M Club Has Interesting History Since Organization

List of Officers and Members for
This Year

One of the real live wire organizations at Maine is the "M" Club. Membership in this club is considered one of the greatest honors attainable on the campus. When a man wins his "M" in one of the varsity sports, he automatically becomes a member. Meetings are held every month at the various fraternity houses on the campus. These meetings are always preceded by a supper, and needless to say, all of the members are individual stars in this indoor sport.

The "M" Club was formed in November, 1910, at a meeting of the wearers of the "M", called by the Director of Athletics, Edgar R. Wingard. The former foot ball star and afterwards first president was Professor Bean, professor in civil engineering. Among the charter members was "Marty" Mc Hale, at that time a star hurler on "Marty" has appeared in the uniform of the New York "Yankees" and Boston "Red Sox".

The "M" Club has continued since its organization in 1910. At these monthly meetings, the men meet and become better acquainted. The main objects of this club are to promote athletics and advance Maine spirit. If the student body is not showing enough "pep," the "M" Club soon calls for a rally and the necessary "pep" is quickly instilled. If the track is not in proper shape, a committee is quickly appointed to investigate the matter; results usually follow. If the members are not satisfied with an athletic schedule, the manager and athletic authorities soon hear about it. The club is often consulted concerning proposed plans, and its opinion usually carries considerable weight.

An old custom of the "M" Club, previous to the war, was to stage a show on the eve of the Maine Inter-scholastic Track Meet for the entertainment of the prep school men. This was always a great success and will undoubtedly be revived this year. Every year, the "M" Club conducts a poverty ball which is one of the most popular dances of the year. Old clothes are strictly in order at this affair, and every one has a good time. Other activities of the "M" Club in the past are too numerous to mention.

(Continued on page 4)

Prof. Daggett with Francis X. Bushman

Company Now Playing in the
West

Since last June former Prof. Windsor P. Daggett has been a member of the official staff of Mr. Francis X. Bushman and Beverly Bayne. The co-stars are now on tour in Oliver Morosco's production of "The Master Thief," and Mr. Daggett, as traveling secretary to Mr. Bushman, is with the company. He is also understudy for three members of the cast. The Bushman company recently played two weeks in San Francisco and is now working toward the East.

In Salt Lake City Mr. Daggett made several calls on Dr. George Emory Fellows, former president of Maine, now professor of history and economics at the University of Utah. Dr. Fellows' affection for the state of Maine and for the university is evident, and he was interested to know the progress of the U. of M. in recent years and the success of former students and faculty members of his acquaintance. Dr. and Mrs. Fellows look forward to visiting their summer home in Ellsworth the coming season.

Of the universities he has visited, Mr. Daggett writes that the location of Utah and the architecture of Leland Stanford Jr. are things to be remembered. He was also impressed by the Greek Theatre at the University of California.

Blue Relay Team Meets Tufts Aggregation at Boston Saturday

Cold Weather has Somewhat Hampered Practice---Coach Rider Pleased With Finals---Maine Alumni will Have Cheering Section of 50 Men Led by Joe McKusker--- Rally for Team to be Held Thursday Night

PEN SKETCHES OF BLUE SPEEDSTERS

The relay team has been greatly handicapped in training for the dual meet with Tufts at the B. A. A. Meet by the prevailing cold weather of the past few weeks. Coach Rider has been putting the squad thru their paces every day since the Christmas recesses, and from all indications the squad is in the pink of condition.

The boys are not excessively optimistic over the coming race with Tufts. They realize fully that they are up against a team worthy of their mettle. However, if fight and grit have anything to do with winning relay races, Maine is going to come thru because every man on the squad is a fighter. "Crab" Smith, Tufts Coach, has corralled an army of Boston prep school stars. They are speedy, experienced men, with high school reputations. If Maine wins this race, she will deserve a great deal of credit. If the Blue team is defeated, Maine men and women need not be ashamed of it.

The team will not be chosen until shortly before the men leave for Boston. Competition is exceedingly close. Coach Rider has been conducting a

number of time trials. The times have been kept secret, but are said to compare favorably with those of previous teams. In all probability, Pratt and MacBride will be members of the team. From the squad of candidates, five men will be chosen to make the trip, four of whom will run. According to the old custom, the men chosen will elect their captain before leaving for Boston. "Hep" Pratt and "Mac" MacBride seem to be the most logical candidates for the captaincy.

