MAINE READY FOR HER THIRD ANNUAL WINTER CARNIVAL

Thick Blanket of Snow Insures Success of Sports

With a thick blanket of snow on the ground, Maine is ready for her third annual Winter Carnival. The heavy downfall of Tuesday night insured the success of the snowshoe and skiing events.

Thursday evening at 7 o'clock Lora Jean Carlisle and Jimmie Bourke present their fancy skating acts on Alumni Rink. These entertainers have won laurels throughout New England and Canada with their whirlwind stunts and expect to give the Maine audience a treat. After this the band will lead the procession to Alumni Hall where "Cappy Ricks" will be presented by the Masque and Domino. This is a comedy in three acts adapted from the story by Peter B. Kyne and is supported by a cast of experienced players. It is under the direction of Harold Moon, whose productions have been enjoyed by Maine audiences before.

Friday morning the trials will be held for the field and intercollegiate events of Saturday. Captain Patten of the Winter Sports team suggests that everyone who has entered should be sure to be out, as the inexperienced man is almost on equal footing with the veterans who were unable to develop form because of weather conditions. With the taste of the Boston University victory still with them, the hockey men hope to clean up the rink with Bowdoin in the afternoon. Both teams are in good shape and Bowdoin is still smarting under the football defeat, so a fast game can be expected.

Saturday morning there will be faculty and undergraduate competition in the following events:

Faculty Race.....100 yards
Snow Shoe Dash (Men).....100 yards
Snow Shoe Dash (Women).....75 yards
Half Mile Snow Shoe Race.....9 (invitation)

Quarter Mile Snow Shoe Race
Obstacle Race (Men)
Obstacle Race (Women)
Fraternity Relay.....800 yards
Girls' Dormitory Relay.....400 yards
Ski Joring

First, second, and third prizes will be awarded in every event except the Team Races. The Invitation Events are open to the general public as well as the student body. Ski jumping will be according to Montreal rules.

In the afternoon there will be intercollegiate competition between Maine, Bowdoin, Bates, and Colby. It is predicted that no records will be established, but there will be keen competition as all teams are laboring under the same handicap of a mild winter. Snow is being

(Continued on Page Three)

Work on Arts Building Halted by Cold Weather

All work on the Building of Arts and Sciences has been discontinued for the duration of the winter, but will be resumed on March 1, or as soon thereafter as the weather will permit. Thanks to the mild weather, little time has been lost on account of coldness or snow. The casting of the concrete for the foundations was held up for some time, owing to the unexpected amount of digging required to reach a firm bottom on which to rest the walls. In the southeastern corner of the building site, workmen had to dig 25 feet.

Despite this difficulty, the work has progressed rapidly. The foundation walls have been cast, the pipes for water, sewage, and drainage have been laid, and the greater part of the building materials have been hauled onto the grounds and stored. The steel forms over which the concrete for the first floor will be poured have been put in place and the piping for the basement electric fixtures has been installed. The new building will be ready for use by September 1.

B. B. TEAM LOSES HARD, FAST GAME

The basketball team lost to the University of New Hampshire last Friday night, 42-26, in a fast, rough game at Alumni Hall before a large crowd. The Durham five proved the better team and led the Bears the entire game.

Captain Metcalf was the star for the husky New Hampshire five, obtaining seven goals in the last half. Fernald and Nicord played nice basketball, the former proving a wizard for long shots.

Captain Berg and Horsman were the outstanding players for Maine, with clever passing and dribbling. Newell in the first half and Lake in the second half were the point gainers.

Draper and Willard Speak in Aroostook

Dr. John W. Draper, Associate Professor of English, addressed the English section of the Aroostook County Teachers' Convention at Fairfield on Jan. 25.

In his talk, Dr. Draper emphasized the importance of grammar to all high school students regardless of intended vocation or further education. He stated that in order to obtain real results, it is essential that themes shall be not only written but corrected and revised by the student, as this is the only way of pointing out individual errors. The speaker asserted that English teachers as a rule are not allowed sufficient time for the proper reading and correction of themes.

