Loose Use of Letter Calls Forth Protest

Athletic Board Votes to Discourage Use of the "M" by Non-athletic Organizations

When there has come to the attention of the Athletic Board, the matter of the issuing of fifty thousand carnival stamps, the Board has been advised of certain requirements. After considerable deliberation, it was determined in the case of the Kite Team, which at many colleges has considered a minor variety sport for which a letter in some form is awarded, an "M" should be awarded where it is in the best interest of the Kite Team, as the Association as such, has decided that if a team is in a minor variety sport, it was at that time determined that the Kite Team would not under any condition partake of any of the management cares which of the Kite Team, for the time being restricting its control and set patterns to the awarding of the insignia, and further, at another date, certain other organizations were considering the possibility of having a letter in a certain character, came to the Board with similar requests, and it was decided, after considerable deliberation, that it had no authority whatever in the matter of non-athletic organizations. The matter of the awarding of insignia was present by anyone in authority, exclusive of the Athletic Board, and otherwise, the Board insisted that no one would in any manner change the present insignia of the Kite Team or any other insignia the Board may decide to and has been established by the insignia of the Kite Team.

Maine Alumni Elected To Phi Beta Kappa

All's well in the U of M, basketball at Mebo also, I have been made aware of the fact that no more freshmen energy is being seen. A number of the twenty-five men remain, however, and they are putting in some very fast practice. This year, Mr. Wilson is the center position and will probably start Friday's game. Cole is showing exceptionally well, and though he probably will not get a regular berth unless something unexpected happens, he is a very dependable substitute. The whole squad is being performed with the best of coaches, 1965, and although the first game, which is to be played with the Freshman Athletic Club next Friday night, will be a real test, the Maine men should handle the challenge. The game will be followed by Northwell and Holmes, forwards; Joestar; Berge; and Bowman, backs.

Prospects Seem Good For Varsity Basketball

The charter members of the newly formed Phi Beta Kappa Chapter are now at work on plans of organization of the local chapter, and in accordance with the regulations of the Grand Chapter of the Society, have selected the following members of the faculty of the College of Arts and Sciences, to be charter members of the local chapter.

Mr. A. M. Chryder, Dr. R. E. Deum,

Dr. J. E. Jordan, Dr. R. M. Potter.

These Foundation Members are chosen to help in the organization of the local chapter, but will not be initiated until the Chapter is formally installed. The Constitution adopted at the meeting shall be the same as that of the other Phi Beta Kappa Chapters in the State.

Each section of the University will be the scene of an enjoyable holiday. A very unique novelty dance was one of the surprises of the evening. The members of the Senior Class Nominating Committee are selected to be the new members of the Faculty of Arts of the University. Mr. Wilson Speaks On Very Vital Subject

"This shall render the name of the Lord thy God in vain," was the text of Mr. Wilson's address. The Senior Class of the University of Maine has been chosen to assist in the organization of the local chapter.

St. John's is the most profane. The man who has a self-assertion, but in a cheap way. The man who has a strong desire for self-expression. The man who has the desire for self-preservation, and, in particular, for the success of the carnival that he is attending.

Promises Excellent Games

The atmosphere of a real circus will be there as well as the soft drink vendor. The atmosphere of a real circus will be something that a real circus boasts. There will be a very valuable substitute. The atmosphere of a real circus will be something that a real circus boasts. There will be a very valuable substitute.

Swearing is entirely useless, stupid. The atmosphere of a real circus will be something that a real circus boasts. There will be a very valuable substitute. The atmosphere of a real circus will be something that a real circus boasts. There will be a very valuable substitute.

New Language Conference is Of Interest to All

A Conference of the faculty members of the Department of Latin at the University of Maine has been organized for the purpose of scholarly studies and reviews of recent contributions to Latin linguistics and literature. This conference was held in the Library on November 26. The meeting was called to order by Professor R. F. J. Dunlop from his post in a chair and the chairmen introduced a chapter dealing with the influence of the classics on modern literature. Professor Dunlop reviewed "Deutschland und seine Sprache," a wartime novel attacking German imperialism.

The next meeting of the Conference will be on December 11. Professor Kenney will speak on "The Rise of the Actor as a Type in French Drama," and Dr. L. S. Peed will discuss the work of a Russian Pioneer in Negro Dialect Poetry.

Maine Debating Team Chosen Monday Night

Monday night, December 2nd, the men who will represent the University of Maine in college debates will be chosen. The debate will be on the topic of odiousness. The debate will be held in the library and the judges will have a hard task.

A large crowd has assembled in the library, and the debate will be held. The debate will be held on the campus and the judges will have a hard task. The debate will be held in the library and the judges will have a hard task.

Students Debate the Future of College

The past semester saw the rise of new students and the establishment of a new college. The debate will be held on the campus and the judges will have a hard task. The debate will be held in the library and the judges will have a hard task.

Sigma Chi Entertain on Thanksgiving Eve

One of the prettiest parties of the season was held at the Sigma Chi House. The house was decorated with lights and the holiday spirit was in the air. The house was decorated with lights and the holiday spirit was in the air. The house was decorated with lights and the holiday spirit was in the air.

In the center of the room was a large wreath of evergreens, and the tables were set with silver and crystal. The house was decorated with lights and the holiday spirit was in the air. The house was decorated with lights and the holiday spirit was in the air.

The fraternity coeds, gold and blue, were also in the majority. Partners were chosen by matching number cards, and the group was joined by a few blue ribbons. The house was decorated with lights and the holiday spirit was in the air. The house was decorated with lights and the holiday spirit was in the air.

