Exit 51 drains profits of local businesses

by Robert Hardy
Staff Writer

Each year, the profits of small businesses in downtown Orono funnel down the wrong drain, said Bruce Locke, town manager, on Wednesday.

The drain of which is spoke is the exits which lead to the University of Maine from Interstate 95.

He said students and parents who travel the interstate to UMaine and are not familiar with Orono have a choice between exit 50, which winds through Main Street, or exit 51, which leads to Stillwater Avenue.

The decision to use exit 51, he said, may impact small businesses scattered throughout downtown Orono.

Many of these, he said, compete with the shopping center on Stillwater Avenue and other businesses farther up Route 2 on Park Street. "Orono is split into two parts. One is the downtown area and the other is up by Burger King and McDonalds."

"Students and weekend visitors who are not from this area don't know there is a downtown Orono when they follow exit 51," said Locke.

He said merchants want to attract people who are not familiar with Orono.

The newest faces on the block.

(Keenan photo)

But residents, who cross the streets or wait for traffic signals, want less traffic. A proposal to clarify the choice between exit 50 and 51 by installing a sign on the interstate is before the Town Council. The thrust of the plan is to attract customers to businesses in the downtown area, Locke said.

This summer, a turnover of what Locke terms "specialty shops" moved to

Orono. However, they face stiff competition from Park Street businesses.

He said some small businesses have left while five new shops have taken their places.

"I cannot comment on why certain businesses have left. There could be a number of different reasons. But I'm very enthusiastic about the fact that new

business have moved in so quickly to fill the vacancies."

He said a greater potential exists for commercial business growth on Park Street. However, that same potential does not apply to the downtown area. "There is no room for commercial business expansion given the business zoning we have," said Locke adding that he is also concerned about traffic.

He said traffic patterns changed in 1979 when the sign directing UMaine students to Stillwater Avenue was first installed. This action was in response to complaints from residents and from the Orono Police Department.

Orono's traffic commission responded to the complaints of heavy traffic and presented them to the State Department of Transportation. "There is a real concern for parking. Our revitalization plan is looking at ways to reduce traffic problems in the future."

"I would rather see more parking than an increase in commercial business," Locke said.

This summer a revitalization committee re-stripped and re-designed the Mill Street parking lot behind Pat's Pizza. "We think a much more effective traffic pattern will result," Locke said.

(see EXIT page 4)

Approval of two resolutions kicks off semester

by Linda McGivern
Staff Writer

The General Student Senate, at its 528th meeting last night, unanimously approved two new resolutions.

Dave Mitchell, student government president, sponsored a resolution changing the name of the UMO GSS to the UMaine GSS in order to maintain the non-profit status of the GSS. It met with no resistance from senate members.

The other resolution, sponsored by

Chris Boothby, student government vice-president, proposed consolidation of some of the student government committees.

According to Boothby, the Academic Affairs Committee and the Physical Environment Committee will be consolidated because their functions overlap. In addition, the Public Relations Committee and the Student Survey Committee will be joined for the same reason.

"I really feel this is many years over-

due," said Boothby. "I feel the quality of legislation will improve this year because of the consolidation."

He said too many of the committees were fragmented; there were four to five people on each committee and this did not accurately represent the student body.

Tami Twarog, Hannibal Hamlin/Oak Halls' senator, said she agreed with the resolution but said she felt that Boothby should have consulted the senate before initiating the legislation.

Boothby said it is within his personal power to make committee changes without consulting the senate.

Elisa Sterling, Student Legal Services representative at the meeting, requested an approximate \$1,075 budget-increase for the 1986-87 year.

She said SLS needs \$520 for a full-time paralegal, \$280 for a receptionist who would work a 15-hour week, \$125 for state registration fees for SLS lawyers, and \$150 for attorney dues to the Maine Bar Association.

Sterling said the number of full-service cases and advice-only cases has significantly increased this year. SLS has already had one-third of its total case load this year.

Mitchell began his president's report by asking the senators to try to keep their bias out of GSS meetings, and went on to discuss his role as liaison between the students and the administration.

He also asked GSS senators to alert voting-age students to the existence of bond issue No. 9. The bond issue, which will be voted on in the Nov. 4 elections, would award the University of Maine system \$7.7 million.

"If this passes," said Mitchell, "it sends the word that the people of the state really support higher education in Maine."

Boothby, in his vice-president's address to the senate, stressed to senators their role in initiating legislation. "It is your responsibility to initiate legislation," he said. "If you see a need to be filled, please initiate legislation."

John Keene, vice-president of the Off-Campus Board, said the OCB is in "high gear" this year.

He said the OCB is trying to initiate "off-the-wall-flicks" at the Campus Corner as a weekly event.

(see APPROVAL page 4)

Governor approves divestment

by Marc Larrivee
Staff Writer

A press spokesperson for Gov. Joseph E. Brennan said the governor would philosophically favor University of Maine Foundation divestment from corporations that operate in South Africa.

Dave Cheever said the governor does not equivocate on the issue of apartheid.

"Apartheid is wrong and philosophically we (governor's office) believe we should not be investing in the system," said press spokesperson Cheever.

He said the governor is probably not "even cursorily" aware of the Foundation's nearly \$2 million worth of investments in South Africa.

"I doubt that he is aware of it but if he was he would probably express the same concerns as he did about state funds," Cheever said.

State Treasurer Sam Shapiro said the state Board of Trustees decided to instruct the money managers of state trust fund to investigate divestment.

"We told them to come back in six weeks with a list of companies that we are invested in, that could be divested from," said Shapiro.

The "prudent man law" that obligates investors to assure their clients that returns on stocks will be maintained at the highest possible levels is not an obstacle, said Shapiro.

"I think there are holes in the argument that fiduciary responsibilities are at question because from everything I see we may be able to get larger returns from re-investing," said Shapiro.

According to the 1985 Foundation report to its investors and other public statements on the issue of divestment, "fiduciary responsibilities" are noted as the main objection to divestiture.

The Maine State Board of Trustees is made up of representatives from the state's education, finance, and banking commissions, as well as from the attorney general's office and Baxter State Park, said John Larouche of the attorney general's office.

The board's decision to direct trust fund managers to investigate divestment may affect the \$2 million of investments for the Baxter State Park Trust Fund, Public Lands Trust Fund and Several Trust Fund, said Larouche.

