Health services at BCC may be inadequate
by E.J. Vought
Staff Writer

The presence of an on-campus nurse for only two hours each day does not adequately serve Bangor Community College students, the director of student services at BCC said.

Sharon Dendurent said the two hour time period isn't enough, especially due to the large percentage of handicapped students living at BCC.

"I don't think that's a long enough time. We have handicapped students down here. We've been lucky so far, but I worry about it," Dendurent said.

Robert Cormier, assistant professor and program director of the vocational rehabilitation-computer programming project, said there are "as many as 20" handicapped students at BCC. Cormier said the nursing situation is lacking.

"I'm afraid that there might be a situation where you don't have a nurse here for a while." Cormier said. "If we can come out with a system that everybody says 'no way it could be riggled,' then we won't have people saying 'maybe so-and-so riggled it.'"

—Ed Cutting, chairman of the FEPC

Voting machines to be used in GSS elections

When the senate voted to appropriate $250 to the FEPC to run the election no senators voted against it, but one abstained. Cutting said the senators approved the new system because "the senate is interested in moving too fast."

The money will be used to purchase voting cards, to pay for programming the Vali-Dine system and to write a program for CAPS to be able to process the cards. Cutting said that the senate voted to appropriate $250 to the FEPC for the election no because there are students who live here. Cutting said that the new system puts more power in the hands of the FEPC and that the senate will have access to immediate medical attention.

"If I were in his (Cormier's) shoes, I would feel a little uneasy. You've got a bunch of people who are confined to wheelchairs, who in some cases are not just paraplegics but quadriplegics. I guess I would worry about that," Naber said.

Betsy Aline, assistant director of Cutler Health Center, said the two hour time period fills the need of BCC students.

"I think that does fill the need because BCC students are always able to come here (to Cutler). I do feel sure that if there is an emergency, they can receive help immediately, too," Aline said.

"I think we should be critical of any system," Cormier said. "If we can come out with a system that everybody says 'no way it could be riggled,' then we won't have people saying 'maybe so-and-so riggled it.'"

UMaine BOT appoints chemistry chairman

by Peter Gray
Staff Writer

The University of Maine Board of Trustees appointed a new chairman of the UMO chemistry department at the BOT meeting on Monday, Jan. 28. Raymond Fort, 47, who taught at Kent State University for the last 15 years, has been appointed professor and chairman of the chemistry department, effective July 1, 1985.

BCC help very rapidly. They are close to St. Joseph and Eastern Maine (Medical Center)," Allin said.

Grundy, a first-year student at BCC, is not comfortable with the two hour availability of the nurse.

"I think it should be longer. I have classes that go right through the time when she's available. If I were ill, I wouldn't be able to see her," Grundy said.

Rachel Stephenson, a resident assistant in Augusta Hall, said BCC students shouldn't have to go to Cutler for their health needs.

"It seems to me to be an imposition for the students to have to go to Orono, especially if they're not feeling well," Stephenson said. Professor Ruth Nadelhaft, chairwoman of the University for the last 15 years, has been appointed professor and chairman of the chemistry department."Allin said.

Robert Dunlap, a UMO professor and acting chairman of the chemistry department, said "I am familiar with Dr. Fort's publications. I think he is a very able and intelligent chemist," he said.

Fort will receive an academic year salary of $42,000, and a $6,000 yearly stipend for the three-year appointment.

Fort received his bachelor of science in chemistry from the Wesleyan University in 1961. He received his doctorate in 1965 at Princeton University.

Robert Dunlap, a UMO professor and acting chairman of the chemistry department, said "I am familiar with Dr. Fort's publications. I think he is a very able and intelligent chemist," he said.

Fort has a $496,000 proposed Nuclear Magnetic Resonance system grant pending from the U.S. Department of Energy. Dunlap said the UMO chemistry department had a NMR system installed in December.

"The system is used to determine molecular structure and we have just begun to use it this week," he said. "If Dr. Fort gets the NMR grant, it would be put to use at UMO and a great benefit to the chemistry department," Dunlap said.

