## **Report of Superintendent of Schools**

*To the School Committee and Citizens of the Town of Manchester:*

Herewith is submitted my report showing the work and progress of the schools in this town for the past year.

It has been our aim to retain those teachers who have been successful in our own schools, or employ those who have had Normal training, or experience in teaching, in so far as means at command would allow. Especial effort has been made to have the teaching effective, and along lines that would give the best results.

At the beginning of the school-year arrangement was made in all the schools for a regular lesson in writing every day. This has been closely followed and the pupils all over town have improved wonderfully; we feel that a decided gain has been made in this direction.

Language in our schools as in many other rural schools, as a rule, has been neglected in the past. It seems harder for pupils to make as much advancement in this study as in some others, therefore especial pains should be taken in this department that we may secure a more even balance of school-work. This year a considerable amount of new work has been done and practically all of the work previously taken up, reviewed. This places all of our pupils on a good sound basis for solid work next year.

Considerable time has been given to spelling throughout the year. We hear the business man of today asking, "what is the matter with the spelling in the schools, we can hardly hire a young man or woman who is a good speller?" Let us then earnestly strive to bring the spelling up where it should be. Hard, persistent study and drill, is the key note to success in spelling.

The interests of the younger pupils representing grades 1 to 4 have been well looked after and all the classes show good work.

Examinations have been given every term in all the schools,

and the tests show careful and painstaking work on the part of the pupil.

The sight and hearing have been tested in accordance with the directions and test cards sent from the State office. With a few exceptions, we find the childrens' sight and hearing normal. To secure accurate information along these lines requires the services of a regular examining physician.

It has been very gratifying to note the large number of visits by parents in our schools this year. This one feature speaks of a degree of success, for when parents show a personal interest by visiting the school-room the children take pride in doing their best, and the teacher also puts forth her best efforts to make the work a success.

Only a small amount of money has been expended for text-books the past year. This year it will be necessary to have an appropriation large enough to cover the cost of buying new books to replace those that are worn out and entirely unfit for use. The arithmetics and physiologies should be exchanged for new and up-to-date text-books, that will fit the requirements of rural school-work. With the allowance publishers make for exchange, the bill would not be large. These books are greatly needed to advance the best interests of our pupils.

Among the laws enacted by the legislature of 1909 were several which relate to school funds. A State tax of one and one-half mills is to be assessed annually upon all the property of the State for the support of common schools. The fund raised by this new tax will be additional to the common school fund hitherto provided. If somewhere near the usual amount be appropriated at our annual town meeting for support of schools, the school year can easily be extended to 36 weeks.

#### No. 1—LONGFELLOW SCHOOL.

The spring term of this school was instructed by Miss Emma E. Jones of Pittston. Miss Jones had taught here previously, and all were glad to have her back again. Her work was sys-

tematic and thorough, and the results all that could be desired. We fully expected to have her services for the entire year, but during the summer vacation a better position was offered her and she asked to be released from further duties here.

For the fall term we were fortunate in securing the services of Miss Lois A. Dunlap of Bowdoinham. Miss Dunlap had attended Bates College and taught twelve terms of school. Her methods of teaching were modern and progressive—her whole time was devoted to school-work and the interests of her pupils. The advancement in every study was very gratifying and the work well balanced. Owing to sickness in Miss Dunlap's family she was unable to return for the winter term, much to the regret of all connected with the school.

Miss Beulah S. Pince of Orr's Island was hired for the winter term. Miss Prince is a graduate of Hebron Academy with eleven terms of experience. She is an energetic teacher with excellent methods, and her work has been good.

The record of attendance is as follows: Spring term: Whole number of pupils registered, 28; average attendance, 25; six pupils not absent for the term. Number of visits by citizens, 20.

Fall term: Whole number of pupils registered, 30; average attendance, 24; ten pupils not absent for the term. Number of visits by citizens, 12.

Winter term: Whole number of pupils registered, 30; average attendance, 27; nine pupils not absent for the term. Number of visits by citizens, 25.

#### No. 2—McKINLEY SCHOOL.

Miss Florence A. McKenney of Augusta taught the spring term. That this was her sixth consecutive term in this school is sufficient proof that her work was satisfactory. Estimable in character, her influence over her pupils was always for good. Miss McKenney was offered a larger school and better pay elsewhere, therefore decided not to return for the fall term,

The fall and winter terms of this school were under the direction of Miss Dorothy L. Burgess of this town. With more experience she will undoubtedly become a very successful teacher.

The record of attendance is as follows:—Spring term: Whole number of pupils registered, 11; average attendance, 10; five pupils not absent for the term. Number of visits by citizens, 8.

Fall term: Whole number of pupils registered, 11; average attendance, 10; seven pupils not absent for the term. Number of visits by citizens, 5.

As school is still in session we are unable to report the winter term.

#### No. 4—WASHINGTON SCHOOL.

Miss Mary E. Morang of Waldoboro, a successful teacher of nine terms' experience, was secured for the spring and fall terms in this school. Miss Morang was much beloved by her pupils and worked hard for their advancement. This is the largest school in town, including all the grades from the first up to High School work. This means a large number of classes with only a few minutes to each recitation. However excellent progress was made especially in arithmetic, physiology and writing.

For the winter term in this school we were unusually fortunate in securing the services of Mr. William H. Buker of Litchfield, a senior student at Bates College, but who has had previous experience in teaching. Mr. Buker has every qualification that makes up a first-class teacher, and the work done this term is excellent in every respect, discipline equal to the best, and all connected with the school feel fully satisfied with the progress the children have made under Mr. Buker's direction.

The record of attendance is as follows:—Spring term: Whole number of pupils registered, 30; average attendance, 26; four pupils not absent for the term. Number of visits by citi-

zens, 8.

Fall term: Whole number of pupils registered, 31; average attendance, 26; one pupil not absent for the term. Number of visits by citizens, 14.

Winter term: Whole number of pupils registered, 31; average attendance, 28. Number of visits by citizens, 20.

#### No. 6—LINCOLN SCHOOL.

Miss Grace L. Fifield of this town taught the school for the entire year. We feel that this has been one of the most successful schools in town. It is always to the welfare and advancement of a school to retain a teacher who is thoroughly interested in the work. Miss Fifield's Normal training, together with her long experience, both in the graded schools of the city as well as the rural schools, places her in the front ranks as a teacher. Miss Fifield's method of work is arranged to give definite results. The progress in this school for the year is entirely satisfactory.

The record of attendance is as follows:—Spring term: Whole number of pupils registered, 22; average attendance, 20; four pupils not absent for the term. Number of visits by citizens, 21.

Fall term: Whole number of pupils registered 23; average attendance, 20; four pupils not absent for the term. Number of visits by citizens, 18.

Winter term: Whole number of pupils registered, 22; average attendance, 18; two pupils not absent for the term. Number of visits by citizens, 10.

#### GENERAL TOWN STATISTICS.

Population of Manchester, (census of 1900).....	518
Number between 5 and 21 years of age.....	132
Total enrollment in our schools .....	96
Total number of visits by citizens. ....	161

In closing my report I wish to thank the School Committee, Teachers and Citizens, for the support, interest and co-operation, I have received throughout the year.

Respectfully submitted,

BERTHA N. CROCKER.

Manchester, February 18, 1910.

## Report of School Committee

*To the Citizens of Manchester:—*

The school committee submit the following report for the past year:
