**Huskies Surprise Maine With Power in Dashes To Win 67-50 Decision**

Smith Sets Record In Winning 1000 Yard Run

LEGEND WINS

Miles Scores 18 Points For Northeasterns in Triumph

By W. W. Winslow

Northeastern University hand- ed its second Manufacturers'測試, 3-2 last Saturday when their aggregates thumped back the Pole in weight at 3-2. The Huskies had plenty of men who could crack the races, and a place behind their masters, and they were an equal match for the best of the opponents who were breathing ways by scoring the old record 3-2, and Smidt very nearly had the win. He gave a very good account of himself in the basement of the Maine track.

CORRESPONDENCE

Looney Ludlow

One very good reason why the United States is not prepared for complete democracy has been compassed by the recent events in Germany. The first of these events is the passing of the Ludlow amendment, which is a proposal to amend the Constitution. This amendment, if passed, would have the effect of limiting the right of the people of the United States to meet together and to petition for redress of grievances. The second event is the departure of President Roosevelt, who has been a leader in the movement for democracy in this country. The third event is the election of Mr. Hoover, who is known to be a conservative. These events show that the United States is not yet ready for complete democracy.

CAMPUS CHATTER

By Minzy

With concomitant backing their ideas with sound reasoning and a solid foundation of facts, Miss Minzy has succeeded in impressing upon the minds of the students the importance of thorough education. The primary purpose of education, in her opinion, is the development of character and the preparation of the individual for life. She is of the opinion that the educational system of the country is inadequate and that it must be reformed in order to meet the needs of the times.

BY THE COLONEL

During the last few months the German government has been planning a new military program. This program, which is known as the "New Order in Europe," is being planned for the purpose of establishing a new world order. The new order is to be based on the principle of "might makes right." The German government is planning to use this new military program to conquer and control the entire world. The United States is not prepared for this new world order and must take action to prevent it.

Factory in a Meadow

A cozy small Ford plants dot the fields and meadows within fifty miles of Dearborn. We call them the “village industries.” Their windows are bright in the sun, and their wheels turn to the harmonized energy of once lazy streams.

Many of their workers are farmers who lease farm machinery. After harvest and before green-up, these farmer-workers park their cars in neat rows beside the plants. Inside, with the newest, most modern machines, they build Ford parts.

With the money earned, they buy that fertile forty just east of the pasture lot—families go to school—houses grow wings—hills are filled with provender and sheds with backing machinery.

These Ford families have one foot on the land and one in industry.