"We (the chemistry department) are looking forward to Dr. Fort's arrival," Dunlap said.

BOT approves $35,000 for Carnegie project

by Maureen Montpas
Staff Writer

The installation of an upgraded ventilation system is underway for both the painting studio and solvents in Carnegie Hall. The $35,000 project was approved by the Board of Trustees last month, with the maintenance department of the physical plant funding the project.

"The installation of an upgraded system is a safety issue," said Thomas Cole, director of facilities management at UMO.

"The improved system will more efficiently channel the fumes and solvents to the outside. The improved efficiency will ensure employee and student safety. For these reasons, the project is considered top priority," he said.

Now, acidic fumes and print-plate solvents are vented through the studio windows. The new ventilation system will channel the fumes and solvents through the ceiling.

Robert King, a safety specialist of the office of physical facilities, is working with the physical plant engineers and personnel.

"The ventilation system will consist of a funneled fume hood to be installed in the painting studio, along with an enclosure for the fumes to the outside. The new system will increase the ventilation of both studios," King said.

The project is expected to be completed by March.

Two UMO theater majors chosen for competition

by Melinda Lake
Staff Writer

Two UMO theater majors have been chosen for competition in national theatrical scholarship programs. Bruce Johnson and Scott Snively were chosen to represent UMO at two separate competitions. Johnson was one of 44 contestants chosen for the regional competition of the American College Theatre Festival at the University of New Hampshire. Although he didn't win the competition, he was one of the 12 finalists. He participated in the contest Jan. 23-24.

"I was very excited to be chosen, because before this fall I had never acted before," Johnson said. He was chosen by an ACT Festival committee as a contestant in the Irene Ryan Scholarship Competition for his role as David in "Sticks and Bones."

Johnson, a freshman, attended the Charter College of Manual Dexterity and Prestidigitation in Colon, Mich. for six months after graduating from high school in 1981, and is well-known in the Bangor area as a professional magician. Johnson was a classmate of Snively's at Bangor High School. Snively is a finalist for further auditions in March to be conducted by the University and Resident Theater Association in New York City. Snively, a senior, has been in 12 Maine Masque productions. He has won several Apple awards, which are UMO's equivalent to the Academy Awards.

"The competition was for graduate and summer work, but the faculty nominated me. It was a great honor," Snively said.

Snively said that the fact that he was chosen as a finalist shows that success can come without New York training right away.

After graduation Snively plans to get a Master of Fine Arts degree and use his degree into the actors' union.

The money reportedly was taken from a cash box inside the locked store, to which six current employees, three former employees, the dormitory's mail clerk, and janitor, assistant, and resident assistants have keys.

UMO police are investigating an incident reported at about 11:43 p.m. Saturday in which an unknown vandal removed a fire extinguisher from its case on the second floor of Gannett Hall and discharged it in the hallway and under the door of a resident assistant's room.

The RA reported the fire extinguisher was removed from its case on the second floor of Gannett Hall and discharged it in the hallway and under the door of a resident assistant's room.

The York resident reported the theft of about $180 worth of belongings at about 9:30 a.m. Friday.

A Hannibal Hamlin Hall resident reported at about 1 p.m. Sunday that someone had broken the anemometer on his car while it was parked in the Hancock Hall parking lot. Police have no suspects.

An employee of the Den reported she was threatened while checking identification at the Den on Friday night.

In a written statement, the employee said a man who had been a customer at the Den's restaurant left, then returned just after the restaurant had closed at 7 p.m. According to the statement, when the employee asked the customer for identification, he refused. Two police officers in the Memorial Union were told about the incident, checked the man's identification, and told him he was "off age." About 10 minutes later, the customer, a 21-year-old Old Town resident, reportedly told the employee if she were a man, he would have "knocked your head off." Damage estimated at $50 was the result when an unknown person threw a bottle into the kitchen of the Sigma Chi fraternity house at 5 a.m. Friday.

Two residents of the house reportedly went out to investigate immediately, but couldn't find anything. Police have no witnesses or suspects.

