The candidates for president, vice president

David Webster and Jeff Kelcourse

by Ken Brack
Staff Writer

Student government president and vice presidential candidates David Webster and Jeff Kelcourse believe experience in student government is the key to performance. Webster, chairman of the Governmental Procedures Committee, one year off-campus senator and legislative assistant to Vice President Chris Bradley, said prospective student government administrators must learn the basic structural procedures first.

"We've been through the basic (student Government) class, we've gone up through the bottom and paid the dues," Webster said.

His running mate, Jeff Kelcourse, three year on-campus senator, publicity chairman of the UMaine Organization of Student Governments and Student Affairs Committee member, said both he and Webster are familiar with the structure of committees and boards.

Webster said the role of president and vice president is misunderstood by students first entering the student government.

"It is seen as the powerful place to be for advocating student needs. It is more of a managing role, and an informational resource for committee chairmen," the junior accounting major from Bucksport said.

Kelcourse, a junior political science major from Mexico, said he and Webster "complement each

other as on and off-campus senators."

Webster added, "More than the others, we want to do something for off-campus and non-traditional students." Webster said he favored creating an off-campus lounge with an atmosphere geared towards non-traditional students which would be open during and after classes.

Discussing the issues, both said they would continue to work "on the things we've been working on

David Webster (left) and Jeff Kelcourse

all year."

Concerning the parking issue, Webster said late this spring or early fall he would re-introduce an open parking resolution to move the present 4:30 p.m. time when parking lots become open up to 2:00 p.m. or 1:00 p.m., and consider redesignating some of the lots.

(see WEBSTER page 2)

Jason Wright and Mark Livingston

by Ken Brack
Staff Writer

Student government presidential candidate Jason Wright believes an efficient student government depends on leadership that can unify the campus community and act as a liaison between the students and administration.

Wright, member of the recently-formed Public Relations Committee, junior political science/speech communications major and off-campus student said, "Other candidates have senatorial experience, but I am the one who can unite the senate. I have no enemies. I want to call on input from everywhere."

Wright's running mate, vice presidential candidate Mark Livingston could not be reached for comment.

Wright said as president he would develop "more of a working rapport with the administration. We have considerable financial problems and to remain a top-notch school, UMO must be financially stable."

He said a unified student government and UMaine Organization of Student Government could effectively put more pressure on the state legislature for more funding.

The candidate from Phippsburg said he would work to unify the UMO community: students, student government, faculty and administration.

"All parts must work together

for the whole to work," Wright said.

Wright said he had acquired managerial skills as a night auditor and harbor master at Sebago Lodge, where he works in the summer.

Discussing the issues, Wright said he and Livingston would work for a long term solution to the parking problem.

He said his approach would be "to ask for something little until a solution is achieved." Wright said he supported a proposal to open up the parking closer to 12:00 rather than 4:00 p.m.

Jason Wright (left) and Mark Livingston

Concerning club funding, Wright said he wanted to see the clubs move towards self-sufficiency, but he would not support eliminating student govern-

(see WRIGHT page 2)

Paul Conway and Jon Sorenson

Candidates for student government president and vice president Paul Conway and Jon Sorenson believe it is time for student government to "get back to basics, to represent the students and fulfill its constitutional duties."

Conway, a two-year on-campus senator, budget committee member and executive assistant to President Steve Ritz, said he brings the most diverse background — grounded in business and political science — to the president's position.

"The student government is responsible for representing student views and providing services for the entire student body," Conway said. We must pull in outside views to reflect the entire student body."

Sorenson, public relations co-chairman of the UMaine Fraternity Board, Senior Council member and chairman of blood drives and other community events, said "Paul has the visions and experience of the senate and many other activities. I have campus

views that have been wholeheartedly out of the senate. In terms of total campus involvement, we have more strength and

Paul Conway

experience to represent the entire campus than the other candidates."

Conway said student government accountability and respon-

sibility would be goals of his efforts as president.

"If the senate doesn't become more in tune with the students, no

Jon Sorenson

matter what the issue is, nothing will ever result from a senate resolution," Conway said.

Both said they would send out student surveys every few months

or when pertinent issues arise to help gauge student opinion.

Concerning the parking issue, Conway said he opposed the open parking proposal when it was introduced last fall because "I think professors should be able to park near the buildings." The junior political science major from Belfast said he would work for a compromise proposal to push the 4:30 p.m. when parking lots become open up.

Conway said he supported direct club funding but could not recall his vote when the student senate allocated money for student clubs in a block vote on Jan. 22.

Concerning that session, Conway said "The rules (of order) that night should have been suspended. The clubs should have been funded immediately rather than making the members wait."

Concerning Residential Life policies, Conway said "If the administration is using dorm space without the student's consent, it is wrong."

Both said they thought a strong student government should in-

(see CONWAY page 2)

Webster

"Anyone who has worked with the problem knows it is a long ways away from being resolved," Webster said. "Since 1973 people have been working on it."

Concerning club funding, both said they support direct funding and opposed loan programs and efforts to make clubs self-sufficient. Webster said the Board of Student Organizations — a board he helped "resurrect after reading past minutes and reinstating the idea" — would help coordinate joint fund raisers, newsletters and speakers, and other overlapping needs of clubs.

Concerning Residential Life policies, Kelcourse said that as a UMOSG member he found UMO's Residential Life to have the "strictest policies of all the cam-

(continued from page 1)

puses." Both said they would work to change policies such as the newly-instated 12-month contracts.

Webster and Kelcourse both emphasized the need for more student input in student government and said they would pass out bi-weekly surveys for student opinion.

Conway

tervene to represent the students. Sorenson, a senior economics/business management major from Camden, said he and Conway are researching the idea of raising the recreational sports fee while decreasing or nullifying individual activity fees.

