beginning or undertaking any of the following activities:

8.4.1. Activities Requiring Permit

8.4.1.1. Flood Hazard Areas. All construction or earth moving activities or other improvements within the 100-year flood plain designated on the Flood Insurance Rate Maps published by the Federal Emergency Management Agency.

8.4.1.2. New Construction. New construction of buildings or structures pursuant to Section 4, Schedule of Uses.

8.4.1.3. Alteration. Alteration of a building, structure, or land, or parts thereof, pursuant to Section 4, Schedule of Uses including, but not limited to:

- a. Interior renovations for change in use;
- b. Enclosing open frame porch, for the creation of additional sleeping space or any activity which increases the existing amount of water used daily;
- c. Erection of fences as specified under State Statute

8.4.1.4. Erecting of Signs. Placement of signs except temporary signs pursuant to Section 4, Schedule of Uses.

8.4.1.5. Moving or Demolition. All buildings or structures which are removed from or moved onto, or moved around within a lot, or demolished pursuant to Section 4, Schedule of Uses.

8.4.1.6. Change of Use. The change of any premises from one category of land use to any other land use pursuant to Section 4, Schedule of Uses.

8.4.2. Procedure

8.4.2.1. Application. All applications for a Land Use Permit shall be submitted, with appropriate fee, in writing to the Code Enforcement Officer on forms provided. Applications shall be dated, and the Code Enforcement Officer shall note upon each application the date and time of its receipt.

8.4.2.2. Submissions: All applications for a Land Use Permit shall be accompanied by a sketch plan, accurately drawn to scale and showing actual dimensions or distances, and showing:

- a. The actual shape and dimensions of the lot for which a permit is sought;
- b. The location and size of all buildings, structures, and other significant features currently existing on the lot, as well as all waterbodies and wetlands within two hundred fifty (250) feet of the property lines;
- c. The location of new buildings, structures or portions thereof to be constructed. Building plans shall be submitted if deemed necessary by the Code Enforcement Officer;
- d. The existing and intended use of each building or structure;

- e. Where applicable, the location of soil test pits, subsurface wastewater disposal system, parking lots and driveways, signs, buffers, private wells; and
- f. Such other information as may be reasonably required by the Code Enforcement Officer to provide for the administration and enforcement of this Ordinance.

8.4.2.3. To Whom Issued: Permits shall be issued only to an owner or individual who can show evidence of right, title or interest in the property or to an agent, representative, tenant, or contractor of the owner with authorization from the owner to apply for a permit hereunder, certifying that the information in the application is complete and correct.

8.4.2.4. Compliance with Land Use Ordinance: All activities undertaken pursuant to a permit issued under this Section shall comply with all applicable standards set forth in this Ordinance.

8.4.2.5. Deadline for Decision: The Code Enforcement Officer shall, within thirty-five (35) days of receipt of an application: issue the permit, if all proposed construction and uses meet the provisions of the Ordinance; refer the application to the Planning Board or the Board of Appeals for its review; or deny the application. All decisions of the Code Enforcement Officer shall be in writing.

8.4.2.6. Copies: One (1) copy of the application, with the permit or other written decision of the Code Enforcement Officer, shall be returned to the applicant, and one (1) copy, with a copy of the permit or written decision, shall be retained by the Code Enforcement Officer as a permanent public record.

8.4.2.7. Sewage Disposal: If the property is not served by a public sewer, a valid Subsurface Wastewater Disposal Application shall be submitted whenever the nature of the proposed structure or use would require the installation of a subsurface wastewater disposal system.

8.4.2.8. Posting: The applicant shall cause any permit issued to be conspicuously posted on the lot on which the activity will occur at a location clearly visible from the street.

8.4.2.9. Appeals: Appeals from decisions of the Code Enforcement Officer may be taken pursuant to the provisions of this Ordinance.

8.5. OTHER PERMITS REQUIRED BEFORE APPROVAL

Applications for approval under this Ordinance will not be considered complete for processing until all other required local, state, and federal permits have been secured and evidence that they have been secured has been provided unless state or federal regulations

require local approval first.

8.6. POSITIVE FINDINGS REQUIRED

Approval shall be granted by the Code Enforcement Officer after receipt of a complete application if he/she finds it to be consistent with the long-range goals of the Comprehensive Plan, other adopted plans of the Town, and the goals and purposes of the established districts, only upon a positive finding by the Code Enforcement Officer that the proposed use:

- 8.6.1.** Is a permitted use in the district in which it is proposed to be located;
- 8.6.2.** Is in conformance with the applicable performance standards of this Ordinance;
- 8.6.3.** Will not result in unsafe or unhealthful conditions;
- 8.6.4.** Will not result in undue land, water or air pollution;
- 8.6.5.** Will not result in undue erosion or sedimentation;
- 8.6.6.** Will avoid problems associated with development in flood hazard areas;
- 8.6.7.** Will not result in damage to spawning grounds, fish, aquatic life, bird and other wildlife habitat;
- 8.6.8.** Will conserve shore cover and visual, as well as actual, points of access to inland waters;
- 8.6.9.** Will protect archaeological and historic resources as designated in the comprehensive plan;
- 8.6.10.** Will avoid problems associated with floodplain development and use; and
- 8.6.11.** Will not adversely impact public infrastructure.

8.7. VIOLATIONS

Violations of the terms and conditions of this Ordinance shall be corrected within thirty (30) days of receipt of Notice of Violation, unless an extension of time is granted by the Code Enforcement Officer. Said violation may void all permits.

8.8. COMMENCEMENT AND COMPLETION OF WORK

Construction and alteration activities on projects for which a permit has been granted under this Section shall commence within six (6) months of the date of issuance of the permit and shall be completed within twenty-four (24) months of that date. Activities which are not commenced or completed within the time limits provided above shall be subject to a new application and the permit issued under this Section shall be considered void. Activities may be extended for up to twenty-four (24) months by the Code Enforcement Officer, for good cause, if an application for an extension is submitted not later than thirty (30) days prior to the expiration of the prior permit.

8.9. CERTIFICATE OF OCCUPANCY REQUIRED

After a building, structure, or part thereof has been erected, altered, enlarged, or moved, or a use has been changed, pursuant to approval under this Ordinance, a Certificate of Occupancy shall be obtained from the Code Enforcement Officer for the proposed use before the same may be occupied or used.

8.10. SHORELAND ZONE PERMITS

Within thirty-five (35) days of the date of receiving a written application for activities within the Shoreland Zone, the Planning Board or Code Enforcement Officer, as indicated in Section 6.14, shall notify the applicant in writing either that the application is a complete application, or, if the application is incomplete, that specified additional material is needed to make the application complete. The Planning Board or the Code Enforcement Officer, as appropriate, shall approve, approve with conditions, or deny all permit applications in writing within 35 days of receiving a completed application. However, if the Planning Board has a waiting list of applications, a decision on the application shall occur within thirty-five (35) days after the first available date on the Planning Board's agenda following receipt of the completed application, or within thirty-five (35) days of the public hearing, if the proposed use or structure is found to be in conformance with the purposes and provisions of this Ordinance.

The applicant shall have the burden of proving that the proposed land use activity is in conformity with the requirements of Section 6.

After the submission of a complete application to the Planning Board, the Board shall approve an application or approve it with conditions if it makes a positive finding based on the information presented that the proposed use is in conformance with the standards of Section 8.6 above.

If a permit is either denied or approved with conditions, the reasons as well as conditions shall be stated in writing. No approval shall be granted for an application involving a structure if the structure would be located in an unapproved subdivision or would violate any other local ordinance, or regulation or statute administered by the Town.

8.10.1. Resource Protection District Dwelling Exception

In addition to the criteria specified in Section 8.6 above, excepting structure setback requirements, the Planning Board may approve a permit for a single family residential structure in a Resource Protection District provided that the applicant demonstrates that all of the following conditions are met:

- 8.10.1.1.** There is no location on the property, other than a location within the Resource Protection District, where the structure can be built.

8.10.1.2. The lot on which the structure is proposed is undeveloped and was established and recorded in the registry of deeds of the county in which the lot is located before the creation of the Resource Protection District.

8.10.1.3. All proposed buildings, sewage disposal systems and other improvements are:

- a. Located on natural ground slopes of less than 20%; and
- b. Located outside the floodway of the 100-year flood-plain along rivers and artificially formed great ponds along rivers, based on detailed flood insurance studies and as delineated on the Federal Emergency Management Agency's Flood Boundary and Floodway Maps and Flood Insurance Rate Maps; all buildings, including basements, are elevated at least one foot above the 100-year flood-plain elevation; and the development is otherwise in compliance with any applicable municipal flood-plain ordinance.

If the floodway is not shown on the Federal Emergency Management Agency Maps, it is deemed to be 1/2 the width of the 100-year flood-plain.

8.10.1.4. The total ground-floor area, including cantilevered or similar overhanging extensions, of all principal and accessory structures is limited to a maximum of 1,500 square feet. This limitation shall not be altered by variance.

8.10.1.5. All structures, except functionally water-dependent structures, are set back from the normal high-water line of a water body to the greatest practical extent, but not less than on hundred (100) feet, horizontal distance. In the case of a tributary stream or upland edge of a wetland these structures may not be set less than seventy-five (75) feet from the high-water line. In determining the greatest practical extent, the Planning Board shall consider the depth of the lot, the slope of the land, the potential for soil erosion, the type and amount of vegetation to be removed, the proposed building site's elevation in regard to the flood-plain, and its proximity to moderate-value and high-value wetlands.

8.11. ENFORCEMENT

8.11.1. Nuisances: Any violation of this Ordinance shall be deemed to be a nuisance.

8.11.2. Code Enforcement Officer: It shall be the duty of the Code Enforcement Officer to enforce the provisions of this Ordinance. If the Code Enforcement Officer finds that any provision of this Ordinance is being violated, he/she shall notify in writing the person responsible for such violation, indicating the nature of the violation and ordering the action necessary to correct the violation, including discontinuance of

illegal use of land, buildings, structures, and abatement of nuisance conditions. A copy of such notice shall be maintained as a permanent record.