Shapiro said a proposal to divest approximately \$122 million from the state's retirement fund was rejected by the the Maine Retirement System.

"I believe the Maine Legislature will have to decide the question of statewide divestiture," said Shapiro.

Thomas Harper, executive director of the Foundation, was not available at for comment.

Solar eclipse will dim afternoon

by Melissa Buxton
Staff Writer

Mainers will experience some unusual darkness on Friday. The new moon of October will line up with the earth and sun causing an eclipse.

Because the eclipse is dangerous to look at directly, the image of the eclipse will be projected onto a screen in the university observatory so everyone can see it, said Alan Davenport, director of the university planetarium.

Davenport said people can come to the observatory to see the eclipse at 3:15 p.m., when the maximum part of the eclipse will occur.

Eclipses occur when the sun, moon and earth line up, with the moon passing between the earth and sun causing a shadow. The moon's shadow reaches the surface of the earth in a cone shape and causes darkness.

Davenport said the eclipse which will take place between 2:01 p.m. and 4:27 p.m. is a partial eclipse. Only 75 percent of the sun will be covered by the moon.

"We will be using the main telescope which has an eight inch refractor lens. We will be able to see the shadow of the moon as the moon passes us and the sun."

Dan Grumble, an English major and astronomy buff, said the telescope which is going to be used in the observatory is used to predict an image of the sun

(Keenan photo)

without looking directly at it.

The procedure consists of removing the eyepiece and placing a piece of cardboard with a pin size hole in the place of the lens. The image will then be projected onto a screen so everyone can see it, added Grumble.

Many primitive people thought the eclipse was something evil and responded with prayers, ceremonies, noisemaking and other activities.

The Chinese thought a dragon was eating the sun.

South American Indians shot arrows into the sky to drive off the dragon they thought was eating the sun.

The Eskimos considered the sun and moon to be brother and sister and thought an eclipse occurred when incest was taking place.

Eclipses still continue to attract attention (see ECLIPSE page 3)

Can-Am center to compile book on relations

by Kelley Bouchard
Staff Writer

The University of Maine's Canadian American Center began work this fall on a comprehensive reference book designed to improve understanding of U.S.-Canadian border relations.

"It's the kind of book we hope ends up on the desks of people who affect the cross-border relations of the United States and Canada," said Victor A. Konrad, director of the center.

Konrad said economic, political and cultural aspects of U.S.-Canadian border relations will be addressed in the book, tentatively entitled "Borderlands."

The book concludes a three-year cooperative project conducted by U.S. and Canadian scholars representing various academic interests including geology, sociology, anthropology, economics and political science, Konrad said.

Konrad has been named co-director of the project with Lauren McKinsey.

McKinsey is a political scientist and the director of the Canadian studies program at Montana State University.

Konrad will meet with McKinsey next week in Washington, D.C., during a council meeting of the Association For Canadian Studies In The United States.

"We'll take an extra day while we're there to work out administrative and structural details of the project," Konrad said.

The research phase of the project will take up to two years to complete, Konrad said, resulting in facts and figures concerning the relationships spawned along nearly 5,530 miles of undefended border between the United States and Canada.

"Borderlands" will include case study opinion pieces focusing on particular border topics such as regional geography and environment, patterns of historical settlement, demographics, resource assessments, economic activity, education and culture.

As a result of increased communication and interaction at transborder areas, trade between the United States and Canada has doubled within the last five years, Konrad said.

Relaxed customs duties and promotion of U.S.-Canadian trade has allowed the two countries to experience nearly 85 percent free trade, Konrad said.

Despite trade tensions in industries such as soft wood, potatoes and fishing, Konrad said the United States has experienced a rather "benign relationship" with Canada.

"The countries have adjusted to each other," Konrad said, "but understanding is still needed. A project like this brings people together at an academic level so that people in one region can benefit from the experiences of people in another region."

Major funding for the study came through a \$150,000 grant from the Donner Foundation, a longtime supporter of Canadian studies at American Universities, Konrad said.

With other support coming from governmental and private agencies, Konrad said a total of \$500,000 has been devoted to the project.

Chess championships scheduled for weekend

by Jeanette Brawn
Staff Writer

Chess players will compete this weekend at the University of Maine chess championships to be held in the Bangor Lounge at the Memorial Union.

Championship Trophies will be awarded to first and second place finalists. They will represent UMaine at the Region I Games Tournament, the Association of College Unions International for colleges of the Eastern region, said Dr. H. H. Brimmer, tournament director.

The Eastern Region games conference will be held next February in Connecticut, he said.

"Also, all of those who play well at this weekend's tournament will be considered for inclusion in UMaine's Pan-American training group.

From this training group, a team of ten today except scientific explanation has replaced folk tales.

•Eclipse

(continued from page 2)

Eclipses do not come at every new moon, only once a year, or so, and affect only certain parts of the earth, said Davenport.

Davenport said the only place a total eclipse will take place is in the Atlantic ocean off of Greenland.

The eclipse Friday, will be easy to see across most of U.S. and Canada, except California, Arizona and Oregon. The eclipse will also be visible in parts of Central America and northern South America.

four or more will be selected to participate in the Pan-American Intercollegiate championship," he said.

As indicated on a chess club notice, a five round Swiss system is the format for the championship. The director may opt for a four or three round Swiss system or for a round-robin tourney of six or fewer rounds during registration.

There will be a time control of 50 moves in two hours for the games.

Rounds will begin at 10 a.m. Saturday with the time was subject to change at the site.

The tournament is open to players at all levels of competition and experience. Participation is limited to full-time UMaine students and University college students, including graduate students, Brimmer said.

He asked all participants to bring a clock, set, and board to the tournament. U.S. Chess Federation enrollment is re-

quired and obtainable at the tournament site for \$21. Tournament memberships for \$1 per game will also be allowed.

Pre-registration fees will be \$4 in advance and \$6 at the site, said Brimmer. On-site registration will take place at 9 a.m. Saturday.

The Pan-American Intercollegiate Team Championships will be held on December 26 through the 30, at Providence, RI, Brimmer said.

"Teams come to this championship from Canada, South America and Central America," he said.

Danny Kopec, faculty coach, said,

"We are hoping attendance will be good for this tournament indicating an interest for a team that will be coached for the Pan-American Intercollegiate Chess Championships."