"The recreational fee would pay for those activities. This would provide capital to update equipment and maintain the athletic facilities on campus," Sorenson said.

Other issues discussed by the candidates include the possibility

Wright

ment support for them. He said he would research ways to help clubs get together to raise money, with student government paying half of club budgets.

"We want to free them up from

relying solely on student government, while freeing student government to provide more for surplus, in this way, for emergencies or expansion they won't have to rely just on us," Wright said.

(continued from page 1)

of establishing a trust fund from a percentage of the student activity fees, which would be invested for a "future good or benefit for the students", such as a hotel purchased by students at University of Massachusetts at Amherst for their hotel/motel management school.

Matthew P. Wibby, 22, of Sigma Phi Epsilon, was arrested on a warrant at 10:45 a.m. Feb. 16 for failure to pay a fine. Wibby was released on \$55 bail.

Todd F. Applebee, 19, of 319 Hart Hall, was issued a summons to appear in court Feb. 16 at 7:30 p.m. for illegal transportation of alcohol by a minor. Applebee was stopped on West Mall Road.

Ralf Platte, 23, of 15 Center St., Old Town, was issued a summons Feb. 15 at 8:25 a.m. for operating a motor vehicle over the posted speed limit. Platte was traveling 37 mph in a 20 mph zone.

Edward Simmons, 22, of Phi Gamma Delta, was issued a summons Feb. 16 at 10:37 p.m. for operating a motor vehicle over the posted speed limit. Simmons was traveling 39 mph in a 20 mph zone.

Peter Maggiore, 27, of Stillwater, was issued a summons Feb. 17 at 11:45 a.m. for operating a motor vehicle over the posted speed limit. Maggiore was traveling 50 mph in a 35 mph zone. Peter Millard, 30, of 22 Pond St., Orono, was issued a summons Feb. 17 at 11:30 a.m. for operating a motor vehicle over the posted speed limit. Millard was traveling 38 mph in a 20 mph zone.

Christopher R. Dow, 21, of 130

Forest Ave., Orono, was issued a summons Feb. 16 at 2:20 p.m. for operating a motor vehicle over the posted speed limit. Dow was traveling 37 mph in a 20 mph zone.

George C. Gervais, 19, of 410 Somerset Hall was issued a summons Feb. 15 at 10 a.m. for operating a motor vehicle over the posted speed limit. The speed was not available.

Michael Boyd, 19, of 118 Forest Ave., Orono, was issued a summons to appear in court Feb. 16 at 12:58 a.m. for operating an unregistered vehicle on a public way.

Alan R. Langille, 46, of 7 Sylvan Road, Orono, was issued a summons to appear in court Feb. 16 at 9 a.m. for displaying expired registration plates.

Jo Ann Bernstein, 24, of 69 Hayes St., Old Town, was issued a summons to appear in court Feb. 15 at 12:25 p.m. for displaying expired registration plates.

Shawn Marden, 19, of 319 Gannett Hall, was issued a summons to appear in court Feb. 17 at 11:05 a.m. for failing to stop for a stop sign.

A Hart Hall resident reported Friday the theft of about \$326 worth of merchandise from his room. According to the police report, the incident took place Thursday. The complainant had

left the room, leaving three six-packs of bottles and cans on top of a briefcase-style cassette carrying case with 37 cassette tapes.

During the man's absence, the section's resident assistant reportedly asked an acquaintance of the owner to remove the bottles and cans from the dormitory. The friend complied, carrying the cassette case out with the cans and leaving them all by a loading door to the dormitory. An unknown person or persons reportedly took the merchandise from there.

A Monson man reported the loss of an engagement ring valued at \$200 Feb. 17 at 2 p.m. On Saturday, Feb. 9, the man and his wife were visiting some residents of York Village apartments. The man reported having noticed at 10:30 p.m. that night that the ring, a diamond in a square setting on a gold band, was missing.

A Milford woman reported Feb. 15 someone had apparently siphoned about \$31 worth of gasoline from her car Thursday while it was parked in the steam plant parking lot.

An Old Town man reported Feb. 15 the loss of a Hewlett-Packard calculator valued at \$205. According to the report, the man had the calculator when he left his apartment, but noticed it was missing when he arrived at Fogler Library.

SENIORS STEP UP TO THE CHALLENGE!

The following seniors have stepped up to the challenge:

Senior Challenge is running from February 11 to March 8. This five year pledge program gives you the opportunity to:

- continue the tradition of alumni support at UMO
- show class spirit and pride
- enhance the future value of your UMO degree

Find out how to step up to the challenge:

BE ALL YOU CAN BE.**

Students find jobs with employers in field experience program

by Peter Gray
Staff Writer

Almost 50 percent of UMO students who participate in a field experience program receive post-graduate employment with the same employer they worked for as an undergraduate, said the director of the cooperative education field experience program Wednesday.

Ed Andrews, program director, said, "Students are leaning toward a career goal when they participate in the program. When a student completes the experience and comes back to UMO, they have no fear of getting a job after graduation."

Although UMO doesn't financially support any field base program, almost 80 percent of the employers pay the students for their work, he said.

"We're interested that all students understand the field base learning opportunities that they can receive through our program," Andrews said.

The cooperative education field experience at UMO is a planned learning process that integrates classroom studies with supervised work experiences. Students are treated as any other employee and are responsible to a faculty member for fulfilling the academic requirements.

The student positions can be full-time or part-time and are held during the academic year or summer, Andrews said. The duration of the position can last one month or one year.

Andrews said the academic programs are not supervised through his office but through one of the 48 part-time faculty coordinators.

"Students, on the average, receive 4.2 credits for their experience. However, as many as 12 credits and as little as one credit can be earned," he said.

"When a student leaves the field experience and returns to UMO, we have conducted studies that show a significant increase in a student's grade point average," he said.