8.11.3. Legal Actions: When the above does not result in the correction or abatement of the violation or nuisance condition, the Board of Selectmen, upon notice from the Code Enforcement Officer, is hereby authorized and directed to institute any and all actions and proceedings, either legal or equitable, including seeking injunctions of violations and the imposition of fines, that are determined to be appropriate or necessary to enforce the provisions of the Ordinance in the name of the Town. The municipal officers, or their authorized agent, are hereby authorized to enter into administrative consent agreements for the purpose of eliminating violations of this Ordinance and recovering fines without court action. Such agreements shall not allow an illegal structure or use to continue unless there is clear and convincing evidence that the illegal structure or use was constructed or conducted as a direct result of erroneous advice given by an authorized municipal official and there is no evidence that the owner acted in bad faith, or unless the removal of the structure or use will result in a threat or hazard to public health and safety or will result in substantial environmental damage.

8.11.4. Fines: Any person, firm, or corporation being the owner of or having control or use of any building or premises who violates any of the provisions hereof, shall be subject to enforcement action and upon being found to be in violation shall be fined in accordance with 30-A M.R.S.A. § 4452, as may be amended. Each day such a violation is permitted to exist after notification thereof shall constitute a separate offense. All fines collected hereunder shall inure to the Town.

8.11.5. Contractor Liability: Any contractor involved in any activity regulated by the provisions of this Ordinance may be held liable for violating this Ordinance if the necessary permits for said activity have not been obtained or if work performed by the contractor does not conform to all conditions of approval of the permit or the terms of this Ordinance.

8.12. FEE SCHEDULE

All application fees for permits shall be paid to the Town in accordance with the fee schedule as established by the Board of Selectmen. Fees shall be for the cost of processing the permits and shall not be refundable regardless of the final decision to issue or deny a permit. Advertising costs, technical or legal assistance and associated costs deemed necessary by the Town for the review of applications shall be the responsibility of the applicant.

8.12.1. Application Fee: An application for a land use permit review must be accompanied by an application fee. This fee is intended to cover the cost of the Town's administrative processing of the application, including notification, advertising, mailings, and similar costs. The fee shall not be refundable. This application fee must be paid to the Town.

8.12.2. Technical Review Fee: In addition to the application fee, the applicant may be

required to pay a technical review fee to defray the Town's legal and technical costs of the application review. If required by the Code Enforcement Office and/or Planning Board, this fee must be paid to the Town and shall be deposited in the Development Review Trust Account, which shall be separate and distinct from all other municipal accounts. The application will be considered incomplete until evidence of payment of this fee is submitted to the Planning Board. The technical review fee may be used by the Planning Board to pay reasonable costs incurred by the Planning Board, at its discretion, which relate directly to the review of the application pursuant to the requirements of this Ordinance. Such services may include, but need not be limited to, consulting, engineering or other professional fees, and attorney fees. The Town shall provide the applicant, upon written request, with an accounting of his or her account and shall refund all of the remaining monies in the account after the payment by the Town of all costs and services related to the review. Such refund shall be accompanied by a final accounting of expenditures from the fund.

8.12.3. Impact Fees: In accordance with 30-A M.R.S.A. § 4354, as amended, the Town may require through the adoption of an Impact Fee Ordinance that the applicant provide for the construction of off-site capital improvements or the payment of impact fees instead of the construction. Infrastructure facilities include, but are not limited to: (1) wastewater collection and treatment facilities; (2) municipal water facilities; (3) solid waste facilities; (4) public safety equipment and facilities; (5) roads and traffic control devices; (6) parks and other open space or recreational areas; and (7) school facilities.

SITE PLAN REVIEW**9.1. PURPOSE**

Substantial development or major changes in the uses of land may cause a material impact on the cost and efficiency of municipal services, public utilities, road systems and traffic congestion, and may affect the visual characteristics of neighborhoods and the Town, and the general health, safety and welfare of the community. The purpose of this Section is to minimize the potential negative impacts of development, while maximizing development's positive effects by assessing the impact of new development on surrounding properties, municipal facilities and services, and the natural environment.

Only uses that have been recognized as being permitted uses in their zoning districts, or as the result of successful review as a special exception, are permitted to proceed to site plan review. Therefore, the purpose of site plan review is not to establish the right of a use to be located in the proposed area, but rather to ensure that the way the use is designed and placed on a lot is appropriate to its surroundings.

The Planning Board may consider the historic importance, scenic beauty or irreplaceability of natural areas during the site plan review. This may require a proposed development or structure to relate harmoniously to the terrain and surrounding environment, including existing buildings in the vicinity that have a visual relationship, with the proposal being considered.

9.2. ADMINISTRATION

9.2.1. If site plan review is determined to be required, then no building permit, plumbing permit or certificate of occupancy shall be issued by the Code Enforcement Officer or Local Plumbing Inspector for any use or development within the scope of this Section until a site plan application for the proposed development has been approved by the Planning Board.

9.2.2. An applicant shall request a pre-application meeting with the Planning Board prior to formal submission of a site plan. The materials submitted must include, but are not limited to, a written statement defining the proposed project and a Sketch Plan. The Sketch Plan may be a freehand drawing and shall show:

9.2.2.1. The outline of the tract or parcel with estimated dimensions, road rights-of-way and existing easements;

9.2.2.2. The layout of existing and proposed building(s), driveways and parking areas;

9.2.2.3. Identification of general areas of steep slopes, wetlands, streams and floodplains; and

- 9.2.2.4.** Estimated calculation of the percent of lot coverage (see definition in Section 11.2).
- 9.2.3.** Every applicant applying for site plan review should submit ten copies (10) of the application and supporting documentation to the Code Enforcement Officer All copies shall be prepared in accordance with Section 9.4, and accompanied by a fee as determined by the Board of Selectmen.
- 9.2.4.** An application for site plan review shall be submitted at least fifteen (15) calendar days prior to the Planning Board meeting at which the applicant wishes to be heard. Recommendations from the Fire Chief and Road Commissioner shall be solicited prior to the site plan review meeting.
- 9.2.5.** The Planning Board may schedule an on-site inspection meeting. The on-site inspection shall be jointly attended by the applicant or his or her duly authorized representative and at least two Planning Board members
- 9.2.6.** Within sixty (60) days after the date on which the site plan application first appears on the Planning Board agenda, the Board shall act to approve, approve with conditions, continue, or disapprove the site plan application submitted or amended. The time limit for review may be extended by mutual agreement between the Planning Board and the applicant.
- 9.2.7.** An applicant for site plan review shall obtain any special exception and/or variances that may be required from the Board of Appeals prior to review by the Planning Board. An applicant may request a pre-application meeting prior to receiving special exception approval.

9.3. APPLICABILITY

The following shall require site plan review and approval:

- 9.3.1.** The construction or expansion of buildings, including accessory buildings and structures, for commercial use by a total floor area of 1,000 sq. ft. or more, or a lot's alteration of more than ten thousand (10,000) square feet at multi-family residential properties.
- 9.3.2.** Reuse of a commercial building that has been vacant for more than two (2) years;
- 9.3.3.** The conversion of a residential building to a commercial use.
- 9.3.4.** Minor revisions to an existing site plan seeking an amendment to that previously approved site plan.

- 9.3.5.** Any change of use in which the intensity of use – as reflected in traffic generated, impacts on municipal services, the environment and surrounding neighborhood – will differ in a substantial way from that of the preceding use.

9.4. SITE PLAN CONTENT

The site plan application shall include as a minimum:

9.4.1. Site Plan

A site plan or plans prepared at a scale of not less than 1 inch equals 50 feet, containing the following information:

- 9.4.1.1.** Name and address of the applicant or his/her authorized agent and name of proposed development and any land within five hundred (500) feet of the proposed development in which the applicant has title or interest
- 9.4.1.2.** Existing soil conditions as described by a soil scientist, geologist, engineer or Soil Conservation Service medium intensity soil survey
- 9.4.1.3.** Town tax map and lot numbers and names of abutting land owners
- 9.4.1.4.** Scale, true north arrow, legend and a space for dates of any revisions that may be required
- 9.4.1.5.** Exact dimensions and acreage of parcel to be built upon. The corners of the parcel shall be located and marked on the ground and shall be referenced on the plan. For any site for which construction or grading is proposed, other than an enlargement of an existing building or construction of an accessory building, the Planning Board may require that the site plan include an actual field survey of the boundary lines of the lot, giving complete descriptive data by bearings and distances made and certified by a registered land surveyor.
- 9.4.1.6.** Existing and proposed locations and dimensions of any utility lines, sewer lines, waterlines, easements, drainage ways and public or private rights-of-way
- 9.4.1.7.** The size, shape and location of existing and proposed buildings on the parcel
- 9.4.1.8.** If the site is to be served by a subsurface wastewater disposal system, a report by a licensed site evaluator shall be provided
- 9.4.1.9.** Location and dimensions of on-site pedestrian and vehicular access ways, parking areas, loading and unloading facilities, design of ingress and

egress of vehicles to and from the site onto public streets and curb and sidewalk lines.

9.4.1.10. Landscaping plan showing location, type and approximate size of plantings and location and dimensions of all fencing and screening. Maintenance and replanting provisions shall be noted.

9.4.1.11. Natural contours at intervals of two (2) feet and final contours at intervals of two (2) feet, the natural contours to be shown by dashed lines and the final contours to be shown by solid lines. Where sufficient detail cannot be shown with two (2) foot contours, spot evaluations shall be required, with existing spot evaluations shown in parentheses to be distinguishable from final spot elevations. Where construction will not disturb the entire lot proposed for development, the requirement to map contours or spot elevations shall apply only to those portions of the lot that will be altered in any way and portions of the lot downslope from the proposed alterations to an extent sufficient to clearly delineate the existing and proposed course of drainage and the point or points of discharge from the lot.