To support this contention that students receive insufficient education in grammar, Dr. Draper cited some results of the Freshman Week examinations in English at this University. When asked: "Have your parents ever corrected your grammar?" a common reply was: "They kept us from swearing."

The discussion following the meeting showed a decidedly favorable attitude on the part of the teachers toward Dr. Draper's viewpoint.

Professor H. R. Willard, head of the department of mathematics, spoke before the mathematics section of the same convention. The subject of the lecture was "How Shall We Grade Our Students?" In his talk Professor Willard emphasized the fundamental facts concerning the application of the Normal Frequency curve.

The speaker said that altho this system is gaining popularity all over the country in common schools, it should not be used in ranking classes unless in the case of a very large number of students. He gave data to prove that the curve was not applicable to small classes.

Professor Willard says that he had ample opportunity to appreciate typical winter weather in Aroostook. Six inches of snow fell during his trip, accompanied by very "little" temperature. He also says that he never in his life was any nearer to having cold feet.

Order of the Temple

The first annual banquet of the Order of the Temple will be held at the Bangor House, February 15. A. J. Conti Jr., will act as the toastmaster. The principal speakers of the evening are Rev. Ashley Smith of Bangor and Prof. Toelle.

"BIG THREE" WILL TEACH ATHLETICS AT SUMMER SCHOOL

Brice, Kanaly, and Murphy Engaged to Lecture on Sports

A complete course in Physical Education and Athletic Coaching will be given at the next University of Maine Summer School under the direction of Maine's three head coaches, Prof. Fred C. Brice of football, Prof. Frank M. Kanaly of track, and Prof. Joseph T. Murphy of baseball and basketball.

Realizing the fact that the average individual does not wish to spend the entire summer in this work, the courses offered will be condensed into two weeks' time, from June 30 to July 12. The schedule of the courses will enable the student to enroll in any one course or in all the courses offered. Approximately eight hours each day will be devoted to the work. The theory will be given in the morning and the practice work in the afternoon.

FOOTBALL

A complete course of inside football with stress on fundamentals will be given by Head Coach Brice. The following points will be taken up and discussed in detail, and practical demonstration will be given on Alumni Field.

Pre-season training, equipment, fundamentals, individual position play, team play, offensive formations, defensive formations, field tactics, field strategy, treatment of injuries, scouting and schedule making, rule discussions and officiating.

TRACK

The track and field coaching under Head Coach Kanaly will consist of coaching and training for all fifteen events of the interscholastic and intercollegiate program. Lectures upon the theory of coaching and training will take place in the morning and practical work upon the athletic field in the afternoon.

BASEBALL

Head Coach "Cuddy" Murphy will be in charge of baseball. This course will cover every position thoroughly with particular attention given to the pitcher and catcher. The best type of play for secondary schools will be lectured upon. Practical demonstration will be given on Alumni Field.

(Continued on Page Four)

INVITE SUGGESTIONS FOR CHAPEL SERVICE

Committee Asks for Cooperation of the Student Body

Suggestions for revising the order of exercises in chapel will be welcomed by the chapel committee, according to the chairman, Prof. H. D. Carrington. That the committee is dissatisfied with the singing of students appears from the following letter:

To the Editor of The Campus:

Dear Sir:

The recent appeal of one of our Chapel Leaders for a different attitude toward the Chapel Service has brought the whole question squarely before the student body, and the Committee asks this body for its assistance in solving the problem thus presented.

The members of the present Junior and Senior Classes will remember that two years ago, between the administrations of President Ale and President Little, the suggestion came to us through the Trustees and Alumni of the University that the reestablishment of some form of Chapel Service would do much to unite the four classes and revive the Maine Spirit, which, in the opinion of these gentlemen, was lying at death's door.

The proposition was discussed by students and faculty and the final decision left to the Class of 1922, who voted in favor of such a service. Judging by the articles that appeared at that time in the columns of *The Campus*, the general sentiment was that 1922 had made a wise decision and that it was now the

(Continued on Page Four)

HOCKEY TEAM SHOWS ITS METTLE TO B. U.

