L. W. BACHELDER, Treasurer.

ANNUAL REPORT OF THE SUPERVISOR.

DISTRICT No. 1.—SUMMER.

By Lizzie S. Hodgkins of No. Chesterville. This lady has received special training, and taught more than twenty terms with uniform success. A more consecrated, devoted teacher has never been connected with our schools. Everything in and around the school-room neatly kept,—pupils orderly and attentive. Good work in all the branches taken. Order good. A profitable term.

WINTER.—By Hiram C. Hawkes of So. Windham, who has also had special training, and took up the studies practically. Large amount of board work in Arithmetic, grammar and geography. More attention given to the construction of sentences, letter-writing, and correction of false syntax than any school in town. Reading classes required to give the substance of the topics before attempting to read, thus insuring an understanding of the subject, and enabling them to read with expression. Mr. Hawkes gained the confidence and respect of his pupils, and everything moved along harmoniously.

DISTRICT No. 2.—SUMMER.

By Alice A. Dunn, who has been quite successful in the management of her schools. Is very pleasant and kind in the school-room, and readily gains the confidence of all. Geography taken topically and good recitations made, something done at book-keeping, usual attention given to arithmetic and grammar, while the younger scholars did nicely in reading and spelling.

WINTER.—This term taught by Bertrand D. Hallett. At first visit found order good, and all well engaged. The classes in physiology, arithmetic and book-keeping, as well as spelling, made good improvement. The usual time given to geography,—lessons well recited, but lack of map drawing. Reading taken in the ordinary manner. By consulting the Tabular Statement it will be seen the average attendance is the highest of any term for the year and speaks well for all concerned.

DISTRICT No. 3.—SUMMER.

By Mrs. Cora A. Penny. School appeared well. The work done upon the elementary sounds, diacritical marks and phonetic spelling very satisfactory. Written arithmetic and grammar classes did well. Meaning of words given and required in connection with reading. This was a profitable term. This school possesses some excellent talent.

FALL.—By Sarah Harling of Garland. School quiet and a majority hard at work, teacher self-possessed and pleasant. Classes beginning history and botany did well. Other studies received proper attention. A kindly interest pervaded the school, and a creditable term's work was the result.

WINTER TERM by Mellen A. Whitney of Solon, who is much interested in this work, and by education and taste is fitted for higher grade schools. Pupils were orderly, and with few exceptions made good improvement. Classes in history and geography received much aid from charts, and their examination was praiseworthy. Practical work in written arithmetic, and much needed attention given to the analysis of questions. Very marked progress in penmanship by some. Proper care given to reading, not only were rules and definitions in grammar learned, but applied in sentences on the board. The number not absent one-half day was twenty-one, the most in any time for the year. A pleasing feature in connection with this school, was the visit it received from the parents.

DISTRICT No. 4.

FALL WINTER AND TERMS by DeElsa N. Safford. Fall term quite small. Some fine maps drawn in colors, also a class of young pupils got a good start from maps drawn on the board. Beginners in history did nicely. A larger attendance in winter than usual, and all well behaved, interested and courteous. Great improvement in handling reading classes from first visit. Careful attention given to definitions and pronunciation.

DISTRICT No. 5.

FALL TERM instructed by Lydia E. Ladd of Readfield. This teacher is active, earnest and anxious to do her whole duty. School small and term short, consequently could not expect great improvement. Some in arithmetic did well, others not quite up to the mark. Review in Geography fairly well sustained. Spelling good. House presented a neat appearance.

WINTER.—Ida S. Cowan of Sidney, having labored here before with approbation, again assumed charge and prosecuted the work with her usual vigor. Primary class in arithmetic quite thorough. Practical work on the board in the fundamental rules, with good understanding of the same. All taking geography did very well, and showed considerable skill in map-drawing.

DISTRICT No. 6.

SPRING.—By Beatrice L. Braley. School appeared well, teacher trying to do her best. Very good attendance, and a large list of names to swell the Roll of Honor. This is always a fine appearing school, and contains some very industrious, earnest

necessary. With experience and observance of improved methods will make himself very useful in this occupation.

DISTRICT No. 15.

SUMMER TERM in charge of Ethel F. Cornell. This school was small and short, but well engaged. Found improvement, especially in reading, spelling and geography. General exercises by the younger portion interesting. House, which is utterly unfit for school purposes, freely embellished with evergreens. If this young lady would attend school more and take the interest to post up on methods, would succeed well in making this a pleasant and remunerative employment.

