Falklands crisis could affect UMO research

by Marshall Murphy
Staff Writer

While the Falkland Island crisis may seem a bit too far away from Maine to warrant any serious worry, research work that is being carried out by two departments at the University of Maine could be directly affected by an escalation of the differences between Argentina and Great Britain.

Currently research is being done on Antarctica by professors in the geological sciences and the zoology departments. Antarctica is south of South America, yet still close to the Falkland Islands.

John Dearborn, professor of zoology at UMO, heads research efforts underway on the Antarctica peninsula which juts out closely to South America and the Falkland Islands. "My research team is currently studying marine zoology, specifically bottom feeding animals or echinoderms, such as sea starfish, brittle starfish, and sea urchins," Dearborn said.

Dearborn said they are studying the feeding habits and reproductive cycles of these echinoderms. He added that his research includes the use of an underwater camera.

"Our biggest problem right now is one of logistics," Dearborn said.

"The research vessel *Here* and our supply station get their supplies from Argentine bases. The research vessel and the supplies which are funded by the National Science Foundation cannot be received in Argentine ports because of the crisis."

Instead, Dearborn said, the research vessel was diverted to Chile where supplies can be received and UMO researchers can be transported back to Maine. However, transportation plans through Argentina and equipment for the research efforts that are in Argentina have been lost.

Dearborn feels that if the conflict continues, and logistics become even more of a problem the United States may have to supply the research bases in Antarctica, and will need people to monitor the shipments of supplies.

"We have another research effort slated to start in either January or February of 1983 and hopefully the crisis will have cooled by then or we may have problems with that research effort, too," Dearborn said.

Dearborn said that UMO is not the only university conducting research studies in Antarctica. "There are research teams from the University of North Carolina at Wilmington, the University of California at Los Angeles and the State University of New York

at Binghamton.

"There are anywhere from 15 to 20 universities doing field work on the Antarctica peninsula that could be affected by this crisis," Dearborn said. These programs are funded by the Division of Polar Programs within the National Science Foundation.

Dearborn said that the conflict between Argentina and Great Britain could have long term effects on the Antarctica Treaty. This was a treaty that was signed by 12 states, originally including Argentina and Great Britain, that designated the continent of Antarctica as an area for scientific exploration only. Military presence is forbidden except as support for the scientific research going on there. "The outcome of this conflict could have an effect on the treaty as we know it," Dearborn said.

Thomas Kellogg, assistant professor of geological sciences at UMO is currently doing research in the Ross Sea section of Antarctica. Although this is considerably farther away from the Falklands than the Antarctica peninsula, Kellogg does not rule out any problems that could develop with the crisis.

Kellogg, who is studying marine sediments and the role they play in determining glacial history said,

Faculty get \$800,000 appropriation

by Nancy Storey
Staff Writer

After much lobbying and a fight for funds, the 110th Legislature appropriated \$800,000 for faculty salaries for the University of Maine last week.

Originally, Chancellor Patrick McCarthy had requested \$2.64 million to raise faculty salaries to the equivalent of other land grant universities, but this was chopped to \$800,000 and then there was some question about whether it would pass in the legislature.

McCarthy will now recommend to the Board of Trustees that the \$800,000 be used to supplement the 9 percent salary increase the faculty will receive in their new contract.

This will amount to an extra 2.8 percent, but the administration has not yet determined how the money will be distributed. The 9 percent raise will be across the board.

If the Associated Faculties of the University of Maine had received the original \$2.6 million request, it would have meant an additional increase of 9.2 percent, which would have increased the professors' salaries from 48th to 38th in the country.

Prof. Kenneth P. Hayes, president of the Orono chapter of AFUM, said he is happy to see that at least some appropriations passed but, "The \$800,000 isn't going to carry us very far. I'm hoping the Board of Trustees will seek at least the other \$1.8 million to bring us up to a minimum level."

Hayes said he thought the lobbying done by professors and students had a positive effect on the final decision of the appropriation committee, but that everyone must keep pushing in order to bring salaries up to a competitive level.

State Rep. Michael Pearson of Old Town, chairman of the appropriations committee, said that without letters (see "Appropriations," page 2)

"Many countries have made claims on Antarctica including Argentina and Great Britain and that is where the idea of a treaty came into being. With the Antarctic treaty the hope was to set all territorial claims aside for the duration of the treaty."

Davida Kellogg, assistant research professor for quaternary and geological sciences at UMO echoed Dearborn's definition of the treaty. "The treaty turns over Antarctica to scientific exploration, with the military there for logistical support only, and the total forbiddance of military installations," Kellogg said.

Thomas Kellogg said, "With two of the treaty signatories at odds, this situation may make the future agreements in Antarctica much harder to write."

Kellogg said problems concerning natural resource development have already arisen. "Exploration for possible oil and mineral discoveries is already being discussed by some of the treaty signers," Kellogg said.

Kellogg likens the United States role in Antarctica to that of a watchdog. "I think the United States has political views in mind with Antarctica, but justifies it by having scientific research stations there," he said.

Student letters protest financial aid cuts

by Mary Ellen Matava
Staff Writer

Members of Maine's congressional delegation have received many letters from students, parents and other concerned citizens concerning President Reagan's proposed cuts in student financial aid, and the senators and representatives are against further cuts in financial aid.

"We've gotten an awful lot of response on the issue," said Robert Tyrer, press secretary to Sen. William Cohen. He said Cohen has received between 500 and 600 letters from students and parents indicating their views. "It's been a vigorous expression of concern," Tyrer said.

He said Cohen's office receives different kinds of letters from constituents, from mimeographed post cards to hand written letters. "We have a tendency to pay more attention to a letter that someone has taken the time to sit down and hand write to us," Tyrer said.

Tyrer said Cohen feels enough cuts have been made in student aid already. "He feels we need to look elsewhere to cut the budget," he said.

Congresswoman Olympia Snowe's press secretary, Tad Boggs, said Snowe has received about 600 letters

concerning student aid cuts. "That's a healthy number for any issue," he said. She has also received about 20 phone calls and between 25 and 30 people have visited Snowe's Washington office to express their views on the issue.

