Report of Schools.

Gentlemen :—In reviewing the work of our schools since the issue of the report one year ago, I find that no changes of importance have occurred. Progress has been made in many directions and, with two exceptions, as good results have attended the efforts of our teachers as could reasonably be expected. I am happy to note that harmony and good will have prevailed between teacher and scholars, to all appearance in every instance. Without further remark I will proceed to relate such common place circumstances and events as may be of interest, giving an outline of our work during the year.

Amount of money raised by the Town,	\$2000.00
“ “ School Fund and Mill Tax,	787.57

AGENTS.

The agents chosen by the several districts have performed their duties as required, and well, unless it be in some cases in the selection of teachers or a too frequent change. Some agents fail to secure the best teachers to be had for the place and money. None claim such knowledge as would fit them to select the best teachers and, while doing their best, often make mistakes. Again, the circumstances attending the election of some to office sometimes produces discord in the district. In such a case the best teacher fails to give satisfaction. The agent employs. The Committee or Supervisor is held responsible by law and public sentiment for the success of the school. The power and responsibility are separated. Would such a separation prove successful in a business point of view ? Let that man be school agent who can and will give all the

time needed to meet the wants of the district, then let him be sustained by every citizen of the district and there will be less school money wasted.

DISTRICTS.

Former Supervisors have recommended that the smaller districts be united with the larger ones next adjoining them. The advice has not been heeded and for many reasons it seems to me would not be the best thing to do. There has been no great difference in the length of the schools. The smallest school has been taught $6\frac{1}{2}$ months by a graduate from Gorham Normal School, and the largest school has received only 7 months "schooling." One *great* need in our small schools is apparatus that the work may be more thorough. In this the larger schools excel. I am sorry to say that only four (4) districts are provided with a dictionary and five (5) with a globe. Six only have maps of any kind and one has charts. A great stride in the right direction would be to supply this want. A small outlay each year would do this.

TEACHERS.

Twenty one (21) teachers have been employed the past year in our schools; 8 male, 13 female. Four (4) districts have retained the same teacher through the school year. Praise is due the majority of our teachers but when a teacher is retained only one term much time is lost in getting a start and results cannot be fairly estimated. As teachers, we little understand our calling when we suppose it to be merely a teaching of book-knowledge. Natural as well as acquired abilities, coupled with a good moral character, control of what he knows, and the ability to communicate it to others, uniform temper, patience, forbearance, decision, and firmness, tact to illustrate the studies of the school, and show the value of knowledge, to discern character, and a *love* for the profession are essential for success.

The teacher forms principles, establishes habits and moulds character. His influence is felt no less in the moral than in the mental part. The production of pure and noble characters are a greater and better work for the future than noble intellect without character. "Who can meet and sustain such responsibility." Let the teacher well consider. If the good of a school can be promoted by continuing the same teacher do not change a certainty for an uncertainty. A successful teacher should be retained as long as possible that the advancement made in one term may be continued into and through the next. If the children are receiving good instruction,—keep it. Six weeks of good school is better than any amount of poor.

SCHOLARS.

The whole number of scholars in the town is 489. The number attending school 310. Average age of scholars registered 11 years. Do not the scholars in the town of Falmouth graduate too young? Have they acquired what they should know to become men? The attendance and deportment of the scholars throughout the town during the year has been excellent. By the outline report, you may see that in some schools $\frac{1}{3}$ of all the scholars have been in attendance every half day.

PARENTS.

The whole number of visits during the year by citizens has been 331.

Our common schools, where three-fourths of the children receive all their education, can claim and ought to receive the true, unprejudiced interest of all parents having children who do or should attend the same. Comparatively few send their children away to school, then it must be our district school, such as it is or such as you can make it, that shall fit them for business or whatever positions in life awaits them. In such a country as ours where the government itself rests upon the

intelligence and integrity of the people let not a lack of the right sort of interest on the part of parents, be a hindrance to success. Let the attention of the parents be turned toward the instruction of their children, let the whole community be alive to the necessity of having better schools for the education of the youth and better supervision, parental as well as official, then good teachers will put forth their best efforts, and poor ones may seek other employment.

SUPERVISOR.

The number of visits made by me have been 58 official and 8 "neighborly calls." You are all aware of the change in school books effected by me. I herewith give my reasons for the change :

1st. To secure to our town uniformity.

2nd. To secure, without expense to the scholars, new books for their old ones. New books (issued 1881) worth at wholesale over \$300 have been exchanged for all the books in town of whatever series or edition.

3rd. To reduce the number of classes and secure better classification. Many who could hardly afford to purchase new books and "new comers," having stray books have become possessors of new books and so classified.

