MAINE TRACK MEN SECOND IN STATE

Bowedin Excels in Second and Third Places, but Maine Secures Her Share of Firsts. Rain Prevents Superior Work

DOPE UPSET IN SEVERAL CASES

Bowedin College won the State Meet on Alumni Field last Saturday, May 12, by a good margin, taking more points than all the other colleges put together. Rain prevented the running of the jumps, but many seconds and thirds placed Bowedin far ahead.

Although drizzling rain which fell all day were run off. The track was wet and muddy. However, it was a brave scribe for the jumpers, as the take-offs were very soft. The final score of the meet was—Bowdoin, 61; Maine, 37; Bates, 23; and Colby, 13.

MAINE LOSES TO N. H. University Nine 12-6

The University of New Hampshire, coming from the Maine 12 to 9 at Durham, N. H., May 8 at Thompson and Bove, the Maine matadors, were hard hit for seventeen safeties, while Garvan, the New Hampshire righthander, handled Maine's 10 hits well scattered until the final innings of the game, when he was ulti-

The banquet in honor of Colonel Tiltinghast was held in the Alumni Hall Friday, May 30th. President Harding wrote to Col. Tiltinghast, Huston, Commander-in-Chief of the V. F. W., as follows:

"...Ad was small, they made up in spirit to live with her. All the neighbors were sorry when she died."

The play centers around Miss Ells, a pretty, working lady, who has returned after a long leave of absence. When her husband returned from the war, she found the home in a state of utter confusion. The neighbors, and the Maine ace, pitched a driving game, getting 11 strikeouts in the latter half of the second inning. This was the start of Maine's 10 hits well scattered until the final innings of the game, when they were eliminated by the fast sprinting of Tim McGreal s-4 1 1 1 if finish with a timing of only 4.37 flat.

On to the New Englands

With the New England Tour, including the game scheduled for next Saturday, we should not allow our enthusiasm to be dampened by last week's defeat.

The surprise of the evening was the announcement of the Maine Cup, which had been awarded to the winning team. The Maine Cup is a prestigious award given annually to the team that wins the most games in the New England Tour.

During the four years that he has been here Major James has made a name for himself for his hard work and square dealings. Under him the R.O.C.T. has been modeled into an excellent military unit. Many new ideas have been insti-
tuted during his tenure, and the team has grown rather than decreasing.

Speaking more directly of newspaper work, he said that the publicity in the public eye has also increased during that period, and that at the present time the newsroom is almost doubled compared to outside pages. He said that interest in writing is growing rather than decreasing.

After the meeting, many of the students and faculty gathered in the Quad to celebrate the end of the academic year. The band played music, and cake and punch were served. The event was a great success and a fitting end to the academic year.

The University of Engineering

Of all the things that go to make the successful engineer, none is more important, nor more in step with the spirit of the profession, than a studious attitude. One man says about another—"he is always willing to learn," "he doesn't think he knows it all"—and he intends to pay a high compliment when he says it.

The great engineers are always at school, always learning, always seeking for more knowledge. They begin with this desire for fuller understanding, and they keep it up to the end.

Any engineering operation, over and above the primary purpose for which it is carried out, is an active and post-graduate class in engineering, also. So that Westinghouse, or any other great business, is, of its very nature, a University where theory and practice combine to make bigger, broader and more practical engineers.

The courses in this University are not limited to prescribed subjects nor terms—the subjects are almost infinite, and the semesters are endless. Men with the weight of years on their shoulders work and learn side-by-side with those whose day has just dawned.

This post-graduate school fits men for almost anything. Fits them for it, and makes them continually fitter. Out of this continuing fitness have grown the engineering accomplishments on which this institution has grown. It is, perhaps, one of the great educational institutions of its day.