In addition to the five men chosen, Coach Rider and Manager Foley will make the trip. While in Boston, the party will stop at the Copley Square Hotel.

Our team will be supported by organized cheering. The Maine alumni of Boston and vicinity will have a section of about 50 men. "Joe" McKusker, the former Maine cheer leader, will have charge of this part of the program. Hats off to the Boston alumni!

Any of the undergraduates who can possibly do so should make the trip. The meet promises to be one of the biggest ever held. In addition to a

large number of college relay races, there will be a list of open events in which amateur stars from all parts of the country will compete. The Hunter mile promises to be the big event of the evening as usual. The best distance men in the country will be seen in this classic. The meet will be held in the Mechanics Building, Saturday evening, February 7, at 7.15.

A snappy rally will be held Thursday evening in the chapel to give the squad a send-off. These men have been working hard in zero weather. No one has been out to cheer them or encourage them. If you pretend to have a drop of Maine blood in your veins, you will be at that rally Thursday night at seven o'clock. Win or lose, you may rest assured that this team will give their best for Maine. Immediately after the race, Manager "Mike" Foley will telegraph the result to Orono. If Maine wins, make as much noise as you did last year when we trined Bowdoin. Remember that rally Thursday night, and make it so snappy that those men will remember it Saturday night when they warm up on the track at Boston.

Musical Clubs Promised A Very Successful Trip

Manager Armstrong has Arranged a Schedule Including New York City and Points in Massachusetts

Don't fail to hear the University Musical Clubs this season. They're good. That they're on the job is evidenced by the fact that before Christmas they had completed their training and given five public concerts. We believe they made the earliest appearance of any college musical organization. For good college man "pep" and excellent singing they're perhaps—modestly speaking—the best ever. The classical nature of past programs has been sacrificed and this year up-to-date music will be offered.

George Renwick '23, a first tenor soloist and reader of Scotch dialects is one of the drawing cards. He has an unusually sweet voice. O. C. Osborne '23, basso profundo, a clever quartet, saxophone soloist, an unstrung sextette and the Yiddish song and dance troupe which scored a tremendous hit in the recent undergraduate Minstrel show, are the attractions in addition to the offerings of the glee, mandolin and banjo clubs.

Business Manager Paul Armstrong '21 has arranged the following schedule of public concerts:

- Bangor, Me., March 16
- Lewiston, Me., March 18
- Portland, Me., March 20
- Winthrop, Me., March 19
- Biddeford, Me., March 21
- Beverly, Mass., March 22
- Lynn, Mass., March 23
- Malden, Mass., March 24
- Boston, Mass., March 25
- New Bedford, Mass., March 26
- New York City, March 27
- Stamford, Conn., March 29
- New Haven, Conn., March 30

Summer School to Be Resumed This Year

By a recent action of the Board of Trustees the summer session of the state University, which has been discontinued for two years on account of war conditions, will be resumed the coming summer. The term will begin June 28 and continue for six weeks.

The summer term is designed primarily to meet the needs of secondary school teachers in the State of Maine. It affords teachers an opportunity to review the subjects which they have already studied in college and to register for more advanced work in such subjects. Courses will be offered in English, French, German, Spanish, Mathematics, Physics, Chemistry, History, Economics and Education. Other departments will offer courses if there is sufficient demand for them.

The State Department of Education will cooperate with the summer term and members of the department will give lectures upon subjects particularly connected with the School Law of the State. In the Department of Education courses relating to the junior high school management will be offered.

The expenses to the students for board and tuition will be reduced to a minimum and the material equipment of the university will be placed at their disposal. It is believed that no summer school in America has a more favorable location.

J. STITT WILSON GIVES FIRST ADDRESS FEB. 11

At the University of Maine Hon. J. Stitt Wilson will give his four addresses in the following order:

- Feb. 11th (at 11 a. m.)—The War and Democracy.
- Feb. 11th (at 6.30 p. m.)—The Very Soul of Democracy.
- Feb. 12th (at 6.30 p. m.)—The Master Virtue of Democracy.
- Feb. 13th (at 6.30 p. m.)—The Immediate Objective of Democracy.
- Feb. 14th (at 6.30 p. m.)—The Creators and Preservers of Democracy.

