L. W. BACHELDER, Treasurer.

ANNUAL REPORT OF THE SUPERVISOR.

District No. 1—Summer.

By Pauline L. Gould of New Portland. A teacher of twenty-one terms experience, supplemented by Normal training, the practice as well as the theory, which equips her to labor understandingly. Her system is to teach the pupil to do his own thinking—true education. All departments of study received careful treatment. The agent was unable to secure a teacher until quite late which interfered with the regular attendance of some of the older pupils. This term gave general satisfaction.

Winter.—George E. E. McCann of New Gloucester. This young man is possessed of a jovial nature, ready for a good time that soon placed him on very friendly relations with his pupils, some of which have been more constant in their attendance than is their usual practice. Classes in arithmetic did the usual textbook work—practical tests lightly touched. Book-keeping was prosecuted quite vigorously at first with good results, but the interest was suffered to wane. But little benefit can be derived from written analysis without papers being corrected and passed back. Pronunciation defective. History, geography and physiology well studied and good advancement made. Order good.

District No. 2.—Fall.

By Hattie M. Cummings, who has had extensive and successful experience in primary work. All branches received the usual attention. Map-drawing in connection with geography was introduced and something done at it. Pupils were kept busily engaged. General advancement "all along the line." School-room presented a very attractive appearance by being trimmed with autumn leaves, woven and arranged in a very pleasing style; a short but profitable term.

Winter.—P. L. Gould, instructress. This term was auspiciously commenced and continued several weeks, with much interest, when outside influence created a restiveness on the part of some of the pupils, which in a measure, neutralized the best efforts of the teacher for a time. The reading classes were handled very intelligently and marked improvement was the result. Beginners in grammar and geography gave evidence of careful training. Other studies fairly sustained. Much attention given by the pupils to their personal appearance and surroundings.

District No. 3.—Spring and Fall.

These terms were taught by Susan Whittier of New Sharon, whose

ripe experience enabled her to enter upon and prosecute her work with intelligence and system. The report of her school in No. 11 last year is applicable to these terms, to which we refer you.

Winter.—Ruel Fletcher of Readfield is instructing this term. Were obliged to visit it three weeks before its close—found them at their every day duties. School appeared excellent—diligently engaged—reviews well sustained; all studies received clear explanation from the teacher—good improvement in grammatical analysis and arithmetic, though the benefits derived from the latter would have been greatly enhanced if taken in connection with the intellectual by the first class—other studies received their allotted time to good advantage. Mr. Fletcher is industrious and is rendering valuable aid to the school.

District No. 4.—Fall and Winter.

This school, divided into two terms was conducted by Eliza M. Carr of Winthrop; a young lady, zealous in the cause. All departments of the work managed reputably—pupils taught to rely upon principles rather than the textbook. Business-papers, maps, etc., by the pupils were commendable. A prize, offered in penmanship, created an interest that was held throughout the term with marked improvement by all. Department of school, fine. Decorations of school-room with pictures, mottoes, etc., disclosed a praiseworthy interest in their surroundings. A term of much profit.

District No. 5.—Winter.

But one term instructed by Ida S. Cowan formerly of district No. 18. All that was said of this teacher in the above mentioned district is applicable to her labors here. All studies taken, well sustained—pupils taught to be self-reliant. There was evidence of more hard tudy than has been noticeable previously. The school-room was also made more attractive by decorations. Several pupils from another town attended the first half of the term, making quite a full school. This also was a school of much value.

District No. 6.—Spring.

Hattie A. Smith of Readfield instructed this school and endeavored to do her best. This school makes a good impression upon the visitor by the kind and generous spirit exhibited towards their teacher and each other. There are some faithful pupils here, who, we trust will receive in due time, the advantages they deserve. The school well represented and engaged at first, at last—most of the older ones absent. Those present showed excellent improvement in their reading and orthography.

Fall.—By DeElsa M. Robinson of Mount Vernon, who did all

been laid out with more method and the forces more concentrated; better results would have followed. The teacher had the respect and control of his pupils, and gave quite general satisfaction.

District No. 15.—Fall & Winter.

The school for the year was taught by John E. Downes, who had labored here before and is well adapted to this school. He entered upon the work with energy and zeal, supplemented with experience, which had ripened into improved methods—arithmetic was made practical by the use of test questions and business forms—reading received more than usual attention. General exercises on the elementary sounds of letters, diacritical marks and pronunciation of the most commonly mispronounced words were of great value. Pupils unable to write a letter in Script, at the beginning of the term, were able to write their spelling quite well before the close. Order good. A profitable school.

District No. 16.—Fall & Winter.