Boggs said, "She does not endorse the administration's original budget proposal." Snowe would like to see a compromise reached so the cuts in student aid are not so deep, he said.

Congressman David Emery's press secretary, James Middleton, said Emery has also received many letters on the student aid issue. "We have

received at least 700, and perhaps 1,000," Middleton said.

He said most of the letters have said not to cut student aid anymore.

"The effect of these letters has been to solidify his (Emery's) commitment to oppose any more cuts," he said. "He does not support further cuts in education, and is on record for sponsoring resolutions to prevent cuts from going through," he said.

Sen. George Mitchell's Eastern Maine representative Clyde MacDonald said Mitchell has received many letters against student aid reduction. "We've received a stack of

letters on this issue, especially from UMO students," MacDonald said.

"Senator Mitchell will vote against all cuts in student aid," MacDonald said. "He had this stand before he received the letters."

Council of Colleges support nuclear freeze

by Mary Quinn
Staff Writer

The Council of Colleges has unanimously passed a resolution supporting a mutual freeze on the "...testing, production and deployment of nuclear weapons..." Stewart Doty, chairman of the Council, said.

V.K. Balakrishnan, a mathematics professor, presented the resolution. He is the alternate for S.J. Farlow, associate professor of mathematics.

The resolution begins, "Whereas the Soviet Union and the United States between them currently possess 50,000 or so nuclear weapons and are in the process of building 20,000 more nuclear warheads before the end of the century," and proceeds explaining the danger of nuclear weapons in respect to "human civilization and the planet earth".

The purpose of the endorsed resolution is for "...the Congress of the United States to take immediate action by calling upon both the United States and the Soviet Union to institute a mutual freeze..."

From those who received copies of the resolution, President Reagan, Governor Brennan, Senator Bill Cohen, Senator George Mitchell, Representative David Emery and Representative Olympia Snowe, only

Sen. Cohen and Rep. Emery responded to Doty.

Cohen shared the "...desire to halt the nuclear arms race..." but explained that "History has proven that the Soviets respond to our arms control initiatives only when we are negotiating from a position of strength. If we are frozen into a position of inferiority as the Hatfield-Kennedy resolution would do, the Soviets will have no incentive to work for the kinds of arms reductions which are needed."

For this reason, Cohen wrote that he has joined "...as a primary sponsor of a resolution initiated by Senators Henry Jackson (D-Wash.) and John Warner (R-Va.) expressing the sense of the Congress that the United States should engage in substantial, equitable, and verifiable reductions of their nuclear weapons. This resolution has been co-sponsored by 58 members of the Senate and endorsed by President Reagan."

This approach differs with the Hatfield-Kennedy approach "...in that it calls for U.S. negotiations to work on a sustained effort to reach agreement with the Soviets on a long-term mutual and verifiable nuclear forces freeze at equal and sharply reduced levels of forces. Our ultimate goal is the reduction of the world's nuclear weapons to the level of zero."

Appropriations still needed

(continued from page 1)

from professors, it would have been difficult to pass the appropriation.

Pearson, who graduated from UMO in 1968, said it also helped to have someone connected at least in some way with the university on the appropriations committee in order to push for the funds.

He said he hopes the faculty request more money at the next appropriations session. "I hope they push for more funds," he said, "and I think they'll get additional funds as part of their collective bargaining agreement. At least, I think they should. UMO is pretty low on the totem pole compared with other institutions of the same size."

News analysis

Black culture at university is minimal

by Russell Muise
Staff Writer

From the moment a student first thinks of going to the University of Maine at Orono, to the moment he actually does, he is aware of the score.

The student is aware of how much money it will cost and how much he will have to earn to pay for his education. The student also knows what social life the school will offer. For many, the university is the ideal environment in which to earn a college degree, but for some, UMO lacks the perfect cultural balance.

The cultural balance that the student does find is as simple as black and white. The white numbering 10,210 and the black a mere 19. The problem is not unique to the university, however, and the state itself has less

than a five percent population of black persons.

In today's racially conscious society, it is hard to believe that a major university could have such an imbalance of whites to blacks. This is a problem that concerns the administration at UMO, but there is no clear solution to the problem.

Director of the Onward Program, Gerald Herlihy said, "You need black people who are in higher leadership positions for a black student to identify with in order to persuade them to attend UMO."

Herlihy feels the university has a unique problem. The university does not have a black member in the admissions office. Therefore, a potential black student does not have a black figure to identify with. "They

could get a super education at Maine, but I want them to understand the situation," he said.

Herlihy also said, "Having more blacks would be intellectually and academically enriching for everyone at the campus."

The situation at Maine is that the school is adjusted around a predominantly white culture. The school does not offer a black student courses in black studies or promote cultural activities which interest different ethnic and cultural groups.

Athletic Director Harold Westerman expressed concern that other schools may offer black studies. He is concerned about the problem because almost half of the black students on campus are athletes.

Westerman asked, "Does a school

like BU or DePaul have courses that may be geared towards the black student?" Westerman felt that black studies may be one of the tools needed to increase the black enrollment at Maine.

The cost of having black studies at Maine in times of major financial cuts would seem a very remote possibility.

UMO President Paul Silverman said, "We are trying our best, it's a matter that concerns me very much." Silverman summarized by stating it would take a lot of resources and the surrounding community would have to help out.

The problem of attracting a larger number of blacks to UMO is a difficult problem to solve. Herlihy said, "it will not happen unless someone in a high administrative position decides to hire blacks in the admissions office."

Senate allocates \$18,237

by Robin Stoutamyer
Staff Writer

The General Student Senate allocated \$18,237.10 to five groups at its meeting last night after a discussion concerning the amount of money the senate will have available.

Myron Buck, off-campus senator, opened the senate meeting by expressing concern for the amount of funds that would be available to clubs and organizations that will receive funding on a first-come-first-serve basis next semester.

He said that more clubs will be requesting more money from the \$300,000 student government budget and the senate should consider this when allocating funds to the first clubs making requests so that all of them will receive enough to continue their activities.