Friday afternoon Captain Elliot led the hockey team to a most glorious victory over Boston University. The ice, weather and the men themselves were in fine condition for one of the best games that has ever been played on the Maine rink.

Drew Stearns, playing his first game of the season, made up for all the time he has lost. It seemed that he was everywhere on the ice and not far behind him was Stover.

Baxter filled his position at goal in his usual good form. At times he was a target for a literal shower of pucks, but only two of them got thru. During the second period a B. U. player rushed Baxter in order to get the puck into the goal. Baxter received a severe blow on the head when his head and the ice came together as a result of the rushing, but he was not hurt enough to leave the game.

Maine took a 2 to 0 lead in the first period and then B. U. tied the score in the second period. In the third period the two teams played one another to a standstill. Then Maine seemed to run away with the puck and from that time until the final whistle blew they had everything their own way. Maine scored two goals in rapid succession in this period.

MAINE (4) (2) B. U.

Junior "Mechanicals" Acquire a New Lathe

The Junior "Mechanicals" have been made happy by the addition of a new Hartness Flat Turret Lathe. This is the first new piece of equipment of any great value the department has received since the war, and they surely needed it.

The lathe is a huge machine occupying 55 square feet of floor space, and is equipped for both bar and chuck work. It handles a bar 2 1/4 x 24 inches and will do chuck work up to 14 inches swing capacity. It is the very latest and best model obtainable, and has many new features. Probably its greatest advantage lies in the invention of a "cross sliding head." This allows many more working positions than ordinarily possible.

The operation is practically automatic, and the machine will turn out work with amazing speed and precision. There are nine speeds, nine feeds, and six tools can be used at once. An adjustable oil pump supplies a steady flow of oil over the work.

The new turret lathe is the product of the Jones, Lamson Company of Springfield, Vt. They very kindly sent a representative, Mr. Young, who attended to the proper setting up of the machine, and gave a thorough demonstration of its use and possibilities.

The Department of Mechanical Engineering hopes to add regularly to their equipment from year to year now. With the new lathe they will be enabled to save a large sum by making their own bolts and machine screws in the future.

Sequel to Carnival

The executive officers of the Band and Table will hold open house for the men and women students of the University of Maine, as a wind-up for the Winter Carnival, on Sunday, Feb. 10 from 3:00 to 5:00. It is hoped that many of the students will respond and visit as many of the houses as possible within the hours designated.

The following homes will be open:
Mrs. C. C. Little, Campus
Mrs. L. J. Pollard, 12 Park Street
Mrs. Mark Bailey, 35 Oak Street
Mrs. H. W. Smith, College Road
Dean Colvin, University Inn

DEBATING SCHEDULE TO BE CARRIED OUT, SAYS PROF. BAILEY

Action of Quitting Orators Characterized as a "Scheme"

The threatened disruption of the University of Maine debating team, reported a bit prematurely in the Portland Press Herald of Feb. 4, will not take effect. Despite the withdrawal of Edward M. Curran and John Behringer, debates on the World Court will be held as scheduled, according to Prof. Mark Bailey of the department of public speaking.

Behringer and Curran withdrew, they say, after the faculty refused a request that they be granted two hours of scholastic credit as a reward for their forensic activities. That amount of credit was promised, Prof. Bailey says, with the stipulation that they do a certain amount of outside reading and make certain reports. In most college courses giving credit, outside reading and regular reports are required.

"These men had a scheme to get thru," Prof. Bailey said to the *Campus* reporter, "and it is a good thing for debating that they have got out. Their action will have no effect on the schedule."

Both students and faculty members feel that the Portland paper overestimated the news value of this action, as the following paragraph indicates:

"The action of the two leading debaters of the squad, Mr. Curran being captain of the debating team and president of the debating society, brings the controversy, waged for several days, to a head, and has created comment and excitement about the campus second only to that which would be brought about by the withdrawal from an athletic team of two star performers on the even of a great battle."