There are many advantages of hiring a student for a field experience, he said. The specific employer benefits are:

— Having access to a large number of creative and highly motivated workers with no commitment to hire.

— Receiving professional-level employees when they cannot afford the salary of a permanent employee.

— Saving money by reducing or eliminating training periods should they hire a student employee permanently upon graduation.

Cynthia Nagem, a senior business major, participated in the field experience program last spring, working as a marketing consultant for the Waterville *Central Maine Morning Sentinel*.

"I was a junior at UMO and wanted a break from the normal classroom education," she said. "I desired practical experience and wanted to know how I could apply my classroom education after graduating."

World/U.S. News

Adventuresome students not deterred by drinking age

MADISON, Wis. (CPS) — Students who drink and drive are stimulation-seekers who are not likely to be deterred by laws raising the minimum legal drinking age, said recent research by a University of Wisconsin team.

Instead of trying to curb students' adventuresome habits, counselors should help students find new ways to satisfy their need for thrills, said the researchers.

Their conclusions are based on a study comparing student drinking and driving habits with personality types, says UW psychologist Frank Farley who, along with graduate student Sharon McNeely, conducted the study.

They found that students most likely to drink excessively and drive tend to be extroverted risk-takers who prefer change and novelty and who are attracted to experimental lifestyles.

"These people tend to reject rules and regulations of any kind," said Farley. "Minimum-age drinking and driving laws are just creating more rules for them to reject."

Although these students are more prone to delinquency, the researchers say, they are just as likely to exhibit positive characteristics such as creativity.

"These two forces arise from the same group of people," said Farley.

"We need to get these people to transfer their interests from one to the other."

"If counselors are aware of the characteristics of extreme stimulation-seekers, they can help channel their energy into the creative potential."

To date, Farley and McNeely have surveyed only a small sample of students. They said their results may not reflect all students.

But their thesis said the need for stimulation is the key to understanding and controlling drunken driving ... the largest killer of those aged 16 to 24 ... is supported by accident statistics.

Farley says those in their late teens and early 20s have the greatest need for stimulation. The frequency of traffic accidents follows the same pattern.

Furthermore, since alcohol is a depressant, young drinkers are likely to seek even riskier means of getting the stimulation they crave.

The theory, Farley said, explains why many accidents caused by drunken drivers involve, night driving, the presence of passengers and speeding.

"Nighttime driving provides little external stimulation, making passengers more likely to divert the driver's attention," Farley said.

"All of those factors," he said,

"maximize the likelihood of a mistake."

Safety regulations such as seat belt laws and speed limits simply prompt the stimulation-seekers to take even bigger risks, Farley said.

Farley said he does not know whether

the characteristics of thrillseekers are genetic or acquired.

But in either case, Farley prescribes trying to channel the thrillseekers into contact sports, the creative arts or any activity that involves intensity or uncertainty.

Reagan feels frequent vacations on his ranch are justifiable

SANTA BARBARA, Calif. (AP) — President Reagan, returning to the White House on Sunday after a four-day vacation, says he feels justified making frequent trips to his California ranch because "you give up an awful lot of privacy" serving in the Oval Office.

Reagan said the demands of the presidency accompany him wherever he goes. "And I look at it in another way — at my age, how many more years do I have to go to the ranch and enjoy the ranch," the 74-year-old president said.

After enjoying warm temperatures and sunny skies at his mountaintop spread, Reagan flew back to Washington to prepare for a meeting Wednesday with British Prime Minister Margaret Thatcher.

Since taking office in 1981, Reagan has spent all or part of 171 days at his ranch, or 12 percent of his presidency.

"You give up an awful lot in privacy and so forth, in these positions, and I think you're entitled, as long as you're

still president, are still faced with the problems, that—I've spent days at the ranch, the better part of the day, on the telephone."

Reagan discussed his affection for his 688-acre ranch in an interview with the Santa Barbara News-Press.

"I think that particular place casts a spell on you ... When you get in there, it's — the world is gone."

The president's hideaway is located 2,400 feet high in the Santa Ynez mountains, overlooking the Pacific Ocean. Reagan said he occasionally sees tracks and other signs of bears and mountain lions on his property, and frequently sees bobcats.

A Secret Service agent on duty at the ranch once watched a mountain lion stroll past his post from a distance of 30 feet, the president said.

The president's five-room adobe home, built in 1872, is heated solely by firewood. The Reagans bought the ranch in 1974.

Israeli pullout seen as a victory for Lebanon.

BEIRUT, Lebanon (AP) — Lebanese President Amin Gemayel visited Sidon on Sunday and hailed the Israeli military pullout from the port city as the "first step toward the liberation" and sovereignty of southern Lebanon.

Gemayel, accompanied by Prime Minister Rashid Karami, praised "national resistance" guerrillas in their fight against the Israeli army, which evacuated Sidon on Saturday.

"It's the day of the south. It's the first step toward the liberation of the south," Gemayel said at a ceremony at Sidon's government house. "Nations cannot be built without ... innocent blood, the blood of the heroes."

Gemayel lauded "the noble, heroic national resistance that raised Lebanese honor ... and became the symbol of Lebanese unity and liberation."

In a statement to the Lebanese army, Karami echoed Gemayel's sentiments, saying "legitimacy has returned" to Sidon.

"In your return to the nation, you proved the unity of the nation," Karami's

statement said. Israel withdrew its army from Sidon and surrounding areas Saturday, two days ahead of schedule. The move was the first of three stages that Israeli officials said last month would remove the army entirely from Lebanese territory.

Israeli Radio reported Sunday the second stage of the army's withdrawal would begin in three weeks. Israeli Prime Minister Shimon Peres has said he hopes the entire process will be over by summer's end.

The Israeli front line had been at the Awali river, just above Sidon and 22 miles south of Beirut. They drew back to the Litani River, 17 miles south along the Mediterranean coast. Lebanese forces were within two miles of the new line.