He said that about half to a third of the money allocated to the clubs this year will be available for them next year. Buck also made several suggestions to insure that enough money will be available, such as deducting 15 percent from the budgets of the boards and committees that have already been allocated funds.

The senate decided to put off Buck's recommendations until next semester.

The Senior Council was allocated \$10,000 which is about half of its total budget of \$20,524.30. Donna Gregoire, representative for the Senior Council at the meeting, said that the council will raise the remainder of its budget itself.

In other business, the Children's Center was allocated \$3,625, the Hilltop Craft Center received \$2,640, the Maine Outing Club was allocated \$1,547.10, and the Inter-Varsity Christian Fellowship was given \$425.

Dance-concert tonight

by Mary Quinn
Staff Writer

WMEB is sponsoring a fund raising dance/concert tonight in the Damn Yankee and will be featuring Andrea Re and Clouds.

"We are basically doing this because WMEB is broke. We have no money," Becky Richardson, Public Affairs Director for next year, said.

The concert will begin at 8:00 p.m. and end at 1:00 a.m. Admission is \$2 and everyone is welcome. There will be people at

the door checking identification for those desiring to drink. Beer and wine will be served.

When asked why the event is occurring on such short notice, Richardson said, "Andrea Re and Clouds were down in Boston with their agent doing bookings in that area. We just found out that they are available for it."

Richardson also said that the station has many other benefit programs lined up for next year including the annual 'Begger's Banquet' and concerts of this sort.

**UNIVERSITY OF MAINE
AT ORONO**

Opinion

Cultural imbalance

The University of Maine offers students a wide and diversified background in the arts and sciences. It offers students the chance to meet and make friends with people with different backgrounds. It gives them the opportunity to grow and mature into young adults.

But one thing the university does not offer its students is the opportunity to meet very many students with different cultural backgrounds. Only 121 students of a student body of more than 10,000 students are foreign students.

This is a minor problem compared to the ratio of black students to white students. At UMO, the white student population numbers 10,210 and the black students 19. This indicates a serious problem in recruitment of students with internationally and racially different backgrounds at the university.

Perhaps the low percentage of blacks is not surprising in a state with only a five percent black population.

The athletic department is the only department on campus which has had any success in recruiting black students. They have had success because they offer either a program that the athlete likes or offer the

athlete a scholarship in a sports program.

However the administration has not addressed and taken action to resolve the problem. This is obvious in the number of international and black students to the white student population.

Some people involved in the recruitment process think that the problem stems from the lack of a black or international leader on campus. We do have a person in charge of recruiting Indian students--Ted Mitchell, assistant dean of student affairs. Mitchell has been very successful in recruiting Indians in programs at UMO.

What we need to do is reach out further, outside the state of Maine if possible. We also need to build up our cultural studies, either by adding new courses or by organizing cultural events. Getting a leader to represent each cultural group may be the best answer, but it is costly.

The students at UMaine need to mix with students of different cultures to become people who are able to live with and tolerate people of different races. They need the true university experience.

Outside In

SUSAN ALLSOP

Thank you and good-bye

It's time to move on since my crowded college yearbook, unlike that of high school, will not allow me room to write my blurbs of experiences past. I'll now take this opportunity to do so.

But first, I must say, that the mission has been accomplished. I have learned quite a bit about people in this college community. (Won't Mom and Dad be happy to hear this after all those out-of-state tuition bills?)

UMO is a stopping ground where students refuel their minds, mingle with folks unlike themselves, and progress onward to realize their goals. It's a weaning process, in between high school and the real world. Many students were not ready to go out on their own after high school. Of course, some college seniors are still not ready and some never will be. But at least we were afforded the opportunity.

As I ponder what my next move will be, I hesitate for a moment, turn around and look back to all the enlightening experiences.

At this point I'll raise the stein to dear old Maine and also to:

Whoever placed me at BCC freshman year, where I decided to make the best of it and met a lot of people I'll never forget. I mean that well.

The Campus staff that still produced regardless of blackouts, warm days, lazy Sundays and constant opposition. I guess we work better under pressure.

Off-campus parties. Mill Street Block parties. Fraternity parties. The old dorm parties when you were actually allowed to have a few dozen kegs - and they wonder why the dorms are now looking more and more like ghost towns.

The guys at Willow Drive - Michael and Mark, you finally got in the paper.

Weekends, I guess we lived for them. But lots of times we put a little weekend in our week. That means you too, Laurie.

College Weeks in Bermuda and Ft. Lauderdale where I learned how to catch rays and party at the same time. Life has its rough spots.

Tammy, Sue and Kathy - don't you ever dare tell. You may have a lot on me, but I've got the same on you.

The freshmen who show me how much I've mellowed and how much more fun I was back then.

The sorority girls who still talked to me after I had a great time pledging, then dropped out.

And to the Class of 1982. We're on to something new - let's hope it's better.

Susan Allsop is a senior journalism major from Duxbury, Mass.

The Maine Campus brief (300 words or less) Names will be...

Donor

To the editor:

We at the Red Cross Services would like to express our sincere thanks to the University of Maine Board and the Council on Blood for thousands of hours who will be affected by units of blood donated by Greek Blood Donors. April 21, 1982.

Congratulations in order since this record for the day blood collection at the Northeast Regional Blood Center.

We wish to thank hundreds of Greek and non-Greek donors.

Coverage

To the editor:

The time has come for students of UMO to have an unbiased, newspaper which is to impartially report equal cross-section activities.

Time and the Maine Campus have slighted various of the University of Orono community. irresponsible reporting selective coverage the personal prejudice of Campus staff. In have tried to attain unprofessional practice altering advertisements highly selective coverage being merely inadequate to some sort of coverage. However, the present

Response

EQUAL TIME

The Maine Campus welcomes letters to the editor. Letters should be brief (300 words or less) and include a name and telephone number. Names will be withheld only under special circumstances.

"Anonymous" and open letters, although welcome, will not be published.