Department of Horticulture Includes Allied Sciences

Details of a Formal Garden
Given

The department of Horticulture at the University of Maine deals with fruits, flowers, and vegetables. In some institutes there are separate departments of Pomology, Floriculture and Olericulture, but at Maine these names apply only to subjects included in the department of Horticulture. The study of methods of handling various fruits and flowers, and the plants which produce them, is one that differs radically from studies in direct science or courses in art.

Perhaps the most interesting facts for the student body and members of

(Continued on page 4)

Bowdoin Musical Clubs Play in Bangor Friday

The musical clubs of Bowdoin College are to give a concert in Bangor at the City Hall on Friday, February 6. The clubs have recently returned from a trip to New York where they played in the Waldorf-Astoria Hotel under the auspices of the Bowdoin Alumni club of New York and the State of Maine Club of that city. It was the first time in nine years that the college has sent its club outside of New England.

1921 PRISM NOTICE

Juniors must have their pictures, writeups, and \$2.00 assessment in by Saturday, Feb. 7 in order to insure publication.

Arthur L. Deering to Be Director of County Agents

Has Been Engaged in Agricultural Lines Since Graduation

Arthur L. Deering, county agent of Kennebec and executive field agent of the Kennebec Farm Bureaus, which leads all the other counties in membership, is to be director of agricultural county agents and farm bureaus, in connection with the University of Maine extension service.

A recommendation of his appointment was forwarded Wednesday by Dean Merrill to the United States Department of Agriculture and there is every reason to believe that a commission will very shortly be issued.

ATTENTION MR. MAINE MAN

It should not be necessary to urge a single student of the University of Maine to buy a Blanket Tax. Surely there is no one who will deny the need of supporting Maine athletics financially. The financial report of the Athletic Association published in our last issue should convince the most skeptical that the money from a 100% sale of Blanket Taxes is no more than enough to carry on a semester's athletics. But, we are only human, some of us, and we say that we will buy a Blanket Tax later, possibly when the spring athletic season opens. You may think that you have the right idea when you ease your conscience in this way. But have you ever stopped to think what this procrastination (delay) really means. In the first place, the Athletic Association cannot plan a good athletic season on promises and hot air; but, if they have a goodly percentage of Blanket Taxes paid in at the beginning of the semester, they can lay the plans for a good schedule of games and meets with the assurance of a solid financial backing. Secondly, you are not a member of the Athletic Association until your Blanket Tax is paid and you have no right to vote at its elections. Thirdly, your name is not placed on the subscription list of the Campus until you buy the "blue ticket" and you are out of touch with University affairs.

You Maine man or woman who plans to wait a while before buying that Blanket Tax separate \$5.50 from your roll *Now and Put Your Name on That "Blue Ticket."* Buy That Blanket Tax Now.

NEWS

Send in more news,
You men galore;
Send in more news,
We do implore.

Send in more news,
All secretaries;
Send in more news,
We need it badly.

Send in more news,
Each live reporter;
Send in more news,
To fill the paper.

Send in more news,
Each week to us;
Send in more news,
Enlarge the CAMPUS.

Yes, more news is needed. It is an easy enough job to fill the paper full of print but what is wanted is more representative news columns. Every week there are a number of meetings, dances, alumni notes, campus notes, and so forth that escape the attention of the editors and reporters. Let us all try to help and make the paper a representative sheet.

PLUGGING FOR FINALS

Finals are over and we are starting the last semester of the year. Finals are over, but were they over successfully? Did you have to "pulg" for that history or economics or mathematics or did you do your daily work as it came along and just have to brush up to meet that final face to face?

We all know what it means to plug for a final and taking the chance that we shall get this question or that question right. We might "hit it" for a B, or as is most always the case, for an E or an F. But if we do get a B, what does it count us? Mathematically, it counts us 3 when figuring for the dean's list; and in appearance—how good that B looks on the rank card!

But that is as far as a lucky mark does go. Do you know a B's worth of the history or the economics or the mathematics? Do you feel justified in saying that you got all that you could out of the course? Can you learn all that there is to learn about a subject in a few hours of concentration?