PLENTY OF SUBSTITUTES

Seven men are available to take the places of Behringer and Curran, it was announced Tuesday by Harrison L. Richardson, manager of debating. These men are Theodore Hatch '24; H. L. Richardson '24; Robert Haskell '25; Stanley Hyde '25; John McCobb '25; Chester Cambell '25, and Albert A. Rights '27. Charles G. H. Evans '27 is sure of a position on one of the teams.

The following schedule is to be carried out:

Feb. 14 Triangular debate with the University of New Hampshire and Rhode Island State College. Maine's affirmative team is to debate with Rhode Island State at Kingston, R. I. and the negative team is to debate New Hampshire University in Alumni Hall.

Feb. 15 Maine's Negative team vs. College of the City of New York at New York City.

Feb. 16 Maine's Negative team vs. Clark University at Worcester, Mass.

Feb. 18 Maine's affirmative team vs. M. A. C. at Amherst, Mass.

Feb. 19 Maine's affirmative team vs. Boston University at Boston.

Debates with Colby and the University of Vermont are pending.

In all of the contests the issue will be: Resolved that the United States should join the World Court of Justice.

Madame Parcher, S.A.E. Matron, Seriously Ill

Madame Parcher, matron of the S. A. E. house, remains in a very critical condition as a result of a shock which she suffered on Saturday morning, January 5. There has been no marked improvement although she has regained consciousness and speech. This is Madame's 19th year as matron of S. A. E. and it was her dearest wish to make her stay an even 20. She is so beloved by all her "boys" that news of her illness has brought to her from all parts of the country endless letters and messages of anxiety, inquiry and hope of speedy recovery.

All the co-eds who remained in Balentine over the week-end enjoyed a welcome respite from study. Alarm clocks were allowed to run down.

Profit by Mistakes

It is to be hoped that the New Year's resolutions, which the *Campus* advocated the first of the year, lasted thru finals and stood everyone in good stead. Now, with the beginning of a new semester, is an excellent time to make some new resolutions for the rest of the year.

Looking back over the past semester it must be that we can all see where we have made mistakes, or could have done better than we did. Regarding studies, practically everyone can find a chance for improvement. Most of us studied too little. We may as well admit it honestly, now that the ranks have gone in. Yet for all that our purpose in attending the University is to gain an education. Many, far far too many, lose sight of that fact and neglect their studies. Those who do not study regret it when finals overtake them, but those who have gone before tell them that greater will be their regret when life's problems find them unprepared.

So let us dig right into our studies and learn our lessons day by day, profiting by our mistakes of last semester and by the advice of others.

Be Active

Having decided to be good students from now on, let us turn our attention to college activities, which warrant their place in college life for being schools of character. Thru participation in activities students acquire determination, endurance, self-confidence, judgment, sportsmanship and many other points of character too numerous to mention. They also learn that work can accomplish much, yet little can be accomplished without work. The student who enters into the life of the University gains more than can well be told. But the student who does not enter in loses more than he ever realizes. Every student who desires to get the full benefit of his college education should enter one or more activities, be it athletics, dramatics, debating, college journalism, the musical clubs, or anything else.

It may sound contradictory to advocate both studying harder and being more active on the same page, but in reality the two things are not incompatible. Altho many students do not consider that they have time for both, yet they waste a great deal of time. If time is well apportioned one can do much more than he realizes.

However, no student should attempt to carry too many activities at the same time. Judgment should be used in deciding the amount of time one can afford to devote to activities, or studies will suffer.

There is always an opportunity in activities for one who cares to try. Before the semester is farther advanced, is the best time to become active. Choose your preferred branch and go to work at it now. It means hard work to study diligently and to be active at the same time, but it can well be done, as good men have proven, and the reward is well worth the effort.

Winter Carnival

University of Maine celebrates its third annual Winter Carnival this week.