The Maine Campus reserves the right to edit letters.

Other reasons for moving off-campus

To the editor:

As a second year student and, campus resident I read with interest Marshall Murphy's article about the vacancy problem in the dorms. Ross Moriarty seems to feel that academic dismissals and, lack of money are the major reasons for UMO's disappointing loss of room and board funds. Mr.

Moriarty, vacancies on campus will continue to up in the next few years and the major reason is none of the ones you mentioned. I hope every CD and RD it pertains to realize the truth when it is finally pushed in front of their blinders. Living on campus for a majority of students is not worth the frustration and hassle of dealing with persons so closed off in their offices or wherever that they can not or will not see the light.

I see myself as only one of four returning juniors to an original section of thirty-four. There will be no seniors next fall. The rising tide of evacuating students to off-campus housing is a direct result of university policy enforcement gone haywire.

Why is it even though it is a beautiful Saturday afternoon and there are no complaints, music can not be heard outside of windows in Stewart Complex: tell me what is the harm? Some university policies were obviously created to have something to fall back on in cases of excess.

Persons who are supposedly given the authority to deal with problems which come up in campus life. They should

also have the ability to distinguish real problems. While at the same time not blowing out of proportion minor issues.

It's obvious that the situation is not the same all over campus. My example is just a drop in the bucket compared to the rest of the slop combined, which has hastened many of my friends to leave this campus.

Everyone knows of the problems Gannett Hall has had with our past RD situation. I would think that the process of picking RD's and CD's be reviewed. We as students, are becoming tired of dealing with such garbage and we are the people who support these hallowed halls; we deserve a better effort.

As the oldest of five kids, I would not recommend on-campus life here as it now stands to my brothers. There goes another \$50,000 Ross. I guess this blows any chance I had at becoming an RA, right Cathy?

Mark Parent
206 Gannett

Donors are thanked for their efforts

To the editor:

We at the Red Cross Blood Services would like to extend our sincere thanks to the University of Maine Fraternity Board and the Panhellenic Council on behalf of the thousands of hospital patients who will be affected by the 489 units of blood donated at the Greek Blood Drive held on April 21, 1982.

Congratulations are also in order since this years Greek Mobile exceeded last years record for the largest single day blood collection held in the Northeast Region.

We wish to thank the hundreds of individuals, Greek and non-Greek, who

gave of their time to donate blood to help save the lives of others. The blood donor is a special breed of person who represents only about 5 percent of the eligible donor population. These donors literally save the lives of the 90 percent of us who will need blood or a blood product at some point in our lives.

The success of each blood drive is determined by those involved. The brothers and sisters from UMFB and Panhell deserve a special "thank you" for the many hours they gave in a true Greek spirit to make this event a success. Above all we would like to thank Scot Balentine

from Delta Tau Delta for his outstanding efforts in organizing, promoting and supervising this blood drive.

We are thankful and proud to be included each year as part of the annual Greek Week celebration. Thank you for this opportunity to express our sincere gratitude.

Coverage reflects prejudice and bias attitude towards Greek events

To the editor:

The time has come for the students of UMO to demand an unbiased, professional newspaper which is dedicated to impartially reporting an equal cross-section of campus activities.

Time and time again the Maine Campus has slighted various organizations of the University of Maine at Orono community because of irresponsible reporting and/or selective coverage reflecting the personal prejudices of the Campus staff. In the past, I have tried to attribute such unprofessional practices as, altering advertisements and highly selective coverage, as being merely inadvertent or due to some sort of oversight. However, the prejudices of the

Campus staff have reached such a flagrantly intolerable point that they can no longer be so justified! The Campus has adopted a running policy which can only be characterized as anti-Greek.

Earlier this semester, the Campus staff chose to sensationalize a solitary hazing incident, complicating one fraternity, with bold-faced front-page headlines, while virtually neglecting the Alpha Tau Omega Fight Night. They relegated this event which netted over \$3,000 for charity, and was witnessed by over 1,000 spectators, to a short one-half column article on the back page of the Campus.

Editor's note: plus a front page photo.

The brothers of Sigma Phi

Epsilon spent countless hours

in preparation for an event to benefit the United Way. But instead of recognizing the brothers for their altruistic efforts to help out a worthy cause, the Campus instead chose to focus on the new policies designed to eliminate the drinking problems which the Campus associates with the Greek system. But this past week is the last straw!

Last week, more than 1,000 students involved in the Greek community, participated in donating blood, the Greek Sing, parades and the various social events and games involved in Greek Week.

These events were completely ignored in Monday's edition of the Maine Campus. Yet the attendance of about 150 or so students at a Nuclear Dissarment Rally received

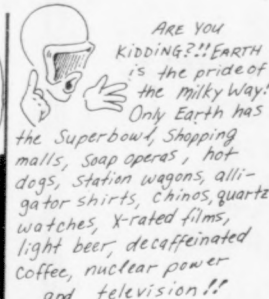

bold-faced front-page headlines, a large two-column front-page photograph, and an article spanning the first two pages!

The question which must inevitably arise is why an event involving nearly one percent of the college population warrants front-page headlines, while events involving over 10 times that number of students did not receive one single word of mention. Such inexcusable preferential treatment, which obviously reflects the prejudices of a biased Campus staff, is not only unprofessional, but is a great disservice to a Greek system which empiracally has donated countless thousands of dollars to charity organizations and spends hundreds of hours yearly in philanthropy and

community service projects.

The selective coverage which has been so prominent in the past can no longer be tolerated. It is high time that the staff of this so-called newspaper begin to adopt a professional, unbiased approach to reporting and begin to reflect all the newsworthy events on campus without interjecting, either directly or indirectly, their own personal preferences.

Michael A. Madden

University employees learning...

The quest for knowledge, broadening horizons and enlightenment, amazing aspects one seeks through education, are all truly the work and dedication people put toward a good education. Parents begin planning and saving for their child's education as soon as they are born. Students begin thinking about and saving toward their education when they begin their first paper route.