9.4.1.12. Specification of quantities and grades of materials to be used if land-filling is proposed

9.4.1.13. Photos of the project area prior to any site preparation shall be submitted with the map

9.4.1.14. A digital copy of lot lines and buildings shall be submitted, if available.

9.4.2. Written Statement

A written statement by the applicant shall consist of:

9.4.2.1. Evidence by the applicant of his/her title and interest in the land that the application covers

9.4.2.2. A description of the proposed uses to be located on the site

9.4.2.3. Total floor area and footprint of each proposed building and structure and the lot coverage as defined in Section 11.2

9.4.2.4. Summary of existing and proposed easements, restrictions, and covenants on the property

9.4.2.5. Method of solid, liquid, chemical, or other waste disposal

9.4.2.6. Erosion and sedimentation control plan, stormwater drainage control

plan, and soils information

- 9.4.2.7. Approximate volume of soil to be added or removed, the amount of blasting required, and a disposition plan for removed materials
- 9.4.2.8. If public water and sewer are to be used, written statements from the water utility and sewer district shall be provided commenting on the capacity of the system and the availability of the utility to provide service to the new development
- 9.4.2.9. An estimate of the date when construction will start and be completed
- 9.4.2.10. List of approvals and permits required by the Office of the State Fire Marshal and other State and Federal Agencies

9.4.3. Minor Revisions to Approved Site Plans

- 9.4.3.1. Applicants proposing minor revisions to an existing site plan shall submit ten copies (10) of the revision application to the Town Office fifteen (15) calendar days prior to the Planning Board meeting at which the applicant wishes to be heard.
- 9.4.3.2. Application materials shall consist of the amended site plan as proposed and supporting documentation for all written statement requirements and standards applicable to the revision.
- 9.4.3.3. The Planning Board may schedule an on-site inspection meeting. The on-site inspection shall be jointly attended by the applicant, or his or her duly-authorized representative, and at least two (2) Planning Board members.
- 9.4.3.4. Within sixty (60) days after the date on which the site plan revision application first appears on the Planning Board agenda, the Board shall act to approve, approve with conditions, continue, or disapprove the site plan application submitted or amended. The time limit for review may be extended by mutual agreement between the Planning Board and the applicant.
- 9.4.3.5. Minor revision applications are exempt from the pre-application process.

9.5. PERFORMANCE STANDARDS

The following standards are to be used by the Planning Board in judging applications for site plan reviews and shall serve as minimum requirements for approval of the site plan. The site plan shall be approved unless, in the judgment of the Planning Board, the applicant is not able to reasonably meet one or more of these standards. In all instances,

the burden of proof shall be on the applicant.

9.5.1. Preservation and Enhancement of the Landscape

At completion, as defined during site plan review, landscaping should be designed and planted to define, soften or screen the appearance of off-street parking areas from the public right-of-way and abutting properties and structures.

9.5.2. Soils and Erosion Control

The soils on the site shall have adequate capacity and stability to support all proposed development. Filling, excavation and earth moving activity shall be carried out in a way that keeps erosion and sedimentation to a minimum. The design shall include best management practices that;

9.5.2.1. Preserve and protect the natural vegetation

9.5.2.2. Keep the duration of exposure of disturbed soils to as short a period as possible and stabilize the disturbed soils as quickly as practicable

9.5.2.3. Use temporary vegetation or mulching to protect exposed critical areas during development

9.5.3. Vehicular Access

Vehicular access shall comply with the access management standards of Section 5.3.1.

9.5.4. Parking and Circulation

The layout and design of all means of vehicular and pedestrian circulation, including walkways, interior drives and parking areas, shall provide for safe general interior circulation, separation of pedestrian and vehicular traffic, service traffic, loading areas and arrangement of parking areas.

9.5.5. Surface Water Drainage

Adequate provision shall be made for surface drainage so that removal of storm waters will not adversely affect neighborhood properties, downstream water quality, or the public storm drain system or cause soil erosion. Whenever possible, on-site absorption of run-off waters shall be used to minimize discharges from the site.

9.5.6. Existing Utilities

The development shall not impose an unreasonable burden on sewers and storm drains, water lines or other public utilities.

9.5.7. Special Features of Development

Exposed storage areas, exposed machinery, installations, service areas, truck loading areas, utility buildings and similar structures shall have sufficient setbacks and screening to provide a sound and visual buffer sufficient to minimize their

adverse impact on other land uses within the development area and surrounding properties.

9.5.8. Exterior Lighting

All exterior lighting shall be designed to minimize adverse impact on adjacent properties. Factors to be considered by the Planning Board in determining whether exterior lighting has been designed to minimize impact on neighboring properties shall include the location, height, shading and intensity/wattage of the proposed exterior lighting. Where practical, the Planning Board shall require exterior lighting fixtures to have motion detectors or other security options so that illumination occurs only when necessary and is otherwise dimmed or turned off.

9.5.9. Emergency Vehicle Access

Provisions shall be made for practical and safe emergency vehicle access to all buildings and structures at all times of the year.

9.5.10. Municipal Services

The development will not have an unreasonable adverse impact on municipal services.

9.5.11. Water Quality

Must comply with Federal and State regulations.

9.5.12. Air Quality

Must comply with Federal and State regulations.

9.5.13. Water Supply

The development has sufficient water available for the reasonably foreseeable needs of the development and will not cause an unreasonable burden on an existing water supply, if one is to be used.

9.6. GENERAL PROVISIONS

- 9.6.1.** The Planning Board will find one, or more, of the performance standards above are not applicable to an application.
- 9.6.2.** All construction performed under the authorization of a building permit issued for development within the scope of this Ordinance shall be in conformance with the approved site plan.
- 9.6.3.** Site plan approval shall expire two (2) years after Planning Board approval if a building permit has not been issued. Applicants may seek a two-(2) year extension prior to an approved site plan's expiration, unless the Ordinance, at the time of renewal, has changed to such an extent that the previously-approved use would no longer be permitted.

- 9.6.4.** The Planning Board, after reviewing and finding specific technical deficiencies, may hire its own civil engineer, soil scientist, geologist or other expert to review the plan submitted by the applicant. The applicant shall pay for this expense.
- 9.6.5.** The Planning Board may, in order to carry out the purposes of this Section, require reasonable conditions necessary to protect the public interest and to fit such uses harmoniously into their neighborhoods. Such conditions imposed shall be included in the building permits issued by the Code Enforcement Officer.
- 9.6.6.** The Planning Board's decisions shall be made independently of and concurrently with State and Federal agencies' reviews but may be subject to their stricter requirements.

9.7. APPEALS

An appeal of the Planning Board's final decision may be filed by any person aggrieved by that decision. An appeal from a final decision of the Planning Board shall be to the Board of Appeals, which shall conduct its review on an appellate basis limited to the Planning Board record, to determine whether the Planning Board's decision was within the scope of its authority and supported by substantial evidence in the record.

BOARD OF APPEALS**10.1. ADMINISTRATIVE APPEALS**

The Board of Appeals shall hear and decide appeals where it is alleged that there is any error in any order, requirement, decision, or determination made by, or failure to act by, the Code Enforcement Officer or the Planning Board in the administration of this Ordinance. When errors of administrative procedures or interpretation are found, the case shall be remanded to the Code Enforcement Officer or Planning Board for correction.

10.2. VARIANCES

The Board of Appeals shall authorize variances upon appeal, within the limitations set forth in this Ordinance.

10.2.1. Dimensional variances may be granted only from dimensional requirements including frontage, lot area, lot width, height, and setback requirements as set forth below.

10.2.2. Variances shall not be granted for establishment of any use otherwise prohibited by this Ordinance.

10.2.3. The Board of Appeals shall not grant a variance unless it finds that:

10.2.3.1. The proposed structure or use would meet the performance standards of this Ordinance except for the specific provision which has created the non-conformity and from which relief is sought;

10.2.3.2. The proposed structure or use will not interfere with access of firefighting apparatus to a structure on the land in question or adjacent property; and

10.2.3.2. The strict application of the terms of this Ordinance would result in an undue hardship.

10.2.3.4. The term "undue hardship" shall mean all of the following:

- a. That the land in question cannot yield a reasonable return unless a variance is granted;
- b. That the need for a variance is due to the circumstances of the property and not to the general conditions in the neighborhood;
- c. That the granting of a variance will not alter the essential character of the locality; and
- d. That the hardship is not the result of action taken by the applicant

or a prior owner.

The Board of Appeals may grant a variance to a property owner for the purpose of making that property accessible to a person with a disability who is living or regularly visits the property. The Board of Appeals shall restrict any variance granted under this subsection solely to the installation of equipment or the construction of structures necessary for access to or egress from the property by the person with the disability.

10.2.4. The Board of Appeals may grant a variance to a property owner of a single-family dwelling that is the primary year-round residence of the petitioner from a setback requirement only when strict application of this Ordinance to the petitioner and the petitioner's property would cause undue hardship. A variance under this section may not exceed twenty (20) percent of a set-back requirement and may not be granted if the variance would cause the area of the dwelling to exceed the maximum permissible lot coverage (if applicable). If the petitioner has obtained the written consent of an affected abutting landowner, the twenty (20) percent limitation may be exceeded, except for minimum setbacks from a wetland or waterbody required by Section 6. The term "undue hardship" for this section means:

10.2.4.1. That the need for a variance is due to the unique circumstances of the property and not to the general conditions in the neighborhood;

10.2.4.2. That the granting of a variance will not alter the essential character of the locality;

10.2.4.3. That the hardship is not the result of action taken by the applicant or a prior owner;

10.2.4.4. That the granting of the variance will not substantially reduce or impair the use of abutting property; and

10.2.4.5. That the granting of a variance is based upon demonstrated need, not convenience, and no other feasible alternative is available.

10.2.5. For variance requests for activities within the Shoreland Zone, a copy of each variance request, including the application and all supporting information supplied by the applicant, shall be forwarded by the Code Enforcement Officer to the Commissioner of the Department of Environmental Protection at least twenty (20) days prior to action by the Board of Appeals. Any comments received from the Commissioner prior to the action by the Board of Appeals shall be made part of the record and shall be taken into consideration by the Board of Appeals.