The faculty has granted Friday as a holiday in order that the week-end may better be given over to enjoyment of the events. This is the gala occasion of the winter season, and should be entered into as such by all. The program that has been arranged appears to be excellent. Everyone can find enjoyment to suit his or her own taste. Some parts are more attractive to some people than others, but on the whole the program is one to appeal to all. The success of the Carnival depends on the patronage it receives. Because of that fact it is essential that every Maine man, who desires to see the Carnival successfully carried out, should do his part to bring it about.

Disgruntled Debaters

The action of the public speaking department in regard to the resignation of two debaters merits the approval of the entire student body. When two men conceive the notion that they are essential to the success of any activity, and lay down the ultimatum that they will withdraw unless they are given greater academic credit for their participation, then it is time that a firm stand be taken upon the matter.

Dateless Nights

The men and women of the University of Wisconsin have come to an agreement that there shall be three "dateless" nights a week. This not only will be of a great financial benefit but is expected to raise the scholarship in general. If we of the University of Maine could come to such an agreement we might derive similar benefits. If the campus, as a whole, set aside three nights when no dates should be made a great deal of time and money could be saved. It's a good idea and well worth a little thought.

CORRESPONDENCE

Feb. 4, 1924

Mr. Edward Cutting,
Campus

Dear Mr. Cutting:

Will you endeavor to see that the following notice gets into this week's *Campus*?

There are a large number of student clubs and societies meeting in college buildings during the week. These meetings usually take place in the evening beginning at 7.00 or 7.30. Up until the present time the administrative officers have made no arrangements by which the students could sign for a committee or society room and be sure that other societies would not plan to meet in the same room.

It is true that a calendar has been kept for the chapel and gymnasium, but conflicts were entirely possible and have occurred in the use of rooms in Coburn, Fernald, etc.

In order to remedy this situation and to give the student societies assurance that they may meet without fear of interruption, it has been decided to place the different college buildings in charge of certain officers and individuals who will make the proper assignment, let out the key and guarantee that the room will be available without fear of conflict for the meeting.

The schedule of individuals and officers will be as follows:

Students wishing to hold a committee or fraternity meeting in Aubert Hall (Physics end,) Fernald, or Coburn apply to office of Dean Stevens.

Wingate Hall—office of Dean Boardman.

Winslow Hall—office of Dean Merrill

Alumni Hall—office of Registrar

Aubert Hall (Chemistry end)—Prof. Brautlecht

Estabrooke Hall—office of Prof. Ellis

Library—office of Mr. Walkley

Lord Hall—office of Prof. Barrows,

of Prof. W. J. Sweetser

This plan becomes effective immediately and fraternities and sororities which meet in college buildings should bear this in mind and secure keys beforehand.

Sincerely yours,
J. A. Gannett
Registrar

Orono, Maine

January 25, 1924

Editor, The Maine Campus

Dear Sir:

I would like to express through the *Campus* my appreciation of the assistance rendered by the student body of the three upper classes in filling out recommendation blanks for the Freshmen, as part of the Personnel System of the College of Technology. I feel that the

students have in nearly all cases given a careful estimate of their Freshman associates, and I know that a great measure of the success in the administration of the system thus far is due to this excellent co-operation.

Very truly yours,
W. J. Creamer Jr.

Regarding Coming Events

Editor of the Maine Campus

Campus

Dear Sir:

I beg to call your attention to the fact that the column of coming events in the *Campus* of Jan. 23, 1924 is somewhat out of date. In fact it is a whole year behind the time. The basketball events listed are a perfect copy of last year's schedule. Unfortunately this year's schedule is entirely different and it will be necessary to rectify the error by printing this year's schedule, a copy of which you will find enclosed.

Sincerely yours,

P. A. Harriman

Manager of Basketball

Feb. 6 Tufts at Medford
Feb. 8 New Hampshire at Durham
Feb. 9 Portland A. C. at Portland
Feb. 16 Fitchburg Normal at Orono
Feb. 21 Mass. Aggies at Amherst
Feb. 22 Worcester Polytech at Worcester

Feb. 23 Trinity at Hartford
Mar. 1 M. I. T. at Orono
Mar. 7 Trojan A. C. at St. Johns, N. B.
Mar. 8 Trojan A. C. at St. Johns, N. B.