Here at UMO, there are some university employees very dedicated to education and learning who participate in the tuition waiver program. Some of these employees work toward degrees on a part time basis that take years to get, others take courses to further their education or to satisfy learning curiosities and others prepare for a job.

The tuition waiver program was started July 22, 1969. A recommendation was presented to the chancellor and the administrative council in order to encourage employee participation in education programs. From this recommendation it was voted, "to waive tuition fees for the maximum of six credits per semester or

school," said Dean, who is now 29. "I went to Mary Baldwin College in Virginia for two years. I was a zoology major and had aspirations of becoming a veterinarian. I found that I didn't really like the field as well as the strict atmosphere of an all women's school. I decided I wanted a taste of the real world. After working my first minimum wage job, I realized I needed some training. About that time, I came to work at UMO and started in the tuition waiver program."

Dean said she is in a special learning program for adults called a collective bank program.

"When I started in my degree program, I found that many of the courses that I had taken at Mary Baldwin would not transfer to UMO," Dean said. "Under this program, all the courses I take at UMO are transferred back to Mary Baldwin, where I will receive my degree from in a couple of weeks. I think it's good that colleges are getting programs like this one which are geared for the non-traditional student."

Dean said she is planning to go to law school in the fall and has already been accepted at Washington and Lee University as well as Franklin Pierce College.

"I remember when I started, I thought I would never finish. Sometimes it was frustrating. I think the tuition waiver program is just terrific and has really helped me maintain the right perspective," Dean said.

Employees in the tuition waiver program register for classes in the same way as students and if they are enrolled in a degree program are assigned an advisor.

David Baxter, assistant director of financial aid, will be receiving his masters degree after two and a half years of work.

"I think it is one of the advantages of working for an institute of higher learning, being able to take courses. I think the tuition waiver program is great. I can relate courses I take to my work area which is a benefit to the office and even if I didn't receive my degree I would have benefited," Baxter said.

With the high cost of education, 23-year-old Mark Pelletier, cafeteria supervisor of Brewer Commons at BCC, feels that without the tuition waiver program he could never have afforded an education.

"In my opinion it's probably the best benefit next to the insurance. I've been in the business administration program since 1978. I know it's going to take me a long time, at least five or six more years, but for me I like to slow pace and mixture of work and school," Pelletier said.

Nancy Bligh, a secretary at the steam plant came to work at the university partly because she sought to be in an educational environment. She is presently taking a variety of courses.

Pelletier said because the tuition is provided for by the university he feels compelled to keep his average at least at a 3.0.

"I feel lucky to have an opportunity to get an education and don't want to goof off," he said. "This semester has been good; I'm taking two classes at BCC, US History and Sociology. I like both my professors and have found them to be really interesting; they seem to know how to keep your attention. A real plus this semester is having my classes during the day. In the past, I've taken courses mainly at night which is exhausting. You work all day then you go to school for sometimes as long as three hours a night."

Pelletier said taking classes makes him feel more tied into what is happening at the college.

"I find being a student helps me to understand more of the student concerns which in turn helps me to do my job better," Pelletier said.

Some employees like Samuel Garwood, assistant librarian, take courses to keep them in tune with new developments occurring in their fields.

"I have taken courses mostly in the computer science field. It's an associated interest partly professional and partly personal. Libraries are

using computers for more and more things," he said. "For instance, at Fogler we use computers in categorizing bibliographic materials and there is a good chance in the future we'll computerize the card catalogs."

"I think it's a very worthwhile program. It's important to have an active interest in an academic area. I think the program benefits both the university and the individual," Garwood said. "I can now solve programming problems that occur with our system here at the library and with the knowledge I've acquired, I will be in a better position to know the right decisions to make about installing future computer equipment in the library."

Some employees like Ellis Waller, human development specialist in aging, take courses just to further their personal knowledge.

"Since 1977, I've taken at least one course a semester just to expand upon my own basic knowledge," Waller said. "I've taken a few business courses to help me organize my life a bit. I find taking courses for your own curiosity creates less pressure for getting good grades and taking classes helps me to keep up with changes both

some training.'***

summer session for courses taken at any campus by any full-time classified or professional employee, subject to conditions established administratively." This also enabled part-time employees to take one course or three credits per semester.

Philip Higgins, staff assistant for personal service, said there are about 1,525 classified employees and about 1,225 professional employees at UMO.

George Berube, assistant director of budget and finance, said about 500 employees a semester participate in the tuition waiver program.

After more than seven years of work toward her degree, Susan Dean, in charge of parking at the police and safety department, will be graduating with her bachelors degree in political science this May.

...th

in my professional life."

Waller also co-owns a Community Service program that provides employment for people who are also allowed to take courses through extension programs.

"The university is anybody over 65 or 66 credit hours. My generation went to the twelfth grade and going back to school. They have a lot of them've been out of school for a while. It's interesting too, to take course like things that tend to their lives."

Nancy Bligh, secretary at the steam plant, said, "I've been at the university since I was one of the main things to come to work at a desire to be in an environment. I'm to do so right now degree program."

Susan Dean worked with a bachelors degree program for adults.

...through tuition waiver program

in my professional life and my personal life."

Waller also coordinates the Senior Community Service Project which is a program that provides part time employment for people over 55 and also allows them to take some free courses through the cooperative extension program of the university.

"The university has a policy that anybody over 65 can take up to six free credit hours. Most people from that generation went to school up until the twelfth grade and it's great to see them going back to school," Waller said. "They have a lot of anxiety because they've been out of school so long and wonder if they can keep up. It's interesting too, this population tends to take course like human interaction; things that tend to be very pertinent to their lives."

Nancy Bligh, secretary at the steam plant, said, "I've worked at the university since January of 1981 and one of the main things that enticed me to come to work at the university was a desire to be in an educational environment. I'm not sure what I want to do so right now I'm not enrolled in a degree program. I'm taking a variety

of courses to get an idea of what I'd like to do."

Bligh said sometimes she finds working full time and taking classes can be exhausting because she takes her classes at night.

"I find being a returning student somewhat of an asset. I've been out in the world and am serious about learning where I think some students tend to get involved in the social lives and get lost in the shuffle," Bligh said.