Israel did not pull back far in eastern Lebanon, yielding only about 200 square miles of Lebanese territory while retaining 850 square miles. Israel's military command said Sunday that a rocket-propelled grenade was fired at an Israeli

position east of the coastal city of Tyre and automatic weapons fire was aimed at another post at Bidias, six miles to the northeast.

An Israeli spokesman, speaking in Tel Aviv on condition he not be identified, said there were no injuries from the two overnight attacks.

Since Israel's invasion in June 1982, 615 Israeli soldiers have been killed in Lebanon, the military estimates. Accurate figures on how many Lebanese fighters were killed are hard to come by, but Lebanese police estimate more than 19,000 Lebanese civilians have been killed since the invasion.

Supreme Court wants help with heavy case-load

WASHINGTON (AP) — Chief Justice Warren Burger on Sunday urged Congress to create a new national court to help the Supreme Court cope with its "avalanche of cases."

"Years ago we passed any sensible limit on what the Supreme Court should be asked to do," Burger said, the nation's highest-ranking judge and one of nine Supreme Court members.

Although aiming his message square-

ly at Congress, Burger traveled to Detroit and used an American Bar Association convention as his forum. The text of his speech to the ABA was released in Washington D.C.

As envisioned by Burger, the new court would be a five-year experiment. It would sit in Washington four weeks a year, and have nine members — selected from the nation's 226 federal appeals court judges.

Violence directed at wrestling team continues

STANDISH (AP) — A wave of violence against members of a high-school wrestling team continued this weekend when the co-captain of the squad was assaulted at his home, authorities said.

Raymond Landry Jr., whose home was struck by fire last month which police suspect was intentionally set, was beaten early Saturday and could not participate in a wrestling tournament, said York County Assistant District Attorney Mary Tousignant.

She said Landry, co-captain of the Bonny Eagle High wrestling team in Buxton, was accosted on the back porch of his house, but did not see his assailant.

The attack is the latest in a series of incidents during the past month that appear to be aimed at members of the team.

Two fires have been set on the Buxton property of coach Theodore Reese. On Jan. 19, a fire destroyed a barn on Reese's property and threatened his house.

Four days later, a fire in a garage adjacent to Landry's home killed a horse and a dog.

On Feb. 9, another fire was reported at Reese's home, and a fire destroyed a barn at the home of a junior varsity wrestler who had been on the varsity team earlier in the season.

An investigative team of state, local and county authorities is looking into the rash of incidents in the Buxton and Standish areas.

Tousignant said her office is treating the assault case as a separate matter because there is no evidence linking it to the fires.

Police staged an all-night vigil Friday in the Buxton-Standish area because of fear another fire might be set. No one has been injured in the fires.

On Saturday, Landry did not participate in the wrestling match. He watched the tournament at Biddeford High School from the bench with his teammates.

Landry had obtained a waiver from the Maine State Secondary Principals Association, which sets athletic eligibility rules, to participate in Saturday's match.

DEVELOP YOUR CAREER

and Lifestyle

OUR REPRESENTATIVE WANTS TO INTERVIEW... YOU!

Located on the coast between the cultural and educational opportunities of Los Angeles and the scenic coastline and beautiful beaches of the Ventura/Santa Barbara area, THE NAVAL SHIP WEAPON SYSTEMS ENGINEERING STATION (NSWSES) at Port Hueneme, California (that's "NEMESIS" at "Port Why-nee-me") has exceptional Civil Service career opportunities for graduating engineers.

YOU will be working with experts in weapon systems technology involving in-service engineering and integrated logistics support for U.S. Navy ships in the fields of tactical software, digital computers, missile testing, launching systems, radars and systems engineering.

If you currently hold a BS degree (or will have one shortly) in Electronics Engineering (or another discipline with electronics background or interest) we have Civil Service positions for:

- Electronic Engineers
- Electronic Technologists
- Electronic Technicians

WE OFFER a federal benefits package as well as the challenge of dynamic career growth. Flextime, the opportunity for graduate education at nearby universities and colleges, uncrowded community living set on a scenic coastline of unparalleled beauty. Hiking, surfing, sailing, exploring the Southern California Mission heritage, the musical events of Ojai, and the horse trails of the ranches and canyons.

We are just a short drive north from the cultural and educational diversity of Los Angeles, yet our uncrowded, smog-free, relaxed environment sets us a world apart. Come see us. Develop your career and your lifestyle.

Women's hoop team edges Rhode Island, 65-57

by Rich Garven
Staff Writer

The UMO women's basketball team beat the University of Rhode Island 65-57 for its 20th win of the season Sunday in Memorial Gymnasium.

The win, Maine's fifth in a row and its eighth in the last nine games, gives the Bears a 20-7 record. Rhode Island drops to 11-12 with the loss.

Liz Coffin led Maine with a game-high 34 points on 12 of 22 shooting. The freshman forward also had 16 rebounds, four blocked shots and three steals while playing the entire game.

Coffin was the only non-senior to start for Maine. UMO head coach Peter Gavett started seniors Beth Cormier, Emily Ellis, Tammie Laverdiere and Claire McCoy because it was their last home game in a Maine uniform.

Ellis chipped in with 13 points and nine rebounds while Lauree Gott had 10 for Maine. The Wrams were led by Marlene North's 13 points. Ellen Quantmeyer had 12 and Michelle Washington 10 along with a game-high 19 rebounds.

It was the first time in four years Maine had beaten Rhode Island and only the third time in 11 games the Bears had won against URI. Last year the Wrams beat Maine 109-67.

"We've never beaten the big schools, the Rhode Islands and the New Hampshires, in the four years I've been here," Ellis said, "so it's good to go out in a blaze of glory."