WINTER TERM by Willie H. Ellis of Smithfield. At first visit things were moving along harmoniously, and indications pointed to a fairly prosperous term. Had no intimation to the contrary until last visit, when we found order slack, pupils indifferent and careless, and the "I don't care whether school keeps or not" feeling seemed to predominate. Examination showed little if any improvement in reading and grammar; second class in arithmetic did well, in physiology fair, and small class in geography reviewed promptly. Trouble culminating after last visit in a disgraceful fracas, brought the school to a close. Teacher and pupils were probably in the wrong. Possibly it might be traced to district dissension—nothing will more surely destroy the interests of a school than the contention of opposing parties. Be the true cause what it may, it is to be deeply regretted.

DISTRICT No. 16.

SUMMER TERM by Georgie Higgins of Oakland, who appeared quite at home, willing and anxious to do all she could. Much practice on the elementary sounds, diacritical and punctuation marks. Classes just taking grammar and geography made a good beginning and did very well in so short a term, and her first work. To succeed in larger and more advanced schools needs further preparation.

WINTER TERM by Jennie F. Crowell of Smithfield, whose position seemed to be that of governess, as there are but three or four to attend, a number far too small to bring out the true mettle of either teacher or pupil, impossible to get up enthusiasm or emulation, essential requisites to the greatest success. Miss Crowell was diligent, devoted to her charge, and gives promise of developing into a very useful teacher.

DISTRICT No. 17.

In summer taught by Caro E. Wyman, whose early ambition lay in the direction of "teaching the young idea how to shoot." She tried to lift the work from the ordinary routine, and those

taking geography for the first time became much interested; some of the younger pupils quite enthusiastic, reciting from maps drawn on the board. Those taking analysis received aid from a chart prepared by the teacher. Book-keeping began and neatly kept, proper attention given other studies. The walls of the schoolroom were hung with appropriate mottoes, and the desk furnished with pretty bouquets by the pupils.

The winter by Henry J. Page, who is receiving a course of training for this work at Farmington. Although this is a small school the interest is generally good. Some are studious and apt and give promise of fine scholarship if given suitable privileges. Work in geography continued from last term with good results. First class in arithmetic did practical work on the board, individuals in other classes did finely. Mr. Page is much interested in this labor, and his perseverance in perfecting himself is worthy of praise.

DISTRICT No. 18.

Schools for the year taught by Stella M. Phillips. She is ambitious to become a good teacher, and would find the training and methods of a Normal school very helpful. Gave the younger pupils drill from the board, older ones put work on neatly. Rules and definitions well committed, general exercises taken, very good, reading not critical enough, spelling rather more than an average, work in physiology fair. The teacher having had proper instruction in penmanship and interested in same, her scholars made fine improvement.

REMARKS.

Fellow-Townsmen:—Old Father Time has brought us to another milestone, and we would most respectfully call your attention to the foregoing special Reports, which give somewhat in detail the history of another year's work, and show the condition of our schools at the present time. We do not claim they are what they ought or could be, under a different, and we believe a better system.

Experience has taught us that the teacher's life is not "the lovely vale of Arno with its enchanting scenery, delicious air, and sunny skies," but full of trials and perplexities; and when we take into consideration the disadvantages under which most of them labor, the lack of proper blackboards, maps, globes and charts, with an average of twenty recitations a day, ranging from Primary to High school studies. A very large proportion deserve a meed of praise, where censure is often bestowed.

We have discouraged the practice of having our school forces

expended upon mathematics, to the exclusion of other and equally deserving branches so much neglected, and more attention has been given to synthesis, reading, physiology and writing than ever before, while the work in arithmetic was made more practical.

In compliance with the act of the last legislature entitled "An act relating to Scientific Temperance Instruction," Smith's Physiology, written with special reference to the requirements of that act and recommended by the State Board of Health, was introduced with favorable results.

Statistics gleaned from proper sources show the aggregate length of our schools to be a little more than nine per cent. less than last year. This of course was caused by the decrease of our funds four hundred and twenty-one dollars. We never knew so general a call for more schooling, and there are scholars in every district who would be greatly benefitted by a High School in town. The appeal was made last year for a small amount for this purpose, and was met by cutting down the general appropriation thirty-three per cent., or four hundred dollars. If this policy is pursued, it will not take a "a prophet or a son of a prophet" to divine the time when your children will not retain the rank in scholarship they hold to-day.