10.3. SPECIAL EXCEPTIONS

The Board of Appeals shall hear and decide only those requests for special exceptions that are authorized by this Ordinance and which are specifically listed as special exceptions. The Board of Appeals shall decide such questions as are involved in determining whether such special exceptions should be granted; and by majority vote to grant such special exceptions with such conditions and safeguards as are appropriate under this Ordinance, or to deny such special exceptions when not in harmony with the purposes and intent of this Ordinance. An exception may be granted only if the petitioner has established to the satisfaction of the Board of Appeals that the following criteria are met:

- 10.3.1.** That the proposed use will not have an adverse effect on the natural environment and/or that the site for that use does not have unusual physical characteristics such as topography, soils, lot size or shape which would have an adverse effect on surrounding properties.
- 10.3.2.** That the proposed use would not significantly depreciate the value of surrounding property.
- 10.3.3.** That the proposed use will not create an unreasonable demand for public services, including, but not limited to, public roads, fire protection, police protection, solid waste disposal, sewage treatment, public water supplies, schools, public open spaces and recreational programs and facilities.
- 10.3.4.** That the proposed use would not result in an inordinate amount of pedestrian and/or vehicular traffic at or surrounding the site and/or cause any problems regarding emergency vehicle access.
- 10.3.5.** When put to any other use, a structure originally designed as a dwelling shall not be put to a use that would cause rapid deterioration of the structure.
- 10.3.6.** That the proposed use will not have an adverse effect on surrounding property in consideration of the expanse of pavement, intensity of use and the structure's bulk and material.
- 10.3.7.** That the proposed use will not have an adverse effect on the use and quiet possession of surrounding property owners, including, but not limited to, hours of operation, type of traffic and noise levels at property lines.
- 10.3.8.** The applicant shall provide sufficient information and documentation to assure that the use will meet all applicable performance standards of this Ordinance.
- 10.3.9.** Before granting any special exceptions, the Board of Appeals may refer the application to the Planning Board for an informational report concerning the effect of the request on the surrounding area and any other pertinent data with respect to the Comprehensive Plan.
- 10.3.10.** The following Special Exception performance criteria shall be established where

applicable:

10.3.10.1. The use of heavy equipment on a regular basis in a residential neighborhood shall not be allowed before 6:00 a.m. and after 6:00 p.m.

10.3.10.2. Landscaping is to be preserved in its natural state insofar as practicable and shall be designed to stabilize slopes and buffer the site where necessary. The Board shall also consider the degree to which landscaping, fencing and other design elements have been incorporated to mitigate adverse effects on surrounding properties.

10.3.10.3. Review by the State Fire Marshall's Office is required for industrial and light industrial uses.

10.4. HEARING PROCEDURES OF THE BOARD OF APPEALS

10.4.1. The Board of Appeals may receive any oral or documentary evidence, but shall provide as a matter of policy for the exclusion of irrelevant, immaterial or unduly repetitious evidence. Every party shall have the right to present his/her case or defense by oral or documentary evidence, to submit rebuttal evidence and to conduct such cross examination as may be required for a full and true disclosure of the facts.

10.4.2. The appellant's case shall be heard first. To maintain orderly procedure, each side shall proceed without interruption. Questions may be asked through the Chairperson. All persons at the hearing shall abide by the order of the Chairperson.

10.4.3. At any hearing, a party may be represented by agent or attorney. Hearings shall not be continued to other times except for good cause.

10.4.4. The Code Enforcement Officer or representative of the Planning Board shall attend all hearings and may present to the Board of Appeals all plans, photographs, or other material he/she deems appropriate for an understanding of the appeal.

10.4.5. The transcript of testimony, if any, and exhibits, together with all papers and requests filed in the proceedings, shall constitute the record.

10.4.6. On-Site Inspection Option: The Board of Appeals may hold an on-site inspection of the site to review the existing conditions, field verify the information submitted and investigate the development proposal. The Board of Appeals may decide not to hold an on-site inspection when the site is snow covered. If an application is pending during a period when there is snow cover, the deadline by which the Board of Appeals shall take final action on the application may be extended, which extension shall not exceed thirty (30) days after the Board of Appeals is able to conduct an on-site inspection. Written notice of the on-site inspection shall be

provided to all parties entitled to notice.

10.4.7. Decision Procedures of the Board of Appeals

10.4.7.1. A majority of the members of the Board of Appeals shall constitute a quorum for the purpose of deciding an appeal.

10.4.7.2. The concurring vote of a majority of the members of the Board of Appeals shall be necessary to reverse any order, requirement, decision, or determination of the Code Enforcement Officer or Planning Board, or to decide in favor of the applicant on any matter on which it is required to pass under this Ordinance, or to or to grant any variance authorized by this Ordinance.

10.4.7.3. The person filing the appeal shall have the burden of proof.

10.4.7.4. The Board of Appeals shall decide all appeals within thirty-five (35) days after hearing, and shall issue a written decision on all appeals.

10.4.7.5. All decisions shall become a part of the record and shall include a statement of findings and conclusions as well as the reasons or basis therefore, upon all the material issues of fact, law or discretion presented, and the appropriate order, relief or denial thereof. Notice of any decision shall be mailed or hand delivered to the petitioner, his representative or agent, the Code Enforcement Officer, Planning Board, and Board of Selectmen within seven (7) days of the decision date.

10.4.7.6. Upon notification of the granting of an appeal by the Board of Appeals, the Code Enforcement Officer or the Planning Board shall promptly issue a permit in accordance with the conditions of approval, provided that all required approvals have been received.

10.4.7.7. A copy of all variances affecting shoreland zoning granted by the Board of Appeals shall be submitted to the Maine Department of Environmental Protection within fourteen (14) days of the decision.

10.4.8. Reconsideration of Decision of the Board of Appeals

10.4.8.1. The Board of Appeals may reconsider any of its decisions within forty-five (45) days of its prior decision. A request to the Board to reconsider a decision must be filed within ten (10) days of the decision that is to be reconsidered. A vote to reconsider and any action taken on that reconsideration must occur and be completed within forty-five (45) days of the vote on the original decision. The Board of Appeals may conduct additional hearings and receive additional testimony.

10.4.8.2. Reconsideration should be for one of the following reasons: (1) The record contains significant factual errors due to fraud or mistake regarding facts upon which the decision was based; or (2) The Board misinterpreted the applicable ordinance, followed improper procedures, or acted beyond its jurisdiction

10.4.9. Appeal to Superior Court

An appeal may be taken within forty-five (45) days after any decision is rendered by the Board of Appeals, by any party to Superior Court in accordance with State Law, except that any appeal of a reconsidered decision under Section 10.4.8 must be made within 15 days after the decision on reconsideration.

10.5. VARIANCES RECORDED

If the Board of Appeal grants a variance under this section, a certificate indicating the name of the current property owner, identifying the property by reference to the last recorded deed in its chain of title and indicating the fact that a variance, including any conditions on the variance, has been granted and the date of the granting, shall be prepared in recordable form. This certificate must be recorded in the County registry of deeds within ninety (90) days of the date of the final written approval of the variance or the variance is void. A variance is not valid until recorded as provided in this section. The date of the final written approval shall be the date stated on the written approval.

DEFINITIONS**11.1. CONSTRUCTION OF LANGUAGE**

In this Ordinance, certain terms or words should be interpreted as follows:

11.1.1. The word "person" includes a firm, association, organization, partnership, trust, company, or corporation, as well as an individual.

11.1.2. The present tense includes the future tense, the singular number includes the plural and plural includes the singular.

11.1.3. The word "shall" means the action is mandatory.

11.1.4. The word "may" means the action is permitted.

11.1.5. The words "used" or "occupied" include the words "intended", "designed", or "arranged to be used or occupied".

11.1.6. The word "dwelling" includes the word "residence".

11.1.7. In the case of any difference or meaning or implication between the text of this Ordinance and any map or illustration, the text shall control.

11.1.8. Terms not defined shall have the customary dictionary meaning.

11.2. DEFINITIONS

For the purposes of interpreting this Ordinance, the following terms, phrases, words and their derivations shall have the meaning given herein.

ABUTTING PROPERTY: Any lot which is physically contiguous with the lot in question even if only at a point and any lot which is located directly across a public street or way from the lot in question.

ACCESS, VEHICULAR: A public or private roadway used to enter or leave a public highway from adjacent land using an on-road motor vehicle. An access may be a driveway or an entrance depending upon the type of land use and volume of traffic generated by that use.

ACCESSORY BUILDING, STRUCTURE OR USE: A building, structure or use which is incidental and subordinate to the principal building, structure or use. Accessory uses, when aggregated shall not subordinate the principal use of the lot. A deck or similar extension of the principal structure or a garage attached to the principal structure by a roof or a common wall is considered part of the principal structure.

AGGRIEVED PARTY: An owner of land whose property is directly affected by the granting or

denial of a permit or variance under this Ordinance; a person whose land abuts land for which a permit or variance has been granted; or any other person or group of persons who have suffered particularized injury as a result of the granting or denial of such permit or variance.

AGRICULTURE / AGRICULTURAL ACTIVITY: The production, keeping or maintenance for sale or lease, of plants and/or animals, including but not limited to: forages and sod crops; grains and seed crops; dairy animals and dairy products; poultry and poultry products; livestock; fruits and vegetables; and ornamental and green house products. Agriculture does not include forest management and timber harvesting activities and does not include the construction, creation or maintenance of land management roads.

ALTERATION: As applied to a building or structure, a change or rearrangement in the structural parts or in the means of egress; or an enlargement, whether by extending on a side or by increasing height; or in moving from one location or position to another.

APPEAL: A means for obtaining review of a decision, determination, order or failure to act pursuant to the terms of this Ordinance as expressly authorized by this Ordinance.

AQUACULTURE: The growing or propagation of harvestable freshwater plant or animal species.

ARCHAEOLOGICAL HISTORIC SITE OR STRUCTURE: Any site or structure that is listed individually in the National Register of Historic Places or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register; Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district preliminarily determined by the Secretary of the Interior to qualify as a registered historic district; Individually listed on a State inventory of historic places in States with historic preservation programs which have been approved by the Secretary of the Interior; or Individually listed on a inventory or historic places in communities which historic preservation programs that have been certified either: by an approved State program as determined by the Secretary of the Interior; or directly by the Secretary of the Interior in States without approved programs.

ASSISTED LIVING FACILITY: A type of multi-family dwelling, including multiple individual rooms or dwelling units to be occupied as a residential shared living environment. Such construction will normally include individual apartments or rooms, combined with shared community space, shared dining facilities, housekeeping services, personal care and assistance, transportation assistance, and specialized shared services such as medical support services and physical therapy. This definition includes boarding care, convalescent homes, elderly congregate housing, group homes, and nursing homes.