Maine plays the University of New Hampshire at Durham on Wednesday in the Bears' last regular season game. Last season UNH beat Maine 83-65.

URI head coach Nancy Langham said a number of factors contributed to the Wrams' loss.

"They (the officials) weren't calling the same thing on both ends of the floor," Langham said. "I'm not taking anything away from Maine though. After last year's blowout at our place I don't think we knew how improved they were."

"We've been a very inconsistent team this year. We have six freshmen and we either play quite well or like today. And 44 (Coffin), I think we made her day, her season."

Coffin helped Maine take an early 20-7 lead by scoring 14 of those points. The baskets came from inside after rebounding missed shots, from the baseline on jumpers and on driving layups.

"I thought they were more worried

about Emily (Ellis) and when (the ball) went to the baseline they sagged on her," Coffin said. "I could have taken the pop shot (the jump shot), but I drove the lane. Even if Emily's not scoring its her presence that helps."

Ellis is averaging over 20 points a game, but only had four in the first half. After the first minute of the game she didn't score until the 11:09 mark of the second half.

Rhode Island scored twice on baseline jumpers by Quantmeyer and Margaret Grierson to cut Maine's lead to 20-11 before Ellis picked up her third foul. She went to the bench and didn't play the last 8:08 of the half.

Coffin and Gott scored four each including a layup by Gott off a two-on-one with Kelly Nobert to give a 28-17 lead with 2:45 left in the half. URI's only consistent scoring threat up to this point was Quantmeyer who had eight points.

Rhode Island outscored Maine 8-4 over the last three minutes to end halftime down 32-25. With 15 seconds left Sonja Wedge collided with a Wram player and left the game with a sprained ankle. The sophomore guard didn't play in the second half.

Playing mostly a 1-3-1 zone, the Bears held URI to 36 percent shooting from the field while making 50 percent of its shots (13 for 26).

URI, a 71 percent free throw shooting team, only made one of six in the first

half and Langham said it made a difference in how the Wrams started the second half.

Rhode Island came out running in the second half hoping to cut Maine's lead fast, but missed four straight layups on two-on-one and three-on-two breaks.

Coffin scored three points for Maine while Washington had four free throws for Rhode Island to make it 35-29 Maine. Washington entered the game averaging 17.4 ppg, but was held to two points in the first half.

The teams traded baskets before Ellis scored on an inside jumper and made a free throw after being fouled by Quantmeyer on the play to give UMO a 41-33 lead with 11:09 to go.

Quantmeyer tipped in her own shot on the next play, but Coffin scored twice on layups to make it 45-35. Judy Ryan then came back with two baskets after grabbing rebounds and Morth drove the lane for a layup to cut Maine's lead to four, 45-41.

As she had done all game, Coffin scored when Maine needed it, with a jumper in the key to give the Bears' a six-point lead.

Ellis came back with a layup off a Nobert (three points, nine rebounds) pass to make it 49-41 with 7:15 remaining. Maine would only score once more from the field after that basket.

The Bears made 14 of 24 free throws down the stretch on their way to the

Four seniors on the UMO women's basketball team played their last home game on Sunday afternoon. They are (pictured left to right) Claire McCoy, Emily Ellis, Beth Cormier and Tammy Laverdiere. (York photo)

65-57 final score. Rhode Island never got closer than six points and were down by 13 at one point.

Gavett felt defense was the key to Maine's win.

"We played real strong defense," Gavett said. "They got those hoops on rebounds and garbage play."

Maine had eight blocked shots and

eight steals while outrebounding Rhode Island 53-51. The Bears held URI to 31 percent from the field while forcing it to commit 21 turnovers.

"In our last 26 games we've been in every one," Gavett said. "Rhode Island is a tough team and that's what pleases me. I think we've been the most consistent team in New England, if not the East, this year."

TO PURCHASE ALCOHOLIC BEVERAGES AT 7-ELEVEN. COME OF AGE.

Alcohol abuse is a serious problem, particularly among people who are not of legal drinking age. The 7-Eleven stores in this area want to help do something about this problem. We want to assure that the laws regarding the sale of alcoholic beverages to those not of legal drinking age are upheld in our stores. We are asking our customers who are age twenty-five and younger to have a photo driver's license or Maine issued photo I.D. card available for inspection when purchasing alcoholic beverages from us. We try to be good neighbors and live

up to our responsibilities as a corporate citizen. This is not the first time we have been involved in community concerns. We've been involved with you in the Maine Special Olympics. We enlisted your aid in the support of the State's mentally handicapped, and, through your generosity, 7-Eleven stores have raised over \$14,000 within the state of Maine.

Now we ask your cooperation and support in helping us adhere to the law. If you come to 7-Eleven to purchase alcoholic beverages, please come of age.

Our concern is people.®
RMR, INC.

Men's 5 beats Utica, loses to Siena, in NY

The UMO men's basketball team departed New York State, the second time in two weeks, with a 69-66 victory over Utica College Friday night that squelched a three-game-losing streak. The Black Bears lost a 77-63 decision to conference foe Siena College Saturday night, however, which allowed the conference skid to continue at eight.

The Bears record now stands at 7-16 overall and 1-11 in the NAC. Siena's records are now at 18-5 and 9-3, which keeps them in the hunt for the conference title.

The Bears had been playing solid basketball but just didn't have the horses to disrupt some of the NAC's leading teams. The previous weekend, the Bears dropped games at Niagara University and Canisius College.

Consequently this past weekend, things didn't seem much better as the Bears made the trip with only eight players as Todd Taylor is red-shirting the remainder of the season and T.J. Forester missed the trip to catch up on some school work. In addition, the Bears lost the services of center Chip Bunker, who was struck with the flu before Saturday

night's game. And to make it even tougher, Utica and Siena were playing some tough basketball.