A York Hall resident reported the theft of about $100 worth of belongings at about 9:30 a.m. Friday at Fogler Library. The woman reported the theft of a briefcase containing contact lenses, three textbooks and a clothed in the ladies' room. The bag and the belongings were missing when she returned to pick them up a few minutes later.

A York Village resident reported losing his jacket Friday at a fraternity party at Delta Tau Delta. The estimated value of the jacket is $80.

But although the student body and the emergency services departments have seen a rise in the amount of completed surveys, the survey still lacks the participation of women in the student body. Women saved an average of 8% in the pretax income in the savings rate. However, many of the students who were distributed the survey said they were more interested in the survey than they were in the results.

"Well, it's a little caffeine rush experience,” said Mark Lane, a member of the ASWSU survey team. “People are there to experience the thrill of the unknown, to see what would happen if they did participate.

Survey shows women uncertain about savings

(USPS) — With more than 44 million women in the work force, women command a substantial amount of financial clout. But although on the average they earn and save more, they are still uncertain about what to do with their savings, a recent survey showed.

Women save 11.5 percent of their pre-tax income on average, nearly triple the savings rate of the nation as a whole. However, many lack the confidence and skills to make the most of their savings, the survey of 901 Working Woman magazine readers, primarily between the ages of 18 and 45, showed. Almost half the women are confused about financial options.

In addition to the 49 percent of women unsure of what to do with their money, 35 percent say they want to invest in stocks but do not know which to buy; 35 percent are afraid of losing more money than they make on investments; and 26 percent are not sure when to buy or sell their investments. (The total is more than 100 percent because respondents may have checked more than one option.)

Savings accounts, in spite of their low yields, are used by 72 percent of the women. The survey ranked approximately one third of the women as conservative investors, near one-half as moderate risk-takers and almost 20 percent as speculators.

Younger women do not feel as comfortable with financial decisions as women over age 50, the survey showed. Marital status also affected certainty. Only 42 percent of married women said they felt uncertain about their financial decisions, while half of those separated, divorced or widowed said they did. About 55 percent of women under 25 or living with another felt unsure.

UMO investment group to meet today at 6 p.m.

ORONO — A club for students interested in learning about investing their money will meet for the first time at 6 p.m. Monday in the 1912 Room in the Memorial Union, one of the club's organizers said Monday.

Mark Adams, a senior finance major and president of the UMOM Investment Club, said the club will start out with "miniscule" initial investments of $10 to $15 for the semester. He said he hopes those initial investments will see at least a partial return at the end of the semester.

"The whole thing is not to make a killing," Adams said. "It's to invest, to see if you know when to sell... It's just to see how you could have done.

The club is sponsored by Shearson-Lehman/American Express, a national investment company, Adams said. It will deal mostly with the New York Stock Exchange and will work not only with stocks, but with bonds and other investments.

The club is open to students of all majors, and Adams said a business background is not necessary. It will be divided into groups of four or five people. Each group will be allocated a certain amount of money with which to buy stock. The club will also hold seminars through American Express, at which guests will speak on topics such as banks, real estate and Individual Retirement Accounts.

Adams said people who are low on money and are unable to invest this semester are welcome to join, although they will not be able to vote on purchases of stock. They will, however, be able to participate in the seminars and other activities.

The group will conduct its transactions through Adams — the club's attorney-in-fact and the only club member who can actually buy and sell stock — and James Ellington of Bangor, a stock agent for American Express.

Although there is no minimum or maximum number of people required to form the club, Adams said he would like to see about 20 participants.

Program Contest

for all dorm governing boards

Awards presented for:
- Best overall program
- Best new program
- Best continuing program

Also for:
- Best overall complex program

Top prize $300 and a trophy

Here is a good way to earn extra money for your dorm. Deadline is Wednesday, February 6 at 6:00 p.m.

IDB Board of student government
U.S.S.R. wants to ban space weapons in treaty

MOSCOW (AP) — The Soviet press issued new criticism of U.S. space weapons research Sunday and said the "only pattern" for drawing up an arms accord would be to include a ban on space weapons.