'When I go to classes

I find I'm being

tended to, plus

I get mentally

challenged.'

Dr. Mike Shannon, residential life coordinator for the BCC complex, is another employee taking courses out of interest and to keep in tune with changes in the world.

"This semester I'm taking a computer programming course mostly because computers are the thing of the

future and are being used more and more in teaching and residential life," Shannon said. "I really enjoy taking classes because in my job, I'm usually always catering to other people's needs and when I go to classes I find I'm being tended to, plus I get mentally challenged."

Samuel Carwood, an assistant librarian, takes courses to keep in tune with his field. He has taken courses mostly in the computer science field.

Susan Dean works at the police and safety department and will be graduating with a bachelors degree in political science this May. She is in a special learning program for adults called a collective bank program.

A WMEB FUNDRAISER

Movie to raise funds for public television

by Lisa Reece
Staff Writer

To promote and raise funds for public television the movie production of *Annie* will premiere June 17 at the downtown Bangor Cinema.

The rights to the *Annie* movie were given to public stations around the country by Columbia Pictures Inc. Last summer, producer of the movie, Ray Stark, Columbia Picture president, Frank Price, and Lawrence Grossman, president of the Public Broadcasting System made the announcement live-via-satellite from KCET television in Los Angeles.

During the national live broadcast Stark said that he was hopeful that this alliance between Columbia and public television will set an example for the private sector to support public television.

"This exciting project is totally in keeping with President Reagan's budget policy," he said.

The Maine Public Broadcasting Network located at UMO had been working on the project since last August, when it was announced. MPBN will host the movie this June, MPBN Director of Promotion, Barbara Beers said.

"We held two press conference back in August, then we waited until two months ago when KCET-TV announced the location of the movie theater for us," she said.

After MPBN received the details on the movie theater it started compiling a list of area residents to help us promote

attention to MPBN," Beers said.

The premiere program will start at 8 p.m. and will include an opening speech by Governor Joseph Brennan. Ballou will then introduce MPBN Program Manager, Bernard Rosetti, who will introduce the movie. The movie will last two hours, a reception at the Bangor Auditorium will follow.

The movie is directed by John Houston, and will star, Albert Finney as Daddy Warbucks. Ten year-old Aileen Quinn will play Annie, with a cast including, Carol Burnett, Bernadette Peters, Ann Reinking, Tim Curry and Geoffrey Holder.

There is a possibility of having an *Annie* look-alike contest to be scheduled about a week before the show, Beers said. The winner along with her parents, will be the guest of MPBN at the *Annie* movie, she said.

MPBN General Manager, Edward Winchester, said he was enthused about the project and thinks it will generate people's interest in public television.

"What Columbia pictures is doing for public broadcasting is a well appreciated thing," he said.

"The support that we have gotten so far is tremendous and we haven't started advertising yet," Beers said. She also said that the local businesses are very supportive of this program.

"It is heartening to see all this support," she said.

The movie theater seats 535 and Beers hopes the house will be full.

Albert Finney and Aileen Quinn star in the *Annie* movie that MPBN will host this summer. The movie is a gift from Columbia Picture Inc. to help promote and raise money for public television stations across the country.

and organize the project," she said.

Beers, who is also the coordinator of the *Annie* movie, contacted 20 people consisting of lawyers, bankers and business people to form an *Annie* committee. John Ballou, a Bangor lawyer is the general chairman for the project.

"I was very pleased with the support I received from the people I contacted," Beers said.

The committee met on April 15 and formed sub committees to do the publicity, fund raising and coordinate the premiere, she said.

"Money raised from the premiere will cover the cost of the project, but it won't compare to the publicity we hope to receive for MPBN. That is the most important thing we hope to accomplish: to bring the public's

Student adjusts to U.S.

by Matt Smith
Staff Writer

Mike Gerakios, 24, from Sydney, Australia, had to make a few adjustments in lifestyle when he came to the United States to take pulp and paper courses here at UMO.

Gerakios has lived in Hannibal Hall for the past two semesters and he explained some of the differences between living here and Australia as a college student.

Gerakios said the United States and Australia are very different in their lifestyles. "Back in Sydney where there are 4.5 million people living in one city the atmosphere is more homey than it is here in the US cities like Boston and New York. People are more casual back in Australia and the pace is faster here in the big cities," he said.

"The university is very different here from back in Australia," Gerakios said.

"Where I went to college in Sydney there were 20,000 students enrolled and the college was next to the ocean. The professors don't give you as many chances to improve your grades and a typical course have examinations that count as much as 70 or 80 percent of your grade," he said.

Gerakios said that college is not as expensive back in Australia. "A college year only

costs a few hundred dollars back in Sydney and that's for your union fees," he said. "But it's hard to get into college back home, you have to have good grades and prove your worth having there."

The biggest difference between here and Australia is the weather, he said. "I thought long underwear and sweaters were for old people. I went home for four weeks for semester break and when I came back I had to bundle up in all those heavy clothes. The coldest it ever gets back in Australia is like the weather is here now in May."

"They don't play cricket here either," Gerakios said. "I played two semesters of rugby while I was here and it's not as popular as it is back home."

"I thought long underwear and sweaters were for old people"

Gerakios said that he will be returning to Australia to work after he finishes the pulp and paper program in May. "I'll be going home to work for Albany International and I may work part time at getting my MBA in chemical engineering," said Gerakios.

Gerakios has a BE in chemical engineering from the University of New South Wales at Sydney, Australia.

British destroyer sinks, casualties feared

(AP)- An Argentine jet fighter fired a missile into the British destroyer HMS Sheffield Tuesday, sending it down in flames, and there were a "number of casualties" among the warship's 280 seamen, the British Defense Ministry announced.

The counterblow came as Argentine rescue crafts continued searching for survivors from the cruiser General Belgrano, sunk in the frigid waters of the South Atlantic on Sunday by a British submarine. Argentina announced that at least 680 crewmen have been rescued, leaving about 360 sailors still missing.