The answers to these questions are obvious. You can get all that is possible out of a course only in one way. Study daily throughout the semester and do not let a day pass without acquiring all that you can about the subject. For, remember, the ranks are not of paramount importance; it is what you know that really counts in your preparation for your life work.

Let us all try to make each day count. When we lie in "ram pasture" or that "bunk room" each night, let us feel that tomorrow's work will be an addition and not a subtraction. And when finals come again, we shall need only a brief review to refresh that which we already know, and that B will then represent honest persistent endeavor to learn and to know.

ROMANCE IN INDUSTRY

Sensing a reality in the romantic or human interest side of present day industry, Charles M. Ripley of the General Electric Company, has written a book entitled, "Romance of a Great Factory." In it he has pictured the curious, spectacular and awe-inspiring aspects of the achievements and life in a big industrial plant and describes the sights and sounds of the shop and its men, which he terms "a great industrial orchestra."

In an introduction, Dr. Charles P. Steinmetz, states that writers too often fail to see the wonders of our day. "In the modern factory," says Dr. Steinmetz, "there is far more romance and poetry than there has ever been in the history of the past, but we must be living with it to see and understand it. That is, we must be living with the men of our century and not sheltered in the dust of past ages."

Electrical and compressed air coal-cutting machines are shortly to be introduced into some of the coal mines of England, according to recent reports.

Distinguished English College Women Visit this Country

To Try to Organize College Women Thruout the World

College women throughout the country, graduates and undergraduates, cannot fail to take keen interest in the visit to the United States at this time, of the three distinguished British university women: Prof. Caroline F. E. Spurgeon, Dr. Winifred Cullis and Mrs. Ida Smedley MacLean. Besides being representatives of a university training whose standards we in America are growing more and more to admire, Miss Spurgeon, Dr. Cullis and Mrs. MacLean are here to promote a plan for the uniting of college women around the globe in a vast federation of college women the world over having a feeling of solidarity. A movement based on their sense of common understanding and purpose cannot fail to make a strong appeal.

The federation, moreover, is backed by many of the leading educators in America, including President Mary E. Woolley of Mount Holyoke, Acting President Helen Taft of Bryn Mawr, Dean Virginia Gildersleeve of Barnard, President William A. Neilson of Smith, and others.

The proposed federation is no unsubstantial dream. A tentative constitution has already been drafted, the provisions of which are definite and detailed. The purpose of the federation, as stated in the draft, "shall be to promote understanding and friendship between the university women of different nations and thereby further their interests and develop sympathy and mutual helpfulness between the peoples of the world." Membership in the federation "shall be open to national federations of university women which are approved by the Council," the central executive committee of the federation. Provisions are made for a president, executive secretary and councilors, for central offices and expenses.

It is when we come to the means by which the purpose of the federation is to be carried out, that college women will be chiefly interested, for the means are almost entirely educational. Provisions are to be made so that through the agency of the federation, college or university students may be interchanged among the countries represented in the union. The Rhodes scholarships have already familiarized us with something like this arrangement, but the Rhodes scholarships are awarded only to graduate students and do not involve any interchange between the countries concerned. Under the plans of the proposed federation, Polish students in economics may come to Columbia University for additional courses; American students of architecture may finish their preparation at the Sorbonne; Spanish students of history may study for their theses at Cambridge, and so on indefinitely, thru all the permutations and combinations. And undergraduates, as well as graduates, may benefit by these provisions.

Interchange of students will mean much in promoting "understanding and friendships between the university women of different nations" but the most direct method of ensuring mutual understanding is at the fountain-head, through the teaching force of a nation. The proposed federation provides for an interchange of professors and junior lecturers. The larger men's universities in the East have already tried this experiment but the exchange has not been general. The proposed federation will make an interchange of the teaching force of nations universal, with a consequent effect on the understanding between countries which will be readily recognized as incalculable and which deserves a chapter in itself.

ELECTRIC TRACTION POPULAR IN BELGIUM

Why Belgians want electric traction is brought out in a recent issue of Electrical World. The Belgian government has decided to start electrifying its railroads, beginning with the line from Brussels to Antwerp. Economically, steam lines are cheaper to operate than electric, and the installation costs are lower; but these are counterbalanced by the possibility of running increased freight and passenger service by electric methods.

