To the Superintending School Committee and Citizens of Jackman Plantation:

I herewith submit my annual report of the condition of our schools. In comparison with many other towns and cities of the State, we have been very fortunate in being able to carry on our school work without serious interruption from influenza or other epidemics. There has of course, been some absence on this account, but not to greatly interfere with the work of the year, consequently, if we are spared a further visitation, we shall accomplish the usual amount of work without especial difficulty. In general the condition of our schools is excellent, we have an efficient corps of teachers, the discipline is good, and with the exception of a few pupils whose attendance is poor or who are lacking in interest, satisfactory progress is being made.

## HIGH SCHOOL

The spring term was held at the Station schoolhouse as during the past two years. Both the location and arrangement of the building were unsatisfactory, and it was seen by all interested in the school that its future success depended in a considerable measure on a more central and suitable location. During the summer an arrangement was made with Moose River whereby the two plantations should unite in the support of a high school to be centrally located as possible, which

should offer both the Commercial and College Preparatory courses. The joint committee was most fortunate in being able to secure the former residence of Mr. Abram Newton for the use of the school. Its location is excellent and the arrangement of rooms very convenient. Our course of study has been approved by the State Department of Education, and the school awarded a class A rating, which releases both plantations from all tuition claims, and enables graduates of the College Preparatory course to enter the University of Maine without examination. Graduates of both courses are eligible to take the State examinations for elementary teachers certificates. The present school year has thus far then been an unqualified success, and it is highly desirable the present union of the two plantations for the support of a high school be continued as in this way both plantations have the advantages of a much better school than it would be practical for either to maintain alone, on account of expense.

#### PAYSON SMITH SCHOOL

The Grammar school is in charge of Miss Clara Libby, who is a first class teacher in all respects. The room is quiet and orderly and the pupils are making good progress. At present there are four pupils in the ninth grade which should mean four freshmen for the high school next year. In the Primary room we are still fortunate enough to retain Mrs. Williams the high quality of whose work is well known to all. The children in this room are doing excellent work with the exception of those whose attendance is too erratic to make satisfactory results possible.

#### STATION SCHOOL

Several changes have taken place here. All the children have been put in charge of one teacher in the south room, the steam heating plant has been abandoned in favor of a box stove and chemical closets installed in place of the flush system to avoid freezing. The results on the whole have been pleasing. Miss Kennedy has her school well in hand, and is securing good results. The heating of the school room is more within the

bounds of possibility, and the operating expense much less than in previous years.

#### ATTENDANCE

This is still unsatisfactory; I know of no one thing more needed at present to enable us to get the full benefit of our school money than a more rigid enforcement of the truancy law. Expert teachers and the best of text books and equipment cannot greatly benefit children who are absent frequently and consequently have little interest and no connected idea of the work.

#### REPAIRS

On account of the extremely high cost of labor and materials, no important repairs have been made during the past, or are contemplated for the coming year. Experience has shown however, that from \$100.00 to \$200.00 is needed annually on this account to meet the incidental expenses of up-keep.

The following amounts are recommended for the ensuing year.

Common Schools .....	\$535.00
High School .....	600.00
Text Books .....	150.00
Insurance and Supplies .....	250.00
Repairs .....	150.00