Coming Carnivals

The first of the three Maine Inter-collegiate Winter Sport Carnivals will be held at the University of Maine February 7, 8 and 9. As yet there has been little chance to practice for the events, but now there is plenty of snow and the ski jump is in fine condition. There should be plenty of material out training so that there will be keen competition for the team and aid in winning the first of the three carnivals of inter-collegiate competition.

The next carnival will be at Auburn Feb. 14, 15 and 16 and the last will be at Augusta Feb. 21, 22 and 23. There will be eight competitors taken to these carnivals. Coach Brice will help all he can but he will not be able to do your running, so report to him, and all get together, putting Maine over-the-top in Winter Sports.

Technology Smoker

All members of the faculty and the students of the College of Technology are cordially invited to attend a smoker to be held at 7:30 P. M. in 30 Coburn Hall on Feb. 13, 1924, under the auspices of the Maine Sections of the American Chemical Society, the American Institute of Electrical Engineers, the American Society of Mechanical Engineers, and the American Society of Civil Engineers. Among the speakers of the evening will be Prof. Charles P. Weston and Prof. A. L. Grover. Prof. Grover will give his illustrated lecture on his Mt. Katahdin trips. Light refreshments will be served.

Math Club

At the meeting of the Mathematics Club held just before Christmas, Dean Hart spoke on the Recent Eclipses of the Sun. He told about the eclipses occurring in September, 1922 and in September, 1923. At this meeting the Club presented Dean Hart with a loose-leaf pocket note-book containing the autographs of the members of the Club and a ten-dollar gold piece.

Paul L. Bean of Auburn, a graduate of the University of Maine, has been elected agent of the Androscoggin Reservoir Company. Mr. Bean was formerly connected with the faculty in the civil engineering department, rising to the position of associate professor. In 1914, he became chief engineer of the Public Utilities Commission, where he remained until he became the assistant to Walter L. Sawyer, the former incumbent of the position of agent.

Charles Brockden Brown and Feminism by Miss Genevieve Violette and Progress in Phonetic Methods by Mr. C. F. Whitcomb were the lectures given before the Language Conference last week.

LESSONS IN DEBATING

given by E. Curran
at the University Store
Hours: 8 A. M.—5.30 P. M.

BALENTINE NOTES

Balentine co-eds spend their evenings in Hope Norwood's room listening to the stock market reports and the latest dance music from Cleveland, Philadelphia, Boston, Schenectady and Phi Kap. The freshmen are much absorbed in the bed-time stories. It has been broadcasted that Gee Priest has felt the loss of the radio more keenly than any Phi Eta.

Mrs. Munson, who has been ill with a cold, is now improving.

Dr. Little was a dinner guest at Balentine Thursday night.

Jane Bessey and Mollie Watt were dinner guests of Annette Lane at her home in Bangor Sunday.

Dorothy Dinsmore spent the week-end at her home in Machias.

Mary Friend was elected house president for the spring semester at the election held Wednesday night.

Mary Copeland spent the week-end at her home in Brewer.

Blanche De Coster spent the week-end at her home in Portland.

Mary Friend was the guest of Elizabeth Pendleton at her home in Bangor over the week-end.

Evening dresses are beginning to arrive for the Carnival Ball.

"Why damn you Sir, I'm Matt Pease-ly," thunders Matt at the awestricken "Cappy" Ricks. The whole three acts keep the audience on edge.

"The perfect
cream in the perfect container"

(This is the way one user describes Williams and the new Hinge-Cap)

Williams
Shaving
Cream

Men buy Williams expecting to find their main satisfaction in the Hinge-Cap. But when they first use the cream they get an equally pleasant surprise. The heavier lather, the greater thoroughness with which it softens the beard, make a hit at once. Then, Williams lather lubricates the skin so that the razor fairly "glides" the hairs off. And last, there's that delightful after-care of the skin. Truly, you'll find that with the Hinge-Cap Williams is "miles ahead." It's a pure cream without coloring matter of any kind.