AUTOMOBILE RECYCLING FACILITY: An automobile recycling business is a business that purchases or acquires salvage vehicles for the purpose of reselling the vehicles or component parts, rebuilding or repairing salvage vehicles for resale (See 30-A M.R.S.A. § 3752, as may be amended).

AUTOMOBILE REPAIR SERVICE: A place where, with or without the attendant sale of engine fuels, the following services may be carried out: general repair, engine rebuilding, reconditioning

of motor vehicles; collision service, such as body, frame, or fender straightening and repair; painting and undercoating of automobiles, ground transport, towing services, and vehicle rentals.

AUTOMOBILE SALES: A lot arranged, designed, or used for the storage and display for sale of any motor vehicle and where no repair work is done except minor incidental repair of automobiles displayed and sold on the premises.

BASAL AREA: The area of cross-section of a tree trunk at four and one-half (4½) feet above ground level and inclusive of bark.

BASAL AREA, RESIDUAL: The sum of the basal area of trees remaining on a harvested site.

BASEMENT: Any portion of a structure with a floor-to-ceiling height of six (6) feet or more and having more than fifty (50) percent of its volume below the existing ground level.

BED-AND-BREAKFAST: An owner-occupied residential structure in which no more than three sleeping rooms are made available for a fee to overnight travelers and which may provide guests with a morning meal. Such establishments do not provide guests with the independent living quarters and eating facilities normally associated with a hotel or motel.

BOARDING HOUSE: A house in which boarders are provided, under contract, rooms and meals for a certain period of time, usually by the week or month.

BOAT LAUNCHING FACILITY: A facility designed primarily for the launching and landing of watercraft, and which may include an access ramp, docking area, and parking spaces for vehicles and trailers.

BUFFERS: Areas of land, together with specified types and amounts of planting thereon and any structures which may be required between land uses to eliminate or minimize conflicts between them.

BUILDING: Any structure having a roof supported by columns or walls and intended for the shelter, housing, or enclosure of persons, animals or chattel. Each portion of a building, separated from other portions by a fire wall, shall be considered as a separate building.

BUILDING FOOTPRINT: The area covered by a building measured from the exterior surface of the exterior walls at grade level. Where the building is elevated above grade level on posts or similar devices, the building footprint is the area the building would cover if it were located at ground level.

BUSINESS SERVICE: A service listed under U.S. Standard Industrial Classification Code 73, including by way of example: advertising, credit reporting and collection, mailing and reproduction services, services to buildings, personnel supply services, computer and data processing services, management and public relations, similar services to businesses, and the business offices of corporations or firms.

CAMPGROUND, COMMERCIAL: Any area or tract of land used to accommodate two (2)

or more parties in temporary quarters, including, but not limited to tents, recreational vehicles, or other shelters, for profit.

CAMPSITE: Any area or tract of land used to accommodate no more than two (2) parties in temporary quarters, including, but not limited to, tents, recreational vehicles, or other shelters, not for profit.

CANOPY: The more or less continuous cover formed by tree crowns in a wooded area.

CERTIFICATE OF OCCUPANCY: Official certification that a premises conforms to provisions of the Land Use Ordinance, plumbing code, American with Disabilities Act, Life Safety 101 and NFPA 31 and may be used or occupied. Such a certificate is granted for new construction or for alteration or additions to existing structures. Unless such a certificate is issued, a structure cannot be lawfully occupied.

CHURCH: As used in this Ordinance, refers to a place of worship regardless of denomination.

CLEAR CUT: The harvesting of a stand of trees within a forested area of five (5) or more acres such that more than sixty (60) percent of the crown closure has been removed.

CODE ENFORCEMENT OFFICER: The official responsible for enforcement of this Ordinance and for other duties set forth by state statute and this Ordinance. The Code Enforcement Officer shall also have all the duties of a Building Inspector.

COMMERCIAL OUTDOOR RECREATION: Outdoor recreation activities that are operated by an entity other than a unit of government and which are available for use for a fee, including but not limited to standard golf courses, ice skating rinks, tennis courts, cross-country ski trails, and alpine ski trails, but excluding games and activities common to amusement parks. Private outdoor recreation facilities serving exclusively a residential use shall be considered accessory to the residential use.

COMMERCIAL STRUCTURE: A structure primarily used for the buying and selling of goods, natural or manufactured.

COMMERCIAL USE: The use of lands, buildings, or structures, other than a “home occupation,” defined below, the intent and result of which activity is the production of income from the buying and selling of goods and/or services, exclusive of rental of residential buildings and/or dwelling units.

COMMUNITY LIVING USE: A state-approved, authorized, certified or licensed group home, or intermediate care facility for eight or fewer mentally handicapped or developmentally disabled persons.

CORNER LOT: Lot located at the intersection of two streets. Corner lots shall conform with the front yard setback on the primary street and the side yard setback requirements on the secondary street.

CURB CUT: The opening along the street right-of-way line at which point vehicles may enter or leave the street.

DAY CARE FACILITY: A house or place in which a person or combination of persons maintains or otherwise carries out a regular program, for a fee, for any part of a day, providing care and protection for three or more children under the age of 16 unrelated to the operator, not to include nursery schools, summer camps, formal public or private schools, and further defined by the Department of Health & Human Services as follows: **DAY CARE CENTER:** A Day Care Facility as defined in State statutes for thirteen (13) or more children on a regular basis; and **DAY CARE HOME:** A Day Care Facility as defined in State statutes for three (3) to twelve (12) children on a regular basis.

DECK: An attached open platform to a building or structure without a roof.

DEVELOPMENT: A change in land use involving alteration of the land, water or vegetation, or the addition or alteration of structures or other construction not naturally occurring.

DIMENSIONAL REQUIREMENTS: Numerical standards, relating to spatial relationships including but not limited to setback, lot area, shore frontage and height.

DRIVEWAY: A vehicular access-way serving no more than two (2) lots.

DWELLING: A building used as the living quarters for one or more families, containing a minimum of three hundred (300) square feet of floor area, exclusive of garages and similar unheated storage spaces, and equipped with a heating system and plumbing. The term includes manufactured housing as defined by 30-A M.R.S.A §4358, as may be amended.

DWELLING UNIT: A room or group of rooms designed and equipped exclusively for use as permanent, seasonal, or temporary living quarters for only one (1) family. The term shall include mobile homes, but not recreational vehicles.

DWELLING, MULTI-FAMILY: A building, or portion thereof, used for residential occupancy by three (3) or more families, each living independently of the other

DWELLING, SINGLE-FAMILY: A dwelling designed for and occupied by not more than one (1) family and having no roof, wall or floor in common with any other dwelling unit. The term shall include manufactured and prefabricated homes.

DWELLING, TWO-FAMILY: A detached or semi-detached building or similar structure used for residential occupancy by two (2) families living independently of each other.

EMERGENCY OPERATIONS: Operations conducted for the public health, safety or general welfare, such as protection of resources from immediate destruction or loss, law enforcement, and operations to rescue human beings, property and livestock from the threat of destruction or injury.

ENLARGEMENT OR EXPANSION OF USE: Any intensification of use in time, volume, or

function, whether or not resulting from an increase in the footprint, height, floor area, land area or cubic volume occupied by a particular use, including but not limited to the addition of one or more months to a use's operating season; or the increased use of more floor area or ground area devoted to a particular use. Increases which are required in order to meet the requirements of the Americans with Disabilities Act and/or the State Fire Code are not considered to be enlargements or expansions of use.

ENTRANCE, VEHICULAR: A vehicular access serving one of the following land uses: residential use, developments serving three (3) or more dwelling units, retail, office, or service business uses including department stores, strip malls, convenience stores, gas stations, auto repair shops, restaurants, or similar uses.

ESSENTIAL SERVICES: Gas, electrical or communication facilities; steam, fuel, electric power or water transmission or distribution lines, towers and related equipment; telephone cables or lines, poles and related equipment; gas, oil, water, slurry or other similar pipelines; municipal sewage lines, collection or supply systems; and associated storage tanks. Such systems may include towers, poles, wires, mains, drains, pipes, conduits, cables, fire alarms and police call boxes, traffic signals, hydrants and similar accessories, but shall not include service drops or buildings which are necessary for the furnishing of such services.

EXPANSION OF A STRUCTURE: An increase to a structure's footprint or volume, including all extensions such as, but not limited to, attached decks, garages, porches, and greenhouses.

FAMILY: One (1) or more persons occupying a premises and living as a single housekeeping unit.

FLEA MARKET: An outdoor market of rented space, selling antiques, used household goods, curios, and the like, at a frequency of no more than four days in any six month period.

FLOODWAY: The channel of a stream or other watercourse and adjacent land areas that must be reserved in order to discharge the 100-year flood without cumulatively increasing the water surface elevation by more than one foot in height.

FLOOR AREA: The sum of the horizontal areas of the floor(s) of a structure enclosed by exterior walls, plus the horizontal area of any unenclosed portions of a structure such as porches and decks.

FOREST MANAGEMENT ACTIVITIES: Timber cruising and other forest resource evaluation activities, pesticide or fertilizer application, management planning activities, timber stand improvement, pruning, regeneration of forest stands, and other similar or associated activities, exclusive of timber harvesting and the creation, construction and maintenance of roads.

FORESTED WETLAND: A freshwater wetland dominated by woody vegetation that is six (6) meters (approximately 20 feet) tall or taller.

FOUNDATION: The supporting substructures of a building or other structure including but not limited to basements, slabs, sills, posts or frostwalls.

FRESHWATER WETLAND: Freshwater swamps, marshes, bogs and similar areas, other than forested wetlands, which are:

1. Of ten (10) or more contiguous acre; or of less than ten (10) contiguous acres and adjacent to a surface water body, excluding any river, stream or brook, such that in a natural state, combined surface area is in excess of ten (10) acres; and
2. Inundated or saturated by surface or ground water at a frequency and for a duration sufficient to support, and which under normal circumstances do support, a prevalence of wetland vegetation typically adapted for life in saturated soils. Freshwater wetlands may contain small stream channels or inclusions of land that do not conform to the criteria of this definition.