Leap Year Ball to be Feature on Friday the 13th

A Leap Year Ball—and on "Friday the thirteenth." How does this sound? It is bound to be the most novel and the liveliest time ever, because it is being handled by the co-eds. The committee, of which Miss Minerva French is chairman, is selling the tickets to the co-eds who are issuing the invitations. This gives them the distinct advantage of selecting the right man. Much concern is being shown by the male contingent of the University as to who the favored ones will be. May they all be favored.

The Track Club and "M" Club are two of the most influential organizations on the campus. The object of the Track Club is to aid and to foster track athletics. The organization contains representatives from every fraternity and honorary organization, and from the "M" Club. The Track Club is making a remarkable showing this year. Cross-country, track, and relay are aided in every possible way by the Track Club, which, in turn, should be aided by the students of the University. The co-eds deserve much credit for their energy in managing the Ball.

Boys, if some one proposes to you that you go to Alumni Hall, Friday, February 13th, don't forget that it is leap year; and girls, don't miss this opportunity.

"M" Club Vaudeville Plans Develop

All roads will lead to Alumni Hall, Friday evening, February 23, for one of the biggest surprises of the year. The "M" Club is staging a big vaudeville production which will be followed by a dance.

The committee is sparing no efforts to make this the banner affair of the season. Already some clever acts have been booked. The program will consist of nine acts of the highest type. They will constitute nine rounds of joy, frolic, and music galore. It will be the best show ever seen in this section of the State, without a doubt. In addition to this unusual vaudeville bill, an innovation to programs of this kind by securing the feature film *Americano* in which "Dug" Fairbanks, a most popular hero of the "shifties," thrills his audience.

The curtain will go up at 7:00 o'clock sharp, and from then until the final fall of the curtain, there will be action every minute. This show is highly flavored with the essence of ginger. Immediately following the exit march every one will adjourn to the gym for an order of twelve dances. The dance music will be rendered by a very clever group of musicians. They are all selected men and it is guaranteed that this music will be without peer.

Through an error in the Campus last week, the price was quoted as being fifteen cents, and in view of the fact that the management is undergoing heavy expense to secure this feature film and the high class acts and music, the price will be fifty cents per couple. This will include the performance and dance.

Don't forget the date, Friday, February 23. Tickets will be on sale the last of the week, and if you are one of the wise birds, you will secure yours early. Tickets may be obtained from any of the committee.

Watch these columns for further announcements, as well as the bulletin boards.

Electricity is being widely used in clearing the North Sea of mines. Many of the mines are sunk very deep and have antennae which, when touched, cause the mine to explode. Special electric cables several hundred yards long are being used to explode these mines at a safe distance from the boat.

The Norwegian Fishery Administration is considering using electrically propelled boats in its fishing fleet. A considerable sum has been allotted for conducting research along these lines.

The M. C. A. presents
"DOMBEY AND SON"
Dickens' famous novel
dramatized in fine style
at 6.30 p. m.
Thursday, Feb. 5th

It Is Said

THAT the "M" Club is going to put on a movie and vaudeville show that will put most theatres to shame—at least the Bijou, anyway.

THAT the relay team is going to make "Crab" Smith's speedsters hit the boards at a pretty good rate.

THAT the Campus Board wishes to express thanks to Sidney Osborne '23 for the relay cartoon that appears in this issue.

THAT the Round Table should begin a series of afternoon dances similar to the one they held last year.

THAT Dean Hart has been swamped this week with numberless excuses of numberless variety.

THAT the freshman banquet and the Sophomore Hop will create a lively week-end for the two lower classes. We wonder who will take a trip this year.

THAT the Orono Theatre is not only presenting an excellent brand of motion pictures but is showing the right spirit in using the Campus as a means of reaching the student body. Patronize our advertisers.

THAT delay is dangerous. BUY THAT BLANKET TAX NOW.

THAT a real rally will be held Thursday night to send off our relay team to the B. A. A. Games. Make it a point to be present.

THAT the Maine movies to be shown next Tuesday night will be well worth your patronage. A five reel feature will be shown also. All for \$15.

THAT if the series of Maine events shown pictorially next Tuesday are a financial success a bigger and better series will be taken this year.