These terms were taught by Ethel F. Cornell. This was her first effort in this department. Her previous devotion to study and ambition to meet the approbation of her teachers, we were pleased to see rewarded by conducting this small school to a close satisfactory to parents and pupils. Trust she will not be content with present success, but seek further opportunities for improvement and thus broaden her field of usefulness in this direction. We always find the pupils cheerful and attentive to duty and a bond of good will pervading the school.

District No. 17.—Summer.

Mrs. Marcia Bickford, teacher. Pupils coming in from another district, made this larger than the summer terms usually are here. Good order and interest noticeable, which was maintained through the term. Her kindness of manner readily attracts young pupils, and makes her especially adapted to their instruction. The amount of work performed for the length of the term satisfactory.

Winter.—Bertrand D. Hallett taught this term, it being his first. Department of scholars good—no whispering noticeable—all interested and studious. Work in arithmetic thorough. Those that took geography made good recitations—penmanship received attention.—Attendance and average good. Teacher gained and retained the confidence of all by his manly bearing, interest in and devotion to his school. This young man by utilizing the means within his reach, will press to the front ranks.

District No. 18.—Spring & Fall

Ida S. Cowan of Sidney instructed these terms. More scholars in

the district than formerly. This young teacher is thoroughly devoted to her work, good at explanation, illustration and of a practical turn of mind. Scholars as usual well deported. Algebra received careful treatment and also geography, which was rendered of more value by the addition of map-drawing—composition on the historical events studied—book-keeping neatly done. Drill on selections made the reading exercises of more value. These terms were profitable to the district.

REMARKS.

Fellow-Townsmen:—Another year has rolled around and a retrospective glance brings it forcibly to mind that in our experience, we never had a more zealous, consecrated corps of teachers, or faithful, hard working pupils, as a whole. We are well aware in a few of our schools some branches have not been taught so understandingly as is desirable—and in no study is it so painfully evident as in grammar.

The rules and definitions are sufficiently dwelt upon, but the application of these rules in the construction of sentences is sadly neglected—enough of the tearing down, but not enough of the building up. As an incentive to regular attendance, decided to print the names of all pupils present at each session for a whole term—the list to be entitled The Roll of Honor. That it has been the means of accomplishing much good, will be readily seen when it is stated, the list is nearly twice as large as last year and a gain of three per cent on the average of the terms collectively—a favorable showing, when it is considered the terms were longer and at times the roads almost impassible. Some may object to this method, which is open to criticism, and suggest higher motives; but children are like their elders and influenced by the same means. The honor of occupying a position rather than pecuniary gain causes rivalry between men. The soldier, who retreats not before the fire of the enemy is mentioned with honor and it makes him a *better soldier*. Is the love of praise less strongly fixed in the child than in the adult? Should not the boys and girls in our schools, who retreat not before the pelting rain and drifting snow, but face them courageously for a term of many weeks, should they not be mentioned honorably and receive for their truly meritorious conduct, the cheering words, *well done?*

A cry is raised from pupils in most of our districts (two or three more highly favored, excepted) for a term of high school. If the general appropriation is reduced; in the interest of justice and in compliance with the demand for better privileges, would recommend the raising of a small amount for a term this spring and another in the fall. Two hundred and fifty dollars and probably less, would

be sufficient for this, one half of which would be refunded by the state.—If this small sum is withheld, advise districts to unite and take advantage of the law.

Recommendations and suggestions come crowding into the mind, but for fear of exceeding the space allotted, will conclude by thanking parents agents, pupils and teachers for their cooperations and courteous treatment and express the hope, they will not relax their effort until our schools shall be second to none. Let us remember it is the home influence and training that largely determine their character. Ever bear in mind that—“Character groweth day by day, and all things aid it in unfolding: Scratch the green rind of the sapling or want only twist it in the soil, the scarred and crooked oak will tell of thee for centuries to come.”

ROLL OF HONOR.

SUMMER No. 1.—Nettie Judkins, Caro E. Wyman, Bert Brann, Isabel O. Richardson, Emma Mills, H. Clinton Wyman. Winter No. 1, Caro E. Wyman. No. 2 Fall, Fidelia W. Stevens, Ida L. Gowell, Minnie E. Page, Rosa M. Farnham, Lila P. Farnham, May E. Damren, Andrew M. Page, Roland A. Partridge. No. 2 Winter, Charley O. Page, Minnie E. Page, Alla Page, Andrew M. Page, Rosa M. Farnham, Lilla P. Farnham. No. 3 Spring, Lillie Bunker, Lilla Mosher, May S. Yeaton, Eva C. Mosher, Maude A. Bunker, Ada Clough, Lilla M. Penney, Clara B. Braley, Arthur A. Stevens, Harry F. Neal, Linnie F. Bunker, Clair J. Yeaton, Harry Williams. No. 11 Fall. †