FRONTAGE, ROAD: The linear distance between the sidelines of a lot, measured along the lot line that borders upon whatever right-of-way serves as legal access to the lot. For the purposes of this Ordinance, the following ways shall constitute legal access to a lot along which frontage may be measured:

1. A way accepted by or established as belonging to the Town, Knox County, or the State of Maine, provided access is not specifically prohibited;
2. A way, whether dedicated to public ownership or not, as shown on an approved subdivision plan;
3. A private or public way which has not been approved by a governmental subdivision but which has been established in a deed recorded in a Registry of Deeds or otherwise legally established by adverse possession or adverse use.

FRONTAGE, SHORE: SEE SHORE FRONTAGE.

FUNCTIONALLY WATER-DEPENDENT USES: Those uses that require, for their primary purpose, location on submerged lands or that require direct access to, or location in, inland waters and that cannot be located away from these waters. The uses include, but are not limited to commercial and recreational fishing and boating facilities, excluding recreational boat storage buildings, and uses that primarily provide general public access to inland waters.

GARAGE: An accessory building for parking or temporary storage of automobiles of residential occupants of the premises, or a part of the residence usually occupying the ground floor area of one- or-two family dwellings. Not more than one (1) space may regularly be used by the private passenger automobile of a person not resident on the premises.

GARAGE SALES: Garage sales shall mean and include all sales entitled “garage sale”, “yard sale”, “lawn sale”, “porch sale”, “attic sale”, “rummage sale”, or “flea market” sale or any similar casual sale of tangible personal property which is advertised by any means or is made evident by articles being set out in a yard, porch, or garaged whereby the public at large is/can be made aware

of such sale.

GREAT POND: Pursuant to 38 M.R.S.A. §436-A, as may be amended, any inland body of water which in a natural state has a surface area in excess of 10 acres, and any inland body of water artificially formed or increased which has a surface area in excess of 30 acres except for the purposes of this Ordinance, where the artificially formed or increased inland body of water is completely surrounded by land held by a single owner.

GROUND COVER: Small plants, fallen leaves, needles and twigs, and the partially decayed organic matter of the forest floor.

GUEST ROOM: A room in a hotel, motel, tourist home or "bed and breakfast" residence offered to the public for compensation in which no provision is made for cooking.

HEIGHT OF A STRUCTURE OR BUILDING: The vertical distance between the mean original grade at the downhill side of the structure and the highest point of the structure, excluding chimneys, steeples, antennas, and similar appurtenances which have no floor area.

HOME OCCUPATION: An occupation or profession which is customarily conducted on or in a residential structure or property and which is:

1. Clearly incidental to and compatible with the residential use of the property and surrounding residential uses; and
2. Which employs no more than two (2) persons other than family members residing in the home.

HOSPITAL: An institution providing health services, primarily for in-patients, and medical or surgical care of the sick or injured, including as an integral part of the institution, such related facilities as laboratories, out-patient departments, training facilities, central service facilities and staff offices.

IMPERVIOUS SURFACE: The area covered by buildings, structures and associated constructed facilities, areas which have been or will be covered by a low-permeability material, such as asphalt or concrete, and areas such as gravel roads and unpaved parking areas, which have been or will be compacted through design or use to reduce their permeability. Common impervious surfaces include, but are not limited to, roof tops, walkways, patios, driveways, parking lots or storage areas, concrete or asphalt paving, gravel roads, packed earthen materials, and oiled, macadam, or other surfaces which similarly impede the natural infiltration of stormwater.

INCREASE IN NONCONFORMITY OF A STRUCTURE: Any change in a structure or property which causes further deviation from the dimensional standard(s) creating the nonconformity such as, but not limited to, reduction in water body, tributary stream or wetland setback distance, increase in lot coverage, or increase in height of a structure. Property changes or structure expansions which either meet the dimensional standard or which cause no further increase in the linear extent of nonconformance of the existing structure shall not be considered to increase

nonconformity. For example, there is no increase in nonconformity with the setback requirement for water bodies, wetlands, or tributary streams if the expansion extends no further into the required setback area than does any portion of the existing nonconforming structure. Hence, a structure may be expanded laterally provided that the expansion extends no closer to the water body, tributary stream, or wetland than the closest portion of the existing structure from that water body, tributary stream, or wetland and complies with the requirements of Section 6. Included in this allowance are expansions which in-fill irregularly shaped structures.

INDIVIDUAL PRIVATE CAMPSITE: An area of land not associated with a campground, but which is developed for repeated camping by only one group not to exceed 10 individuals and which involves site improvements which may include but not be limited to gravel pads, parking areas, fire places, or tent platforms.

INDUSTRIAL STRUCTURE: A structure primarily used for the assembling, fabrication, finishing, manufacturing, packaging or processing of goods, or the extraction of minerals and/or storage of goods.

INDUSTRIAL USE: The assembling, fabrication, finishing, manufacturing, packaging or processing of goods, or the extraction of minerals.

INSTITUTIONAL: A non-profit or quasi-public use, or institution such as a church, library, public or private school, hospital, or municipally owned or operated building, structure or land used for public purposes.

ITINERANT PEDDLER: A person engaged in a temporary or transient business within the Town to sell goods and products within the public right of way or on private property.

JUNKYARD: A yard, field, or other area used as a place of storage for any of the following items, excluding items which are being stored out of doors for household use for a reasonable period of time:

1. Three (3) or more unserviceable, discarded, worn-out, or junked motor vehicles as defined by state law, not including temporary storage, as defined by state law, by an establishment or place of business engaged primarily in doing auto body repair work for the purpose of rendering a motor vehicle serviceable;
2. Discarded, worn-out, or junked plumbing, heating supplies, household appliances, and furniture;
3. Discarded, scrap, and junked lumber; or
4. Old or scrap copper, brass, rope, rags, batteries, paper trash, rubber debris, waste and all scrap iron, steel and other scrap ferrous or nonferrous material.

KENNEL, COMMERCIAL: Any place in or at which any number of dogs or cats are kept for the purpose of sale or in connection with boarding, care, training or breeding, for which a fee is charged.

KENNEL, NON-COMMERCIAL: An accessory building to a residence designed or used for the accommodation of dogs or cats owned by the occupants of the residence.

LAND USE PERMIT: A permit for proposed land use activity as defined in this Ordinance and issued by the Code Enforcement Officer in accordance with the provisions of this Ordinance.

LIGHT MANUFACTURING: The fabrication or processing of materials into a finished product. Fabrication relates to the stamping, cutting or otherwise shaping of the processed materials into useful objects/products. Light manufacturing does not include the refining or other initial processing of basic raw materials such as metal ore, lumber or rubber.

LOADING SPACE: An off-street space or berth on the same lot with a building or contiguous to a group of buildings for the temporary parking of a commercial vehicle while loading or unloading merchandise or materials, and which abuts upon a street, alley or other appropriate means of access.

LOT: A contiguous parcel of land in single or joint ownership described on a deed, plot plan, or similar legal document.

LOT AREA: The area of land enclosed within the boundary lines of a lot, minus land below the normal high-water line of a water body or upland edge of a wetland and areas beneath roads serving more than two lots.

LOT COVERAGE: The percentage of lot area covered or occupied by principal and accessory structures, and roads, driveways, parking lots and other impermeable/impervious surfaces.

LOT DEPTH: The mean horizontal distance between the front and rear lot lines measured within the lot boundaries.

LOT LINE: A line bounding a lot which divides one lot from another; or from a street or any other public or private space.

LOT LINE, FRONT: In the case of a lot abutting only one street, the street line separating such lot from such street; in the case of a double frontage lot, each street line separating such lot from a street shall be considered to be the front lot line, except where the rear yard requirement is greater than the front yard requirement in which case one of two opposing yards shall be a rear yard. In the case of a lot with no road frontage, the front lot line shall be considered to be the lot line in front of the front entrance of the building.

LOT LINE, SIDE: Any lot line other than a front or rear lot line.

LOT LINE, REAR: That lot line which is parallel to and most distant from the front lot line of the lot; in the case of an irregular, triangular, or gore-shaped lot, a line twenty (20) feet in length, entirely within the lot, parallel to and at the maximum possible distance from, the front lot line shall be considered to be the rear lot line. In the case of lots which have frontage on more than one road or street, the rear yard shall be the two opposing yards.

LOT OF RECORD: Any validly recorded lot which at the time of its recordation complied with all applicable laws, ordinances, and regulations.

LOT STANDARDS: The combination of controls which establishes the maximum size of a building and its location on the lot. Components of lot standards, also known as "space and bulk" regulations in size and height of building; location or exterior walls at all levels with respect to lot lines, streets and other buildings; building coverage; gross floor area of buildings in relation to lot area; open space (yard) requirements; and amount of lot area provided per dwelling unit.

MAINTENANCE & REPAIR, NORMAL: Any work necessary to maintain an improvement or structure in its original or previously improved state or condition. Normal maintenance and repair shall not include reconstruction, change in design, change in structure, change in use, change in location, change in size or change in capacity.

MARINA: A business establishment having frontage on navigable water and, as its principal use, providing for hire offshore moorings or docking facilities for boats, and which may also provide accessory services such as boat and related sales, boat repair and construction, indoor and outdoor storage of boats and marine equipment, boat and tackle shops and marine fuel service facilities.

MARKET VALUE: The estimated price a property will bring in the open market and under prevailing market conditions in a sale between a willing seller and a willing buyer, both conversant with the property and with prevailing general price levels.

MEDICAL CLINIC: An office building used by members of the medical profession for the diagnosis and out-patient treatment of human ailments.

MINERAL EXPLORATION: Hand sampling, test boring, or other methods of determining the nature or extent of mineral resources which create minimal disturbance to the land and which include reasonable measures to restore the land to its original condition.

MINERAL EXTRACTION: Any operation within any twelve (12) month period which removes more than one-hundred (100) cubic yards of soil, topsoil, loam, sand, gravel, clay, rock, peat, or other material from its natural location and to transport the product removed, away from the extraction site.

MINIMUM LOT WIDTH: The closest distance between the side lot lines of a lot. When only two lot lines extend into the shoreland zone, both lot lines shall be considered to be side lot lines.