British Defense Ministry spokesman Ian McDonald said the 3,660-ton

Sheffield was struck by a missile and caught fire, "which spread out of control."

British news media said the seven-year-old Sheffield, one of the most modern warships in the Royal Navy, was hit by a missile fired by an Argentine jet fighter from a distance of more than 20 miles. The reports said the Argentine pilot fired two missiles, one missing and the other scoring a direct hit on the Sheffield's control room.

McDonald said the crew abandoned ship when there was no hope of saving it and all evacuees were picked up. "It is feared there have been a number of casualties, but we have no details of them yet," he added.

Martial law measures are reinstated in Warsaw, other cities

WARSAW, Poland (AP) - Rioting broke out Tuesday in the Baltic port city of Szczecin for the second time in as many days. Authorities reimposed a night curfew in Warsaw as well as other martial law measures.

It was not immediately clear in which other cities the restrictions went into effect, but the East German news agency ADN said the curfew was imposed in Warsaw, Szczecin and Gdansk.

Disorders in Szczecin, a provincial capital about 15 miles from the East German border, were announced in Parliament by Interior Minister Gen. Cieslaw Kiszczak in a review of Monday's clashes between police and Solidarity union supporters in Warsaw and at least 13 other cities.

Kiszczak said police detained 1,372 people during the rioting, and that at least 72 police officers were injured in street battles. The number of civilian casualties was "still unknown," he said.

"The most serious incidents took place in Warsaw where police decided to disperse aggressive groups," the army general said. "The incidents lasted until late night, and similar excesses were repeated today Tuesday in Szczecin."

Authorities reimposed curfews on Warsaw residents which begin at 9 p.m. for youths under 18 and midnight for adults, the Polish news agency PAP reported. Both end at 5 a.m. They also banned meetings of student clubs, discotheques and all entertainment, PAP said.

News Briefs

WASHINGTON (AP) - John W. Hinckley Jr. was painted Tuesday as both a calculating assassin who "waited with a gun in his pocket, waited to shoot the president, waited to kill him," and as a lonely, isolated man snared in an inner world of his own fantasy.

The two portraits of the young man who admittedly shot President Reagan and three others last year were presented to a jury as it began to try Hinckley on 13 felony counts, five carrying a maximum punishment of life in prison.

(AP)- Former Portland, Maine Mayor Bruce Taliento, serving a 3½-year sentence for embezzlement, has been transferred to a pre-release center in Hallowell, authorities said.

Taliento's transfer from the Maine Correctional Center in South Windham was approved by state penal authorities because he is not considered "an escape

risk," Assistant Superintendent James Clemons said Tuesday.

ALGIERS, ALGERIA (AP)- Foreign Minister Mohamed Benyahia, who mediated the release of the U.S. hostages in Iran, has been killed in a plane crash en route to Tehran, where he was headed in an effort to end the Iran-Iraq war. Iran blamed Iraqi jets for the crash.

In an official announcement, the government said Benyahia, eight other officials, an Algerian journalist and the crew of four died when their Grumman G-2 executive jet crashed Monday in northwest Iran near its borders with Turkey and Iraq, a government statement said.

PEKING (AP)- China slashed its bloated bureaucracy Tuesday by reducing the number of vice premiers from 13 to two and the number of ministries and commissions from 52 to 41.

The massive government reshuffle has been predicted for weeks.

Maine scores another run in what has become a very productive season at the plate for the women Black Bears. (Ferazzi photo)

Softball squad to host Vermont, record at 11-4

by Ken Waltz
Staff Writer

The UMO women's softball team will try to keep their current winning streak, eight wins in the last nine games, alive when they host the University of Vermont in a doubleheader today beginning at 1:00 p.m.

The Bears have looked very impressive this season despite the cancellation of their first 11 games. The team has proceeded in compiling an 11-4 mark and a first place standing in the MAIAW standings.

Coach Janet Anderson says her team has performed very well so far this season and doesn't see them slowing down now. "Our fielding and hitting has been super," she said. "The pitching has also been very good this year."

The Black Bear pitching squad, consisting of freshman Claire Betze who is 4-1, Nancy Szostak, a sophomore who is 2-3 and junior Sherri Denis, who has been unbeatable at 5-0, have pitched very consistently.

Besides getting very good pitching, Anderson has seen her teams bats come alive, as is evident by a doubleheader against USM when the Bears won 9-0 and 11-1.

Other players who continue to contribute to the teams success are co-captains Ethel Macklin, a short stop from Winslow, Maine and Cathy Woodhams, a senior, who always seems to hit the ball hard right at someone.

The Bears are undefeated in state and look to finish the season strongly, and tune themselves up for the upcoming MAIAW playoffs this Saturday at Colby College.

Offenberg lifts his way to Mr. Maine placing

by Ken Waltz
Staff Writer

Barney Offenberg, a junior physical education major, pumped and posed his way to a fifth place showing in the 1982 Mr. Maine Body Building Classic held at the Lewiston Armory last Saturday.

This was the second showing for Offenberg at a Mr. Maine contest, but the first time around he says he got "blown away by the competition."

Offenberg, who is 5' 7½" tall and weighs 153 pounds, competed in the short men's division. Offenberg said that this was the toughest division because the best performers in the other two divisions (the over 35 and teenage divisions) were placed in and

competed in his group.

The competition consists of the following steps: 1) You pump up (expand your muscles), 2) You are prejudged while performing several mandatory poses. The judges will compare your muscle symmetry, definition and proportion and 3) Consists of individual poses to music in front of the judges.

Asked how he got interested in the art of body building, Offenberg said, "I went down to the Mr. Maine competition a few years ago with a friend and he competed and placed. I got very excited about it and decided to start training."

Offenberg said he trains five times a week and has been lifting steadily for the past two and a half years. But, he is quick to point out that a good diet is also very important. "I'm a vegetarian, but still eat fish, egg whites, dairy products and poultry,"

he said. "But I never eat red meat."