\$250 in prizes

For the best sentence of ten words or less on the value of the Williams Hinge-Cap, we offer the following prizes: 1st prize \$100; 2nd prize \$50; two 3rd prizes, \$25 each; two 4th prizes, \$10 each; six 5th prizes, \$5 each. Any undergraduate or graduate student is eligible. If two or more persons submit identical slogans deemed worthy of prizes, the full amount of the prize will be awarded to each. Contest closes at midnight March 14, 1924. Winners will be announced as soon thereafter as possible. Submit any number of slogans but write on one side of paper only, putting name, address, college and class at top of each sheet. Address letters to Contest Editor, The J. B. Williams Co., Glastonbury, Conn.

ORIGINAL
MELACHRINO
"The One Cigarette Sold the World Over"

Something Happened in 1891

What
Engineering
Owes To
Sound
Principles

PERHAPS no phase of electrical development is more fascinating than the events leading up to the practical use of electricity as the motive power for street railway transportation.

It is a story of "midnight oil", hard thinking, extreme perseverance. No better example of the value of sound principles to present day engineering could be cited than the Westinghouse No. 3 Motor, as introduced in 1891.

Its design was so fundamentally correct and the details were so soundly worked out that subsequent developments of railway motors all followed the principles embodied in it. Now let's see what bearing this has had on modern transportation.

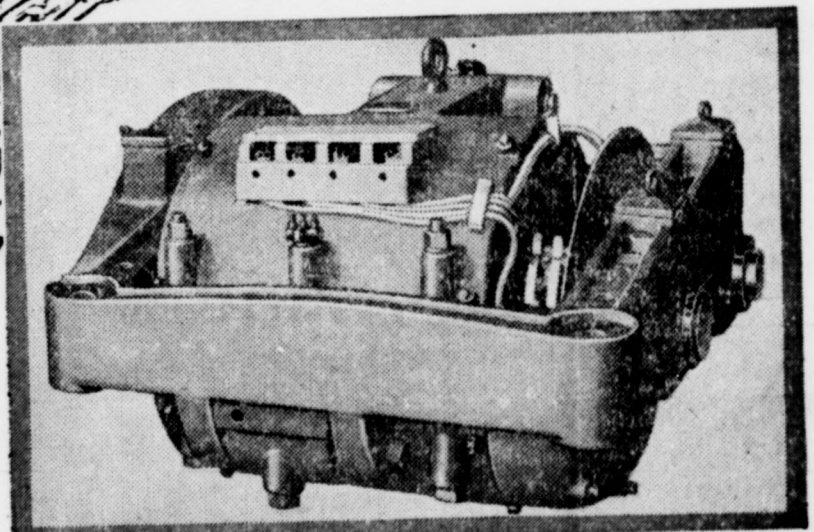

In 1700 the first permanently fixed rails made their appearance. In 1831, in New York, horse cars began operation. In 1834, after fruitless attempts to apply steam, compressed air, gas, etc., to these cars, a Vermont blacksmith, one Thomas Davenport, sug-

gested that electricity be used as the motive power.

The very first practical commercial dynamo, built by Gramme, in 1862, made this suggestion a possibility.

It was natural that George Westinghouse, with his intense interest in transportation, should take up this problem. From 1889 to 1891, he, with his organization, worked continuously to perfect a commercially practicable railway motor, and the famous No. 3, daddy of all street railway motors, was the result.

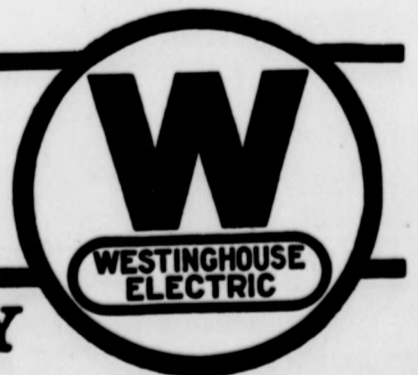

As mentioned before, the principles embodied in the No. 3, thirty-two years ago, are still in use, and at least ten prominent features of this remarkable motor are to be found in present-day types. A number of these early motors are still in operation—a tribute to sound engineering principles.

