Consider Engineering

“Consider Engineering does a great job of showing all of the students what types of engineering there are and which one will be best for you.”

- Meagan Dube, '22

Stay during the summer, be inspired for life.

Consider Engineering is a challenging and rewarding four-day summer program for high school juniors to get a taste of college life and what it takes to be an engineer.

Be one of 108 students from Maine and around the U.S. invited to spend four days at the University of Maine participating in exciting engineering experiments, problem solving challenges, and great networking with faculty, practicing engineers and fellow campers—at no cost to you.

This program is offered three times in July to groups of 36 students who have completed their junior year of study, excel in math and science, and demonstrate communication and leadership skills. This free-of-charge educational and inspiring program is competitive, with only half the applicants gaining admission. Food and lodging is included.

If you have questions please contact us at info@umaineppf.org. **Please note that Teachers and Guidance Counselors may submit transcripts and letters of recommendations directly to us through this email address as well.**

Our 2021 summer program is full at this time but please email us at info@umaineppf.org if you are interested in talking with us to learn more about engineering at UMaine and the amazing career opportunities.

Applications closed for 2021

What to expect

- Form lifelong friendships
- Experience campus life
- Explore what it takes to be an engineer
- Meet industry leaders
- Work hands-on and in the field
- Discover if engineering is right for you.