Commentaries by the Communist Party daily newspaper Pravda and the military newspaper Krasnaya Zvezda underscored the importance of such a ban to the Soviet Union as it prepares for the new arms-control talks in Geneva.

Soviet and U.S. negotiators are to begin discussions on space weapons, medium-range missiles and strategic nuclear forces on March 12. Soviet officials and media have been conducting a vigorous campaign to stress that any proposed arms agreement that does not include space weapons will not be acceptable to the Kremlin.

"The upcoming Soviet-American talks in Geneva may become an important landmark," Pravda said in an article by Igor Birzukov.

"The accord reached on the subject and aims of these talks opens the possibility for a serious and fruitful examination of issues pertaining to prevention of an arms race in outer space and putting an end to it on Earth," the article said.

Pravda said that formula — the "only pattern" possible under present day conditions for the resolution of the problems" of arms control.

"The point is to phrase honestly by the accord reached on the linkage of space and nuclear weapons — contains the only pattern possible under present day conditions for the interconnection" of the three sets of talks that begin next month."

"Krasnaya Zvezda," a Soviet newspaper

Reagan's budget likely to undergo revisions

WASHINGTON (AP) — Congressional leaders of both parties signaled strongly Sunday that the $974 billion budget President Ronald Reagan is submitting to Congress is top-heavy with defense spending requests and is likely to undergo major revision.

On the eve of the budget's formal submission, House and Senate leaders were predicting widespread congressional resistance to the budget's call for a military spending increase of some $30 billion over this year's levels.

"The president, I must say, is in a fairly comfortable position. He said 'Don't touch Social Security. Don't touch defense. Don't raise taxes. And you can't touch interest on the national debt.' That doesn't leave a great deal," said Senate Majority Leader Robert Dole, R-Kan.

"Those of us in the Congress have to maybe look beyond some of the president's promises of the campaign," Dole said. He was interviewed on the ABC-TV program, "This Week with David Brinkley."

Dole said military spending decreases and a possible freeze on Social Security benefits — both rejected by the Reagan administration — would be "back on the table" as the Senate begins work on the 1986 budget.

He also suggested that the Senate might scale back Reagan's request for cuts in the student loan program.

Dole suggested the Senate might vote to limit growth in the defense budget to 3 percent next year after inflation, instead of the 5.9 percent figure advocated by the administration — for a defense savings of "around $18 billion to $20 billion."

House Majority Leader Jim Wright, D-Texas, said the proposed budget shows "the blind spot on the part of Mr. Reagan and also Mr. Defense Secretary Caspar W. Weinberger. When they speak of shrinking government, they don't think of the Pentagon as a part of government."

The proposed budget is expected to call for $973.7 billion in spending and to project a $180 billion deficit — if all the spending cuts Reagan wants are approved. This year's deficit is expected to run $222.2 billion.

Reagan's budget is expected to call for domestic spending cuts of around $39 billion — including cutbacks in Medicare, farm price supports, student loans, housing aid and mass transit.

I'M AN AIR FORCE PILOT

There was a time way back when women in the Air Force did the same things women did everywhere. Civilian and ad

administration positions. Those positions are still around, but for women in the Air Force, the opportunities are endless.

You'll find women in almost every area associated with the prestige and responsibility of leadership — of officers. Many of these women began their relationship with the Air Force in college, as cadets in Air Force ROTC. We received $100 per month for expenses. And, those of us on scholarship

had uniforms, books, and lab and incidental fees paid by the Air Force. If you're a woman interested in attending college, Air Force ROTC can make a big difference in your life. And when you graduate, you may become an Air Force officer. The likely the best.

Women's basketball team splits two games

by Rich Garven
Staff Writer

For the second time this season the UMO women's basketball team lost a game decided in the final minutes to Northeastern University, this time 45-42 at the Memorial Gymnasium Sunday. The loss came one day after Maine had beaten the University of New Brunswick 89-51. That contest saw senior Emily Ellis pass the 1,500-point career scoring level.