THAT a meeting of the Bowdoin Club of Portland held January 15, Coach John Magee of Bowdoin stated that although Bowdoin could win the proposed indoor track meet he had rather save his men until spring when, according to his predictions, Bowdoin will win again.

It takes a good man to be a track coach and a "prophet" all in one.

THAT "Jawn" and Portland sporting scribes are not on good terms.

Alumni Notes

Hamlin Robbins has recently completed his Agricultural Course, and has gone to South Portland where he will be employed by "Shorty" Peabody '15 at Sagadahoc Farm.

P. W. Monohon '14 has accepted a position as director of vocational education, in the state department of education at Augusta. While serving in that capacity, he will be in charge of high school courses in agriculture, home economics, manual training, vocational trades, evening classes and Americanization work among foreigners in all the high schools of the state.

Fred Robie '15 has resigned his position as orchard specialist with the Agricultural Extension Department of Washington state and has taken over the management of the home farm at Gorham, Maine.

H. Styles Bridges, school course '17, has accepted the position as County Agent in Hancock County. He will assume duties March 1. He will succeed George N. Worden '13.

At a recent meeting of the stockholders of the Pearl and Dennett Company of Bangor, John H. Magee was elected vice-president. He is probably the youngest executive of a corporation in the state.

He is a graduate of Bangor High School and the University of Maine. While a student here he was a member of the Kappa Sigma fraternity and the honorary journalistic fraternity, Sigma Delta Chi.

(Continued from Page One)
Arthur L. Deering to be Director of County Agents

Mr. Deering, who is to succeed Paul W. Monohon, recently appointed to the new office of director of vocational education in Maine, is a native of Denmark in Oxford county. He was reared on a farm. Following his graduation from Bridgton academy, he went to Massachusetts and was employed by D. Whiting & Co., milk contractors. Afterward he was employed on a large dairy farm in southern Massachusetts. With his savings there and by partially working his way through he was enabled to take a four years' course in agriculture at the University of Maine.

In his junior year he was summer herdsman of the college farm, and during his senior year was assistant instructor in dairying. He was prominent in track athletics, president of the Agricultural club, first manager of the Agricultural college paper and a member of the college stock-judging team. He was a member of the Phi Kappa Phi fraternity and of the Alpha Zeta, an honorary agricultural fraternity.

Following his graduation from college he taught agriculture in Hartland Academy and then, seven years ago, was appointed agricultural extension agent in Kennebec county, where he has been exceedingly successful.

He will remove with his family from Augusta to Orono.

LOST

Lost—A small Waterman fountain pen with a gold band. A black ribbon was attached to the ring on the top. Lost between Estabrooke Hall and Mt. Vernon House. Finder please leave at Mt. Vernon House.

Junior Masks to Give Benefit Movie

In order to raise funds for the trophy cups that they are to present to the winning fraternities of the coming Inter-fraternity Track Meet, the Junior Masks will conduct a benefit moving picture entertainment in Alumni Hall on Saturday night, February 7th.

The newly released production of Frank Keenan "Brothers Divided" in which the actions of Tome, the convict being just to the other fellow, proves to be a romantic and exciting adventure which anyone will follow with almost breathless interest down to the last detail of cleaning up the town.

An admission charge of ten cents, plus one cent war tax, will be asked and every student of the university is urged, not only to come and see a mighty fine picture for a mighty low price, but to contribute towards the purchasing of two handsome trophy cups for the approaching Inter-fraternity Track Meet.

Electric plows are being tried out in Italy, and the trials have proved so satisfactory that it is probable electric plowing will become widely used. The cost has been shown to be less than one-third of the cost of the ordinary tractor work, and the fact that most of the fields are small and comparatively flat, and that the necessary power is available in practically every section of the country, makes Italy especially suitable for the experiment.

Alumni Association to Present Maine Movie

On the evening of February 10th the University of Maine Alumni Association, thru its secretary W. D. Towner, will show in Alumni Hall the moving picture films that were taken at the 1919 Commencement, the championship Maine-Bowdoin game of last fall, the victory of the U. of M. Cross-Country team over Brown University, and the exciting "bag-scrap" between the class of 1922 and class of 1923. About fifteen hundred feet of pictures were taken of the above events and have been since worked up into two snappy reels showing life at this university.