This tournament is held every year and moves from campus to campus within the Pan-Américas, he said. "I believe a team is more than just a random assortment of individuals who happen to be from the same place. It should be a group of individuals who practice together, exchange ideas and help each other to the common goal of success," said Kopec.

(continued from page 1)

This year, *Headcheese*, the OCB newspaper, will become more of a newsletter and less politically oriented, said Keene.

Finally, there was some discussion from Eric Goodness of the Fair Election Practice Commission about the number of senators in the GSS this year.

According to the student government constitution, the senate is in session if there are 35-55 members. There are currently 49 members in the senate. FEPC policy dictates the senate must comprise 55 members.

Goodness said the FEPC tried to get the best representation (in senate) it possibly could, but some arbitrary seats were given to dorms which otherwise would not have gotten any representation, such as Estabrooke and Colvin.

Chris Boothby speaks to GSS.

(Hames photo)

Exit

(continued from page 1)

Two business managers agree a sign on the interstate would help.

Andrew Grover who manages the 7-Eleven store said at least half of his customers are students. On weekends, such as Parents and Friends weekend, when visitors travel through Orono, a sign would help.

"Any weekend when there is heavy traffic, our business would benefit, especially in gas sales, with people coming in and leaving."

Kevin Perkins, manager of LaVerdiere's Super Drug agreed.

"We stay pretty steady with in-town traffic but it seems like it would make sense if they changed the sign. It would help us and others nearby."

He said with the Mill Street parking lot behind Pat's Pizza, his business does not suffer from the town's parking problems.

Locke said the revitalization committee is handling all landscape and re-designing procedures but that a long-range master plan for assessing the town's expansionary needs has not been adopted at this point.

Bruce Locke (Keenan photo)

The university name change from UMO to UMaine could result in a sign change on Route 95. Locke said the council is considering installing the sign at the same time the university changes its sign.

QUESTION #2

HOW CAN THE BUDGET-CONSCIOUS COLLEGE STUDENT SAVE MONEY?

- Save over 50% off AT&T's weekday rates on out-of-state calls during nights and weekends.
- Don't buy textbooks when "Monarch Notes" will do just fine.
- Save 40% off AT&T's weekday rate on out-of-state calls during evenings.
- Count on AT&T for exceptional value and high quality service.
- Hang around with the richest kids in school; let them pick up the tab whenever possible.

If you're like most college students in the western hemisphere, you try to make your money go a long way. That's why you should know that AT&T Long Distance Service is the right choice for you.

* AT&T offers so many terrific values. For example, you can save over 50% off AT&T's day rate on calls during weekends to 8 am, until 5 pm Sunday, and from 11 pm Sunday through Friday.

Call between 5 pm and 11 pm, Sunday through Friday, and you'll save 40% off our day rate.

Ever dial a wrong number? AT&T gives you immediate credit if you do. And of course, you can count on AT&T for clear long distance connections any place you call.

To find out more about how AT&T can help save you money, give us a call. With a little luck, you won't have to hang around with the rich kids. Call toll-free today, at 1 800 222-0300

GREAT DEAL!

Film promo wins kudos for UMaine artist

by Susan J. Plourde
Staff Writer

Time and money do not always win, just ask Michael Mardosa.

Mardosa, a graphic artist at the University of Maine has been cited for excellence in design by *Print: America's Graphic Design Magazine* for his cover design for the *From Stump to Ship* promotional materials.

Among his competitors were *Time*, *Newsweek*, and *Fortune* magazines, Nike and Apple corporations, and the Universities of California at Los Angeles and Berkeley.

In the New England region, Mardosa's entry was cited along with those from the Massachusetts Institute of Technology, Northeastern University and Wheaton College.

"Just to be included is something of a kudo," Mardosa said, "considering our budget and the brief time we had to work on [the project]."

From Stump to Ship is a 1930's logging film that was rejuvenated in a historical project undertaken last year by UMaine and the Northeast Archives of Folklore and Oral History.

The project was funded by the Maine Humanities Council and Champion International Corporation.

Mardosa's design was used for media kit covers, postcards, posters, videocassette covers and display ads promoting the film. The design depicted a logger holding a peavey (a tool used for moving logs) while balancing on a floating log.

"The promotional materials were designed to evoke the period and the mood of the 1930's," Mardosa said.

"From a PR standpoint, the film was a success," he added.

The annual awards are selected by the *Print* editors based on quality of design and printing, originality and other standards.

"Everybody in the field pays attention to this magazine," Mardosa said.

Prize-winning cover.

Mardosa is particularly proud of the recognition this award has brought to UMaine.

"We are making an effort to try and show that the work we do here is of regional and national importance," Mardosa said. "People don't have to go

to Boston to get good work done, they just have to walk across campus."

Mardosa, a graphic designer and illustrator for the past 11 years, has been on the staff of the UMaine Public Information and Central Services Division since 1980.

Preventive health program answers student questions, concerns

by Kirsten Schulze
Staff Writer

The Preventive Medicine Program is run by students in health-oriented majors.

These students work six to 12 hours, usually at Cutler Health Center, providing health screening for hypertension, lung function, body fat, flexibility and visual acuity, according to the health program brochure.

Nona Peters, a student with the Preventive Medicine Program, says by getting involved in this program the student staff benefits by working in a major-related field.

Students gain experience for their future profession, they enjoy the work and get to exchange information with other members in different health majors, she added.

"It is an important position to inform the students on campus about their health and the ability to change unhealthy habits," said Peters.

Glen Raymond, a student involved in the health program said, this information has changed the lifestyles and health habits of students and staff members.

Raymond said the staff members are now more aware of what they eat and how much they exercise.

The program is confidential and free, so all can benefit from the Preventive Medicine Program, said Peters.

Nancy Price, health educator, said part of the students work at Cutler Health Center entails performing tests and informing people, but they also go to residence halls and fraternities to introduce their program.

The Preventive Medicine Program provides answers to questions by on-campus students concerning their health.

Their aim is to make healthy students aware of the risks and to help them learn a preventive approach to health care, said Price.

Unpalatable utterances

Certain words have been deemed obscene in polite society. They are not repeated in church. They are not allowed on television. Public use of these words is considered crass and vulgar.