On Jan. 23 Northeastern and Maine were tied with 1:30 to go before the Huskies pulled away to win 55-46. On Sunday the Bears fought back from an early 15-point deficit and were tied four times, but couldn't capitalize on their scoring opportunities down the stretch and lost again.

Northeastern is now 15-5 while Maine falls to 14-7 with the loss. UMO head coach Peter Gavett called it a "typical game" for Maine.

'We've already done it six times this season," Gavett said. "Tied a minute to go, they make the big shot and we don't.'—Peter Gavett, women's basketball coach

Maine never trailed in the game and led 47-26 at halftime. The Bears went up by as many as 37 points in the second half as Gavett played all 15 players on the roster.

Ellis scored 16 for the Bears as she shot eight for 11 from the field. Coffin had a game-high 10 rebounds for Maine.

Gavett scored 16 for the Bears as she shot eight for 11 from the field. Coffin had a game-high 10 rebounds for Maine.

Maine's Caroline Coffin was called for her fourth foul with 5:17 left and Erica Ellis made both free throws to give Northeastern a 36-32 lead with 7:28 left.

A layup and two free throws by Ellis (16 points, 10 rebounds) tied it and 36-36, but Sonja Wedge picked up her fourth foul on the ensuing play. Williams missed the front end of the one-and-one before Green hit a baseline jumper to give NU the lead again.

With 5:17 to go Singleton was called for her fourth foul and the sophomore center didn't return until the 3:25 mark. Maine could only score until a Liz Coffin foul while fighting with Singleton for possession. Singleton's free throw was off and Coffin grabbed the rebound, but she started to fall out of bounds and rolled the ball between her legs. Williams picked up the loose ball and layed it in to make the final 45-42 at UMO couldn't score in the game's last 19 seconds.

Williams, a freshman from New York City, finished with six points, seven rebounds and five assists. The 5-foot-6 guard scored the Huskies last four points, including two free throws after Coffin, who is 6-foot, fouled her while going for a rebound.

‘Well, I just figure being a guard you have to get position on the bigger people," said Williams who called it her finest collegiate game.

On Saturday Ellis scored 32 points, including Maine's first 13, to lead the Black Bears to a 89-51 win over UNB.

With her tenth point of the game she hit the 1,500 mark in career scoring. Ellis scored 48 points over the weekend and is now in third place on the UMO career scoring list. Only two men, Rufus Harris and Bob Warner, scored more points in a Maine uniform.

Niagara U. defeats Black Bears in OT, 97-96

by David Roy
Staff Writer

The UMO men's basketball team put four players in double figures, but it wasn't enough as they dropped a 97-96 overtime decision to Niagara University on Monday night at the Memorial Gymnasium. Maine shot 66 percent from the field, almost 18 percentage points better than its season average, but were once again plagued by turnovers. Maine committed 25 turnovers while Niagara committed just nine.

After the game, head coach Skip Chappelle said, "The key was the turnovers. We put ourselves in a self-destructing situation."

Maine battled back from a four-point deficit at the end of regulation time to force the overtime period...

With 1:22 remaining and Maine down 77-73, Jeff Wheeler converted a three-point play to cut the Purple Eagles lead to one.

After both teams traded baskets, Steve Smith fouled Joe Arlauckas with 37 seconds left as Niagara tried to inbound the ball. Arlauckas missed the front end of the one-and-one, and Maine grabbed the rebound. But Jim Boylen was called for traveling, and the ball went back to Niagara with 22 seconds left.

With 19 seconds remaining, Niagara ahead 76-78, the Bears appeared to have the Purple Eagles trapped in the backcourt. Instead, they were called for foul.

Niagara's Gary Bossert hit the front end of a one-and-one to make the score 93-88 with 1:19 left, but two free throws and a tip-in after a 1.1 Forester steal by Steve Smith cut the gap to one.

After a Gerry Henry jumper again gave the Eagles a three-point lead, Tolliff scored with 21 seconds left and the Bears called time out, but with 11 seconds left in overtime, Bossert hit the front end of a one-and-one situation to give the Purple Eagles a 97-94 lead. The Bears grabbed the rebound of the second shot, and got the ball inside to Rich Henry for a layup, accounting for the final margin of 97-96.

