REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee and Citizens of Jonesport:

The time has arrived when it becomes my duty as superintendent of schools to submit the annual report of the Public Schools of this town. This being my 15th in a series of similiar reports.

It is customary in reports of this kind to summarize upon the accomplishments, needs and condition of the schools, also to supply an itemized statement of the receipts and expenditures of the various accounts. It has often been said, and I have no doubt as to the truth of the statement, that a very small percentage of the citizens read these verbal reports. For this reason and the reason that these reports add to printing costs I shall be brief.

An itemized account of the receipts and expenditures for all school purposes will be found in the report immediately following this verbal report. The school budget which appears at the end outlines in itemized form the financial needs of the schools for the fiscal year ending March 1936. This school budget is conservative, and in the opinion of the Committee, is in keeping with the times.

As time goes on we find it more and more difficult to adapt ourselves to the housing conditions that are available for our high school pupils. The necessity of having to pass from one building to another for classes is very unsatisfactory. It is detrimental to the health and comfort of the pupils. It gives rise to much lost time. Proper teacher control is made exceedingly difficult. The general tone of the school is weakened. School spirit is at a low ebb. Again, under present housing conditions it is impossible to provide for the social activities which are so essential to the well-being of pupils of high school age. It has been said, and truly so I believe, that the real function of our schools is to teach our young people as future citizens to adapt themselves to the very complex economic and social conditions of

the present and the ever changing conditions of the future. The general tone of a high school is dependent in a large measure upon the physical conditions or surroundings. The classes should be conducted under one roof. Space should be provided for the social activities, athletics and the like. Our present housing accommodations render these activities impossible. In consequences of this fact the enrollment of the high school has been greatly reduced. Under more favorable housing conditions we should have 150 pupils whereas we now have about half this number.

Some consideration has been given to the possibility of building a new high school building. Our greatest obstacle has been a lack of funds. Through the efforts of our senator, Homer Worcester, a bill has been introduced in the legislature which, if enacted would set up a school district which would enable the town to build in cooperation with the federal government a modern school building such as would provide for all the activities usually associated with the modern high school.

So far as I can ascertain there is considerable interest on the part of the town officials and other citizens in this project. The united efforts of all is essential, if this is to materialize. I bespeak the hearty cooperation of all interested in this movement.

Bills have been introduced in the 87th Legislature concerning the recommendations of the Public School Finance Commission which has been working for over a year on the problem of a better equalized support of public education on the part of the State from other sources than property tax. These bills if enacted into law will result in increased state aid to this town of about \$6,200.00. This means relief to the property tax payers of this town, and at the same time affords an opportunity to better our educational offerings. All citizens interested in tax relief and the educational welfare of the children of this town are urged to use every legitimate effort to influence legislation which will permanently enact these bills into law. The most important of

these bills comes up for legislative hearing on March 6th and 7th. These hearings are to be held in the House of Representatives. Our senators and representatives will be glad to know how their constituents stand on these bills.

In the event that these bills become law there can be no hope that the towns will receive additional aid from the state for the fiscal year 1935-36, this additional aid would probably become available the year following.

To the teachers and other employees of the schools I wish to take this opportunity to express my gratitude and appreciation for their loyalty and devotion to duty during the past year.

Also, I wish to thank the members of the school committee for their counsel, cooperation and support.

To the citizenry through whose efforts this education is made possible, and through whose steadfast determination it is to be maintained, I express my sincere appreciation.

Respectfully submitted,

RALPH L. BROWN,

Superintendent of Schools.