Comedian George Carlin made famous a list of such words which could not be uttered on television. He later revised his list to include many variations and regional colloquialisms considered offensive.

One of his original seven words, the f--- word, has begun to inundate speech patterns. By many, its usage has become almost commonplace.

For some reason, punctuating every other utterance with this word, or a variation thereof, has become a sign of toughness and maturity.

It signifies neither. Constant use of the f--- word only identifies the speaker as unimaginative and boorish. It is as repulsive as snot dangling on the end of a nose.

With the abundance of words available, why do some people find it necessary to consistently badger their audiences with this monosyllabic repetition?

Obscenities are effective because of their shock value. The small child who repeats the f--- word to mom for the first time realizes the potency of these words.

If a child can grasp this concept, why is it so difficult for adults? Bludgeoning the listener with obscenities is fruitless.

The effectiveness of obscenities lies in their strategic manipulation. These words should be used sparingly, peppering our conversations. They should not overpower content.

When used, obscenities should signify intense emotion. Theoretically, if the speaker were thinking clearly, less blinded by passions, something more imaginative would come to mind.

The art of fine cuisine relies on the chef's perfect balance of spices. The same can be said of conversations. Discover the nuances of language. Learn how to flavor your speech to achieve the desired result.

The challenge of a good conversation is being able to parry and jab effectively.

There is an art to knowing when to, and when not to, use certain words.

TV and life

Jack and Mike are the perfect American working couple. They have the perfect American working marriage. They are yups, and they live in Chicago, the city of choice for television and movies, of late.

It's Jack's half of the pair that I am concerned with. Jack, Jackie Shea, is a columnist for *The Mirror*, and I guess she writes them daily, because she always babbling something about deadline.

I admire Jackie Shea. She is always well-groomed and well-dressed, and seems to have the respect of her co-workers and the support of her husband. Mike is the wonder boy of Chicago's restaurant world, and is always exhorting her to eat properly.

Then there's me. I have a bathtub; but no shower, so even though I bathe regularly, there's always a feeling that I am not as clean as I was when I showered. Consequently, I do not always feel that well-groomed, especially on humid days. And the only times that I am well-dressed are the two days following laundry day. My co-workers try to stay far away from me until I have had at least three cups of coffee, and I have no significant other to exhort me to eat well. However, I do reside above Orono's two watering holes, and not too far away from the Seven-Eleven.

Jack has time for everyone. People walk into her office with their problems and she has time to listen. She blows her deadlines to find people new hearts, to relentlessly chase down rapists in defense of falsely accused rapists. She rights the wrongs done to collegiate athletes.

I sit in my office. The phone rings and I tell the person with the problem, "Yes, yes, I'll get to it." But I never tell them when. Because generally it won't be anytime soon. I somehow get lost in the piles of papers on my desk, and besides, let's face-it: The type of news that happens in Chicago just ain't happening here.

Jackie has a beautifully appointed apartment, done in what I call soft-tech. Just the right mix of wood and brick, whites and neutrals. Her home is located in a wonderful building on a nice street. There are never dishes in her sink or unpaid bills cluttering a hall table.

As you may have guessed, my apartment is not beautifully appointed. I have nice furniture, but it is overwhelmed by the wretched pink and blue paint job done by previous tenants. My building is old and the livingroom and kitchen floors slope into each other. But there are never dishes in my sink (a point in my favor?) there are only coffee cups. Guess what condition the bills are in.

So I admire Jackie and her well-ordered life. But I don't envy her. Mainly because she is a character in a television show, and a rather lame one, at that. And to envy a television character with its picture-perfect idealization of what life is (should be) like is as useful as shooting the moon.

Jessica Lowell is a senior journalism/forestry major with a bird on her head.

I am aware that Mr. Higgins' work appeared in the Editorial section of *The Daily Maine Campus*, and as such, he is entitled to his own ideas and opinions, as I am to mine. Admittedly, the laws and rules for student drinking are a hindrance in many social situations, but to blame Residential Life for implementing rules they did not establish is immature

The very argument used when Legislators raised the drinking age in the State of Maine, removing the legal privileges of purchasing and consuming alcohol from those under the age of 21. If students have a problem with policy, they should go to the policy-makers, not blame those hired to enforce the policy. I have found the R.A.s, R.D.s and staff of Residential Life at the University of Maine, to be the most carefully selected, well-trained group of individuals I have ever encountered on a college or university campus, and as such worthy of respect, not public ridicule. Aside from my personal opi-

nion, which I have stated clearly, there is also a journalistic principle involved in the printing of Mr. Higgins' cartoon. I feel the artist comes dangerously close to Webster's definition of libel, "n. 1. any false and malicious written or printed statement, or any sign, picture, or effigy, tending to expose a person to public ridicule, hatred or contempt or to injure his reputation in any way."

This letter is in no way intended as a personal attack on Mr. Higgins, but is meant to provide the opportunity for thought.

Soviet moratorium

To the editor:

As many of you know, the Soviet Union has declared a moratorium on nuclear weaponry in 14 months. This can be seen as a significant step toward making peace with the United States. It would be appropriate if the United States took a similar step to show our desire to make peace with the Soviets. The Reagan Administration has refused to take such a step. There is no moratorium in the United States; our military continues to build its arsenal of nuclear weapons; indeed there have been no steps taken by the administration to show that we do want peace. It seems their lofty rhetoric about desiring to compromise with the Soviets is untrue. They told the American and Soviet people what they wanted to hear while they were planning to do otherwise. Why?

By analysis, I have reached the conclusion that the reasons for this stubbornness and infidelity are monetary. The Military-industrial complex (Pentagon, General Dynamics, Boeing, etc.) which supports the Reagan Administration, has too much money invested in the development and testing of nuclear weaponry for it to be a viable economic strategy to stop testing. To reduce this a bit further: It would cost too much money to take a step toward ensuring the survival of the world as we know it. I would like to know how much is too much?

There is a way in which we as

citizens can persuade our government—those who represent us—to make the necessary investment. This persuasive power is called the vote.

The House of Representatives has recently passed a bill which would stop all funding for nuclear testing. Senator Mitchell has co-sponsored bill S-2220, the Cranston Test Moratorium

Act, in the Senate. The Senate will soon be voting on this bill. It would behoove us all to exercise our influence on the Senate to pass S-2220. Our future depends on it!