To young teachers and those contemplating engaging in this occupation, we would say, it is the distinctive work of our Normal schools to give training and drill on those subjects you will be required to teach. These schools are increasing in public favor, and are no longer an experiment, but have become established as an integral part of the Maine system of education, and the demand for their teachers exceeds the supply. The Massachusetts Board of Education report: "The persons educated at the Normal Schools excel teachers who have not had the benefit of these institutions in their capacity to communicate knowledge, and to guide their pupils into a clear understanding of the principles of the art or science taught."

To parents we would say, visit your schools and cultivate friendly feelings with your teachers. If you hear an unfavorable report, investigate before giving it credence.

The Roll of Honor shows an increase of over fourteen per cent from last year, and has been arranged in grades, giving the names of those not absent for three terms, first; two terms, second; and lastly, those of one term.

We do not claim we have made no mistakes in the three years' supervision of your schools, but where they appear, please attribute them to "errors of the head and not the heart."

In conclusion, we thank all for their uniform courtesy and

kindness, and assure you we shall always take a deep interest in the welfare of your schools and the prosperity of your children.

Respectfully submitted,

H. F. D. WYMAN, Supervisor.

ROLL OF HONOR.

FOR THREE TERMS.—Lilla Mosher, Eva Mosher, Hattie Davis, Ada Clough, Maude Bunker, Hattie Foster, Hortie Hersom, Rilla Hersom, Minnie Morrill, Bertie Morrill.

FOR TWO TERMS.—Clinton H. Wyman, Ruel S. P. Adams, Rosa M. Farnham, Minnie E. Page, Alla R. Page, Andrew Page, May Damren, Sadie Clough, Lilla Penney, Harry Neal, Linnie Bunker, Clair Yeaton, May Yeaton, Gertrude Braley, Wesley Knowles, Mary Furvis, Eddie Wadleigh, Emma Reynolds, Mabel Whitehouse, Mertie Whitehouse, Stella M. Yeaton, Carrie E. Yeaton, Rose Yeaton, Georgie Reynolds, Grace G. Yeaton, Lillian Tracy, Maude Tracy, Effie L. Hersom, Georgie A. Ham, Lettie Merrow, Florence Merrow, Ernest Merrow, Della Alexander, Annie Tibbetts, Katie Branch, Charlie Branch, Herbert Bickford, Millard Gleason, Minnie M. Stevens, Lendall Staples, Albert Staples, Ina Cram.

FOR ONE TERM.—Prescott C. Wyman, Lila Farnham, Rollie Partridge, Bertie Damren, Willie E. Brann, Eddie F. Stevens, Fidelia W. Stevens, Permelia H. Stevens, Ida L. Gowell, Claire Minot, Linscott Yeaton, Arthur Stevens, Benjamin Cornell, Winnie Bunker, Lillian Bunker, Harry Damren, Nellie Stevens, Nellie Brown, Clara Braley, Rose Braley, Inez Braley, Dannie Brown, Fred Brown, Ilko Knowles, Henry Pray, Angie Weaver, Arthur Newell, Walter Newell, Edith Perkins, Dora Copp, Henry Copp, Manley Haskell, Grace Wadleigh, Calvin Brooks, Melinda Brooks, Sadie Lord, Alice M. Lord, Fred C. Lord, Fred Guptill, Arthur E. Guptill, Arthur L. Cottle, Emma E. Tibbetts, Elmedia Tibbetts, Frank Brown, Wallace Farnham, Natt. Farnham, Nellie Chandler, Gertie Damren, Edward Hersom, Joseph Littlefield, Dellie Pray, Elmer Morrill, Bertie Morrill, Dellie Kelley, Dora Hersom, Bert Farnham, Syrena W. Hersom, Ida Chandler, Taber Hersom, Gertie Farnham, Alphonso Farnham, Willie E. Farnham, Linnie Morrill, Bert Hutchins, Harry Alexander, Dexter Spaulding, Jennie Damren, Albert Furbish, Winifred Murrey, David Bickford, Millard Stevens, Addie E. Collier, Helen Boynton, Cora Bickford, Alice M. Richardson, Hadley E. Richardson, Walter Damren, Ida L. Larkin, Willis P. Sawtelle, Carrie Farnham, Francis Farnham, Leslie Davis, Clarence Cram, Annie Clark, Bert. Guptill.
