It haunted clerks for generations

“The first of the month” used to be a time of feverish activity for ledger clerks. But the Bell System accounting staff — broke away from tradition — simplified the keeping of accounts and rendering of monthly statements to customers.

They applied a modern system of rotation filling to the big Bell System business which now spans this work evenly throughout the month. In cooperation with manufacturers, they devised special typewriters and bookkeeping machines. Thus they did away with insufficient rush and achieved greater accuracy, speed and neatness.

This is but one example of a point of view found in the Bell System. Even long accepted routines is constantly studied — it’s always worth looking for the more efficient way!