Asked what he feels is the most important part of the competition to work on before a meet, Offenberg said, "Symmetry is the most important because big leg muscles don't look good if your arms don't look proportionate," he said.

Offenberg, who is 25 years old, will compete in the Mr. Vacationland competition on October second at the University of Southern Maine. Asked what his future body building plans hold for him, he said, "I plan on working hard until I finally win the Mr. Maine title."

Celtics look to wrap up series with Bullets

(AP)- The Boston Celtics, Philadelphia 76ers and San Antonio Spurs have their opponents on the ropes in the National Basketball Association playoffs and can deliver the knockout blows Wednesday night.

The Celtics, leading Washington 3-1 in their best-of-seven Eastern Conference semifinal series, can eliminate the Bullets with another victory in Game 5 at the Boston Garden.

The Celtics, defending league champions are seeking to become the first team to win two consecutive NBA titles since they did it last, in the 1967-68 and 1968-69 seasons, virtually are unbeatable at home. Their regular-season record in Boston Garden was 35-6.

But the Bullets have been surprisingly tough in the playoffs.

"Who knows?" added Kevin Grevoy. "Maybe they'll be off again. I hope they fall asleep and go off form, but I don't really think it'll happen."

There will be a mandatory meeting for all people interested in sports writing and photography for the fall semester tonight at 7 p.m., room 106 Lord Hall. For further info, contact Paul Tukey or Ken Waltz the MAINE CAMPUS

Peter Adams: Always a winner

Editor's note: This is the second in a four part series on the graduating seniors on the Maine baseball team.

by Nancy Storey
Staff Writer

He's been called the spark plug of the team. Many people call him the best shortstop in the east.

And, when he's not injured, Peter Adams has what it takes to make a good team great.

"He's the key to the infield," said Maine Coach John Winkin about Adams. "He's struggled most of the year with injuries, but somehow he still has managed to come along. You can kid him all you want to but he's out there to win and he does everything he can to do so."

Adams has been the shortstop at Maine for four years, starting

his freshman year right out of Portland High School. From watching him play, there's no question that he knows what he's doing.

This year has been hard on the player whom everyone feels has a shot at turning pro. He broke his hand in the pre-season, suffered a severe contusion on his arm three weeks ago and, most recently, he hurt his ribs.

But the injuries haven't kept him from playing. He's missed less than three games due to injuries and has been producing both offensively and defensively.

Batting a hefty .337 in 86 times at bat, Adams has two doubles, two triples and 25 base hits for 20 runs batted in. Defensively he has 48 put-outs and 77 infield assists as one part of what Winkin feels is the "best double play combination around."

The second part of this combo, captain Mark Sutton at second base, says he's, "never seen a

Peter Adams (Storey photo)

shortstop who can do as many things defensively as Peter does. He's quick, he has range and he's got a great arm."

Some people look at the stats, however, and see that Adams has always had a lot of errors. Sutton says this is because Adams gets to a lot of balls that other shortstops wouldn't be able to. And in the double play, Sutton says, "There's no doubt in my mind about where the throw's are going to be. It's always right where I want it."

The education major says his four years at Maine have been a lot of fun. "It's been an experience," he says, adding that the baseball team has been like family to him. "We've met a lot of people, been a lot of places together...it's like we've been a family for the last four years. And that's the way it should be."

Run with the Black Bears

by Phil Hodgkins
Staff Writer

The fourth annual Black Bear Run will be held Thursday at 7:30 a.m., starting and ending at the Memorial Gymnasium. All faculty and students are encouraged to run with the students of the Personalized Fitness and Health class on the three mile trip.

"Bring your friends or enemies. This is to expose people to running," said Professor Walter Abbott. "There are a lot of people in their four wheel drives who should be out running."

The PE 22 class is a mixture of lectures and labs, with each student working out three to four times a week.

"The class is designed to help the student with cardiovascular fitness and strength. Each student learns how to prescribe practices and monitor programs," Abbott said.

The class is made up of runners of various skill levels, building up their stamina and endurance throughout the semester. All the students are able to finish at least five miles before the conclusion of the course.

About 35 students will cover the three mile trek and a crowd of 60 runners is expected to cross the finish line. "This is the social event of the year for the class," said Abbott. "This run also gives the runners a chance to get acquainted with nature."

Abbott encourages all to participate in the run Thursday, so put on the sweats and lace up the sneakers and join the PE 22 class on the Black Bear Run.

Sox win 5-3

BOSTON (AP)- Glenn Hoffman's two-run single snapped a 3-3 tie in the third inning as Boston defeated the Minnesota Twins 5-3 Tuesday night.

Boston, which has won 13 of its last 14 games, fell behind 3-1 in the second. But Bruce Hurst, 1-0, allowed just three hits in the next five innings. Luis Aponte worked the last two innings for his third save.

This is the famous Budweiser beer. We know of no brand produced by any other brewer which costs so much to brew and age. Our exclusive Beechwood Ageing produces a taste, a smoothness and a drinkability you will find in no other beer at any price.

Budweiser®

KING OF BEERS®

AMATEUR

ATHLETE OF THE WEEK

GENUINE

Budweiser is pleased to announce this week's intramural/club sport athlete of the week.

Jennifer Lamb, a senior from Camden, has been chosen for her outstanding effort in last weekend's rugby matches.

Jennifer, a Zoology major, played exceptionally well leading her team over Colby College. The captain is now in her second year of competition, and is a valuable contributor to the team.

Congratulations Jennifer this Bud's for you!

GENUINE

this Bud's for you!

CONGRATULATIONS!

The General Alumni Association proudly thanks area merchants, UMO & BCC organizations and their student representatives and the WELLS COMPLEX residents and staff for their support of the first National Student Phonathon Program.

These individuals provided the resources necessary for the largest personal contact program to alumni in the history of our University. **375** students successfully opened communications between the University of Maine at Orono and over 7,200 alumni. In the 18 days of calling 1458 alumni pledged 27,000 dollars to the university through the Annual Alumni Fund of the General Alumni Association. In behalf of the University of Maine at Orono and the 63,000 UMO alumni, **Thank you.**