You may contact Senators Mitchell and Cohen by writing or calling them in Washington. The addresses and numbers are:

—Senator George Mitchell
Senate Office Building
Washington, D.C. 20510
(202) 224-5344

—Senator Bill Cohen
Senate Office Building
Washington, D.C. 20510
(202) 224-3121

A call would let Senator Mitchell know his constituency is behind him. Senator Cohen has made no commitment and will need some extra persuasion so he is clear on where we, the people who elected him, stand.

I urge everyone, please, let them know!

In Peace,
Steven R. Gerlach
Maine Peace Action Committee

Commentary

MPAC

MPAC urges protest

On Monday, October 6 those members of the University community who believe in peace, justice and the right to self-determination will have a prime opportunity to express their views and take a stand against the U.S.-sponsored war of terror against Nicaraguan civilians.

For it is on October 6, at 3:15 in Sutton Lounge of Memorial Union, that Rep. John McKernan will bring his campaign for governor to the university.

Last spring McKernan voted to give \$100 million to the counterrevolutionaries ("contras"), who are fighting to overthrow the democratically elected government of Nicaragua.

The Maine Peace Action Committee (MPAC) urges members of the university to protest McKernan's support for contra terror and to voice their support for the four veterans who have been on a fast for peace with Nicaragua in Washington since September 1.

First and foremost, it should be pointed out that this country has full diplomatic relations with Nicaragua and no official state of war exists between the two countries. Thus, this support for the contras violates not only U.S. law, but the U.N. charter and every norm of international relations. The U.S. is acting in an outlaw fashion in this instance. This policy enjoys almost no support whatever in the international community.

In fact, Canada and several of our close European allies are assisting Nicaragua with economic aid.

Secondly, all major, respected human rights groups are unanimous in their evaluations of the Nicaraguan government and the contras. They uniformly report that while the Nicaraguan government has committed some abuses, they are at war, their record is improving, and the abuses have been isolated and not of an extreme nature. The contras, however, continue to systematically commit the worst types of abuses, including the rape, torture and murder of innocent civilians, among them pregnant women and infants.

In fact, the contras' strategy is inherently terrorist in nature. They know that they cannot win head-to-head confrontations with Nicaraguan troops, so they avoid them. They choose instead to wage a campaign of terror against Nicaragua's civilians.

This is not terribly surprising in light of the fact that the contras' leadership is made up almost entirely of officers from the National Guard that ruled Nicaragua with an iron fist, crushing all rebellion and wreaking brutality on Nicaragua for 40 years until the Sandinistas threw them out in 1979.

Anyone who is at all familiar with the history of Nicaragua can't help but be sickened by McKernan's and President Reagan's babble about the contras' democratic intentions.

Reagan and McKernan insist that the Sandinistas must hold elections. Elections were held in November 1984. Several countries sent observers, all of whom concurred that the elections were basically fair and honest. In fact, the system of proportional representation that was used, like that used in Western Europe, is considerably more democratic than the winner-take-all system employed in this country. In any event, the elections were markedly fairer than those held in nearby El Salvador, upon which this country has heaped oodles of praise.

It should also be pointed out that the Sandinistas have made enormous gains in education, health care, housing, and employment, among other areas. This comes despite the enormous cost of having to defend themselves from the contras.

Compare this to the kind of leadership and ideals that the contras stand for. In their 40-year tenure at the helm in Nicaragua, their sole achievement was the further impoverishment of Nicaragua's many poor.

This should give you a rough idea of what John McContra stands for in Nicaragua. I urge you to study this question further, for thanks to "leaders" like McKernan, we are all being led down the garden path to another Vietnam-like war in Nicaragua.

By voting for contra aid, McKernan has voted for murder, rape and torture in Nicaragua. MPAC urges you to protest his presence on campus.

World/U.S. News

South African miners walk off job in protest

JOHANNESBURG, South Africa (AP) — As many as 325,000 black miners — more than half the workforce — stayed off the job Wednesday in what union officials called a powerful display of worker strength in South Africa's largest industry.

The one-day walkout, called to protest the 177 deaths in Sept. 16 fire at the Kinross Gold Mine, cost the mines an estimated \$3.6 million, according to an academic monitoring group.

"This worker action is unparalleled in South African labor history and demonstrates the importance of worker safety at the work place," said Marcel Golding, spokesman for the 250,000-

member National Union of Mineworkers.

"The whole theme was that this was an accident which could have been prevented," Golding said of the deadly fire, the nation's worst gold mining accident.

Fumes from burning materials, including a polyurethane foam used to line the tunnels but banned in American and British mines, are suspected in the deaths of the 172 black and five white miners.

The miners' union said 325,000 of the nation's 600,000 black miners did not go to work. Mining companies put the figures at about 250,000.

Most mines said they would dock the

strikers' pay or take a vacation day from them.

Jay Naidoo, general secretary of the Congress of South African Trade Unions, said about 275,000 workers in other industries held memorial services, including hour-long stoppages.

"This shows the extent to which the miners' union is representative of the miners, and the support it is able to muster," Naidoo said.

"It also demonstrated that health and safety have also become an issue."

The Chamber of Mines, the industry association, had called for five minutes of silence at noon in 100 gold and coal mines nationwide. The union said that

was not adequate.

Mining companies refused to estimate the cost of the protest. The Labor Monitoring Group based at the University of the Witwatersrand estimated the cost at \$3.6 million, based on its count that 250,000 to 275,000 stayed away from work.

South Africa's gold, coal, diamond and metals mines produce about 60 percent of the nation's export earnings.

At a union-sponsored memorial service last week, black activist Winnie Mandela brought cheers when she said miners could bring the country to a halt and force the government to abandon apartheid if they refused to work.

Soviets and Americans optimistic on summit

WASHINGTON (AP) — The Soviet Union joined the Reagan administration Wednesday in predicting a breakthrough in curbing nuclear weapons at the meeting in Iceland between President Reagan and General-Secretary Mikhail S. Gorbachev.

Presidential chief of staff Donald T.

Regan said the two days of summitry Oct. 11-12 "could lead to a better understanding and, perhaps, some give here and there in order to reach an agreement so we get some arms reductions."

For the Soviet Union, Foreign Ministry spokesman Gennady

Gerasimov said he expected in Reykjavik "some kind of breakthrough" in the form of instructions to lower-level weapons specialists to solidify an agreement.