In Friday's contest, Jim Boylen led the Maine charge with 19 points to help end the Pioneers seven-game win streak. Boylen's layup in the lane with 6:52 left in the game put the Bears up for good.

Rich Henry sank two foul shots with three seconds remaining to uphold the victory. Henry had 11 points in the game.

Utica's Wallace Williams was the game's high scorer with 22 points. Wallace snipped the Bears lead to one with a jumper with six seconds remaining which paved the way for Henry's crucial free throws.

The Bears shot 62.5 percent from the floor while holding the Pioneers to a 47.9 performance. Jeff Wheeler was an instrumental contributor to the Bears' strong shooting night as he hit 9-of-13 from the floor for 18 points.

In the second game, without the aid of the 6-foot-11 Bunker, Maine crumpled under the evenly distributed scoring of the Siena Indians.

Indian guard Matt Brady, who had a game-high 22 points in the 83-65 win-

ing effort against the Bears on Jan. 21, proved again to be the mainstay with his 20-point outing Saturday.

Siena opened the game up in the first half 46-33 and never let the lead dwindle to less than eight for the remainder of the game. Dave Carlisle (13 points), Doug Poetzsch (12 points), Eric Banks (11 points) and Art Tooles (10 points)

fueled the Indians attack.

Henry's 18-point game led the out-manned Bears, while Jeff Topliff and Steve Smith each added 10.

Maine is now off until this weekend when they face Colgate University for a pair of home contests. Colgate is still winless in NAC play.

—By Jon Rummier

Mancini loses rematch

RENO, Nev. (AP) — Ray "Boom Boom" Mancini wasn't quite ready to call it a career after having his face carved up for the second time by a crafty Livingston Bramble. But if he listens to those close to him, he may have stepped into the ring for the last time.

"If it was up to me, I'd tell him to forget about it," said Mancini's father, Lenny, a former top lightweight contender himself.

Dave Wolf, Mancini's manager said, "My own feelings are I'd rather this be the end."

The former World Boxing Association lightweight champion, however, said he needed more time to reflect on his brief but at times spectacular career before making a decision.

"I'm not going to answer that now," the 23-year-old Mancini said Saturday night after dropping a close but unanimous 15-round decision to Bramble. "My impulse right now would be to hang them up. I've had a good career but right now I just need some tender loving from my family," he said.

Mancini, who failed in his effort to win back the lightweight crown Bramble took from him last June by a 14th-round knockout in Buffalo, N.Y., was cut early and

couldn't see out of his left eye after Bramble's punches swelled it shut in the eighth round.

But with a near-sellout crowd of 11,758 cheering his every move, Mancini rallied late in the fight to pull within one point on all three cards of the ringside judges. The effort won him some respect from the champion.

"I don't think anybody can give me a fight like that," said Bramble, who was unmarked after the grueling bout. Ray fought with a lot of heart — he just wasn't going to quit."

Mancini pressed the attack throughout the fight but Bramble appeared to land punches more often and more effectively than the challenger. Bramble rocked Mancini with combinations to the head on several occasions and also scored well to the body.

The victory earned Bramble, from the Virgin Islands, \$515,000 but more importantly put him in to position for lucrative fights against unbeaten Hector "Macho" Camacho or Aaron Pryor. If he wants to remain the WBA champion, however, he must face top contender Tyrone Crawley in a mandatory title defense within 90 days.

THE PRIZES:

\$1000 - First Prize
\$800 - Second Prize
\$600 - Third Prize
\$200 - Three Honorable Mentions

THE CONTEST:

Steve Grady
"Creative Writing Contest"

THE DEADLINE:

Friday, March 8, 1985 - before noon.

To enter: Submit your best creative writing (poems, short stories, plays, essays, ect.) typed, double spaced to the Department of Journalism, 107 Lord Hall. Entrants must have completed at least two Academic Years of credits in English and Journalism and should be planning to major in either of these fields or be a graduate of one of these programs. Identify your entry by typing your name, address and the title on a separate sheet. (Judging is anonymous.)

FOR MORE DETAILS, DROP BY THE

CARING
AS AN
AIR FORCE
NURSE

A new world of nursing opens when you become an Air Force nurse.

You are committed to the welfare of service members and their dependents. With worldwide employment and travel opportunities, you'll receive a highly competitive pay and compensation package.

If you're pursuing a bachelor of science degree in nursing and are qualified, you could become a member of the USAF Nurse Corps through Air Force ROTC. You may also be eligible for an AFROTC two-year nursing scholarship which pays full tuition, lab and incidental fees, books, plus \$100 a month tax-free. During the last two years of AFROTC, you will receive \$100 a month tax-free during the school year even if not on scholarship.

So while working for your degree, consider the advantages of Air Force ROTC and the exciting world of an Air Force nurse.

College hoop roundup

by The Associated Press

Barry Stevens' scoring was the big news for Iowa State, but Jeff Hornacek's layup with eight seconds remaining was the big basket for the Cyclones.

While Stevens scored 22 points to become the third 2,000-point scorer in Big Eight Conference basketball history, Hornacek's basket enabled Iowa State to upset 10th-ranked Kansas 72-70 Saturday.

Iowa State, 17-9 and playing at home, snapped a three-game losing streak.

The only other Top Ten team to lose Saturday was sixth-ranked Georgia Tech, which bowed 62-55 at Virginia, although there were plenty of scares elsewhere. Second-ranked Georgetown trimmed Providence 87-73, No. 3 Michigan shaded Minnesota 66-64, fourth-ranked Oklahoma held off Missouri 88-84, No. 5 Memphis State nipped Florida State 70-68, seventh-rated Duke whipped Notre Dame 81-69, No. 8 Syracuse downed LSU 72-64 and ninth-ranked Southern Methodist defeated Louisville 72-64.