Any student who was not here at the Alumni Class Day Frolics of last Commencement won't want to miss the greatest circus ever, to see Professor A. L. Grover win the two mile race on a bicycle is but one incident. Come see the Verdun Bearcat in action and the wonderful tight-rope walker! "To see yourself as others see" you watch your own actions in the famous bag-scrap. To watch the end runs made by Capt. Stewart and Don Coady in the picture of the Maine-Bowdoin game will bring you to your feet cheering.

In addition to the above reels, there will be shown "Let Katy Do It," an extremely attractive comedy of sunny humor in which there is something doing every minute as Jane Gray and Tully Marshall take the leading parts.

As usual the entertainment will begin at 6.30 p. m. and in order to help defray part of the expense of producing the University of Maine film a charge of fifteen cents will be made by the Alumni Association. Here is a chance for a seven reel program for \$15 so let every U. of M. student remember the date, February 10th, Tuesday, at 6.30 p. m.

Generator room of one of the hydro-electric plants which supply power to the C. M. & St. P.

The Power of Electricity in Transportation

ELECTRICITY has leveled out the Continental Divide. The steam locomotive, marvelous as it is after a century of development, cannot meet all of the present demands for transportation facilities. Its electric rival has proved to be far superior.

On the mountain divisions of the Chicago, Milwaukee & St. Paul Railway—the world's greatest electrification—giant electric locomotives today lift an ever increasing freight tonnage over the mile-high Rockies and also make traveling clean and comfortable. They utilize the abundant energy of distant waterfalls and then, by returning some of this power to the trolley, safely brake the trains on descending grades. And their capabilities are not impaired by excessively cold weather when the steam engine is frozen and helpless.

Electricity is the power which drives the trains of New York City's subway and elevated systems. It operates the locks and tows the ships through the Panama Canal. It propels the Navy's latest super-dreadnaught, the *New Mexico*. Electric mine locomotives have replaced the slow-moving mule and the electric automobile has also come to do an important service. Such achievements were made possible by the extensive research and manufacturing activities of the General Electric Company.

Electricity has become the universal motive power. It has contributed efficiency and comfort to every form of transportation service and in this evolution General Electric apparatus has played a large part—from mighty electric locomotives to the tiny lamp for the automobile.

WHAT man doesn't like his pipe? There's nothing whets your smoke desires like seeing a good pipe lying around. Because you know that in it is the only real smoke satisfaction. Your appetite will be doubly whetted if it is a WDC, because in WDC Pipes all the sweetness and mellowness of the genuine French briar is brought out by our own special seasoning process. Then, too, WDC Pipes are good to look at. The designs are pleasing and workmanship perfect. You'll agree with us that our craftsmen are accomplishing their purpose—to make pipes that are without peers in all the world. Ask any good dealer. Be sure and look for the Triangle trademark. It's a guarantee against cracking or burning through.

University of Maine

The State University Maintained by the State and General Government

COLLEGE OF ARTS AND SCIENCES—Major subjects in Biology, Chemistry, Economics and Sociology, Education, English, German, Greek and Classical Archeology, History, Latin, Mathematics, and Astronomy, Philosophy, Physics, and Romance Languages. Special provisions for graduates of normal schools.
COLLEGE OF AGRICULTURE—Curricula in Agronomy, Animal Husbandry, Biology, Dairy Husbandry, Forestry, Home Economics, Horticulture, Poultry Husbandry, and for Teachers of Agriculture, Two years' course in Home Economics for Teachers. School Course in Agriculture (two years). Short winter courses. Farmers' Week. Correspondence and lecture courses. Demonstration work.
COLLEGE OF TECHNOLOGY—Curricula in Chemical Engineering, Chemistry, Civil Engineering, Electrical Engineering, Mechanical Engineering and Pharmacy.
COLLEGE OF LAW—Three years' course preparing for admission to the bar.
MAINE AGRICULTURAL EXPERIMENT STATION—Offices and principal laboratories in Orono; Experiment Farms in Monmouth and Presque Isle.
GRADUATE COURSES leading to the Master's degree are offered by the various colleges.
SUMMER TERM of six weeks (graduate and undergraduate credit).
For catalogue and circulars, address
ROBERT J. ALEY, President