"It's quite possible that we can have movement" on missiles, the Soviet official said on NBC-TV's "Today" program. "We want our leaders to put their heads together and to think big and to find some kind of direction to solve our problems."

Secretary of State George P. Schultz, meanwhile, said Reagan had accepted Gorbachev's proposal for a two-day, informal meeting within two weeks because "the name of the game here is to solve problems."

Noting that a range of issues will be discussed, Schultz, interviewed on the NBC program, said: "We are in a position, I hope, to make some progress on these problems that I think all of us would want to see resolved if it is possible to do so."

Beyond arms control issues, Reagan and Gorbachev are likely to agree on broader cultural exchanges and expan-

ding consular offices in the two countries, an administration official said.

The two sides also have established "an extensive dialogue" on the guerrilla wars in five countries, Afghanistan, Angola, Cambodia, Ethiopia and Nicaragua, since Reagan proposed a year ago that they set up negotiations to end the conflicts, the official said.

Overall, "there are some interesting prospects" for the Iceland meeting, said the official, who demanded anonymity.

He said Reagan would press Gorbachev to allow more Soviet Jews to emigrate to Israel. The exodus is at a two-year low. Apart from reuniting some divided families by permitting Soviet citizens to join their relatives in the West, "there has been no progress on broad human rights issues," the official said.

Reagan and Gorbachev are also expected to take up the U.S. order to expel 105 Soviet diplomats over the next two years. As part of the deal that brought American reporter Nicholas S. Daniloff home, Schultz extended for two weeks Wednesday's deadline for 25 to depart.

AIR FORCE ALWAYS NEEDS MORE LEADERS.

We're looking for pilots, navigators, missileers, engineers, math majors, people managers, fixers, communicators, and more. And the Air Force ROTC program is a great way to get into a field like one of these which can help you improve your leadership ability and your professional competence.

As a commissioned officer in the Air Force, you can be proud of the role you play in your community and the contribution you make to your country's security. You can know that you're doing something of importance, something with respect and honor.

The Air Force ROTC program offers a way to help you achieve these goals. As an ROTC cadet, you'll learn about leadership, management, and more. You'll learn about benefits of being an officer later on, like an excellent salary, medical and dental care, housing and local allowances, and 30 days of vacation with pay each year. You'll discover a whole new world open to you in the Air Force. And you can get these through ROTC.

Look into it right now. You'll be glad you did.

CALL: Captain Root, 581-1386
 SENIORS: OTS, collect (603) 868-7266

Unfavorable contract for Maine railroads

PORTLAND, Maine (AP) — The owner of the Maine Central Railroad, claiming that it had been unfairly singled out by lawmakers, asked a federal judge Wednesday to invalidate a contract that the government imposed on the carrier and its track maintenance workers.

tion Industries Inc., said the settlement signed into law by President Reagan on Tuesday night violates the constitutional guarantee of equal protection under the law.

"In a deregulated environment, they are making us less competitive than any other railroad in the country, and by doing that they are making Maine shippers less competitive because they will pay the price," Pease said.

needs to abolish job categories and cut wages to be more competitive in the industry.

Propane explosion kills two in Windham

WINDHAM, Maine (AP) — Investigators said a leaking propane gas tank caused an explosion Wednesday that claimed the lives of a Windham couple.

Congress and the president, Pease said, imposed an unfavorable contract on the Maine Central in response to union threats of a nationwide rail strike.

Lawyers in Guilford filed suit in U.S. District Court, seeking an injunction to block the contract. The railroad says it

The national president of the Brotherhood of Maintenance of Way Employees, however, praised the government action, and said government intervention would not have been necessary but for Guilford's intransigence.

Liger J. Comeau, 39, and his wife Noreen, 37, were killed when the 5:25 a.m. blast rocked their one-story home on Highland Lake, said Donald Bisset, the state fire marshal. Bisset said the victims were believed to be the only ones in the house.

Fire Chief Charles Hammond said propane was probably a factor in the blast. Neighbors said propane or gasoline was stored in the cellar of the home.

The wood-frame dwelling and the roof fell onto the foundation.

In signing the law Tuesday night, President Reagan said he was reluctant to have the government "inject itself into the collective bargaining process." He said, however, that the imposed settlement was needed to avert a potential nationwide rail strike.

Comeau was hurled into the woods by the force of the blast and died instantly, neighbors said, while Mrs. Comeau was trapped in the rubble of the house, screaming for help.

The explosion blew out the walls of

"I've been in firefighting for 20 years and I've never seen a building this devastated," said Hammond.

The president said recent court decisions allowing picketing of rail carriers not directly involved in a particular dispute had created "the potential for a nationwide strike in every dispute between labor and management that is governed by the Railway Labor Act."

The 20-pound propane gas cylinder apparently had been used for a charcoal grill, a fire department dispatcher said. "I heard her hollering for help," said Dennis D. Graham, a neighbor, as he fought back sobs. "But I just couldn't do anything. I just couldn't get close enough to do anything."

Teenage suicides declining

BALTIMORE (AP) — The teen-age suicide rate, which tripled between 1950 and 1975 as drug and alcohol abuse among young people also soared, is starting to decline and should decrease gradually over the next five years, a researcher said Wednesday.

suicides might be due in part to an equivalent decline among young people in drug and alcohol abuse.

The firefighters later pulled Mrs. Comeau from the wrecked house but were unable to revive her.

"It's not a huge drop-off. It's still about three times what it was before (in the 1950s) but it looks like it is starting to edge down," said Richard Wetzel, a clinical psychologist at Washington University in St. Louis.

Wetzel said studies have shown that the sharpest rise in teen-age suicides, which occurred between 1965 and 1979, was paralleled by a dramatic rise in drug abuse among the young.

The blast, followed by a small fire, caused "a tremendous amount of destruction," said Bisset.

Wetzel, who spoke at a news briefing sponsored by the American Medical Association and Johns Hopkins Medical Institutions, cited a variety of studies by him and others in drawing his conclusions.

Studies in California have also found that suicides are more likely in counties with higher levels of drug and alcohol abuse, he said.

NEWS BRIEFS

Mandela miniseries in the works

HOLLYWOOD (AP)— A production group led by Harry Belafonte announced plans for a TV miniseries about Nelson Mandela, the imprisoned South African liberation leader, starring Marlon Brando, Jane Fonda and Sidney Poitier.

The as-yet-untitled drama is scheduled to begin filming in Africa in the spring for broadcast on ABC-TV during the 1987-88 season, Belafonte announced Tuesday.

At least two other efforts are under way to produce similar dramas about Mandela, but Belafonte said he has the support of the black leader and his wife, Winnie.

"I am particularly pleased with the faith expressed by the Mandelas in the project and in me," he said.

Daniloff is grateful to Reagan

WASHINGTON (AP)— Nicholas Daniloff told President Reagan Wednesday that if it hadn't been for Reagan's "very deep and personal interest" in his case, he probably would have been kept in the Soviet Union for years.

Reporter Daniloff, spending his first full day in the United States, met briefly with Reagan at the White House before the two made a joint appearance in the Rose Garden. They were joined by Nancy Reagan, who stood next to the reporter, and Daniloff's wife, Ruth, and Daniloff's children, Miranda, 23, and Caleb, 16.

Reagan defended the arrangement with the Soviets that led to Daniloff's freedom, saying: "I don't think there's caving in at all."

Daniloff had been arrested Aug. 30 by the KGB and charged with spying in the Soviet Union.

Military command reorganization

WASHINGTON (AP)— President Reagan on Wednesday signed a bill giving more power to military theater commanders and making the chairman of the Joint Chiefs of Staff the principal military adviser to the president.

In a statement accompanying his signature, the president called the legislation "a milestone in the long evolution of defense organization since our national security establishment was created in 1947."

Congressional sponsors of the bill, led by Sen. Barry Goldwater, R-Ariz., said it would help to pre-

vent foul-ups caused by snarls in the chain of command.

The bill would give theater commanders more latitude in deciding where to store ammunition, to hire and fire four-star generals and admirals, and to send budget recommendations directly to the secretary of defense.

Ignorant on sugar

WASHINGTON (AP)— A leading sugar critic said Wednesday that the Food and Drug Administration displayed "real ignorance" in a study that gave the sweetener a relatively clean bill of health.

"The FDA missed the forest for the trees," said Michael Jacobson, executive director of the Center for Science in the Public Interest.

"I think the FDA report will undercut nutritionists who emphasize that sugar does nothing but add empty calories to the diet."

Jacobson vented his wrath at an FDA task force report made public Tuesday that concluded sugar is not linked to any disease but tooth decay.

A sugar industry group held a news conference Wednesday to trumpet the report and express the hope that it would help knock down the "myth and misinformation" that sugar causes heart disease, hyperactivity and a host of other maladies.

Jacobson said, "No, sugar does not cause gall stones, and no, sugar does not cause hypertension."

But the tremendous amount of sugar we consume does not promote an optimal diet. The FDA showed real ignorance of the role of sugary foods in our society."

South African diplomats fear senate veto

WASHINGTON (AP)— South African diplomats have been calling senators to threaten the cutoff of U.S. wheat purchases if the Senate overrides President Reagan's veto of economic sanctions against that country's white minority government.

Mark Helmke, a spokesman for Sen. Richard Lugar, R-Ind., chairman for the Senate Foreign Relations Committee, said Lugar has received evidence that several senators received telephone calls threatening such action and would shortly provide details.

Drive an Ali 3-WC

HALIFAX, Va. (AP) — Muhammed Ali wants to start a new line of sports cars named after himself.

"It's pretty exciting. It's got more visibility than building a hotel," the former world heavyweight boxing champion said Tuesday.

Ali and five partners are asking the Halifax County Industrial Development Authority for \$9.3 million in industrial revenue bonds to finance a plant that would build a line of limited-edition sports cars.

The car, to be priced at about \$35,000, would be called the "Ali 3-WC," which stands for "Ali, three times world champion."

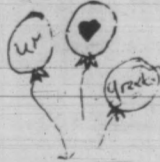

Ali Motors expects to deliver about 3,000 vehicles a year, most of them for export to the Middle East.

Hockey team initiates season at Alford Arena

by R. Kevin Dietrich
Staff Writer

College hockey officially returned to the Alford Arena Wednesday as the University of Maine hockey team kicked off the 1986-87 season with its first practice.

The Black Bears, who open against the University of New Brunswick on Oct. 15, will be looking to improve on a 112-81 season which saw them finish fifth in Hockey East.

Prior to the New Brunswick contest, the Black Bears will hold their annual Blue-White intrasquad game on Oct. 11 at 4:15 p.m.

Overall, Coach Shawn Walsh was pleased with the Black Bears initial practice, saying that "It was a typical first day, things were a bit hectic.

(But) I saw some things I liked and some things I didn't like.

"I thought the goaltending was real strong."

Sophomore Jack Capuano was also happy with his team's play saying "For the first time out, I think we performed well."

Not surprisingly, Maine did have problems with both a lack of timing and concentration, common maladies on opening day.

And while it's difficult to tell just how much better this Maine squad is from the previous version, Walsh has already seen some improvement.

"I think there is a bit more talent." Capuano agreed adding "I think talent-wise, we're further along."

Maine returns 17 lettermen from last year, with an additional 12 newcomers vying for positions on the squad.

Among the rookies are Tim Adams, Bob Beers, Bill Bodwell, Jim Burke, Dave Capuano, Scott King, Christian Lalonde, John Massara, Guy Perron, Chuck Santoro, and Claudio Scremin.

Although Maine doesn't open their regular season until Oct. 24-25 with a two-game series against conference rival Boston College, the Black Bears aren't looking past New Brunswick.

"We're going to take one game at a time," Capuano said.

GREAT JOB OPPORTUNITIES

STUDENT CO-OP POSITIONS

To work full time from
January 1st to August
31st, 1987

Maine Yankee Atomic
Power Company has open-
ings for Co-op Students
starting January 1987.

If you are interested in earning excellent wages while acquiring work experience in your major with possible future employment opportunities, we have 16 co-op positions available for B.S. candidates in the following majors:

- Mechanical Engineering
- Engineering Physics
- Speech Communications
- Electrical Engineering Technology
- Electrical Engineering
- Computer Science
- Mechanical Engineering Technology

Please contact Kay Marcoux, Ext. 1344 at the University of Maine at Orono, Co-op office, by October 15, 1986.