Four members of The Associated Press Second Ten lost when Michigan State upended No. 11 Iowa 57-55, North Carolina State beat No. 13 North Carolina 85-76, Boston College edged No. 16 Villanova 62-61 and Washington trounced No. 18 Oregon State 60-45. Elsewhere in the Second Ten, it was No. 12 Louisiana Tech 59, McNeese State 58; No. 14 Nevada-Las Vegas 99, Cal-Irvine 89; No. 15 Tulsa 78, Creighton 63 and No. 17 Illinois 68, Wisconsin, 49.

On Sunday, top-ranked St. John's reeled off another of its second-half comebacks and defeated DePaul 93-80 as Chris Mullin scored 24 of his season-high 31 points after the intermission.

One other nationally ranked team was in action Sunday but No. 20 Maryland's visit to Clemson was an unhappy one when the Tigers upset the Terrapins 71-64 behind Vincent Hamilton's 20 points.

Iowa State led Kansas 35-28 at halftime and remained in front until the losers' Ron Kellogg scored with 56 seconds left, tying the score 70-70. Iowa State worked the ball around until Hornacek, who finished with 20 points, made his game-winning shot.

Stevens, a senior, got his 2,000th point on an 18-foot jump shot just before halftime. Oklahoma junior Wayman Tisdale and former Kansas star Mike Evans are the only other players in the conference to score 2,000 points in a career.

Meanwhile, Virginia sophomore Tom Calloway scored a season-high 16 points, the Cavaliers built a 13-point halftime lead and never were in serious trouble in surprising Georgia Tech. The triumph was only the second in 10 Atlantic Coast Conference games for Virginia, which got 14 points from Olden Polynice and 13 from Tom Sheehy.

BU Terriers sweep Black Bears

by Jerry Tourigny
Staff Writer

BOSTON — The Boston University Terrier hockey team swept the UMO Black Bears this weekend by 7-2 and 7-4 scores at the Walter Brown Arena.

The victories improve BU's overall record to 19-12-3 and its Hockey East mark to 17-10-3. Maine is now 9-26-1 overall and 5-25 in Hockey East play.

The Terriers, who are in second-place in the league standings, used their strong offensive play to control the games, outshooting the Bears 41-27 on Saturday and 44-35 in Friday's game.

For the Bears, the losses extend their Hockey East losing streak to eight games. The last Hockey East win for UMO came on Jan. 26, when the Bears beat the University of Lowell Chiefs 5-4 at the Joe Tully Forum.

Sophomore Jean Lacoste for Maine and freshman Peter Fish for BU, played both games in goal for the respective teams. Lacoste turned aside 34 shots Saturday and 37 in Friday's game. Fish, who is BU's third-string goaltender behind the injured Terry Taillefer and Bob Deraney, registered 25 saves Saturday night and 31 on Friday night.

In Saturday's game, Maine took a 2-1 first period lead behind two Dave Wensley goals, only to see the Terriers outscore the Bears 6-0 in the last two periods for a 7-4 win.

"They're a good team and that's why they're in second place," Wensley said. "We had our chances, played really intense, but the puck went in the net for them. Anything can happen in the playoffs. We have four games left and we have to make sure we're in peak condition — mentally and physically."

The scoring was distributed well for BU as seven Terriers got in the scoring act. After Ed Lowney gave BU a quick 1-0 lead 37 seconds into the game, Wensley scored his 14th and 15th goals of the year, to give Maine its first and only lead of the weekend.

While on a four-on-three power play, Wensley took a Dave Nonis crossing pass and fired it just inside the near post from the right point, for a 1-1 tie at the 16:03 mark of the period.

The freshman center gave Maine a 2-1 lead with 48 seconds remaining in the period; when he cut to the center from the left side and beat Fish from the top of the slot.

Wensley's second goal turned out to be Maine's last, as the Terriers drilled four shots past Lacoste in the second period and added two more goals in the final period to record their 17th league win.

In Friday's game, BU took a 5-0 lead and held off a third period comeback by the Bears to skate off with a 7-4 victory.

Trailing 5-0 to start the final period, the Bears came out storming and scored

three goals in the opening 4:11 of the period to cut the BU lead to 5-3.

Wensley scored 1:39 into the period to start the offensive binge and was quickly followed (24 seconds) by Nonis with an unassisted goal. Pete Maher completed the three-goal spurt when he beat Fish with 13:46 left in the game.

Terrier Tony Majkozak's goal 2:03 later regained the three-goal lead and Lowney iced the game when he scored with 6:56 to play, giving BU a 7-3 lead.

UMO freshman defenseman Scott Drevitch finished the scoring when he shot one past Fish with 3:27 left in the game.

Lowney, Majkozak, and John Cullen each scored two goals for the Terriers and defenseman Jay O'Leary had three assists on the night. Lowney and Cullen also chipped in two assists apiece.

The Black Bears were without the services of defenseman Rene Comeault for the weekend, who injured his ankle in the Lowell series. Maine will return home this weekend when the Black Bears play the league-leading Boston College Eagles Saturday and Sunday nights at Alford Arena.

After the series with Boston College, the Bears will finish the regular season when they travel to Providence, RI for a weekend series, Feb. 2 and 3, with the Providence College Friars.

DISTRIBUTED PROCESS CONTROL

Challenges And Rewards Are Exceptional In Our Expanding Advanced Technology Environment.

Bailey Controls is one of the world's leading suppliers of distributed digital controls, computer systems and state-of-the-art instrumentation for industrial processes and other applications. Over 2000 of our NETWORK 90 microprocessor-based distributed control systems are in operation worldwide. NETWORK 90 and our other widely respected products incorporate leading-edge electronics, communications, software and materials technology.