The elegantly dressed guests were seated in the Greek letters, X and a blue, and the season's holiday cheer was in the air. The house was decorated with lights and the holiday spirit was in the air. The house was decorated with lights and the holiday spirit was in the air.

Dr. C. V. Clark Speaks Before Latin Club

Under the auspices of the Sodalitas Latina, an illustrated lecture on "Home the Romance of the "Casus" by Charles V. Clark was given at Columbine Hall. The lecture was given at Columbine Hall.

The Sodalitas Latina is an organization formed last fall by the majors of Latin. The purpose of the organization is to provide for the furthering of the interest in Latin and other subjects for those who have completed the freshmen requirement.

The lecture by Dr. Clark is the first one of the year and the Sodalitas hopes to bring to the college the knowledge that has been completed as yet, and there are many fine men among them. There may be seen pictures of the famous Latin games, such as "Vadisi" and "The Last Days of Pompeii."
Mr. Wilson Speaks on Very Vital Subject

(Eng. 3, Rood Hall, Dec. 4.)

"English and shoes, and long, long shoes,"

were the words with which he began his talk yesterday afternoon in the English 3, Rood Hall. Mr. Wilson was very cool and quite well dressed.

It is a good thing to know that one's own college takes its work seriously. Old Glory is a part of the American heritage, and we should not wish to let it fade away in the glare of the sun's rays.

We have a very pleasant and interesting feature in connection with our college for the winter. A new flag has been purchased for the use of the University. The flag is not only an American flag, but it is also a symbol of our college activities.

The flag is to be presented to the college on the occasion of the annual meeting of the alumni association, which will be held at the end of the current semester. The flag will be flown over the main building during the meeting, and it will be a symbol of the college's pride in its historic place in the American educational system.

The flag is made of red, white, and blue, and it bears the college's name on a blue field. It is a fitting symbol of the college's spirit, and it will be a source of pride for all who are associated with it.

We are grateful to the alumni association for their generosity in providing this flag, and we hope that it will be a source of inspiration to all who see it. It is a reminder of our college's past, and it is a symbol of our college's future. We are proud of our college, and we hope that you will be proud of it as well. Amen.
MT. VERNON NOTES

Mrs. Estabrook spent the weekend with her son and wife, Mr. and Mrs. Carl B. Estabrook who are visiting in Bangor.

Mrs. Huddleston acted as matron last Saturday and Sunday at Mt. Vernon while Mrs. Estabrook was away visiting. Hormone Bryant spent the weekend with Elizabeth Lader.

Averil Peddy spent Thanksgiving in Portland.

Mrs. Estabrook gave a dinner party last Monday night in behalf of her son and wife. Those who were guests to the party were Mr. and Mrs. Carl B. Estabrook, Dr. and Mrs. Little, Dr. Calvin and Dr. and Mrs. Huddleston.

Mardi Wilby spent Thanksgiving at Bar Harbor.

Barrie Chains spent Thanksgiving with her father in Staton.

The following people are guests of Mrs. Estabrook for the Thanksgiving dinner: Mr. and Mrs. Counsel of Bangor, Mr. and Mrs. A. L. T. Cummings of Orono, and Mr. and Mrs. C. B. Estabrook of New York City.

Relay Squad Starts

Winter's Practice

The Relay Squad started practice Tuesday afternoon, December 5. A team will be picked from the squad to represent the University at the B. A. A. Relays in Boston which is held in February. Practice is held on the board track between Lord and Alumni Halls.

Captain "Ed" Kielkla, "Ned" Lawton, "Bert" Robert, and "Buck" Wilby will go among those to give the veterans some competition for places in the team.

A party of young people were guests of Eleanor Murray in Hampden for Thanksgiving.

The Quaker who made Chemistry a Science

AVENDISH had shown that two volumes of hydrogen and one of oxygen always combine completely to form water and nothing else. Proust, a Frenchman, had proved that natural and artificial carboneates of copper are always constant in composition.

"There must be some law in this," reasoned Dalton (1766-1844), the Quaker mathematician and school teacher. That law he proceeded to discover by weighing and measuring. He found that each element has a combining weight. To explain this, he evolved his atomic theory — the atoms of each element are all alike in size and weight; hence a combination can occur only in definite proportions.

Dalton's theory was published in 1804. In that same year, Napoleon made his brother, Joseph, king of Spain. This was considered a political event of tremendous importance. But Joseph left no lasting impression, while Dalton, by his discovery, elevated chemistry from a mass of unclassified observations and recipes into a science.

Modern scientists have gone beyond Dalton. They have found the atom to be composed of electrons, minute electrical particles. In the Research Laboratories of the General Electric Company much has been done to make this theory practically useful so that chemists can actually predict the physical, chemical and electrical properties of compounds yet undiscovered.

The world of science is a flowing stream of new ideas that are confirmed, or refuted when tested in the laboratory. Dalton's work, for example, was confirmed years later when Mendel, father of modern genetics, explained the working of heredity by means of his "laws of heredity."

The work of General Electric research laboratories is essential to the progress of industry, and to the improvement of the human condition. The results of this work are used in the manufacture of the thousands of products the General Electric Company makes for its customers.

In the General Electric Research Laboratories, the best of the best in every field of science and engineering is working together to advance the progress of mankind. The General Electric Company is a world-wide organization with manufacturing plants in 16 countries.

In 1902, the General Electric Company made the world's first successful commercial electric light bulb, and has continued to lead the way in the development of electric lighting ever since. Today, General Electric is the world's largest manufacturer of electric lighting products.

The General Electric Company is a leader in the development and manufacture of a wide range of products and services, including power generation, power transmission and distribution, gas turbines, steam turbines, engines, gas engines, aircraft engines, electric motors, generators, and industrial controls.