Golf team doesn't give up despite problems

by R. Kevin Dietrich
Staff Writer

With the ECAC qualifying tournament less than a week and a half away, the University of Maine golf team is still having problems getting their game plan into swing.

The Black Bears are fresh off a mediocre performance at the New England Intercollegiate Championships, held at New Seabury, Mass., which saw them finish in a tie for 10th with Westfield State College with a two-day score of 649.

But prior to that, Maine took second and third (with two squads competing) in the Husson Invitational Tournament over the weekend and the Black Bears

swept the field at Middlebury, Vt., capturing the Middlebury Invitational Tournament the weekend of Sept. 20-21.

The big action, though, was Monday and Tuesday in New Seabury, where 41 schools participated, with the University of Hartford dominating the two-day tournament.

The Hawks finished with a score of 613, well in front of the second place squads, Central Connecticut State University and Bryant College, each of whom tallied 622.

Lowell University and Salem State College rounded out the top five, with scores of 626 and 628, respectively.

According to Maine Coach Art Guesman, the Black Bears started off strong but dropped behind on the second day.

"After the first day we were tied for fourth, but we just didn't play as well the second day," Guesman said. "Nobody scored as well as they should have."

Black Bear Galen Perry led the attack with a two-round score of 158, followed closely by captain John Hickson's 159.

Scott Weiler finished third with 165 for the event and Sean Clark wrapped things up for Maine with two-day score of 167.

Overall low score for the tournament went to Tim Petrovic of Hartford, who registered a 144. Key Gys of Lowell was second at 147, and third place was shared by Kevin Picuch of Westfield, Shane Drury of Providence College and David French of Bryant, all of whom totalled 150.

Course conditions deteriorated Tuesday with gusting winds making playing conditions difficult.

"The wind was 40 MPH off the ocean," Guesman said. "It was really bad."

In spite of their less than spectacular finish, Maine has certainly not given up on itself.

"There's a certain degree of disappointment on the team because they haven't done as well as they should have," Guesman said. "They know they're capable of better."

The big test for the Black Bears will take place on Oct. 9 when Maine tees off at Portsmouth, N.H., to compete in the ECAC qualifying tournament, which will determine whether or not they travel to the Eastern Finals to play against the best in the East.

Cleveland's Daugherty becomes highest paid

RICHFIELD, Ohio (AP) — Brad Daugherty, the first player chosen in the 1986 NBA draft, became the highest paid player in Cleveland Cavaliers' history Wednesday, signing a guaranteed six-year, \$6 million contract.

The 7-footer from the University of North Carolina reportedly would be paid \$500,000 in the first year of the deal, with annual raises until reaching \$1.5 million in the sixth year.

"The whole situation of signing and money was not that important to me," Daugherty said. "I'm not a very materialistic person. I have other things in my life that are very important to me, and money's not one of them."

Cleveland's highest-paid player previously was center Mel Turpin, who is in the third year of a four-year deal worth an estimated \$2.5 million.

The Cavaliers traded with Philadelphia on draft day in June to obtain the first pick overall, sending veteran

forward Roy Hinson and \$800,000 cash to the 76ers.

They used the selection to take Daugherty, who can play both center and power forward.

"I'd rather play forward, but either one's fine," he said. "I think I can play both positions."

Lenny Wilkens, Cleveland's new coach, said he has not decided how he will use Daugherty.

"It's a little early to say," Wilkens said. "It's safe to say he's going to play both center and forward, but which way we'll open the season with him, we don't know."

Daugherty averaged 14.2 points and 7.4 rebounds per game in four years with the Tar Heels, including 20.2 points and 9.0 rebounds per game as a senior.

He is the only one of Cleveland's top four draft-day acquisitions to sign so far.

Ron Harper, a guard-forward from Miami, of Ohio chosen by the Cavaliers

with their own first-round pick, the eighth overall, said this week he expected to be signed by the start of training camp Friday, although his agent was less optimistic.

Also unsigned are Mark Price, a guard from Georgia Tech obtained in a draft-day trade with Dallas, and Johnny

Newman, a forward from Richmond, taken in the second round.

Cavaliers' General Manager Wayne Embry said negotiations were continuing with all three players, as well as with veteran guard World B. Free, who became a free agent after last season.

Winfield wants peace

NEW YORK (AP) — After five straight 100 RBI seasons, outfielder Dave Winfield of the New York Yankees isn't looking for accolades, only peace and quiet.

"I would really like next year and any successive year to play the game without it," Winfield said of his constant verbal battle with Yankees' owner George Steinbrenner. "You don't have to praise me and pat me on the back, just leave me alone in a supportive atmosphere. "I don't know if I would consider this extending a palm leaf, but it would be interesting to be supportive and see what kind of productivity I could get."

Winfield, who signed a \$23.3 million, 10-year contract with the Yankees before the 1981 season, is closing out another productive season and one of the stormiest years with Steinbrenner in the pair's often turbulent relationship.

When Winfield knocked in two runs in Monday night's 8-1 victory over Toronto, he became the first Yankees' player to drive in 100 runs five consecutive seasons since Joe DiMaggio had

a seven-year streak between 1936-1942.

His .263 average, 24 homers and 102 RBI going into Wednesday night's game have kept Steinbrenner quiet on Winfield lately. But when Winfield was the last Yankees' player to report to spring training this season, Steinbrenner was upset. "It tells me something about the man," he said.

A .222 average at midseason had the right-handed hitting Winfield benched against right-handed pitchers, at Steinbrenner's insistence, although the 34-year-old outfielder was named to the starting lineup for the American League in the All-Star Game.

The All-Star selection gave Winfield a chance to fire back, wondering aloud how an all-star player could be sitting on the bench.

Nearing the end of his 14th major league season, Winfield says the continual bickering has removed some of the enjoyment.

"I still try to treat baseball as a game and try to have fun," he said. "But sometimes it becomes so much of a business that it isn't fun. I don't want to have to deal with defending myself. I think I do pretty well every day."

In six seasons with New York, Winfield has hit .289, averaged more than 30 homers per season and driven in 606 runs. Getting 100 RBI this season and joining DiMaggio was a priority with Winfield.

"It's a goal I've been trying to achieve since the beginning of the year," Winfield said. "You don't really talk about it. You just do it."