Westinghouse Motor, No. 3, the Progenitor of the Present Universally-Adopted D. C. Railway Motor.

Westinghouse

ACHIEVEMENT & OPPORTUNITY

Maine Ready for Her Third Annual Winter Carnival

(Continued from Page One)

hauled to the ski jump so as to make this event a possibility.

Competition between colleges will be in the following contests:

Snow Shoe Dash.....150 yards
Snow Shoe Cross Country.....3 miles
Ski Cross Country.....5 miles
Ski Jump
Ski Relay

The closing attractions of the Carnival will be the crowning of the queen and presentation of trophies in the gymnasium at 7:30 p.m., and the Open House Parties at 8:00 p.m. As an outgrowth of Visiting Week, a warmer welcome than ever is extended to the student body to call on the various houses at this time.

The carnival ball committee has secured one of the best orchestras in New England to play for the Carnival Ball. It will come direct to Maine from Hotel Bancroft, Worcester and the Copley Plaza, Boston. Other features will make the ball the biggest and best time of the year. There will be a special car to Bangor afterwards. Don't miss the biggest affair of the carnival!

Three University of Maine students gave reports last Sunday evening at the Grace M. E. Church in Bangor on the Student Volunteer Convention. Leona Reed, Austin Wilkins and McDonald spoke respectively about the Convention, the principal speakers and the personal benefits.

Invite Suggestions for Chapel Service

(Continued from Page One)

duty and privilege of the University to make the assembly a success.

Having assumed its share of responsibility, the student body has, in one respect at least, fulfilled its obligations. By its courteous attitude, it has made the task of those who have been called upon to appear before it a very pleasant one; but in other respects the spirit shown has been less admirable.

The members of the Chapel Committee who, by request, have undertaken to conduct the singing, have no personal grievance because of the fact that their efforts have not met with success; at the same time, they are unwilling to perform alone, since they were appointed to lead. The Committee would be glad to know the wishes of the students in the matter and also to cooperate with any of their representatives in working out a more acceptable order of exercises. Those who wish to assist in the solution of the problem can do so by putting their thoughts on paper and presenting them to *The Campus*.

The Committee has, to be sure, no power to make radical changes in the character of the chapel exercises; but any reasonable suggestions that originated with the students would be submitted to the proper authorities and would receive from them careful consideration.

Sincerely yours,

H. D. Carrington

Chairman of Chapel Committee

"Big Three" Will Teach Athletics at Summer School

(Continued from Page One)

BASKETBALL

Basketball, also under Coach Murphy, will cover in detail the various systems used in the leading colleges of both east and west. The difference between amateur and professional style of play will be covered by lecture. Other topics will be: History of basketball, equipment of players, training and condition, technique (passing, shooting, dribbling), defense (individual and team method), selection of plays, short pass, pivot pass, floor play, the long shot, the long pass attack, out of bounds play, plays from foul shot position, and tip off plays.

PHYSICAL EDUCATION

The physical education course will be given by Prof. Frank M. Kanaly, formerly in charge of physical education at Mass. Institute of Technology, during the two weeks' course. It will consist of exercise, schoolroom and gymnasium practice for high school and grade pupils. A complete course in graded calisthenics for one year. Playground games will be outlined. Gymnasium uniforms will be needed for this course.

The tuition for the courses will be thirty dollars. The student may elect to take any combination of courses offered, for the tuition will be the same for one course as for the total five.

J. F. Kaulfuss, formerly a member of the faculty of Civil Engineering at Maine, has recently been appointed full time professor of Highway Engineering at the Pennsylvania State College. Since leaving Maine Professor Kaulfuss has had excellent experience in Washington, North Dakota, and Chicago.

The co-eds suggest that Phi Kap and other neighboring broadcasting stations give a concert for their benefit.