MOBILE HOME/MANUFACTURED HOUSING UNIT: A detached residential dwelling unit designed for transportation, after fabrication, on streets or highways on its own wheels, or on a flat bed or other trailer, and arriving at the site where it is to be occupied as a dwelling unit complete and ready for occupancy, except for minor and incidental unpacking and assembly operations, such as locating on jacks or other foundation, or connection to utilities. For the purpose of this Ordinance, a mobile home shall be treated as a single-family dwelling and be subject to all land use regulations applicable thereto. Mobile homes may be differentiated between:

1. **NEWER MOBILE HOME:** Those units constructed after June 15, 1976, which the manufacturer certifies are constructed in compliance with the United States Department of Housing and Urban Development standards and complies with the Manufactured Housing Construction and Safety Standards Act of 1974, et seq., which in the traveling mode are 14 body feet or more in width and are 750 or more square feet and are constructed on a permanent chassis and designed to be used as a dwelling, with or without permanent foundation;
2. **OLDER MOBILE HOMES:** Those units constructed before June 15, 1976, and not in compliance with the Manufactured Housing Construction and Safety Standards Act of 1974, which are constructed on a permanent chassis and designed to be used as a dwelling, with or without a permanent foundation, but does not include those smaller units commonly called travel trailers.

MOBILE HOME PARK: A parcel of land in unified ownership approved by the Town for the placement of three (3) or more manufactured housing units.

MOBILE HOME PARK LOT: A parcel of land within a mobile home park, designated on the mobile home park plan, on which an individual manufactured housing unit (mobile home) may be located and which is reserved for use by the occupants of that home.

MOTEL: A building or group of buildings designed, intended or used primarily for providing temporary living accommodations which may include provisions for living space, cooking, bathing and eating.

MOTEL UNIT: A room or group of rooms designed and equipped for use as temporary living quarters which may include provisions for living space, cooking, bathing, and eating.

MOTOR VEHICLE, UNSERVICEABLE: Any motor vehicle which is wrecked, dismantled, cannot be operated legally on any public highway, or which is not being used for the purposes for which it was manufactured.

MUNICIPAL FACILITIES: Buildings or land which is owned by a public entity and operated under its supervision for a public purpose.

NATIVE: Indigenous to the local forests.

NATURAL AREAS AND NATURAL COMMUNITIES/UNIQUE NATURAL AREAS AND NATURAL COMMUNITIES: Areas identified by a governmental agency such as the Maine Department of Conservation Natural Areas Program as having significant value as a natural area and any areas identified in the Comprehensive Plan.

NEIGHBORHOOD STORE: A retail store that occupies less than 2,000 square feet of total floor space and within which no alcoholic beverages are consumed.

NON-CONFORMING CONDITION: A non-conforming lot, structure or use which is allowed solely because it was in lawful existence at the time this Ordinance or subsequent amendment took effect.

NONCONFORMITY, INCREASE: SEE INCREASE IN NONCONFORMITY OF A STRUCTURE

NON-CONFORMING LOT: A single lot of record which, at the effective date of adoption or amendment of this Ordinance, does not meet the area, frontage, or width requirements of the district in which it is located.

NON-CONFORMING STRUCTURE: A structure which does not meet any one or more of the following dimensional requirements; setback, height, or lot coverage, but which is allowed solely because it was in lawful existence at the time this Ordinance or subsequent amendments took effect.

NON-CONFORMING USE: Use of buildings, structures, premises, land or parts thereof which is not permitted in the district in which it is situated, but which is allowed to remain solely because it was in lawful existence at the time this Ordinance or subsequent amendments took effect.

NORMAL HIGH-WATER LINE: That line which is apparent from visible markings, changes in the character of soils due to prolonged action of the water or changes in vegetation, and which distinguishes between predominantly aquatic and predominantly terrestrial land. In the case of wetlands adjacent to rivers and great ponds, the normal high-water line is the upland edge of the wetland, and not the edge of the open water.

PARKING LOT: An open area other than a street used for the parking of more than four automobiles and available for employee parking and public use whether free, for compensation, or an accommodation for clients or customers.

PARKING SPACE: An area not less than ten (10) feet wide and twenty (20) feet long, not including the access thereto, accessible from street or aisles leading to streets and usable for the storage or parking of passenger vehicles. Parking space or access thereto may be construed to be usable year round. A parking space to accommodate the handicapped shall be an area not less than twelve (12) feet wide and eighteen (18) feet long.

PERFORMANCE STANDARD: A criterion established to control the use of land and structures. The purpose of performance standards is to provide detailed regulations and restrictions by means of minimum criteria which must be met by users in order to protect neighbors from adverse impacts of adjoining land uses and to protect the general health, safety and welfare of citizens of Hope.

PERMANENT STRUCTURES: Structures which remain in or over the water for seven (7) months or more in any period of twelve (12) consecutive months.

PERSON: An individual, corporation, governmental agency, municipality, trust, estate, partnership, association, two (2) or more individuals having a joint or common interest, or other legal entity.

PERSONAL SERVICE: A service listed under U.S. Standard Industrial Classification Code 72, and including laundry and cleaning services, photography studios, shoe repair shops, funeral homes, and similar services to the general public.

PORCH: An attachment to a building or structure which has a roof and may be screened or enclosed; it will not be heated.

PRINCIPAL STRUCTURE: A building or similar structure in which is conducted or in which is intended to be conducted, the main or primary use of the lot on which it is located.

PRINCIPAL USE: The specific primary purpose for which land is used.

PROFESSIONAL OFFICE: An office of a professional such as an architect, accountant, dentist, doctor of medicine, lawyer, etc., but not including any manufacturing, commercial or industrial activity.

PUBLIC FACILITY: Any facility, including, but not limited to, buildings, property, recreation areas, and roads, which are owned, leased, or otherwise operated, or funded by a governmental body or public entity.

QUASI-PUBLIC FACILITY: A facility for a recognized public purpose, such as an auditorium, library, park, or museum, which is operated by a not-for-profit organization or by a public agency other than the Town, the State or the federal government.

RECENT FLOODPLAIN SOILS: the following soil series as described and identified by the National Cooperative Soil Survey:

Fryeburg	Hadley	Limerick	
Lovewell	Medomak	Ondawa	
Alluvial	Cornish	Charles	
Podunk	Rumney	Saco	
Suncook	Sunday		Winooski

RECHARGE AREA: Area composed of permeable, porous material through which precipitation and surface water infiltrate and directly replenish groundwater in aquifers.

RECREATIONAL FACILITY: A place designed and equipped for the conduct of sports, leisure time activities, and other customary and usual recreational activities, excluding boat launching facilities.

RECREATIONAL VEHICLE: A vehicle or an attachment to a vehicle designed to be towed, and designed for temporary sleeping or living quarters for one or more persons, and which may include a travel trailer, tent trailer, camp trailer, and motor home. In order to be considered as a vehicle and not as a structure, the unit must remain with its tires on the ground, and must be registered with the State Division of Motor Vehicles.

REPLACEMENT SYSTEM: A subsurface waste water system intended to replace:

1. Any existing system which is either malfunctioning or being upgraded with no significant change of design flow or use of the structure, or
2. Any existing overboard wastewater discharge.

RESTAURANT: A full service eating facility that meets the following criteria:

1. Food and beverages are served at a table for consumption predominately on the premises.
2. Plates and utensils are washed on premises.
3. At least fifty (50) percent of the seating is within the building.
4. State and Town hygiene requirements are met.

RETAIL ESTABLISHMENT: Any business, housed in a permanent structure, engaged primarily in the sale of goods and services to the ultimate consumer for direct consumption and/or use, but not for resale.

RIGHT OF WAY: The legal right, established by usage or grant, to pass along a specific route through property belonging to another.

RIPRAP: Rocks, irregularly shaped, and at least six (6) inches in diameter, used for erosion control and soil stabilization, typically used on ground slopes of two (2) units horizontal to one (1) unit vertical or less.

RIVER: A free-flowing body of water including its associated flood plain wetlands from that point at which it provides drainage for a watershed of twenty five (25) square miles to its mouth.

ROAD: A route or track consisting of a bed of exposed mineral soil, gravel, asphalt, or other surfacing material constructed for or created by the repeated passage of motorized vehicles which often serves as the principal means of access to abutting properties.

ROAD, PUBLIC: A public thoroughfare, way, or easement permanently established for passage of persons or vehicles and which has been duly recorded as such in the Knox County Registry of Deeds.

ROOMING HOUSE: A building of residential character in which three (3) or more rooms are rented to guests for the purpose of lodging and/or the taking of meals. The renting of one or two (2) bedrooms in a dwelling otherwise used as living quarters for one family shall not be considered a rooming house but rather shall be considered an accessory use to the single family dwelling.

SCHOOL, COMMERCIAL: A place or institution for teaching and learning, which place or institution is established for commercial or profit-making purposes, including, by way of example only, schools for dance, music, riding, gymnastics, photography, driving or business.

SCHOOL, PUBLIC AND PRIVATE: A place or institution for teaching and learning, which place or institution teaches courses of study sufficient to qualify attendance there as being in compliance with state compulsory education requirements. A public school, as differentiated from a private school, is operated by a municipal corporation or school administrative district or, for the purposes of this Ordinance, by a recognized religious organization.

SERVICE DROP, ELECTRICAL: Any electrical utility line extension which does not cross or run beneath any portion of a water body provided that:

1. The placement of wires and/or the installation of utility poles is located entirely upon the premises of the customer requesting service or upon a roadway right-of-way; and
2. The total length of the extension is less than 1,000 feet.

SERVICE DROP, TELEPHONE: Any telephone utility line extension which does not cross or run beneath any portion of a water body provided that:

1. The extension, regardless of length, will be made by the installation of telephone wires to existing utility poles, or
2. The extension requiring the installation of new utility poles or placement underground is less than 1,000 feet in length.

SETBACK: The minimum distance from the edge of the road surface or lot line to the nearest part of a structure.

SETBACK, BACK OR REAR: The distance between the rear line of the lot, extending the full width of the lot, and the nearest part of any principal or accessory structure. Back or rear setback and back or rear yard are synonymous.

SETBACK, FRONT: The distance between the edge of the road surface extending the width of the frontage, and the nearest part of any principal or accessory structure. Front setback and front yard setback are synonymous.