Greenleaf's Arithmetics have been used in some of our schools ten years. Some teachers knowing this series by heart, advocate its continuance and oppose the change. The reason is obvious. They seldom have to look into a book to assign or prepare a lesson ; and mechanical teaching results, as a rule. When the teacher is compelled to exercise his brain to solve the problems, the explanations will be with a clearer knowledge and understanding than is possible from memorization. The same is true among our older scholars. The habit of brushing lightly over lessons is noticeable in some schools. The teacher does ^{not} explain sufficiently, and the scholars fail to understand the "reason of things." More practical teaching and more system is needed. The work is broad and demands

the careful attention of every citizen. On it depends the future welfare of our town, state and nation. In criticizing, let us be just, for it is easier to pull down than build up.

Respectfully submitted,

HENRY J. MERRILL,
Supervisor of Schools.

OUTLINE REPORT BY DISTRICTS.

DISTRICT NO. 1.—SILAS SKILLIN, AGENT.

Amount of school money,	\$251 37
Whole number of scholars in the District, 49. Spring term, Alma M. Brackett, teacher. Length of school, 9 weeks. Wages of teacher including board, \$7.50, per week.	
Whole number of scholars attending school,	24
Average number,	20
Number not absent $\frac{1}{2}$ day,	1
Winter term, Alma M. Brackett, teacher. Length of school, 14 weeks. Wages of teacher, including board, \$10.00 per week.	
Whole number of scholars attending school,	34
Average number,	25
Number not absent $\frac{1}{2}$ day,	2

DISTRICT NO. 2—HENRY K. NORTON, AGENT.

Amount of school money,	\$261 63
Whole number of scholars in the District, 51. Spring term, Georgie Wells, teacher. No returns received.	
Fall term, Olive H. Merrill, teacher. Length of school, 8 weeks. Wages of teacher including board, \$9.50 per week.	
Whole number of scholars attending school,	34
Average number,	27
Number not absent $\frac{1}{2}$ day,	4

Winter term, E. H. Ramsdell, teacher. Length of school 12 weeks. Wages of teacher \$40.00 per month.

Whole number of scholars attending school,	39
Average number,	33
Number not absent $\frac{1}{2}$ day,	7

DISTRICT No. 3.—JOHN S. COLLEY, AGENT.

Amount of school money, \$328 32

Whole number of scholars in the District, 64. Spring term, Julia M. Thompson, teacher. Length of school, 8 weeks. Wages of teacher, including board, \$8.00 per week.

Whole number of scholars attending school,	39
Average number,	28
Number not absent $\frac{1}{2}$ day,	4

Fall term, Julia M. Thompson, teacher. Length of school, 8 weeks. Wages of teacher, including board, \$8.00 per week.

Whole number of scholars attending school,	40
Average number,	34
Number not absent $\frac{1}{2}$ day,	10

Winter term, D. O. Moulton, teacher. Length of school 13 weeks. Wages of teacher, including board, \$50.00 per month.

Whole number of scholars attending school,	37
Average number,	35
Number not absent $\frac{1}{2}$ day,	5

We hail the return of our respected teacher of the past and earnestly hope that his labors may be continued among us.

DISTRICT No. 4.—ARTHUR BUCKMAN, AGENT.

Amount of school money, \$204 29

Whole number of scholars in the District, 31. Spring term, Anna C. Colley, teacher. Length of school, 10 weeks. Wages of teacher, including board, \$6.00 per week.

Whole number of scholars attending school,	19
Average number,	15
Number not absent $\frac{1}{2}$ day,	2

Fall term, Anna C. Colley, teacher. Length of school 10 weeks. Wages of teacher, including board, \$6.00 per week.

Whole number of scholars attending school,	24
Average number,	20
Number not absent $\frac{1}{2}$ day,	3

Winter term, Anna C. Colley, teacher. Length of school, 10 weeks. Wages of teacher, including board, \$7.00 per week.

Whole number of scholars attending school,	18
Average number,	16
Number not absent $\frac{1}{2}$ day,	6

DISTRICT No. 5.—ALONZO KNIGHT, AGENT.

Amount of school money, \$282 15

Whole number of scholars in the district, 55. Spring term, Henry J. Merrill, teacher. Length of school, 10 weeks. Wages of teacher, including board, \$40.00 per month.

Whole number of scholars attending school,	31
Average number,	25
Number not absent $\frac{1}{2}$ day,	5

Winter term, Henry J. Merrill, teacher. Length of school, 15 weeks. Wages of teacher, including board, \$40.00 per month.

Whole number of scholars attending school,	35
Average number,	28
Number not absent $\frac{1}{2}$ day,	6

DISTRICT No. 6.—ALBERT WINSLOW, AGENT.

Amount of school money, \$179 99

Whole number of scholars in the District, 26. Summer term, Hattie Locke, teacher. Length of school, 9 weeks. Wages of teacher, including board, \$6.00 per week.