At Bailey Controls, your assignments will be varied and interesting, with ample opportunities for broadened experience working alongside

- ☐ CHEMICAL ENGINEERING
- ☐ COMPUTER ENGINEERING
- ☐ COMPUTER SCIENCE

Depending on scholastic background and professional interests, qualified candidates with good communication skills may begin their careers with us in one of the following areas:

PROCESS MANAGEMENT SYSTEMS

As a member of a project team, engineers and programmers participate in development and application of standard software products and one-of-a-kind contract software in the fields of industrial process control and data acquisition systems. Assignments typically involve problem definition, customer interface, field installation and testing, and troubleshooting. Work is typically done in a standard high level language such as FORTRAN, BASIC, C and PASCAL. The hardware environment includes mainframe, microcomputer and personal computers manufactured by IBM, DEC, HP and MODCOMP, as well as microprocessor-based Bailey products. Foreign assignments are available if desired. Can progress to project engineer or project manager. BS or MS in CS/ChE/EE.

CHEMICAL AND PROCESS INDUSTRY CONTRACT ENGINEERING

Engineers apply Bailey instrumentation products to solve industrial problems, translating customer requirements into control and instrumentation systems for a variety of processes. Calls for excellent interpersonal skills and salesmanship in dealing with associates and customer personnel. Courses in Electronics and Computer Technology are a plus. Can advance to Control and Instrumentation system strategist for a wide range of chemical and industrial processes. BS or MS in ChE/EE.

TECHNICAL PUBLICATIONS

Write and prepare specifications and instructions for Bailey's NETWORK 90 product line, incorporating hardware and software changes. Using information gathered from engineers, documents, schematics and drawings, as well as from working with equipment, develop text and provide direction on supporting illustrations describing personal computer-based work stations. Will work with Marketing Communications for photography, artwork and typesetting/paste-up. Some technical writing experience is a plus. Can progress to overall responsibility for publication preparation. BA or BS in EE/CS/ChE.

PRODUCT DEVELOPMENT MECHANICAL ENGINEERING

As a member of a project team, engineers develop control products suitable for effective manufacturing. Includes analysis, testing and design enhancement of various mechanical, pneumatic or electro-mechanical control instruments, as well as documenting designs and participating in initial production of new mechanical products. Computer aided design tools will be used exclusively and there will be immediate training to operate a state-of-the-art Computer vision system. Can quickly progress to project team leader. BS or MS in ME.

PRODUCT DEVELOPMENT & SUPPORT ELECTRONIC ENGINEERING

Assist other engineers in analog/digital circuit design using OP Amps, transistors, digital IC's including CMOS. Includes creating new electronic circuits for products which may include microprocessors. Will also make variations on existing designs to meet contract specifications or because of component obsolescence, and solve problems that arise in the factory or field. Will set up and run lab tests, possibly supervising technician. Calls for problem solvers able to design circuits. Can quickly progress to project engineer. BS in EE/ET or other with major in Electronics.

See us and learn how you can begin a rewarding career. Qualified candidates are also invited to write to:

Faye Owens
Employee Relations
Bailey Controls Company

some of the foremost professionals in the field of control technology.

Bailey Controls functions as an independent business unit and profit center within our parent company, Fortune 100 McDermott International. Our unique business structure provides professionals with high visibility and quick recognition of achievement. We also offer competitive salaries and a liberal benefits package.

Continuing growth and aggressive development programs have created exciting career openings in our organization for graduates with a BS, BA or MS degree in the following disciplines:

- ☐ ELECTRICAL ENGINEERING
- ☐ ENGINEERING TECHNOLOGY
- ☐ MECHANICAL ENGINEERING

PRODUCT ENGINEERING SOFTWARE DEVELOPMENT

After initial assignments solving problems and enhancing existing designs to gain familiarity with product lines and test/analysis equipment, will design digital/analog circuitry for Bailey's NETWORK 90 product line, transmitters and process analyzers. Products are typically microprocessor-based and incorporate advanced semi-custom integrated circuits. Includes detailed design, stress analysis, timing analysis, prototype testing and validation. Some microprocessor experience is essential, co-op experience and a senior project are strongly preferred. Can advance to project engineer. BS or MS in CS/ChE.

SYSTEMS ENGINEERING SOFTWARE DEVELOPMENT

As a member of a project team, will design, implement and test software for sophisticated process control equipment. Hardware is microprocessor-based and modular. Software functions include processing digital/analog I/O, regulating high-speed data communications networks and interfacing to large mainframe computer systems. Also helps introduce products to manufacturing and assists in initial field installation. Requires training or experience in microprocessor/minicomputer assembly language programming, real-time operating systems, data base management and computer networking. Some familiarity with digital/analog circuit design and computer system hardware is desirable, exposure to C programming language and UNIX operating system is a plus. Can progress to project leader or group supervisor, or to staff engineering. BS in CS/ChE/EE.

SYSTEMS DEVELOPMENT ELECTRICAL ENGINEERING

Will initially investigate and resolve problems on existing designs to gain familiarity with product lines and test/analysis equipment, also enhance existing designs. Basic assignment is to design digital/analog circuitry for Bailey's NETWORK 90 product line, transmitters or process analyzers, typically microprocessor-based and incorporating advanced semi-custom integrated circuits. Includes detailed design, stress analysis, timing analysis, prototype testing and validation. Some experience with microprocessors is essential, co-op experience and a senior project are strongly preferred. Can advance to project engineer. BS or MS in EE.

FIELD SERVICE

Engineers join our Field Service Internship Program and learn process control and state-of-the-art microprocessor technology. Includes classroom and in-plant training. Field service involves start-up, initial commissioning and maintenance of process control in all markets. Requires travel and includes functions such as installation consultation, initial calibration, process analysis, testing and tuning. Maintenance and system performance evaluation skills are important. Must have good customer relations skills, technical ability, enthusiasm and desire to work independently. Can progress in Service Mthagement, Sales, Marketing, Contract Engineering and Application Development. BS in ChE/EE.