SETBACK, SHORELINE: The nearest horizontal distance from the normal high-water line to the nearest part of a structure, road, parking space or other regulated object or area.

SETBACK, SIDE: The distance between the side property line and the nearest part of any principal or accessory structure. Any lot line not a back lot line or a front lot line shall be deemed a side lot line. Side setback and side yard are synonymous.

SHORE FRONTAGE: The length of a lot bordering on a water body or wetland measured in a straight line between the intersections of the lot lines with the shoreline.

SHORELAND ZONE: The land area located within two hundred and fifty (250) feet, horizontal distance, of the normal high-water line of any great pond, river, or saltwater body; within two hundred and fifty (250) feet of the upland edge of a coastal or freshwater wetland; or within seventy-five (75) feet of the normal high-water line of a stream.

SHORELINE: The normal high-water line of a water body, or upland edge of a freshwater wetland.

SIGN: Structure, device, letter, word, model, banner, insignia, flag, or other representation which is used as or is in the nature of an advertisement, announcement, or direction. The area of a sign is the area on one side of the smallest simple geometric shape such as a square, rectangle, triangle, circle, etc., encompassing all lettering, wording, design, symbols, together with any background which is not the same color as the building. An inconspicuous support such as a slim post is not part of sign area.

SIGN, ILLUMINATED: A sign that has characters, letters, figure, designs, or outlines illuminated by electric lighting or luminous tubes as part of the sign, and not the so-called neon tube, or whose illumination is derived entirely from an external artificial source.

SIGN, OFF-PREMISE: A sign that is not located upon the same real property that the business, facility, or point of interest which it serves is located.

SIGN, ON-BUILDING: A sign that is attached to the building wall and which extends not more than six inches from the face of such wall.

SIGN, ON-PREMISE: A sign that is located upon the same real property that the business, facility or point of interest which it serves is located.

SIGN, TEMPORARY: A sign of a temporary nature, erected less than ninety (90) days, within any twelve (12) month period, exemplified by the following: political signs, charitable signs, fundraising sign, construction signs, carnival signs, garage sales, lawn sales, rummage sales, and all signs advertising sales of personal property (excluding mobile homes), and for rent signs. Any exterior sign displayed by an ongoing business on the business premises on which the written or printed message changes while the structure of the sign remains unchanged shall not be considered as a temporary sign. For example, chalkboards and signs with removable lettering shall not be considered temporary signs if in place for ninety (90) days or more within any twelve (12) month period.

SKID TRAIL: A route repeatedly used by forwarding machinery or animal to haul or drag forest products from the stump to the yard or landing, the construction of which requires minimal excavation.

SLASH: The residue, e.g., treetops and branches, left on the ground after a timber harvest.

STREAM: A free-flowing body of water from the outlet of a great pond or from the confluence of 2 perennial streams as depicted on the most recent edition of a United States Geological Survey 7.5 minutes series topographic map, or if not available, a 15-minute series topographic map, to the point where the body of water becomes a river or flows to another water body or wetland within the shoreland area.

STRUCTURE: Anything built for the support, shelter or enclosure of persons, animals, goods or property of any kind, together with anything constructed or erected with a fixed location on or in the ground, exclusive of fences. The term includes structures temporarily or permanently located, such as decks and satellite dishes, buildings, mobile homes, radio towers, sheds, signs, decks, and storage bins.

STRUCTURE, ACCESSORY: A building or similar structure which

1. Is subordinate in area, extent and purpose to the principal building or use served,
2. Is located on the same lot as the principal building or use served except as otherwise expressly authorized by the provisions of this Ordinance, and
3. Is customarily incidental to the principal building or use.

Any portion of a principal building devoted or intended to be devoted to an accessory use is not an accessory or similar structure.

SUBSTANTIAL START: A building is substantially started when the foundation is complete. A substantial start must be made within six months of a building permit being issued.

SUBSURFACE WASTEWATER DISPOSAL SYSTEM - Any system designed to dispose of waste or waste water on or beneath the surface of the earth; includes, but is not limited to: septic tanks; disposal fields; grandfathered cesspools; holding tanks; pretreatment filter, piping, or any other fixture, mechanism, or apparatus used for those purposes; does not include any discharge system licensed under 38 M.R.S.A. § 414, as may be amended, any surface waste water disposal system, or any municipal or quasi-municipal sewer or waste water treatment system.. The term shall not include a wastewater disposal system designed to treat wastewater which is in whole or in part hazardous waste as defined in 38 M.R.S.A. Chapter 13, subchapter 1, as may be amended.

SUSTAINED SLOPE: A change in elevation where the referenced percent grade is substantially maintained or exceeded throughout the measured area.

TIMBER HARVESTING: The cutting and removal of trees from their growing site for the primary purpose of selling or processing forest products., and the attendant operation of cutting and skidding machinery but not the construction or creation of roads. Timber harvesting does not include the clearing of land for approved construction. The cutting or removal of trees in the shoreland zone on a lot that has less than two (2) acres within the shoreland zone shall not be considered timber harvesting.

TRADESMAN'S SHOP: The shop of a self-employed craftsman or person in a skilled trade.

TRANSIENT: A non-resident person residing within the Town of Hope less than thirty (30) days.

TRIBUTARY STREAM: A channel between defined banks created by the action of surface water, whether intermittent or perennial, and which is characterized by the lack of upland vegetation or by the presence of aquatic vegetation, and by the presence of a bed devoid of topsoil containing waterborne deposits on exposed soil, parent material or bedrock, and which flows to a water body or wetland as defined. "Tributary stream" does not include rills or gullies forming because of accelerated erosion in disturbed soils where the natural vegetation cover has been removed by human activity.

The definition does not include the term "stream" as defined elsewhere in this Ordinance, and only applies to that portion of the tributary stream located within the shoreland zone of the receiving water body or wetland.

UPLAND EDGE: The boundary where the soils change from those soils that are saturated and support the growth of wetland vegetation to those soils which are not saturated for a duration sufficient to support the growth of wetland vegetation, but such vegetation is dominated by woody stems that are six meters, approximately twenty feet tall or taller

USE: The purpose or activity for which land or any building thereon is designed, arranged, or intended, or for which it is occupied or maintained.

USE, ACCESSORY: A use subordinate to a permitted use located on the same lot, and customarily incidental to the permitted use.

USE, CONFORMING OR PERMITTED: A use which may be lawfully established in a particular district provided it conforms to all the requirements, standards and regulations of such district.

USE, OPEN SPACE: A use which does not disturb the existing state of the land except to restore this land to a natural condition.

VARIANCE: A variance is a relaxation of the terms of this Ordinance by decision of the Board of Appeals. It can be granted only where such variance will not be contrary to the public interest and only where a literal enforcement of the Ordinance will result in undue hardship as set forth in Section 10.2.

VEGETATION: All live trees, shrubs, ground cover, and other plants including without limitation, trees both over and under four (4) inches in diameter, measured at four and one-half (4 ½) feet above ground level.

VOLUME OF STRUCTURE: The volume of all portions of a structure enclosed by roof and fixed exterior walls as measured from the exterior faces of these walls and roof.

WAREHOUSES AND STORAGE FACILITIES: Facilities that are dedicated to the storage and distribution of manufactured products, supplies and equipment, but excluding bulk storage of materials that are inflammable or explosive or that create hazardous or commonly recognized offensive conditions.

WATER BODY: Any great pond, river, or stream.

WATER CROSSING: Any project extending from one bank to the opposite bank of a stream, tributary stream, or wetland whether under, through, or over the water or wetland. Such projects include but may not be limited to roads, fords, bridges, culverts, water lines, sewer lines, and cables as well as maintenance work on these crossings. This definition includes crossings for timber harvesting equipment and related activities.

WAY, PRIVATE: A thoroughfare or way designated for private use and maintained by a property owner or group of property owners and which has been duly recorded as such in the Knox County Registry of Deeds.

WETLAND: A freshwater wetland.

WETLANDS ASSOCIATED WITH GREAT PONDS: Wetlands contiguous with or adjacent to a great pond, and which during normal high water, are connected by surface water to the great pond. Also included are wetlands which are separated from the great pond by a berm, causeway, or similar features less than one hundred (100) feet in width, and which have a surface elevation at or below the normal high water line of the great pond. Wetlands associated with great ponds are considered to be part of that great pond, such that the shoreland zone encloses both the great pond and the wetland as a whole.

WHOLESALE BUSINESS ESTABLISHMENT: Any business, housed in a permanent structure, engaged in the sale of goods in large amounts to retailers or jobbers, rather than directly to consumers.

WILDLIFE HABITAT: Areas identified by a governmental agency such as the Maine Department of Inland Fisheries and Wildlife as having significant value as habitat for animals and any areas identified in the comprehensive plan.

WIND ENERGY FACILITY: An electricity generating facility consisting of one or more wind turbines under common ownership or operating control, and includes substations, MET Towers, cables/wires and other buildings accessory to such facility, whose main purpose is to supply electricity to off-site customer(s).

WIND TURBINE, COMMERCIAL: A wind energy conversion system which converts wind energy into electricity through the use of a wind-driven turbine generator when the total height exceeds one-hundred fifty (150) feet or the nameplate capacity exceeds one-hundred (100) kilowatts. Such wind turbine includes the turbine, blade, tower, base and pad transformer, if any.

WIND TURBINE, PERSONAL: A wind energy conversion system which converts wind energy

into electricity through the use of a wind-driven turbine generator when the total height is one-hundred fifty (100) feet or less and where no less than 60 percent of the energy generated remains on the property.

WIND TURBINE, HOBBYIST: A wind energy conversion system which converts wind energy into electricity through the use of a wind-driven turbine generator when the total height is less than fifty (50) feet and the prop diameter is twelve (12) feet or less.

WIRELESS TELECOMMUNICATIONS FACILITIES, CELL TOWERS, ANTENNA TOWERS: Structures that receive and/or transmit wireless communications or other signals, excluding emergency, temporary wireless telecommunications facilities, amateur (ham) radio stations, parabolic antenna less than seven (7) feet in diameter and that are an accessory use of the property, or antennas as a residential accessory use.

WOODY VEGETATION: Live trees or woody, non-herbaceous shrubs.