The first half was even, with neither team holding more than a four-point lead. A 14-5 run by Niagara at the end of the half sent them into the locker room with a 40-36 lead.

UNH Wildcats sweep hockey team, 7-3, 7-6

by Jerry Tourigny
Staff Writer

The University of New Hampshire Wildcats, behind the strong goaltending of Bruce Gillies, swept the Black Bears this weekend at the Alfond Arena by 7-3, and 7-6 scores.

The losses drop Maine's record to 9-10-1 overall, and 5-2-1 in Hockey East play while the Wildcats improve to 13-2-1 and 5-0-0.

The frustrating season continues for the Bears who have lost four straight, and none of their last 10 in Hockey East action. UMO has won only two league games in the last 20 matches dating back to Nov. 16, when Maine lost two games at Northeastern University.

On Sunday afternoon, New Hampshire jumped out to a 3-0 lead and held off a Maine comeback to skate off with a 7-3 victory.

With the Wildcats leading 3-0 in the second period, Black Bear forward Steve Santini scored two goals, three minutes apart, to bring Maine within one goal at 3-2, with 11:02 left in the period.

But UNH regained its three-goal lead later in the period when shots by Ralph Robertson and David Lee deflected off Maine goalie Pete Smith's glove into the net, giving the Wildcats a 5-2 edge with 3:19 left.

After John McDonald scored for Maine to open the third period at the 2:47 mark, the Wildcats put the game out of reach 10 minutes later when Peter Deen picked up a rebound in the crease and poked it past Roy Ray for a 6-3 lead.

UNH defenser Shane Skidmore completed the scoring in the game when he beat Roy to his stick side for the 7-3 final score.

Gillies was solid in the New Hamp- shire goal throughout the game turning aside 33 of 36 Maine shots and was chosen the game's No. 1 star.

In two periods of play, Bear goalie Smith made 22 saves while giving up five goals and Roy turned aside 17 of 19 Wildcat shots in the third period.

In Saturday night's game, Wildcat Dan Muse's slap shot from the left wing circle beat goalie Jean Lacoste to the far top corner giving UNH a 7-4 victory.

Maine's goal, ruled a stain in the first period, came as a result of a UNH penalty. With 10 seconds left in the period, Maine was awarded a power play and UNH was given a penalty. UNH's Jim Sounder got the puck from a teammate and fired a shot past Roy to tie the score at 4-4.

With 1:22 remaining and Maine down 6-5, Maine tied the game at 6-6. With 12 seconds left, Jeff Wheeler converted a three-point play to tie the game at 6-6.

After playing a less than spectacular game in regulation, Gillies came up with some big stops on breakaways by Bruce Hegland and Santini in overtime before Maine gave the Wildcats the victory.

"He (Gillies) was shaky during the first game but he came up big at the overtime," said UNH coach Charlie Walter.

Maine coach Shaw Walsh said his team showed signs of mental weakness.

"In Saturday's game and the team fell behind by too much in Sunday's game. We got ourselves in a hole," Walsh said.

"We worked hard and tried to come back and had chances to score, but Bruce Gillies showed why he was the preseason pick to be the MVP (in Hockey East)."

Gillies made 38 saves in the game and the Cats turned aside 31 Wildcat shots in his first start since Jan. 4.

Trailing 6-1, the Bear comeback started when McDonald sent a backhander past Gillies to 6:50 to play.

With only 1:16 left in regulation, Rene Comeau scored his second goal of the game on the power play, he collected a rebound off a Heggland shot and poked it into the net.

Walsh pulled Lacoste with only 15 seconds left and faceoff near the Maine blue line, the Bears stuffed the Wildcats when they tied the game with six seconds on the clock.

McDonald got the puck and raced down the right wing and shot the puck on net. Gillies made the stop but the rebound went to Ray Jacques in the left slot and fired it into the open corner.

Maine returns to action next weekend when the Bears play the University of Lowell Chiefs at the Alfond Arena on Friday and Saturday nights.
