TRANSCRIPT:

00:01

a ceremony is a marking of what has gone

00:04

behind and it's the beginning of what is

00:09

going to happen in the future and this

00:11

is the perfect time to really celebrate

00:13

and to be looking forward the darling

00:16

Marine Center is the only state

00:18

university marine lab in Maine it serves

00:20

the state of it by fulfilling the

00:22

mission of the University of Maine

00:24

through its teaching community outreach

00:26

and research that goes hand in hand with

00:29

economic development and stewardship of

00:32

much of what makes main so special the

00:35

future of our coastal communities the

00:38
darling Center has been doing all of
00:39
this for half a century successful
00:42
programs have to have a narrative it has
00:44
to be a narrative that relates locally
00:47
but can be translated up to global and
00:49
the marine program here has done an
00:52
extraordinary job with that resonating
00:54
with fishermen resonating with what's
00:56
happening out in the Gulf of Maine
00:58
understanding commerce understanding the
01:01
importance of coastal resilience and
01:02
jobs this program has that narrative
01:05
down pat we are paying attention we are
01:09
paying attention in a way that other
01:12
professionals other citizens don't
01:15
necessarily have the time or ability to
01:17
do we are paying attention to how our
01:20
environment is changing how species
01:22
within the system are changing how
01:24
people are responding to those changes
01:26
and we are uniquely positioned as a land
01:29
and sea grant institution to do that

01:32

observational work and are really

01:34

engaged in integrative fashion working

01:38

with partners in industry in local

01:40

communities and indecision for from the

01:43

very local level to the international

01:45

level

The University of Maine in Orono is the flagship campus of the University of Maine System, where efforts toward racial equity are ongoing, as is the commitment to facing a complicated and not always just institutional history. The University recognizes that it is located on Marsh Island in the homeland of the Penobscot nation, where issues of water and its territorial rights, and encroachment upon sacred sites, are ongoing. Penobscot homeland is connected to the other Wabanaki Tribal Nations — the Passamaquoddy, Maliseet, and Micmac — through kinship, alliances, and diplomacy. The university also recognizes that the Penobscot Nation and the other Wabanaki Tribal Nations are distinct, sovereign, legal and political entities with their own powers of self-governance and self-determination.