"M" Club has Interesting History Since Organization

It is an organization of men united by the common bond—the "M".
At the present time, there are forty-three members. Officers are elected every spring for a period of one year. The following are the present officers: President, "Jack" Green '20; Vice-President, "Squirt" Lingley '20; Secretary, "Johnny" Sargent '22; Treasurer, "Dan" Bussell '20.
The following is the list of members: Baseball: "Johnny" Walker '20, "Jess" Willard '20, "Burl" Waterman '20, "Tim" Lawry '21, "Dan" Bussell '20, Manager, "Red" DeRocher '21, "Brig" Young '21, "Coach" Wood '21, "Harry" Watson '20, "Wat" Small '21, "Jack" Barron '21, "Johnny" Sargent '22, "Johnny" Johnson '22.
Football: "Stubby" Furey '20, "Jack" Green '20, "Verne" Beverly '20, "Don" Coady '21, "Cy" Stewart '20, "Fat" Lunge '23, "Ray" Smith '21, "Pat" Hussey '22, "Milo" Ham '20, manager, "Georgie" Ginsberg '21, "Sam" Jones '20, "Hi" Green '22, "Joe" Quinn '22, "Runt" Purinton '22, "Jack" Neavling '23, "Bill" Harvey '23, "Fat" Smith '23, "Doc" Courtney '21.
Track, Relay, and Cross-country: "Skin" Sewell '21, "Hep" Pratt '21, "Roger" Castle '21, "Pete" Preti '20, "Bob" Herrick '22, "Johnny" Barnard '22, "Squirt" Lingley '20, manager, "Midget" Raymond '23, "Jim" Philbrook '23, "Mike" Foley, '21, manager, "New" Emery '20.
Those who have received their letter in two sports are: Lawry, Young, Wood, Stewart.

(Continued from Page One)
Department of Horticulture Includes Allied Sciences

the faculty are those connected with the laboratories, which are available for certain courses. Certainly, for those interested in the beautiful, for lovers of nature study, there is much to attract attention in these laboratories.
In this department the laboratories are in many ways unique for the gardens, the orchards, the greenhouses, and even the decorations about the campus walks and buildings contain many of the items which compare with

the laboratory equipment in other departments.
Formerly it was the policy of this department to produce as large quantities of vegetables, berries, cut flowers, and so forth, as the available land area and help would allow. During the past few years, however, this course of procedure has not been deemed advisable, and at the present time the properties assigned to the department of Horticulture are used primarily for class work while the surplus products all sold at prevailing market prices.
The latest addition to this group of laboratories is the formal garden situated north of the judging pavilion near the drive across the northern end of the campus. Planted in the spring of 1919, this garden is of course still only partially developed, but another season should make it one of the most interesting laboratories on the campus.
A formal garden, as the name implies, is one in which the ornamental plants, flowers, and so forth, are arranged in a symmetrical manner with respect to some geometrical design.
A garden of this kind demands a secluded spot, where its design will not form a harsh contrast with natural surroundings.
In planning for the University garden, a double purpose was kept in mind. It was to serve in an educational capacity and also as a source of pleasure to the University and its many friends.
An evergreen hedge and shrubbery surround the beds of flowers to screen in the latter and give the necessary privacy. Then come the perennial plants, with the annuals occupying the central beds. In the choice of the material it was planned to have a good variety of shrubs, perennials and annuals that are hardy in Maine, so that those interested might see a good range of ornamentals which possibly would help them in selecting plants for their home grounds.
For the course in landscape gardening, this garden gives the students something concrete with which to work and helps them in becoming familiar with decorative plants—a knowledge which is essential for a successful landscape gardener.
It is desired also to use the garden as a test or trial grounds in which other of the less common plants may

be grown and tested for their hardiness.

The Department of Horticulture welcomes visitors to this show-place, which, if nothing more, will at least prove a place of relaxation from the usual affairs of business.

RADIO BARRAGE RECEIVERS

Dr. Alexanderson, the well known wireless engineer, has developed what he calls a barrage receiver, which permits receiving stations to turn a deaf ear to all other messages except the particular one which they desire to hear. In a recent lecture Dr. Alexanderson outlined a comprehensive plan for a world-wide system of radio communication, which, he believes, will send messages at the rate of 100 words per minute.
